

PROCEEDINGS OF SPIE

Photonic Heat Engines: Science and Applications II

Denis V. Seletskiy
Richard I. Epstein
Mansoor Sheik-Bahae
Editors

5–6 February 2020
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 11298

Proceedings of SPIE 0277-786X, V. 11298

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Heat Engines: Science and Applications II*, edited by Denis V. Seletskiy, Richard I. Epstein, Mansoor Sheik-Bahae, Proceedings of SPIE Vol. 11298 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

NOVEL METHODS FOR THERMOMETRY

11298 03	Comparing different optical thermometries for use in condensed phase laser cooling (Invited Paper) [11298-2]
11298 04	Fast monitoring of fiber core temperature changes based on birefringence in polarization maintaining fibers [11298-4]

LASER COOLING OF RARE-EARTHS: BULK SYSTEMS

11298 0B	Enhancement of laser cooling efficiency in rare-earth-doped oxide at elevated high temperature (Invited Paper) [11298-11]
11298 0C	Power scaling of mid-IR optical refrigeration and radiation balanced lasers (Invited Paper) [11298-12]
11298 0E	Oxyfluoride glass-ceramics: a bright future for laser cooling [11298-14]

NOVEL PHOTONIC HEAT ENGINES

11298 0K	Room-temperature multi-phonon upconversion photoluminescence in monolayer semiconductor WS₂ (Invited Paper) [11298-20]
----------	--

NOVEL LASER COOLING SYSTEMS

11298 0P	Anti-Stokes photoluminescence and optical cooling of CdSeS/ZnS colloidal quantum dots embedded in dielectric waveguides [11298-25]
----------	---
