Inverse Problems in Applied Sciences: Towards Breakthrough
2006

TABLE OF CONTENTS

Integral Equations of the First Kind, Inverse Problems and Regularization: a Crash Course 1
C W Groetsch

Calderón's Inverse Problem with an Imperfectly Known Boundary in Two and Three Dimensions 33
Ville Kolehmainen, Matti Lassas, Petri Ola

Uniqueness and Numerical Methods in Inverse Obstacle Scattering 43
Rainer Kress

Carleman Estimates for the One-dimensional Heat Equation with Non-smooth Coefficients and Applications 59
A Benabdallah, Y Dermenjian, J Le Rousseau

Exponential Instability for Inverse Elliptic Problems with Unknown Boundaries 67
Michele Di Cristo, Luca Rondi

Integral Equation Models for the Inverse Problem of Biological Ion Channel Distributions 85
D A French, C W Groetsch

Application of Multiple-precision Arithmetic to Direct Numerical Computation of Inverse Acoustic Scattering 95
Hiroshi Fujiwara, Yuusuke Iso

Magnetic Tomography for Fuel Cells—Current Status and Problems 104
Karl-Heinz Hauer, Roland Potthast

Identification of Viscoelastic Properties by Magnetic Resonance Elastography 121
Nobuyuki Higashimori

Virtual Signal in the Heat Equation and the Enclosure Method 127
Masaru Ikehata

The Inverse Conductivity Problem with Limited Data and Applications 141
Victor Isakov

An Inverse Problem in Advection-diffusion 150
Yutaka Kamimura

On the Conductivity Imaging by MREIT: Available Resolution and Noisy Effect 170
J J Liu, J K Seo, M Sini, E J Woo

Recovering Two Constants in a Linear Parabolic Equation 185
Alfredo Lorenzi

Numerical Method for an Inverse Dynamical Problem for Composite Beams 200
Antonino Morassi, Gen Nakamura, Kenji Shirota, Mourad Sini

A Reconstruction Formula for an Inverse Problem for a One-dimensional Multilayer Medium 220
Sei Nagayasu, Gen Nakamura

Direct Computation of Harmonic Moments for Tomographic Reconstruction 237
Takaaki Nara, Nobutaka Ito, Tomonori Takamatsu, Tetsuya Sakurai

Stability Results for a Reaction-diffusion System with a Single Measurement 246
Hichem Ramoul, Patricia Gaitan, Michel Cristofol

Applications of Tikhonov Regularization to Inverse Problems Using Reproducing Kernels 252
Saburou Saitoh

Recovering First Order Terms from Boundary Measurements 264
Mikko Salo

Remark on Inverse Scattering for the Schrödinger Equation with Cubic Convolution Nonlinearity 282
Hironobu Sasaki

Reconstruction of the Measurable Sets in the Two Dimensional Plane by Two Projections 289
Takashi Takiguchi

Perturbation of Rayleigh Waves in Anisotropic Media 305
Kazumi Tanuma, Chi-Sing Man

Reconstruction of Discontinuities in Systems 322
Gunther Uhlmann, Jenn-Nan Wang

A Remark on Inverse Scattering for Time Dependent Hartree Equations 331
M Watanabe
