

American Institute of Chemical Engineers

# Topical Conference on Distillation 2007

Held at the 2007 AIChE Spring National Meeting

April 22-27, 2007  
Houston, Texas, USA

## TABLE OF CONTENTS

### Session 6 – Energy Savings and Process Innovations: Continuing the Heritage of Kunesh, Sakata and Zuiderweg

|                                                                                                                  |    |
|------------------------------------------------------------------------------------------------------------------|----|
| Energy-Saving Distillation through Internal Heat Exchange (HIDiC): Overview of a Japanese National Project ..... | 1  |
| <i>Shuzo Ohe</i>                                                                                                 |    |
| Unfixed Wall: the Key to a Breakthrough in Dividing Wall Column Technology .....                                 | 17 |
| <i>Bjoern Kaibel, Julius Montz</i>                                                                               |    |
| Inside-Out Approach for Optimizing Distillation Design .....                                                     | 18 |
| <i>Darius Remesat</i>                                                                                            |    |
| Guidelines for BTX Distillation Revamps .....                                                                    | 33 |
| <i>Karl Kolmetz, Joseph C. Gentry, C.S. Kumar, Jeff N. Gray</i>                                                  |    |
| Liquid Continuous Distillation .....                                                                             | 34 |
| <i>Frank Seibert, J. Christopher Lewis, James Fair</i>                                                           |    |
| New Energy-Efficient and Low-Cost Multicomponent Distillation Configurations .....                               | 35 |
| <i>Arun V. Giridhar, Rakesh Agrawal, Venkat Venkatasubramanian</i>                                               |    |
| Energy Saving by Integration of Refining and Petrochemical Plant .....                                           | 36 |
| <i>Tadao Matsumoto</i>                                                                                           |    |
| Separation of P-Diethylbenzene from the Binary Diethylbenzene Mixture by Distillative Freezing .....             | 37 |
| <i>Lie-Ding Shiau, Keng-Fu Liu</i>                                                                               |    |

### Session 28 – Advances in Refinery Distillation: Continuing the Heritage of Kunesh, Sakata and Zuiderweg

|                                                                                                                                       |    |
|---------------------------------------------------------------------------------------------------------------------------------------|----|
| Crude Unit Overhead Corrosion at Sincor .....                                                                                         | 38 |
| <i>German A. Luna Sr.</i>                                                                                                             |    |
| Tower Internals Modifications Improve Performance of Atmospheric Crude Tower .....                                                    | 39 |
| <i>Pat Quotson</i>                                                                                                                    |    |
| A CFD Study Comparing Different Feed Nozzle Arrangement within an Empty Spray Section in a Coker Fractionator.....                    | 40 |
| <i>Karolline Ropelato, Leonardo Rangel, Edson R. Marins, Washington de O. Geraldelli</i>                                              |    |
| Systematic Field Tests Turn Loss into Gain in High-Capacity Trays .....                                                               | 41 |
| <i>Henry Z. Kister, Neasan O'Shea, Dan Cronin</i>                                                                                     |    |
| Preflash Drum When Processing Heavy Oils: Paradox or Reality? .....                                                                   | 60 |
| <i>Silvia Waintraub, Raquel Coutinho, Rogerio Espósito</i>                                                                            |    |
| Aromatics Extraction in a Single Column to Meet the Demands for Aromatics Production and Benzene Reduction in the Gasoline Pool ..... | 74 |
| <i>Lars Sullivan</i>                                                                                                                  |    |
| Debottlenecking a FCC Gas Plant with Ultra System Limit Consep Trays .....                                                            | 75 |
| <i>Giuseppe Mosca, Andrew Hausman, Peter Wilkinson, Norman Burcher, Nicholas Alsop</i>                                                |    |

|                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Spray Section Performance Analysis: an Experimental Approach .....</b>                                                                                    | 76  |
| <i>Andre D. Quelhas, Antonio V. Castro, Glaucia A. Torres, Silvia Waintraub, Braz Marino<br/>Zanutto, Fernando De Carli</i>                                  |     |
| <b>Session 54 – New and Exciting Dynamics and Control Applications:<br/>Continuing the Heritage of Kunesh, Sakata and Zuiderweg</b>                          |     |
| <b>Smart Plants, Smart Distillation .....</b>                                                                                                                | 78  |
| <i>Jimmy L. Humphrey, Christopher Lewis, Frank Seibert</i>                                                                                                   |     |
| <b>Column Instrumentation Basics: Understanding Accuracy and Sources of Error</b>                                                                            |     |
| <b>Part 1 .....</b>                                                                                                                                          | 79  |
| <i>Ruth Sands</i>                                                                                                                                            |     |
| <b>Improving the Efficiency and Reliability of Distillation Model-Predictive Control Projects .....</b>                                                      | 80  |
| <i>Umesh Mathur, Mike Morshedi, Victor L. Rice, Robert D. Rounding, Daniel R. Webb, Robert J. Conroy</i>                                                     |     |
| <b>Two-Phase-Flow and Stress on Internals during Pressure Relief Events on Distillation Columns: Experimental Investigation and Dynamic Simulation .....</b> | 82  |
| <i>Daniel Staak, Jens-Uwe Repke, Gunter Wozny</i>                                                                                                            |     |
| <b>Improve Column Control by Modifications to Temperature Control Strategies.....</b>                                                                        | 85  |
| <i>Ruth Sands, Ken Jackson, Jim England</i>                                                                                                                  |     |
| <b>Control of a Batch Distillation Column .....</b>                                                                                                          | 86  |
| <i>Hongbin Dong, Jim Riggs</i>                                                                                                                               |     |
| <b>Column Instrumentation Basics: Understanding Accuracy and Sources of Error</b>                                                                            |     |
| <b>Part 2 .....</b>                                                                                                                                          | 87  |
| <i>Ruth Sands</i>                                                                                                                                            |     |
| <b>Energy Use in Distillation Operation: Nonlinear Economic Effects .....</b>                                                                                | 88  |
| <i>Douglas C. White</i>                                                                                                                                      |     |
| <b>Session 78 – Standard and High-Capacity Trays:<br/>Continuing the Heritage of Kunesh, Sakata and Zuiderweg</b>                                            |     |
| <b>The Effect of Hole Size on Sieve Tray Performance.....</b>                                                                                                | 89  |
| <i>Mitch Sakata, T. Yanagi, D.W. King, Tony Cai, G.X. Chen</i>                                                                                               |     |
| <b>High Capacity Tray Revamp of a C2 Splitter.....</b>                                                                                                       | 90  |
| <i>Daniel R. Summers, Andre Bernard, Waldo E. De Villiers</i>                                                                                                |     |
| <b>Increasing the Capacity and Lowering the Energy Consumption of a Paraffin Fractionation Tower.....</b>                                                    | 91  |
| <i>Greg Spencer, Izak Nieuwoudt</i>                                                                                                                          |     |
| <b>The Effect of Open Area on Sieve Tray Performance .....</b>                                                                                               | 92  |
| <i>Mitch Sakata, T. Yanagi, A. Shariat, Tony Cai, G.X. Chen</i>                                                                                              |     |
| <b>Hydraulic Investigations to Increase the Capacity of Trays in Distillation Columns .....</b>                                                              | 93  |
| <i>M. Jodecke, T. Friese, G. Schuch</i>                                                                                                                      |     |
| <b>Parallel Flow Trays.....</b>                                                                                                                              | 100 |
| <i>Ping Xu, Brian Nowak, Kevin Richardson, Bob Miller</i>                                                                                                    |     |
| <b>Improving Efficiency of Multiple Downcomer Tray Performance by Various Tray-structure Modification .....</b>                                              | 101 |
| <i>Kejian Yao, Lianghua Wang, Lingyu Zhu, Xiaomei Yu</i>                                                                                                     |     |
| <b>Study on Two-phase Flow in Tray Downcomers - Backmixing and Choking tests .....</b>                                                                       | 116 |
| <i>Xiaomei Yu, Lingyu Zhu, Kejian Yao</i>                                                                                                                    |     |

## **Session 98 – New and Exciting Packing Applications: Continuing the Heritage of Kunesh, Sakata and Zuiderweg**

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| <b>The Performance of Random Packing for High Pressure Distillation Systems .....</b>                         | 121 |
| <i>John Kunesh, Frits Zuiderweg, Tony Cai, A. Shariat, D.W. King, G.X. Chen</i>                               |     |
| <b>Reaching New Performance Levels with Surface Enhanced Raschig Super-Pak<br/>Structured Packings .....</b>  | 122 |
| <i>Michael Schultes, Simon Chambers</i>                                                                       |     |
| <b>Experimental Characterization of High Performance Montz Structured Packings.....</b>                       | 123 |
