2019 20th International Conference on Parallel and Distributed Computing, Applications and Technologies (PDCAT)

PDCAT 2019

Table of Contents

Message from the General Chairs xv
Message from the Program Committee Chairs xvi
Conference Organization xvii
Program Committee xviii
External Reviewers xx
Keynotes xxi
Sponsors xxv

Session 1A: Wireless Networks I

Min-Max Movement of Sink-Based Mobile Sensors in the Plane for Barrier Coverage 1
Wenjie Zou (Fuzhou University), Longkun Guo (Fuzhou University), and Peihuang Huang (Minjiang University)

Base Station Positioning in Single-Tiered Wireless Sensor Networks 7
Xinchen Li (Shenzhen University), Huan Cai (Shenzhen University), Gang Liu (Shenzhen University), and Kezhong Lu (Shenzhen University)

An Energy-Saving Routing Algorithm for Opportunity Networks Based on Sleeping Mode 13
Zhou Chunyue (Beijing Jiaotong University), Tian Hui (Griffith University), Dong Yaocong (Beijing Jiaotong University), and Zhong Baitong (Uniview)

A Timely VANET Multi-hop Routing Method in IoT 19
Maede Fotros (Azad University), Mohammad Mansour Riahi Kashani (Azad University), Javad Rezazadeh (Kent Institute Australia), and John Ayoade (Kent Institute Australia)

Session 1B: Parallel/Distributed Architectures

Parallel Tracking and Reconstruction of States in Heuristic Optimization Systems on GPUs 25
Marcel Köster (German Research Center for Artificial Intelligence), Julian Groß (German Research Center for Artificial Intelligence), and Antonio Krüger (German Research Center for Artificial Intelligence)

FPGA-Based Parallel Multi-Core GZIP Compressor in HDFS 31
Haoxin Luo (Shenzhen University), Ye Cai (Shenzhen university), Qiuming Luo (Shenzhen University), and Rui Mao (Shenzhen University)

GPU Parallel Acceleration of Frequency Domain Algorithm for Calculating Radar Target Echoes 36
Zhao Naixuan (University of Electronic Science and Technology of China), Zhang Ge (University of Electronic Science and Technology of China), Wang Zijian (University of Electronic Science and Technology of China), and Kuang Ling (University of Electronic Science and Technology of China)

Accelerating Alignment for Short Reads Allowing Insertion of Gaps on Multi-Core Cluster 41
Yongjie Yang (Guangxi University, Shanghai Rural Commercial Bank), Cheng Zhong (Guangxi University), and Danyang Chen (Guangxi University)

Session 1C: Scheduling and Resource Allocation

Real-Time Stream Data Processing at Scale 46
M. Reza HoseinyFarahabady (The University of Sydney), Ali Jannesari (Iowa State University), Wei Bao (The University of Sydney), Zahir Tari (RMIT University), and Albert Y. Zomaya (The University of Sydney)

I/O Scheduling for Limited-Size Burst-Buffers Deployed High Performance Computing 52
Benbo Zha (Sun Yat-Sen University) and Hong Shen (Sun Yat-Sen University, University of Adelaide)

Task Merging and Scheduling for Parallel Deep Learning Applications in Mobile Edge Computing 58
Xin Long (Guangdong University of Technology), Jigang Wu (Guangdong University of Technology), Yalan Wu (Guangdong University of Technology), and Long Chen (Guangdong University of Technology)

Coordinated and Hindsight Resources Allocation in Distributed Computing 63
Victor Toporkov (National Research University MPEi) and Dmitry Yemelyanov (National Research University MPEI)

Session 1D: Security and Privacy I

Plaintext Recovery Attacks and Their Mitigation in an Application-Specific SHE Scheme 69
Tikaram Sanyashi (IIT Bombay), Anasuya Acharya (IIT Bombay), and Bernard Menezes (IIT Bombay)

Finite Approximate Consensus for Privacy in Distributed Sensor Networks 75
Matt O'Connor (Victoria University of Wellington) and W. Bastiaan Kleijn (Victoria University of Wellington)

Modeling Data Transmission in Mobile Ad-hoc Networks for Characterizing Black-Hole Attacks 78
Mnar Saeed Alnaghes (The University of Adelaide) and Hong Shen (Sun Yat-sen University)

Privacy Preservation for Network Traffic Classification 87
Yue Lu (Beijing Jiaotong University), Hui Tian (Griffith University), and Jingjing Yu (Beijing Jiaotong University)

Session 2A: Wireless Networks II

D2D-Assisted Computation Offloading for Mobile Edge Computing Systems with Energy Harvesting 93
Molin Li (Tianjin University), Tong Chen (Tianjin University), Jiaxin Zeng (Tianjin University), Xiaobo Zhou (Tianjin University), Keqiu Li (Tianjin University), and Heng Qi (Dalian University of Technology)

Ultra Reliable Communication : Availability Analysis in 5G Cellular Networks .99
Yosra Benchaabene (National Engineering Schcool of Gabes), Noureddine Boujnah (Faculty of Sciences of Gabes, Tunisia TSSG-Waterford Institute of Technology), and Faouzi Zarai (National School of Electronics and Telecommunications of Sfax)

Adaptive Clustering Strategy Based on Capacity Weight .106
Xingchun Liu (Beijing Jiaotong University), Zhipeng Feng (Beijing Jiaotong University), Jingjing Yu (Beijing Jiaotong University), Ying Tao (China Academy of Space Technology), and Shubo Ren (China Academy of Space Technology)

Low-Energy Dynamic Clustering Scheme for Wireless Sensor Networks .112
Wenqi Zhang (Beijing Jiaotong University), Jingjing Yu (Beijing Jiaotong University), Xingchun Liu (Beijing Jiaotong University), Ying Tao (China Academy of Space Technology), and Shubo Ren (China Academy of Space Technology)

Session 2B: High-Performance Scientific Computing

Implementing the Matrix Multiplication with DFC on Kunlun Small Scale Computer .118
Zheng Du (Tsinghua University), Jing Zhang (Shenzhen University), Shihao Sha (Shenzhen University), and Qiuming Luo (Shenzhen University)

Accelerating Conjugate Gradient using OmpSs .124
Sandra Catalán (Barcelona Supercomputing Center), Xavier Martorell (Universitat Politècnica de Catalunya), Jesús Labarta (Universitat Politècnica de Catalunya), Tetsuzo Usui (Fujitsu Limited), Leonel Antonio Toledo Díaz (Barcelona Supercomputing Center), and Pedro Valero-Lara (Barcelona Supercomputing Center)

Tasking in Accelerators: Performance Evaluation .130
Leonel Toledo (Barcelona Supercomputing Center), Antonio J. Peña (Barcelona Supercomputing Center), Sandra Catalán (Barcelona Supercomputing Center), and Pedro Valero-Lara (Barcelona Supercomputing Center)

Adaptive Power Reallocation for Value-Oriented Schedulers in Power-Constrained HPC .136
Nirmal Kumbhare (The University of Arizona), Aniruddha Marathe (Lawrence Livermore National Laboratory), Ali Akoglu (The University of Arizona), Salim Hariri (The University of Arizona), and Ghaleb Abdulla (Lawrence Livermore National Laboratory)

Session 2C: Security and Privacy II

Research on Differential Privacy for Medical Health Big Data Processing .143
Yugu Hu (Guangxi University for Nationalities), Lina Ge (Guangxi University for Nationalities), Guifen Zhang (Guangxi University for Nationalities), and Donghong Qin (Guangxi University for Nationalities)

Quantifying the Impact of Design Strategies for Big Data Cyber Security Analytics: An Empirical Investigation .149
Faheem Ullah (The University of Adelaide) and M. Ali Babar (The University of Adelaide)

A Hybrid Trust Management Model for Secure and Resource Efficient Vehicular Ad hoc Networks .157
Adnan Mahmood (Macquarie University), Sarah Ali Siddiqui (Macquarie University), Wei Emma Zhang (Macquarie University, The University of Adelaide), and Quan Z. Sheng (Macquarie University)

Scalable Anomaly Detection Method for Blockchain Transactions using GPU .163
Shin Morishima (Toyama Prefectural University)

Session 2D: Quantum Computing

Fault-Tolerant Logical Hadamard Gates Implementation in Reed-Muller Quantum Codes .169
DongXiao Quan (Xidian University), Li Niu (Xidian University), LiLi Zhu (Xidian University), and ChangXing Pei (Xidian University)

Efficient Fault-Tolerant Syndrome Measurement of Quantum Error-Correcting Codes Based on "Flag" .176
QiFei Wei (Xidian University), DongXiao Quan (Xidian University), Jing Liu (Xidian University), and ChangXing Pei (Xidian University)

Faithful Multi-Hop Qubit Transmission Based on GHZ States .182
Na Chen (Shandong University of Science and Technology), Bin Yan (Shandong University of Science and Technology), Shuangshuang Shuai (Shandong University of Science and Technology), and Changxing Pei (Xidian University)

Peering Into the Anneal Process of a Quantum Annealer .187
Elijah Pelofske (Los Alamos National Laboratory), Georg Hahn (Harvard University), and Hristo Djidjev (Los Alamos National Laboratory)

Session 3A: Algorithms I

A Virtual Machine Placement Algorithm Combining NSGA-II and Bin-Packing Heuristic .193
Wenting Wei (Xidian University), Kun Wang (Xidian University), Kexin Wang (Xidian University), Shengjun Guo (Xidian University), and Huaxi Gu (Xidian University)

New Parallel Algorithms for All Pairwise Computation on Large HPC Clusters .199
Tao Tang (University of Technology Sydney), Hao Wu (University of Sydney), Wei Bao (University of Sydney), Pengyi Yang (University of Sydney), Dong Yuan (University of Sydney), and Bing Bing Zhou (University of Sydney)

A Holistic Stream Partitioning Algorithm for Distributed Stream Processing Systems .205
Kejian Li (Shenzhen University), Gang Liu (Shenzhen University), and Minhua Lu (Shenzhen University)

Acceleration of Genetic Algorithm on GPU CUDA Platform .211
Dylan Matthew Janssen (Griffith University) and Alan Wee-Chung Liew (Griffith University)

Session 3B: Security and Privacy III

An Economical and High-Quality Encryption Scheme for Cloud Servers with GPUs .217
Xiongwei Fei (Hunan University), KenLi Li (Hunan Univerisity), Shui Yu (University of Technology Sydney), and Keqin Li (State University of New York)

DOCKERANALYZER : Towards Fine Grained Resource Elasticity for Microservices-Based Applications Deployed with Docker 223
Mohamed Hedi Fourati (ReDCAD Laboratory Sfax), Soumaya Marzouk (ReDCAD Laboratory Sfax), Khalil Drira (LAAS CNRS), and Mohamed Jmaiel (Digital Research Center)

CAAVI-RICS Model for Analyzing the Security of Fog Computing Systems: Authentication 229
Saša Pesic (University of Novi Sad), Miloš Radovanovic (University of Novi Sad), Mirjana Ivanovic (University of Novi Sad), Costin Badica (University of Craiova), Milenko Tošic (VizLore Labs Foundation), Ognjen Ikovic (VizLore Labs Foundation), and Dragan Boškovic (VizLore Labs Foundation)

Protecting Sensitive Location Visits Against Inference Attacks in Trajectory Publishing 235
Xiangyu Liu (Wellington Institute of Technology), Manish Singh (Wellington Institute of Technology), and Xiufeng Xia (Shenyang Aerospace University)

Session 3C: Machine Learning and Data Mining I

Outlier Removal for the Reliable Condition Monitoring of Telecommunication Services 243
Günter Fahrnberger (University of Hagen)

Machine Learning Based Performance Analysis and Prediction of Jobs on a HPC Cluster 250
Zhengxiong Hou (Northwestern Polytechnical University), Shuxin Zhao (Northwestern Polytechnical University), Chao Yin (Northwestern Polytechnical University), Yunlan Wang (Northwestern Polytechnical University), Jianhua Gu (Northwestern Polytechnical University), and Xingshe Zhou (Northwestern Polytechnical University)

Research on Case Preprocessing Based on Bert -CNN-LSTM Model 256
Chuyue Zhang (People's Public Security University of China), Manchun Cai (People's Public Security University of China), and Xiaofan Zhao (People's Public Security University of China)

Hybrid Model Featuring CNN and LSTM Architecture for Human Activity Recognition on Smartphone Sensor Data 262
Samundra Deep (Macquarie University) and Xi Zheng (Macquarie University)

Session 3D: Software Tools I

The Library for Hadoop Deflate Compression Based on FPGA Accelerator with Load Balance 268
Haixin Du (Shenzhen University), Jiankui Zhang (Shenzhen University), Shihao Sha (Shenzhen University), Cai Ye (Shenzhen University), and Qiuming Luo (Shenzhen University)

Introducing PulseAT: A Tool for Analyzing System Utilization in Distributed Systems 274
Uwe Jahn (Dortmund University of Applied Sciences and Arts), Vladimir Poliakov (Dortmund University of Applied Sciences and Arts), Meghadoot Gardi (Dortmund University of Applied Sciences and Arts), Peter Schulz (Dortmund University of Applied Sciences and Arts), and Carsten Wolff (Dortmund University of Applied Sciences and Arts)

Development of Filled Circle Drawing in High-Level Synthesis Oriented Game Programming Library 280
Yuki Yamagata (Kyushu Institute of Technology) and Akira Yamawaki (Kyushu Institute of Technology)

An OpenCL-Like Offload Programming Framework for SX-Aurora TSUBASA 285
Hiroyuki Takizawa (Tohoku University), Shinji Shiotsuki (Tohoku University), Naoki Ebata (Tohoku University), and Ryusuke Egawa (Tohoku University)

Session 4A: Algorithms II

Concurrent Failure Recovery for Product Matrix Regenerating Code 292
Jingyao Zhang (Here Data Technology)

Scalability of Parareal for Large Power Grid Simulations 298
Francis C Joseph (Indian Institute of Science) and Gurunath Gurrala (Indian Institute of Science)

Improving Recommender Systems Accuracy in Social Networks Using Popularity 304
Kasra Majbouri Yazdi (Deakin University), Adel Majbouri Yazdi (Kharazmi University), Saeed Khodayi (Azad University), Jingyu Hou (Deakin University), Wanlei Zhou (University of Technology Sydney), Saeid Saedy (Khavaran Higher Education Institute), and Mehrdad Rostami (University of Kurdistan)

A Distributed Genetic Algorithm with Adaptive Diversity Maintenance for Ordered Problems 311
Ryoma Ohira (Griffith University) and Md. Saiful Islam (Griffith University)

Session 4B: Software Systems and Technologies

A Model Driven-Based Approach for Managing Unanticipated Runtime Adaptation of RTE Systems 317
Nissaf Fredj (University of Sousse), Yessine Hadj Kacem (University of Sfax), and Mohamed Abid (University of Sfax)

SMT Solvers as Efficient Tools for Automatic Time Properties Verification of Security Protocols 323
Agnieszka M. Zbrzezny (University of Warmia and Mazury in Olsztyn), Olga Siedlecka-Lamch (Czestochowa University of Technology), Sabina Szymoniak (Czestochowa University of Technology), and Mirosław Kurkowski (Cardinal St. Wyszynski University)

A Scalable Parallel Computing Framework for Large-Scale Astrophysical Fluid Dynamics Numerical Simulation 331
Igor Kulikov (ICMMG SB RAS), Igor Chernykh (ICMMG SB RAS), and Andrei Tchernykh (CICESE Research Center)

TrustZone for Supervised Asymmetric Multiprocessing Systems 337
Mahdi Amiri-Kordestani (University of Otago), David Eyers (University of Otago), Zhiyi Huang (University of Otago), and Morteza Biglari-Abhari (University of Auckland)

Session 4C: Machine Learning and Data Mining II

RNC: Reliable Network Property Classifier Based on Graph Embedding 343
Hao Liao (Shenzhen University), Qixin Liu (Shenzhen University), Alexandre Vidmer (Shenzhen University), Mingyang Zhou (Shenzhen University), and Rui Mao (Shenzhen University)

Optimising Deep Learning Split Deployment for IoT Edge Networks .349
Cailen Robertson (Griffith University), Jia Li (Griffith University), Ryoma Ohira (Griffith University), Quoc Viet Hung Nguyen (Griffith University), and Jun Jo (Griffith University)

Event Causality Detection in Tweets by Context Word Extension and Neural Networks .355
Humayun Kayesh (Griffith University), Md. Saiful Islam (Griffith University), and Junhu Wang (Griffith University)

Imbalanced Data Classification Using Improved Clustering Algorithm and Under-Sampling Method .361
Lu Cao (Sun Yat-sen University, Wuyi University) and Hong Shen (Sun Yat-sen University, University of Adelaide)

Session 4D: Image Processing

Right Ventricle Segmentation of Cine MRI Using Residual U-net Convolutinal Networks .367
Zexiong Liu (Shenzhen University), Yuhong Feng (Shenzhen University), and Xuan Yang (Shenzhen University)

Color Distortion Removal for Heart Rate Monitoring in Fitness Scenario .372
Quoc-Viet Tran (National Taiwan University of Science and Technology), Shun-Feng Su (National Taiwan University of Science and Technology), and Minh-Quang Tran (National Taiwan University of Science and Technology)

Automated Segmentation of Substantia Nigra and Red Nucleus in Quantitative Susceptibility Mapping Images .378
Dibash Basukala (University of Canterbury), Ramakrishnan Mukundan (University of Canterbury), Tracy Melzer (University of Otago), and Anthony Lim (University of Otago)

Session 5A: Software Tools II

Modeling Power Consumption of The Code Execution Using Performance Counters Statistics .384
Guang Wei (Beihang University), Depei Qian (Beihang University), Hailong Yang (Beihang University), and Zhongzhi Luan (Beihang University)

A CloudSim-Extension for Simulating Distributed Functions-as-a-Service .389
Hongseok Jeon (Electronics and Telecommunications Research Institute), Chunglae Cho (Electronics and Telecommunications Research Institute), Seungjae Shin (Electronics and Telecommunications Research Institute), and Seunghyun Yoon (Electronics and Telecommunications Research Institute)

New List Skeletons for the Python Skeleton Library .395
Frédéric Loulergue (Northern Arizona University) and Jolan Philippe (Northern Arizona University, Flagstaff, IMT Atlantique)

Reachability in Multithreaded Programs Is Polynomial in the Number of Threads .401
Alexander Malkis (Technical University of Munich)

Session 5B: Distributed Systems

Disk Throughput Controller for Cloud Data-Centers .407
M. Reza Hoseinyfarahabady (The University of Sydney), Zahir Tari (RMIT University), and Albert Y. Zomaya (The University of Sydney)

Low Computational Data Fusion Approach Using INS and UWB for UAV Navigation Tasks in GPS-Denied Environments 413
Xiaoying Kong (University of Technology Sydney), Gengfa Fang (University of Technology Sydney), Li Liu (The University of Sydney), and Tich Phuoc Tran (UNSW Canberra)

NFV Optimization Algorithm for Shortest Path and Service Function Assignment 418
Arvind Kalyan (Westview High School)

An Improved MCB Localization Algorithm Based on Received Signal Strength Indicator 424
Yan Qiao (Beijing Jiaotong University), Zhou Chunyue (Beijing Jiaotong University), Zhong Baitong (Hangzhou Uniview), and Tian Hui (Griffith University)

Session 5C: Machine Learning and Data Mining III

Succinct Representations in Collaborative Filtering: A Case Study using Wavelet Tree on 1,000 Cores 430
Xiangjun Peng (University of Nottingham Ningbo China), Qingfeng Wang (University of Nottingham Ningbo China), Xu Sun (University of Nottingham Ningbo China), Chunye Gong (National University of Defense Technology), and Yaohua Wang (National University of Defense Technology)

Comparison of Binary Rain Prediction on HIMAWARI using MPI and CUDA 436
Aisya Nafiisyanti (Western Michigan University, National Institute of Aeronautic and Space)

Attention-Based Supply-Demand Prediction for Autonomous Vehicles 442
Zikai Zhang (Beijing Jiaotong University), Hairong Dong (Beijing Jiaotong University), Yidong Li (Beijing Jiaotong University), Yizhe You (Beijing Jiaotong University), and Fengping Zhao (Beijing Jiaotong University)

In the Quest of Trade-off between Job Parallelism and Throughput in Hadoop: A Stochastic Learning Approach for Parameter Tuning on the Fly 448
Ramesh Pokhrel (Oslo Metropolitan University), Ashish Rauniyar (University of Oslo), and Anis Yazidi (Oslo Metropolitan University)

Session 5D: Intelligent Computing

Fengyun-4A Meteorological Satellite Data Service System 454
Yonggang Qi (China Meteorological Administration), Jiashen Zhang (China Meteorological Administration), Zhe Xu (China Meteorological Administration), and Di Xian (China Meteorological Administration)

Dynamic Pipelining for the Loosely-Coupled Distributed Constraint Satisfaction Problems .....N/A
Chun Chen (Chinese Academy of Sciences, University of Chinese Academy of Sciences), Li Ning (Chinese Academy of Sciences), Yong Zhang (Chinese Academy of Sciences), and Shengzhong Feng (National Supercomputing Center in Shenzhen)

Logistics Scheduling for UAV Based on Tabu Search Algorithm 464
Ke Zhao (Nanjing University of Posts and Telecommunications), Shoubao Su (Jinling Institute of Technology), Haiping Huang (Nanjing University of Posts and Telecommunications), and Jie Zhu (Nanjing University of Posts and Telecommunications)

Blockchain Consensus Algorithm Design Based on Consistent Hash Algorithm .470
Jian Yang (Sun Yet-sen University) and Hong Shen (Sun Yet-sen University)

Session 6A: Algorithms III

A Map-Reduce-Based Relation Inference Algorithm for Autonomous System .476
Ting Lv (Guangxi University for Nationalities), Donghong Qin (Guangxi University for Nationalities), Lina Ge (Guangxi University for Nationalities), and Song Wen (Guangxi University for Nationalities)

A Parallel Uncertain Frequent Itemset Mining Algorithm with Spark .480
Jiaman Ding (Kunming University of Science and Technology), Haibin Li (Kunming University of Science and Technology), Yuanyuan Wang (Australian National University), Lianyin Jia (Kunming University of Science and Technology), Jinguo You (Kunming University of Science and Technology), and Yang Yang (Kunming University of Science and Technology)

Multi-Thread Concurrent Compression Algorithm for Genomic Big Data .484
Yimu Ji (Nanjing University of Posts and Telecommunications), Shuai Chen (Nanjing University of Posts and Telecommunications), Haichang Yao (Nanjing University of Posts and Telecommunications), Houzhi Fang (Nanjing University of Posts and Telecommunications), Kui Li (Nanjing University of Posts and Telecommunications), Shangdong Liu (Nanjing University of Posts and Telecommunications), Zhengyuan Xie (University of Toronto), and Kairui Wang (University of Liverpool)

An Improved Online Multidimensional Bin Packing Algorithm .488
Vincent Portella (University of Adelaide) and Hong Shen (University of Adelaide)

Session 6B: Wireless Sensor Networks and Web Security

Dark Web Along With The Dark Web Marketing And Surveillance .492
Kithmini Godawatte (Charles Sturt University), Mansoor Raza (Charles Sturt University), Mohsin Murtaza (Charles Sturt University), and Ather Saeed (Charles Sturt University)

An Improved DV-hop Algorithm Based on Iterative Computation and two Communication Ranges for Sensor Network Localization .495
Xu Xiu (China University of Mining and Technology) and Zhu Changzheng (China University of Mining and Technology)

A Gird-Based Joint Routing and Energy Replenish Scheme for Rechargeable Wireless Sensor Networks .499
Zhansheng Chen (Beijing Jiaotong University, Beijing Union University, Guangxi Key laboratory of hybrid computation and IC design analysis) and Hong Shen (Sun Yat-sen University, University of Adelaide)

Joint Mobile Data Collection and Energy Supply Scheme for Rechargeable Wireless Sensor Networks .505
Zhansheng Chen (Beijing Jiaotong University, Beijing Union University, Guangxi Key laboratory of hybrid computation and IC design analysis) and Hong Shen (Sun Yat-sen University, University of Adelaide)

Session 6C: Distributed Data and Systems

A Temporal Caching-Aware Dummy Selection Location Algorithm 510
Xuejiao Mu (University of Adelaide), Hong Shen (University of Adelaide), and Zhigang Lu (University of Adelaide)

Development of Semantic Model of Multi-Level-Building Navigation Using Indoor Ontology and Dijkstra's Algorithm 514
Ye Yuan (University of Technology Sydney), Xiaoying Kong (University of Technology Sydney), Gengfa Fang (University of Technology Sydney), Li Liu (The University of Sydney), and Sanya Khruahong (Naresuan University)

A Modified Community-Level Diffusion Extraction in Social Network 518
Huajian Chang (Sun Yat-sen University) and Hong Shen (Sun Yat-sen University)

Overlapping Community Detection of Complex Network: A Survey 522
Qi Chen (Institute of Information Engineering, CAS) and Lingwei Wei (Institute of Information Engineering, CAS; School of Cyber Security, UCAS)

Session 6D: Software Systems and Image Processing

Information Management Software Systems for Improving Reliability 526
Kyaw Zaw Ye (Pyinoolwin Science and Technology Research Center), Soe Myint Maung (Pyinoolwin Science and Technology Research Center), Zaw Htet (Pyinoolwin Science and Technology Research Center), Kyaw Thu Aung (Pyinoolwin Science and Technology Research Center), Aung Myat Kyaw (Pyinoolwin Science and Technology Research Center), Pyae Sone Ko Ko (Pyinoolwin Science and Technology Research Center), and Sithu Thant Zin (Pyinoolwin Science and Technology Research Center)

Image Preprocessing Algorithm Based on K-Means 530
Xiaofan Zhao (People's Public Security University of China), Manchun Cai (People's Public Security University of China), Yuan Ren (People's Public Security University of China), and Fan Yang (People's Public Security University of China)

Effect of Parallel Processing by Duplicating Histogram in Automatic Image Binarization for High-Level Synthesis 534
Moena Yamasaki (Kyushu Institute of Technology) and Akira Yamawaki (Kyushu Institute of Technology)

Infinite Propagation Speed for a Two-Component Camassa-Holm Equation 538
Wenjun Cui (Beijing Jiaotong University) and Yidong Li (Beijing Jiaotong University)

Author Index 543
