Volume 11306

Proceedings of SPIE 0277-786X, V. 11306

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Practical Holography XXXIV: Displays, Materials, and Applications*, edited by Hans I. Bjelkhagen, Proceedings of SPIE Vol. 11306 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1 MATERIALS AND PROCESSES

11306 02	Holographic wave front printing for fabrication of reflection holograms with arbitrary recording wave fronts (Best Student Paper Award) [11306-1]
11306 03	Ensuring reliable single-frequency laser performance for holography and other interferometric techniques in production environments [11306-2]
11306 04	Dispersion compensation for full-color virtual-imaging systems with a holographic off-axis mirror [11306-3]
11306 05	Unexplained complex colour shifts within single and dual wavelength holograms [11306-4]

SESSION 2 APPLICATIONS

11306 06	Holographic micro-mirror arrays as projection screens for transparent display applications [11306-5]
11306 08	Digital holography for evaluation of the refractive index distribution externally induced in semiconductors [11306-7]
11306 09	Depth measurement using engineering point spread function with coded aperture [11306-8]
11306 0A	In-depth particle localization with common-path digital holographic microscopy [11306-9]
11306 0B	Open-source 3D-printed digital inline holographic microscope for low-cost cellular imaging [11306-10]
11306 0C	Expanding possibilities how to apply Bayfol HX® film into recording stacks and optical parts [11306-11]

SESSION 3 EXHIBITIONS

11306 OG **Memory and holographic space** [11306-14]

SESSION 4 DIGITAL HOLOGRAPHY

11306 OH **Acceleration of phase-only hologram generation by sub-image preiteration** [11306-15]

11306 OI **Effect of rotational shear on imaging properties of bimodal incoherent digital holography system** [11306-16]

11306 OJ **Designing diffractive arbitrary shaped top-hat beam in non-paraxial systems** [11306-17]

11306 OK **Generalized phase-shifting color holography** [11306-18]

11306 OL **High-resolution binary hologram printing methods** [11306-19]

11306 OM **Simplified content generation for holographic printer using computer-generated integral imaging** [11306-21]

POSTER SESSION

11306 ON **Holographic image reconstruction by magneto-optical light modulation device array** [11306-22]

11306 OO **Real-time holographic gratings recorded in Norland Optical Adhesive 65 and yellow eosin** [11306-23]

11306 OP **Measuring photoelastic dispersion coefficients in material samples with digital holography** [11306-24]

11306 OQ **Overlapping waves with random amplitude and phase** [11306-25]

11306 OR **Study on table-top optical system enlarging viewing-zone for displaying holographic aerial image** [11306-26]

11306 OS **Fast calculation by auto-optimized method in CGH video generation using GPU** [11306-27]

11306 OT **Copper-doped polymeric material for holographic recording** [11306-28]

11306 OU **Single exposition holography for multi-depth objects** [11306-29]

- 11306 0V **Asymmetric public key cryptosystem using digital holographic encryption method** [11306-30]
- 11306 0W **Fast increase of quality of optically reconstructed images in digital holography** [11306-31]
- 11306 0X **Generation speed enhancement for full color computer generated holography using multiple wave-front recording planes** [11306-32]
