SPIE

Volume 11263

Proceedings of SPIE 0277-786X, V. 11263

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Vertical External Cavity Surface Emitting Lasers (VECSELs) X*, edited by Jennifer E. Hastie, Proceedings of SPIE Vol. 11263 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

LASE PLENARY SESSION

11263 02 **VCSEL: born small and grown big (Plenary Paper)** [11263-301]

SESSION 1 MODELOCKED VECSELS

11263 05 **Microscopic modeling of transverse non-equilibrium dynamics in mode-locked VECSELS**
[11263-3]

11263 06 **Pseudo mode-locking** [11263-4]

SESSION 2 SPECIALLY DESIGNED VECSELS I

11263 09 **Generation and stabilization of continuous wave THz emission from a bi-color VECSEL (Best Student Paper Award)** [11263-7]

SESSION 3 SINGLE FREQUENCY

11263 0B **Longitudinal scaling of VECSEL output power maintaining narrow linewidth (Invited Paper)**
[11263-9]

11263 0C **High-power single-frequency intracavity doubled VECSEL at 589 nm for sodium guidestar**
[11263-10]

SESSION 4 MATERIALS

11263 0H **A membrane external-cavity surface-emitting laser (MECSEL) with emission around 825 nm**
[11263-15]

11263 0I **SWIR MECSEL emitting above 1600 nm** [11263-16]

SESSION 5 SPECIALLY DESIGNED VECSELS II

- 11263 OK **Spatially modeless semiconductor laser cavity for the generation of spatio-temporal localized structures (Invited Paper) [11263-19]**
- 11263 OL **Comb tooth resolved MIR spectroscopy using a VECSEL frequency comb and a virtually-imaged phased array spectrometer (Invited Paper) [11263-20]**
