

PROCEEDINGS OF SPIE

Fourteenth International Conference on Correlation Optics

Oleg V. Angelsky
Editor

16–19 September 2019
Chernivtsi, Ukraine

Organized by
Chernivtsi National University (Ukraine)

Sponsored by
ICO – International Commission for Optics
Frontiers in Physics
Ukrainian Ministry of Education and Science
Private Clinic of Eye Microsurgery "Your Vision" (Ukraine)
Arton Company (Ukraine)
Demianovsky Trading Systems Assets' Management (Ukraine)

Co-sponsored by
SPIE

Published by
SPIE

Volume 11369

Proceedings of SPIE 0277-786X, V. 11369

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourteenth International Conference on Correlation Optics*, edited by Oleg V. Degtyarev, Proceedings of SPIE Vol. 11369 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510635104
ISBN: 9781510635111 (electronic)

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

|------|-----------------------------|
| ix | <i>Authors</i> |
| xiii | <i>Conference Committee</i> |
| xv | <i>Introduction</i> |

INFORMATIVE CONTENT OF STATISTICAL OPTICAL FIELDS, INCLUDING SINGULAR OPTICS, PARTIAL COHERENCE AND POLARIZATION

| | |
|----------|---|
| 11369 02 | Statistics of dynamic polarization speckle generated from a moving rough-surfaced retardation plate [11369-2] |
| 11369 03 | The use of magneto-optical and electro-optical modulation of polarization states of optical radiation for Mueller matrix elements measuring [11369-13] |
| 11369 04 | Spatial resolution of polarization imaging by partially coherent and partially polarized light [11369-16] |
| 11369 05 | New simulation approach based on Hilbert transform for restoring the amplitude and phase distributions of random fields. Carbon nanoparticles using [11369-18] |
| 11369 06 | Using of carbon nanoparticles for correlation analysis of speckle fields [11369-19] |
| 11369 07 | Influence of elastically-stressed state on polarization and electronic characteristics of amorphous ribbons [11369-24] |
| 11369 08 | Investigation of influence of nanoparticle's shape on stochastization of scattered field [11369-27] |
| 11369 09 | Correlation identification algorithm in artificial intelligence systems [11369-30] |
| 11369 0A | Optical sizing of cement particles: shape influence [11369-67] |
| 11369 0B | Fourier analysis of speckle fields [11369-69] |
| 11369 0C | Radiation spectrum of system of electrons moving in spiral in medium [11369-78] |
| 11369 0D | Computer modeling and practical realization of chaotic circuit with a light-emitting diode [11369-7] |
| 11369 0E | Increase of spatial resolution of the optical spectrum analyzer [11369-9] |

- 11369 OF **Monte Carlo simulation of magnetic properties of AA and AB stacked nano-graphene bilayer within Ising-like model** [11369-10]
- 11369 OG **Structured light: peculiar properties and applications** [11369-12]
- 11369 OH **Computer simulation of erythrocytes motion in evanescent field** [11369-22]
- 11369 OI **New approaches in birefringent microplate motion peculiarities modelling** [11369-23]
- 11369 OJ **Higher-order polarization in coherent optics** [11369-44]
- 11369 OK **High-precision interference measurements of phase shift between orthogonal linear polarized beams at total internal reflection** [11369-58]
- 11369 OL **Electron-hole processes determining the self-desensitization of dyes on the surface of AgHal microcrystals** [11369-85]
- 11369 OM **Singular skeleton chains formed by the quasi-plane wave and the Laguerre-Gaussian beam after passing the double-phase-ramp converter** [11369-86]
- 11369 ON **Numerical methods for analysis of the rotating point spread function** [11369-90]
- 11369 OO **Investigations of optical absorption by liquid crystals doped by carbon nanotubes** [11369-26]
- 11369 OP **Far-field slit diffraction and express diagnostics of optical vortices** [11369-83]
- 11369 OQ **Representation of solutions for fractional kinetic equations with deviation time variable** [11369-84]
- 11369 OR **Instant and averaged energy flows in the fields formed by superposition of quasi-plane waves** [11369-41]

OPTICAL CORRELATION DEVICES BASED ON DIFFRACTION OPTICAL ELEMENTS, OPTICAL SENSORS

- 11369 OS **The high resolution scintillator type x-ray imaging detector with Si pixel collimator (Invited Paper)** [11369-5]
- 11369 OT **Development of integral photography image with RGB-depth camera (Invited Paper)** [11369-15]
- 11369 OU **Characterization of distortions in electro-holographic image by a Shack-Hartmann wavefront sensor (Invited Paper)** [11369-87]
- 11369 OV **Laser interferometry of topography of surface printed paper with watermark** [11369-31]
- 11369 OW **Light reflecting, absorbing and transmitting in printed area of banknote watermarks** [11369-39]

- 11369 OX **Reference-free wave-front sensor based on the Talbot effect** [11369-49]
- 11369 OY **Estimation of the properties of a position-sensitive photo-thermoelectric temperature sensor** [11369-72]
- 11369 OZ **Optical characteristics of the imprints** [11369-8]
- 11369 10 **3D light interferometry investigation of ink layer formation during intaglio printing** [11369-25]
- 11369 11 **Inspection of semiconductor-based planar wave-guiding structures with a near-infrared transmission digital holographic microscopy** [11369-36]
- 11369 12 **Phase measurement by quadriwave lateral shearing interferometry using spatial light modulator** [11369-89]
- 11369 13 **Analysis of optical spectra by the radio frequency method** [11369-79]
- 11369 14 **About the question for accuracy of devices and apparatus** [11369-81]

OPTICAL CORRELATION DIAGNOSTICS, INTERFEROMETRY AND MICROSCOPY OF ROUGH SURFACES AND RANDOM MEDIA

- 11369 15 **Electron scattering on acoustic phonons in plane semiconductor GaN/AlN nanostructures** [11369-6]
- 11369 16 **Optical properties and kinetic parameters in Cu₂FeSnS₄ thin films prepared by spray pyrolysis** [11369-20]
- 11369 17 **Charge transport mechanisms and efficiency spectra of thin-film CdS/CdMgTe heterostructures with different mercury content** [11369-40]
- 11369 18 **Optical methods of banknotes sorting for Ukrainian Hryvnia: results and problems** [11369-45]
- 11369 19 **The EPR and NQR in layered crystal of GaSe: Gd** [11369-3]
- 11369 1A **Heterostructures on the basis of thin films (3ZnTe)_{0.5}(In₂Te₃)_{0.5}** [11369-17]
- 11369 1B **Photosensitive heterostructure p-Cu₂ZnSnSe₄/n-CdTe** [11369-21]
- 11369 1C **Experimental study of light focusing through strongly scattering media using binary amplitude spatial light modulator** [11369-29]
- 11369 1D **An analytical method for investigations of acoustic phonons spectra in semiconductor ultra-thin flat films** [11369-56]
- 11369 1E **Ellipsometric studies and scanning electron microscopy of Cd_{1-x}Mn_xTe films and layers modified by laser irradiation** [11369-59]

- 11369 1F **Physical properties of Cr_xN thin films** [11369-60]
- 11369 1G **Defect and magnetic structure of Y_{2.93}La_{0.07}Fe₅O₁₂/Gd₃Ga₅O₁₂ epitaxial systems** [11369-61]
- 11369 1H **Defect structure of high-resistivity CdTe:Cl crystals according to the data of high-resolution x-ray diffractometry** [11369-62]
- 11369 1I **Determination of structural heterogeneity of crystals from electron backscatter diffraction images with use of the Fourier energy spectrum** [11369-65]
- 11369 1J **Physical properties of W₂N thin films deposited by reactive magnetron sputtering** [11369-74]
- 11369 1K **Temperature induced transition in one-dimensional molecular magnets** [11369-38]
- 11369 1L **Modeling of adsorption and desorption of hydrocarbons in nanoporous catalytic zeolite media using nonlinear Langmuir isotherm** [11369-42]

NEW APPLICATIONS OF CORRELATION OPTICS IN BIOLOGY AND MEDICINE

- 11369 1M **3D polarization correlometry of object fields of networks of biological crystals** [11369-47]
- 11369 1N **Polarization - interference mapping of the distributions of the parameters of the Stokes vector of the object field of a biological optically anisotropic layer** [11369-52]
- 11369 1O **Informativeness of the medical-physical method for analyzing the distributions of the degree of local depolarization of microscopic images of histological sections of the intestinal wall for the diagnosis of dolechosigma** [11369-53]
- 11369 1P **Polarization interferometry of the polycrystalline structure of biological tissues** [11369-54]
- 11369 1Q **Differential diagnosis of the limitation of the formation of hemorrhages of traumatic origin, cerebral infarction, ischemic and hemorrhagic genesis by polarization-phase tomography** [11369-75]
- 11369 1R **Forensic medical evaluation of cerebral infarction of hemorrhagic formations of hemorrhages of traumatic genesis using polarization-phase tomography** [11369-77]
- 11369 1S **Methods and systems of polarization reproduction and analysis of the biological layers structure in the diagnosis of pathologies** [11369-88]
- 11369 1T **Biologically inspired compound eye** [11369-28]
- 11369 1U **Portable automated measuring system for noninvasive contactless medical diagnostics of physiological divergences and inflammations** [11369-57]
- 11369 1V **Laser autofluorescent microscopy of histological sections of parenchymatous biological tissues of the dead** [11369-64]

- 11369 1W **Stokes-correlometric differentiation of polarization-heterogeneous images of biological tissues and some legal aspects of the use of early diagnosis of diseases** [11369-66]
- 11369 1X **Investigations of polarization distributions of ellipticity states of laser images of punctuate samples of cancer patients and legal aspects of their labor adaptation** [11369-68]
- 11369 1Y **Investigations of phase shift distributions between orthogonal polarization states of laser images of blood samples of cancer patients** [11369-70]
- 11369 1Z **Differential diagnosis of aseptic and septic loosening of an artificial hip joint endoprosthesis cup using spectral-selective laser autofluorescence microscopy** [11369-76]
- 11369 20 **Driving hemodynamic force of the heart, convertible to surface tension of blood** [11369-71]
- 11369 21 **Stokes polarimetric reproductions of the degree of crystallization of blood plasma films in the diagnosis and differentiation of non-alcoholic fatty liver disease and chronic hepatitis** [11369-55]
- 11369 22 **Creating a classification model for diagnosis of joint lesions type** [11369-63]
- 11369 23 **Determination of proline concentration in natural biological environments** [11369-32]
- 11369 24 **Morphological peculiarities of the papillary muscles of the human heart ventricles in the norm applying of the laser polarimetry method** [11369-33]
- 11369 25 **Spectropolarimetric comparison of molecular-genetic study of BRCA1 gene mutation types in patients with breast cancer and their relatives** [11369-34]
- 11369 26 **Spectropolarimetric assessment of the cervical canal connective tissue in diagnostics and prognosis of benign and malignant processes of the endometrium** [11369-35]
- 11369 27 **Spectropolarimetry diagnostics of "epithelium-connective tissue" system condition in patients with benign and malignant processes of the uterine cervix** [11369-37]
- 11369 28 **Stokes parametric autofluorescence microscopic images of optically anisotropic histological sections of tissues of rat internal organs** [11369-46]
- 11369 29 **Usage of a gas-discharge visualization for an investigation of a human internal energy** [11369-51]
