

American Institute of Chemical Engineers

16th Topical Conference on Ethylene Producers 2004

Held at the 2004 AIChE Spring National Meeting

April 25-29, 2004
New Orleans, Louisiana, USA

Volume 1 of 2

Printed from e-media with permission by:

American Institute of Chemical Engineers
16th Topical Conference on Ethylene Producers
2004

TABLE OF CONTENTS

Volume 1

Sessions 54 and 57 - Rotating Machinery Reliability - Impact of Operational Practices

Session 54 Chair: Ed Oberthier

Session 54 Vice Chair: Mike Thuillez

Session 57 Chair: Gampa Bhat

Session 57 Vice Chair: Terry Matthews

54a Online Asset Management Tools for Machinery Systems1
Glenn Poché

**54b Surge- What It Is, Why It Will Damage Your Compressor, and How To Avoid It, with
Discussions on Choke13**
Theodore Gresh, Bruce G Heckel and Brian Spencer

54c Minimum Flaring Impact on Compression System.....50
Greg Dunnells, Kazim Akhtar and David Payne

54d Knowledge-Based Predictive Maintenance For Olefins Turbocompressors58
Constatine Lau and Martin Maier

54e Using Improved Inspection Tooling to Perform Machinery Condition Assessments73
Chris Brown and John R Dugas

57a Rotating Machinery Roundtable - Operational Impacts on Equipment Reliability Discussion.....98
Rotating Machinery Subcommittee

Session 55 - Feedstock Contaminants in Ethylene Plants. How Does Your Plant Measure Up?

Chair: Tom Kopecky

Vice Chair: Marilyn Blaschke

55a Report on Activities of the NOx in Ethylene Recovery Task Group.....99
Dane C Grenoble

55b Feedstock Contaminants in Ethylene Plants - An Update109
Art Baumgartner, Marilyn Blaschke, Steven T Coleman, Robert Kohler and Timm E Paxson

55c Mercury Removal from Cracked Gas and Liquid Streams174
Steve Coleman, Jason Ries, Don Campbell and Keith Clark

55d Adsorbent Reactivity: An Important Factor in Contaminant Removal183
Vladislav I Kanazirev and David L Smith

Session 56 - Ethylene Producers Conference Keynote Address/Ethylene Plant Environmental Issues

Chair: Michael Kennedy

Vice Chair: Bill Turk

56a Ethylene Producers Conference Keynote Address	199
<i>Sally Shaver</i>	
56b The Increased Focus on Episodic Air Emissions in Texas and Louisiana	200
<i>Jennifer Keane</i>	
56c Environmental Self-Analysis and Self-Reporting under Title V and Sarbanes-Oxley	211
<i>Matthew Kuryla and Whitney Swift</i>	
56d Gas Imaging, A New Alternative to Method 21	225
<i>Michael Smylie and Michael Koonce</i>	
56e What Can We Do About HRVOC's?	235
<i>Stephen Lang and Richard Churns</i>	
56f Ethylene Plant Cooling Tower Monitoring and Heat Exchanger Repair Methods	253
<i>Lisa S LeBlanc</i>	
 Sessions 58 and 61 - Ethylene Plant Maintenance - Maintaining Olefins Plant Energy Efficiency	
Session 58 Chair: Steve Bradford	
Session 58 Vice Chair: Larry Bayer	
Session 61 Chair: Larry Bayer	
Session 61 Vice Chair: Thomas Cannon	
58a Energy Efficient Burner Design and Maintenance in the Olefins Industry	265
<i>Darin R Foote</i>	
58b Utilities Leak and Steam Trap Inspection and Repair Program	276
<i>David B Johnston</i>	
58c The Use of Torque Meters for Monitoring Turbine/Compressor Performance	289
<i>Louis J Trahan and Lee W Allison</i>	
58d Turbo Machinery Efficiency Gains through Reliability Improvements	304
<i>Patrick J. Cooper</i>	
58e Steam System Optimization	317
<i>Robert Aegerter</i>	
58f Maintaining and Increasing Cooling Tower Efficiency	327
<i>James L Willa</i>	
58g Maintenance and Energy Economics	341
<i>Claire Cagnolatti</i>	
61a Ethylene Plant Maintenance- -Maintaining Olefins Plant Energy Efficiency - Roundtable	345
 Session 59 - Olefins Production: Fundamental and Technological Aspects: Creativity and Technological Innovation	
Chair: Gilbert Froment	
Vice Chair: Martin Carrera	
59a Propylene: Olefin of the Future?	346
<i>Jeffrey S Plotkin</i>	
59b Options for Meeting Propylene Supply-Demand Gap	348
<i>Robert B James, Dan Wei, Jim Andersen and Walter Vermeiren</i>	

59c MTP Progress with Focus on DME	358
<i>Waldemar W Liebner</i>	
59d Planning and Designing the Modernization of the Recovery Area of a Flexible Cracker	366
<i>Andre Bernard and Richard Hayden</i>	
59e Improve Butadiene Recovery with the KLP™ Process	374
<i>T. D Foley, S. L Krupa, B. G Cho and S. A McColl</i>	
59f Coking Prediction Capability Enhances Steam-Cracker Economics	383
<i>Bernard Descales, Nicolas Sumian, Erin M Surdo, Philippe Mouille and Brian Cooke</i>	

Volume 2

Session 60 - Ethylene Plant Operations

Chair: Matthew A Taylor

Vice Chair: Brenda Donnelly

60a Ethylene Plant Start-up Strategy for Flaring Minimization	393
<i>Sasha Vragolic</i>	
60b Erosion/Corrosion Failure of Compressor Interstage Coolers in an Ethylene Plant	403
<i>Luiza M Jorge, George Nowowiejski and Jose Antonio C Cunha</i>	
60c Troubleshooting a Cooling Water System with a Rigorous Flow and Pressure Network Model	409
<i>André Bernard</i>	
60d Repeat Issues With a High Pressure Steam Control Valve	420
<i>Brian D Baca</i>	
60e F-P3-1180 Furnace Failure	426
<i>Bryce Kagay</i>	
60f Auto-Refrigeration and Brittle Fracture Analysis of Existing Olefins Plants - Identification of Potential Excursions	433
<i>Ralph E King</i>	
60g EEPCC Working Group-Issue Group: Operator Training	455
<i>Howard S Kruman, K. Funk</i>	

Session 62 - Ethylene Plant Safety

Chair: Gary Lovetinsky

Vice Chair: Ray Stroud

62a Implementation of the Hazards and Effects Management Process (HEMP)	491
<i>Mark Siddoway and Natalie Salter</i>	
62b Pipeline Integrity Management Program Implementation Obstacles	503
<i>Reggie Harris</i>	
62c Safety Instrumented System Design for a Grassroots World Scale Ethylene Complex	508
<i>Alastair Anderson and Mark M Moderski</i>	
62d Software Upgrade Triggers Events that Lead to Plant Shutdown	526
<i>David Gent</i>	
62e Morris Plant Furnace Start-Up Incident & Lessons Learned	549
<i>Bala S. Devakottai, Denise R Karstensen and Bruce R. Raeburn</i>	

62f Flare Line Failure Case, What Have We Learned?556
Abram Kuo and Ryan Pitt

**Sessions 63 and 64 - Ethylene Plant Technology - Furnace Burner Technology Review
and Roundtable**

Chair: Chris Wallsgrove

Vice Chair: Chell Chellappan

63a Burners: Where We Are and How We Got Here576
R. Waibel

63b Flame Rollover and Other Flame Shape Problems577
Ron Just

63c The Impact of NOx Regulation on the U.S. Ethylene Industry585
Vikki Medley

**63d/64a The Latest Generations of Ethylene Furnace Burners . A Market Perspective From
Vendors600**
Scott Reed, Doyle Bishop, Michael Wignal, John Grever and Ashok Patel

64b Commercialization of Ultra-low NOx Burners for Ethylene Heaters601
*Robert J. Gartside, Peter R Ponzi, Frank D. McCarthy, S.G.(Chell) Chellappan, Paul J. Chapman
and R.T. Waibel*

64c Furnace Burner Open Forum/Roundtable602
Furnace Burner Roundtable

Session 65 - Ethylene Plant Process Control

Chair: R. Donald Bartusiak

Vice Chair: James E Hackney

**65a Optimising Ethylene Plant Production Using Model Predictive Control and Dynamic Real Time
Optimization611**
Michael Boell, Rob Vasbinder and Nic Castelijns

65b Alternate Methods of Process Model Identification: Benzene Distillation628
Sasha Vragolic

65c Furnace Optimizer in a Naptha Cracker639
Hitoshi Shindo, Kheng Lau, Ryugi Kaneko and John S Ayala

65d After the Alarm Rationalization - Managing the DCS Alarm System650
Jamie Errington, Tim DeMaere and Dal Vernon Reising

**65e Maximizing the Yield and Throughput of Ethylene Plants Through Advanced Turbomachinery
Constraint Control Systems666**
*Krishnan Narayanan, Anurag Gupta, Paul Fisher, Jagadeesan Kumar, Sankara Ramakrishnan
and Khalid N Al-Rushoud*

65f Implementation of Alarm Management Software in a DCS-controlled Ethylene Plant688
Doug Rode, Karim Moti, Allen Monholland and Richard Bykowski

Session 66 - Ethylene Plant Technology - Advances in Distillation Technology for Ethylene Plants

Chair: Steven Borsos

Vice Chair: Brian Bahr

66a Design Guidelines for Distillation Columns in Fouling Service	698
<i>Karl Kolmetz, Andrew W Sloley, Timothy M Zygula, Wai Kiong Ng and Peter W Faessler</i>	
66b Developments in Splitter Revamps	730
<i>Waldo de Villiers, Jose Bravo, Peter Wilkinson and Daniel Summers</i>	
66c Hydraulic Analysis is Key to Effective Low-Cost Demethanizer Debottleneck	741
<i>Steven P Bellner, Bill Ege and Henry Z Kister</i>	
66d Divided Wall Technology for Butadiene Extraction.....	752
<i>Robert J Brummer and Bernd Heida</i>
