**Volume 11653**

Proceedings of SPIE, 1605-7422, V. 11653

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantitative Phase Imaging VII*, edited by Yang Liu, Gabriel Popescu, YongKeun Park, Proc. of SPIE 11653, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## QPI METHODOLOGIES

---

- 11653 06 **A generalized iterative projection framework for pixel-super-resolved holographic imaging** [11653-15]
- 11653 08 **Field-of-view extended quantitative phase microscope by coded aperture correlation holography** [11653-18]
- 11653 0A **Reduction of the influence of parasitic interferences and coherence induced disturbances in digital holography-based quantitative phase microscopy by modulation of the object illumination with an electrically focus tunable lens** [11653-20]
- 11653 0B **Enhanced QPI functionality by combining OCT and ODT methods (Invited Paper)** [11653-21]
- 11653 0E **Transparent thin-film metrology with a high sensitivity transmission-mode quantitative phase microscope** [11653-24]
- 11653 0F **Deep-UV hyperspectral microscopy with phase and absorption-based contrast (Invited Paper)** [11653-25]
- 11653 0I **Fusing quantitative-phase imaging with airy light-sheet microscopy** [11653-28]

---

## QPI ALGORITHMS

---

- 11653 0P **Hidden projection tomography via phase retrieval algorithm** [11653-1]
- 11653 0S **Quantitative phase-contrast by using a modified phase retrieval algorithm** [11653-4]
- 11653 0T **Probability of error as an image metric for the assessment of tomographic reconstruction of dense-layered binary-phase objects** [11653-5]
- 11653 0V **Non-linear 3D tomographic object reconstruction of partially coherent broadband transmission illumination microscopy systems** [11653-7]
- 11653 0Y **Hierarchical synthesis network: a frequency extraction technique for structured illumination-based phase retrieval** [11653-10]
- 11653 0Z **Simultaneous recovery of phase and defocus from coherent through-focus intensity images** [11653-11]

---

**QPI OF CELLS & TISSUES**

---

11653 16     **The spectrum of single cell drug response through the lens of long-term high-speed live cell interferometry [11653-41]**

---

**POSTER SESSION**

---

11653 1E     **Transport of intensity phase imaging with Wiener deconvolution for enhanced visibility [11653-49]**

11653 1F     **Deep convolutional neural network-based lensless quantitative phase retrieval [11653-50]**

11653 1G     **Quantitative phase imaging of thick scattering samples through a flexible fiber-optic bundle [11653-51]**

11653 1H     **Investigation of imaging contrast in optical diffraction tomography for cell imaging [11653-52]**

11653 1K     **High resolution phase imaging with transport of intensity equation and sinusoidal illumination [11653-55]**

11653 1Q     **Medical nanoparticle impact on macrophage temporal dry mass development quantified in vitro by digital holographic microscopy [11653-61]**

11653 1U     **QPI and atomic force microscopy in a comparative evaluation of biopolymer composites for a biomimetic matrix [11653-65]**

11653 1V     **Bessel beam assisted common-path spectral domain optical coherence phase microscopy [11653-17]**
