Volume 11250

Proceedings of SPIE, 1605-7422, V. 11250

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Speed Biomedical Imaging and Spectroscopy V*, edited by Kevin K. Tsia, Keisuke Goda, Proceedings of SPIE Vol. 11 250 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

iii	<i>Authors</i>
iv	<i>Conference Committee</i>

HIGH-THROUGHPUT MICROSCOPY

11250 0E	High-throughput and field-portable ptychographic lensless on-chip microscopy based on translated pattern modulation [11250-12]
----------	---

IMAGING FLOW CYTOMETRY

11250 0H	2D image-guided cell sorter and 3D imaging flow cytometer (Invited Paper) [11250-15]
11250 0J	Image-based cell sorting using artificial intelligence [11250-17]

HIGH-THROUGHPUT BIOLOGY

11250 0N	Probing the spatiotemporal dynamics of Ras-associated membrane nanodomains with high-throughput single particle tracking via photoactivated localization microscopy (spt-PALM) (Invited Paper) [11250-21]
11250 0P	High-speed label-free photoacoustic histopathology [11250-23]

HIGH-THROUGHPUT TECHNOLOGIES

11250 0Z	Acquiring fluorescence decay kinetic measurements with on-chip acoustic focusing cytometry (Invited Paper) [11250-33]
11250 12	Continuous high-resolution observation system using high-speed gaze and focus control with wide-angle triangulation [11250-36]
