Volume 11265

Proceedings of SPIE 0277-786X, V. 11265

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Real-time Measurements, Rogue Phenomena, and Single-Shot Applications V*, edited by Daniel R. Solli, Georg Herink, Serge Bielawski, Proceedings of SPIE Vol. 11265 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Author Index*
vii *Conference Committee*

NONLINEAR DYNAMICS IN LASERS AND MICRORESONATORS I

- 11265 09 **How equidistant are microresonator frequency combs?** [11265-7]
11265 0B **Time-stretched all-fiber supercontinuum source for spectroscopy** [11265-9]

NONLINEAR DYNAMICS IN LASERS AND MICRORESONATORS II

- 11265 0F **Stability of a long cavity laser** [11265-13]

REAL-TIME AND TIME-STRETCH INSTRUMENTS

- 11265 0G **Coherent frequency conversion for quantum information processing (Invited Paper)** [11265-14]
11265 0I **Infrared absorption spectroscopy of dynamically compressed water (Invited Paper)** [11265-16]
11265 0L **Temporal imaging system based on four-wave mixing interaction which do not require synchronization to a pump wave** [11265-19]

POSTER SESSION

- 11265 0M **Temporal imaging of ultrafast signals in time and space simultaneously** [11265-20]
11265 0Q **Open-path remote sensing for multi-species gas detection using a broadband optical parametric oscillator** [11265-24]
