Volume 11692

Proceedings of SPIE 0277-786X, V. 11692

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Interconnects XXI*, edited by Henning Schröder, Ray T. Chen, Proceedings of SPIE Vol. 11692 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510642195

ISBN: 9781510642201 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/21/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

HYBRID INTEGRATED OPTICAL LINK MODULES

- 11692 04 **Short reach, high temperature operation and high reliability silicon photonic micro-transceivers for embedded and co-packaged system integration (Invited Paper)** [11692-1]
- 11692 05 **Co-packaged optics for HPC and data center networks (Invited Paper)** [11692-2]

OPTICAL INTERCONNECT DEVICES

- 11692 06 **Monolithically integrable optical single sideband transmitter for low-cost, high-density optical interconnects (Invited Paper)** [11692-3]
- 11692 07 **Silicon photonic switches (Invited Paper)** [11692-4]
- 11692 0C **The role of VCSELs in 3D sensing and LiDAR** [11692-9]
- 11692 0D **NRZ, DB, and DMT performance for short-reach VCSEL-based optical interconnects** [11692-10]

PICS FOR OPTICAL INTERCONNECTS

- 11692 0H **From integrated photonic transceivers to all-optical logic (Invited Paper)** [11692-14]
- 11692 0I **Ultra-long grating emitters for optical phased array leveraging subwavelength structures (Invited Paper)** [11692-15]

NOVEL OPTICAL WAVEGUIDE AND INTEGRATED INTERCONNECT TECHNOLOGIES

- 11692 0K **Thermally stable single-mode glass waveguides with fiber connectors for co-packaged optics (Invited Paper)** [11692-17]
- 11692 0M **3D nanoprinting of mode-field conversion tapers for low-loss optical interfacing of single-mode fibers and photonic integrated circuits (Invited Paper)** [11692-19]
- 11692 0N **Interconnection challenges on integrated terahertz photonic systems (Invited Paper)** [11692-20]

HYBRID DEVICE INTEGRATION APPROACHES FOR PIC

- 11692 OR **Integrated high-speed quantum random number generators for mobile, IOT, and edge applications (Invited Paper)** [11692-24]
- 11692 OT **A particle swarm optimization approach for designing III-V/Si vertical couplers** [11692-26]

OPTICAL INTERCONNECT SYSTEMS

- 11692 OW **A silicon photonic evanescent-field sensor architecture using a fixed-wavelength laser (Invited Paper)** [11692-29]
- 11692 OX **An overview of key optical communications technologies under development at the NASA Glenn Research Center (Invited Paper)** [11692-30]
- 11692 OZ **Maximizing the impact of emerging photonic switches at the system level** [11692-32]
- 11692 10 **Resilient architectures for free space optical wireless interconnection systems** [11692-33]

FIBER OPTICS AND MICRO-OPTIC ASSEMBLY

- 11692 13 **Probabilistic deep neural network based signal processing for Brillouin gain and phase spectrums of vector BOTDA system** [11692-36]
- 11692 14 **Next generation multi-fiber ferrule using 165 micron pitch optical fiber** [11692-37]
- 11692 18 **Extremely low-loss and bendable tapered multi-core fiber with double core structure for compact assembly of silicon photonics multi-port devices** [11692-41]
