Volume 11317

Proceedings of SPIE, 1605-7422, V. 11317

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Medical Imaging 2020: Biomedical Applications in Molecular, Structural, and Functional Imaging*, edited by Andrzej Krol, Barjor S. Gimi, Proceedings of SPIE Vol. 11317 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

| | |
|------|---------------------------------------|
| ix | Authors |
| xiii | Conference Committee |
| xv | Introduction |
| xvii | 2020 Medical Imaging Award Recipients |

NEUROLOGICAL IMAGING I

| | |
|----------|--|
| 11317 02 | Graph embedding using Infomax for ASD classification and brain functional difference detection [11317-1] |
| 11317 03 | Classification of attention-deficit/hyperactivity disorder from resting-state functional MRI with mutual connectivity analysis [11317-2] |
| 11317 04 | Minimizing cotton retention in neurosurgical procedures: which imaging modality can help? [11317-3] |
| 11317 05 | Inferring brain functional hubs by eigencentality mapping of phase fMRI connectivity [11317-4] |
| 11317 06 | Reduced sine hyperbolic polynomial model for brain neuro-developmental analysis [11317-5] |

NEUROLOGICAL IMAGING II

| | |
|----------|---|
| 11317 09 | Identification of dementia subtypes based on a diffusion MRI multi-model approach [11317-8] |
| 11317 0A | A graph deep learning model for the classification of groups with different IQ using resting state fMRI [11317-9] |
| 11317 0B | Intraoperative ultrasound to monitor spinal cord blood flow after spinal cord injury [11317-10] |
| 11317 0C | Deep learning of volumetric 3D CNN for fMRI in Alzheimer's disease classification [11317-11] |
| 11317 0D | How to meet the 10 ps Coincidence Timing Resolution PET challenge [11317-12] |

VASCULAR AND PULMONARY IMAGING

- 11317 0E Co-registration of infarct core location with angiography during mechanical thrombectomy procedures for treatment progression monitoring [11317-13]
- 11317 0F Exploration of pathology-specific flow patterns utilizing high speed angiography at 1000 fps [11317-14]
- 11317 0G A preliminary study of visualizing texture components of stage IA lung adenocarcinoma in three-dimensional thoracic CT images with structure-texture image decomposition [11317-15]
- 11317 0H 3D microstructure analysis of human pulmonary emphysema using a synchrotron radiation CT [11317-16]

INNOVATIONS IN IMAGE PROCESSING I

- 11317 0I Quantitative assessment of weight-bearing fracture biomechanics using extremity cone-beam CT [11317-17]
- 11317 0J Segmentation of 4D images via space-time neural networks [11317-18]
- 11317 0K Localization and segmentation of optimal slices for chest fat quantification in CT via deep learning [11317-19]
- 11317 0L Abdominal muscle segmentation from CT using a convolutional neural network [11317-20]
- 11317 0M A prospective randomized clinical trial for measuring radiology study reporting time on Artificial Intelligence-based detection of intracranial hemorrhage in emergent care head CT [11317-23]

INNOVATIONS IN IMAGE PROCESSING II

- 11317 0N Automated computer-based enumeration of acellular capillaries for assessment of diabetic retinopathy [11317-22]
- 11317 0O Deep semantic segmentation of Diabetic Retinopathy lesions: what metrics really tell us [11317-21]
- 11317 0P Sparse-view CT perfusion with filtered back projection image reconstruction [11317-24]
- 11317 0Q Segmentation of epicardial adipose tissue in cardiac MRI using deep learning [11317-25]
- 11317 0R IRIS: interactive real-time feedback image segmentation with deep learning [11317-26]
- 11317 0S Quantification of flow through intracranial arteriovenous malformations using Angiographic Parametric Imaging (API) [11317-27]

DEEP CONVOLUTIONAL NEURAL NETWORKS IN MOLECULAR, STRUCTURAL, AND FUNCTIONAL IMAGING I

- 11317 0T Supervised machine learning for region assignment of zebrafish brain nuclei based on computational assessment of cell neighborhoods [11317-28]
- 11317 0U Deep learning based high-resolution reconstruction of trabecular bone microstructures from low-resolution CT scans using GAN-CIRCLE [11317-29]
- 11317 0V Deep learning based multi-organ segmentation and metastases segmentation in whole mouse body and the cryo-imaging cancer imaging and therapy analysis platform (CITAP) [11317-30]
- 11317 0W ASNet: An adaptive scale network for skin lesion segmentation in dermoscopy images [11317-31]
- 11317 0X A causal brain network estimation method leveraging Bayesian analysis and the PC algorithm [11317-32]

DEEP CONVOLUTIONAL NEURAL NETWORKS IN MOLECULAR, STRUCTURAL, AND FUNCTIONAL IMAGING II

- 11317 0Y Efficacy of radiomics and genomics in predicting TP53 mutations in diffuse lower grade glioma [11317-33]
- 11317 0Z Classification of skin-cancer lesions based on Fluorescence Lifetime Imaging [11317-34]
- 11317 10 A hypergraph learning method for brain functional connectivity network construction from fMRI data [11317-35]
- 11317 11 MRI-based radiomics of sarcomas in the preclinical arm of a co-clinical trial [11317-36]
- 11317 13 A machine learning approach for abdominal aortic aneurysm severity assessment using geometric, biomechanical, and patient-specific historical clinical features [11317-38]

NOVEL IMAGING METHODS

- 11317 14 Initial investigations of x-ray particle imaging velocimetry (X-PIV) in 3D printed phantoms using 1000 fps High-Speed Angiography (HSA) [11317-39]
- 11317 15 Micro-CT imaging technique to characterize diffusion of small-molecules [11317-40]
- 11317 16 Quantifying the effects of stenosis on blood flow using 1000 fps High-Speed Angiography (HSA) [11317-41]
- 11317 17 Co-registration of pre- and post-stent intravascular OCT images for validation of finite element model simulation of stent expansion [11317-42]

11317 18 Image processing using Convolutional Neural Network (CNN) for Region of Interest (ROI) fluoroscopy [11317-43]

OCULAR AND OPTICAL IMAGING

11317 19 Spatially aware deep learning improves identification of retinal pigment epithelial cells with heterogeneous fluorescence levels visualized using adaptive optics [11317-44]

11317 1A Mask-guided diffusion optical tomography image reconstruction for breast imaging [11317-46]

11317 1C In vivo cancer detection in animal model using hyperspectral image classification with wavelet feature extraction [11317-48]

11317 1D High-resolution x-ray luminescence computed tomography [11317-49]

BONE AND SKELETAL IMAGING, SEGMENTATION, REGISTRATION, AND DECISION-MAKING

11317 1E Application of a novel ultra-high resolution multi-detector CT in quantitative imaging of trabecular microstructure [11317-50]

11317 1F CT-based characterization of transverse and longitudinal trabeculae and its applications [11317-51]

11317 1G Graph Laplacian learning based Fourier Transform for brain network analysis with resting state fMRI [11317-52]

11317 1H Evaluation of intensity-based deformable registration of multi-parametric MRI for radiomics analysis of the prostate [11317-53]

11317 1I Automatic measurement of extra-axial CSF from infant MRI data [11317-54]

CARDIAC IMAGING AND NANOPARTICLE IMAGING

11317 1J Study of the effect of boundary conditions on fractional flow reserve using patient specific coronary phantoms [11317-55]

11317 1K Quantitative estimation of flow rate to fill the intravascular volume (FRIV) for CT myocardial perfusion imaging [11317-56]

11317 1L An implementation of data assimilation techniques for transmural visualization of action potential propagation in cardiac tissue [11317-57]

11317 1M Fully automated segmentation of the right ventricle in patients with repaired Tetralogy of Fallot using U-Net [11317-58]

- 11317 1N A spectral CT study on iodine augmentation of radiation therapy and its potential for combination with chemotherapy [11317-59]
- 11317 1O Time course study of a gold nanoparticle contrast agent [11317-60]

POSTER SESSION

- 11317 1P Comparison different vessel segmentation methods in automated microaneurysms detection in retinal images using convolutional neural networks [11317-45]
- 11317 1Q CrohnIPI: An endoscopic image database for the evaluation of automatic Crohn's disease lesions recognition algorithms [11317-61]
- 11317 1R Attenuation correction without structural images for PET imaging [11317-62]
- 11317 1S Multi-organ segmentation in pelvic CT images with CT-based synthetic MRI [11317-63]
- 11317 1U Fully automated segmentation of the temporal bone from micro-CT using deep learning [11317-65]
- 11317 1V A new interactive visual-aided decision-making supporting tool to predict severity of acute ischemic stroke [11317-66]
- 11317 1W Controllability of structural brain networks in dementia [11317-67]
- 11317 1X 3D distributed deep learning framework for prediction of human intelligence from brain MRI [11317-68]
- 11317 1Y Optimization of DSA image data input to a machine learning aneurysm identifier [11317-85]
- 11317 20 Brain tumor segmentation using 3D mask R-CNN for dynamic susceptibility contrast enhanced perfusion imaging [11317-70]
- 11317 21 Connectivity analysis of anterior nuclei of the thalamus in diffusion-MRI using constrained spherical deconvolution (CSD), multi-shell multi-tissue CSD and probabilistic DTI for ANT-DBS in epilepsy [11317-71]
- 11317 22 Integration of multi-task fMRI for cognitive study by structure-enforced collaborative regression (Cum Laude Poster Award) [11317-72]
- 11317 23 MRI-aided attenuation correction for PET imaging with deep learning [11317-73]
- 11317 24 Multiparametric MRI-guided high-dose-rate prostate brachytherapy with focal dose boost to dominant intraprostatic lesions [11317-74]
- 11317 25 Quantification of axillary lymphadenopathy from CT images of filovirus infections in non-human primates: sensitivity and evaluation of radiomics-based methods [11317-75]

- 11317 26 Evaluation of $R2^*$ as a noninvasive endogenous imaging biomarker for Ebola virus liver disease progression in nonhuman primates [11317-79]
- 11317 27 Intensity non-uniformity correction in MR imaging using deep learning [11317-76]
- 11317 28 Synthetic CT-aided MRI-CT image registration for head and neck radiotherapy [11317-77]
- 11317 29 Improved accuracy and precision of calcium mass score using deconvolution and partial volume correction [11317-78]
- 11317 2A Automatic quantification of hip osteoarthritis from low-quality x-ray images [11317-80]
- 11317 2C Non-invasive prediction of lymph node risk in oral cavity cancer patients using a combination of supervised and unsupervised machine learning algorithms [11317-87]
- 11317 2D Repeatability, reproducibility, and accuracy of a novel imaging technique for measurement of ocular axial length [11317-88]
- 11317 2E Noise reduction in the inverse solution for one-dimensional cardiac active stress reconstruction [11317-82]
- 11317 2F Micro-computed tomography imaging of a rodent model of Chronic Obstructive Pulmonary Disease (COPD) [11317-83]
- 11317 2G Infarct region segmentation in rat brain T2 MR images after stroke based on fully convolutional networks [11317-84]
- 11317 2H Left ventricular myocardium segmentation in coronary computed tomography angiography using 3D deep attention u-net [11317-86]
