PROCEEDINGS OF SPIE

Complex Light and Optical Forces XIV

David L. Andrews Enrique J. Galvez Halina Rubinsztein-Dunlop Editors

4–5 February 2020 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 11297

Proceedings of SPIE 0277-786X, V. 11297

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Complex Light and Optical Forces XIV*, edited by David L. Andrews, Enrique J. Galvez, Halina Rubinsztein-Dunlop, Proceedings of SPIE Vol. 11297 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510633575 ISBN: 9781510633582 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time)· Fax +1 360 647 1445 SPIE.org Copyright © 2020, Society of Photo-Optical Instrumentation Engineers.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v Authors
- vii Conference Committee

FUNDAMENTALS OF COMPLEX LIGHT

- 11297 02 Conceptualization of the photon for quanta of structured light (Invited Paper) [11297-1]
- 11297 04 Quantum signatures in the classical limit of electromagnetic waves [11297-3]
- 11297 05 **Closed-form analytical Mie theory of vector complex source vortices** [11297-4]
- 11297 06 Computation of spot diagrams of different vector beams using geometrical exact ray tracing [11297-5]

NOVEL INTERACTIONS FOR COMPLEX LIGHT GENERATION

11297 08 Size-selective optical printing of silicon nanoparticles through their dipolar magnetic resonance [11297-7]

MANIPULATION AND INTERACTIONS WITH LIGHT

- 11297 OB Patterning ultrafine metal nanoparticles using optoelectronic tweezers (OET) [11297-11]
- 11297 OC Rayleigh and Raman optical activity with Laguerre-Gaussian twisted light [11297-12]

OPTICAL FIELDS AND FORCES

- 11297 OF Non-conservative instabilities in optical vacuum traps (Invited Paper) [11297-14]
- 11297 01 Vacuum optomechanics of optically levitated objects: determination of nonlinear properties of the optical trap [11297-17]
- 11297 0J Continuous symmetries and conservation laws in chiral media [11297-18]
- 11297 0K Understanding particle trajectories by mapping optical force vortices [11297-19]

GENERATION AND COMMUNICATION

11297 00 GRIN lens: a new element for complex vectorial beam modulation [11297-24]

PROPAGATION

- 11297 OTHigher-order Bessel beams integrated with time (HOBBIT) for dynamic structured light control
(Invited Paper) [11297-29]11297 OWControlling the spectral rotation of ultrashort vortex pulses [11297-32]
- 11297 0Y Transport properties of optical fibres with high numerical apertures [11297-34]

POSTER SESSION

- 11297 0ZEstimation of maximum translation speed of a trapped particle in holographic optical tweezers
[11297-35]
- 11297 10 Mode conversion in nanophotonic waveguides via symmetry breaking optomechanical near-field interactions [11297-36]
