Volume 11703

Proceedings of SPIE 0277-786X, V. 11703

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *AI and Optical Data Sciences II*, edited by Bahram Jalali, Ken-ichi Kitayama, Proceedings of SPIE Vol. 11703 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510642416
ISBN: 9781510642423 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/21/$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

PHOTONICS HARDWARE ACCELERATOR I

11703 05 **Dual time- and wavelength-multiplexed photonic reservoir computing (Invited Paper)** [11703-2]

11703 06 **Low SWaP real-time edge processing for cognitive sensing and autonomous control applications (Invited Paper)** [11703-3]

11703 07 **Machine-learning-aided photonic hardware implementation incorporating natural optical phenomena (Invited Paper)** [11703-4]

PHOTONICS HARDWARE ACCELERATOR II

11703 0K **Investigations on intelligent photonic signal processing technology (Invited Paper)** [11703-17]

11703 0L **Photonic reservoir computer with all-optical reservoir** [11703-18]

AR/VR

11703 0V **Application of deep learning for nanophotonic device design (Invited Paper)** [11703-28]

11703 0W **Deep learning in holography (Invited Paper)** [11703-29]

OPTICAL CLASSIFICATION AND REAL-TIME INFERENCE I

11703 18 **Deep learning for control of nonlinear optical systems (Invited Paper)** [11703-41]

11703 19 **Optical nonlinearity compensation based on machine learning technology (Invited Paper)** [11703-42]

OPTICAL CLASSIFICATION AND REAL-TIME INFERENCE II

11703 1D **Machine learning techniques for real-time UV-Vis spectral analysis to monitor dissolved nutrients in surface water** [11703-46]

11703 1E **Optical-electronic implementation of artificial neural network for ultrafast and accurate inference processing** [11703-47]

11703 1F **A machine learning approach to array-based free-space optical communications** [11703-48]

POSTER SESSION

11703 1M **A hybrid lens: integrating neural lens and optical lens on the Fourier plane** [11703-55]

11703 1O **Image classification using delay-based optoelectronic reservoir computing** [11703-57]

11703 1S **Infrared visible color night vision image fusion based on deep learning** [11703-62]
