Volume 11323

Proceedings of SPIE 0277-786X, V. 11323

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Extreme Ultraviolet (EUV) Lithography XI*, edited by Nelson M. Felix, Anna Lio, Proceedings of SPIE Vol. 11323 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
xi *Conference Committee*

THE FUTURE IS HIGH NA

11323 07 **High-NA EUV lithography exposure tool: program progress (Invited Paper)** [11323-3]

11323 08 **High-NA EUV lithography optics becomes reality (Invited Paper)** [11323-4]

11323 0A **Lithographic pattern formation in the presence of aberrations in anamorphic optical systems** [11323-6]

11323 0B **How we are making the 0.5-NA Berkeley mirco-field exposure tool stable and productive** [11323-7]

INORGANIC RESISTS: JOINT SESSION WITH CONFERENCES 11323 AND 11326

11323 0G **Calibration of a MOx-specific EUV photoresist lithography model** [11323-12]

STOCHASTICS: JOINT SESSIONS WITH CONFERENCES 11323 AND 11326

11323 0H **Cluster of correlated reactions as a cause for various types of stochastic defects in extreme ultraviolet lithography** [11323-13]

STOCHASTICS OF EUV PATTERNING

11323 0J **On the dependencies of the stochastic patterning-failure cliffs in EUVL lithography** [11323-15]

11323 0K **Prediction of EUV stochastic microbridge probabilities by lithography simulations** [11323-16]

11323 0L **Probability prediction of EUV process failure due to resist-exposure stochastic: applications of Gaussian random fields excursions and Rice's formula** [11323-17]

11323 0O **Fundamental characterization of stochastic variation for improved single-expose EUV patterning at aggressive pitch** [11323-20]

EUV SCANNER MONITORING

11323 0P **Leveraging sub-E0 dose assessment methodology to improve EUV lithography cluster dose performance** [11323-21]

11323 0Q **EUVL mask process development and verification using advanced modeling and characterization techniques** [11323-90]

11323 0S **Novel monitoring of EUV litho cluster for manufacturing insertion** [11323-23]

EUV PATTERNING AND ETCH: JOINT SESSION WITH CONFERENCES 11323 AND 11329

11323 0V **Strategies for aggressive scaling of EUV multi-patterning to sub-20 nm features** [11323-26]

PROGRESS IN EUV SOURCES

11323 0X **Challenge of >300W high power LPP-EUV source with long collector mirror lifetime for semiconductor HVM** [11323-28]

11323 0Y **Understanding EUV-induced plasma and application to particle contamination control in EUV scanners** [11323-29]

PROGRESS IN EUV MASKS

11323 10 **EUV mask infrastructure and actinic pattern mask inspection (Invited Paper)** [11323-31]

11323 14 **EUV mask polarization effects on sub-7nm node imaging** [11323-35]

11323 15 **Quantitative phase retrieval for EUV photomasks** [11323-36]

11323 16 **Pathfinding the perfect EUV mask: the role of the multilayer** [11323-37]

EUV OPC AND MODELING

11323 17 **Machine learning techniques for OPC improvement at the sub-5 nm node** [11323-38]

EUV RESIST FUNDAMENTALS

11323 1C **Measurement of latent image in resist using scanning probe techniques** [11323-43]

11323 1F **Excitation selectivity in model tin-oxo resist: a computational chemistry perspective** [11323-46]

EUV MASK INSPECTION AND PELLICLE

11323 1G **The EUV CNT pellicle: balancing material properties to optimize performance** [11323-47]

11323 1I **Illumination control in lensless imaging for EUV mask inspection and review** [11323-49]

11323 1J **Optical defect inspection solution for EUV stochastics detection** [11323-50]

NEW CONCEPTS IN EUV

11323 1L **Simulation investigation of enabling technologies for EUV single exposure of Via patterns in 3nm logic technology** [11323-52]

11323 1N **Projecting EUV photo-speeds for future logic nodes** [11323-54]

POSTER SESSION

11323 1Q **Novel high-contrast phase-shifting masks for EUV interference lithography** [11323-57]

11323 1W **Application of alternative developer solutions for EUV lithography** [11323-63]

11323 1Z **Additional real-time diagnostics on the EBL2 EUV exposure facility** [11323-66]

11323 21 **Spectral purity performance of high-power EUV systems** [11323-68]

11323 24 **Compact modeling to predict and correct stochastic hotspots in EUVL** [11323-71]

11323 25 **A plausible approach for actinic patterned mask inspection using coherent interferometric imaging** [11323-72]

11323 26 **Impact of EUV resist thickness on local critical dimension uniformities for <30 nm CD via patterning** [11323-73]

11323 28 **Update of development progress of the high power LPP-EUV light source using a magnetic field** [11323-75]

11323 29 **Analysis of trade-off relationships between resolution, line edge roughness, and sensitivity in extreme ultraviolet lithography using machine learning** [11323-76]

11323 2A **CLEAN TRACK solutions for defectivity and CD control towards 5 nm and smaller nodes** [11323-77]

11323 2D **Realization of thermally stable transmissive optical elements for the EUV wavelength range** [11323-80]

11323 2E **Impact of flare on source mask optimization in EUVL for 7nm technology node** [11323-81]

11323 2H **EUV OPC methodology for beyond 20nm memory cell by simulation data** [11323-84]

11323 2J **Compressive sensing method for EUV source optimization using different bases** [11323-86]

11323 2L **Particle contamination control by application of plasma** [11323-89]
