

2008 4th International Conference on Mobile Ad-hoc and Sensor Networks

(MSN 2008)

**Wuhan, China
10 – 12 December 2008**

**IEEE Catalog Number: CFP0830F-PRT
ISBN: 978-1-4244-4093-1**

The 4th International Conference on Mobile Ad-hoc and Sensor Networks

MSN 2008

Table of Contents

A Welcome from the Technical Program Chairs

Organizing Committee

Program Committee

Probabilistic Analysis

Connectivity in Multi-radio Multi-channel Wireless Mesh Networks	1
<i>Huang Chuan and Zheng Baoyu</i>	
Power of Discrete Nonuniformity - Optimizing Access to Shared Radio Channel in Ad Hoc Networks	9
<i>Jacek Cichoń, Mirosław Kutylowski, and Marcin Zawada</i>	
Three Dimensional Intrusion Objects Detection under Randomized Scheduling Algorithm in Sensor Networks	16
<i>Yanping Zhang, Yang Xiao, Kui Wu, Xiaojiang Du, and Bo Sun</i>	

Power Control

Energy Efficient Topology Control Algorithms for Variant Rate Mobile Sensor Networks	23
<i>Jianbo Li, Liusheng Huang, and Mingjun Xiao</i>	
Hector is an Energy Efficient Tree-Based Optimized Routing Protocol for Wireless Networks	31
<i>Nathalie Mitton, Tahiry Razafindralambo, David Simplot-Ryl, and Ivan Stojmenovic</i>	
A Multi-channel and Power Controlled Based AODV for Throughput Improvement in Multi-hop Ad Hoc Networks	39
<i>Carine Toham, François Jan, and Andrzej Duda</i>	

Security and Privacy II

Secure Opportunistic Data Retrievals in Challenged Environments	47
<i>M. Chuah and R. Metzger</i>	
Signature Scheme with Arbitrary Length Message Recovery in CPK	55
<i>Chen Yong-gang, Jia Chun-fu, Lv Shu-wang, and Chen Hui-yan</i>	

RFID and Information Security in Supply Chains	59
<i>Gaurav Kapoor, Wei Zhou, and Selwyn Piramuthu</i>	
SMNDP: A Practical and Provably Secure Multi-path Source Routing	63
<i>Feng Tao, Guo Xian, and Ma Jian-Feng</i>	
Coverage and Connectivity	
Sensor Deployment Strategy for Collaborative Target Detection with Guaranteed Accuracy	68
<i>Zhaohui Yuan and Gaofeng Wang</i>	
Connectivity Based Greedy Algorithm with Multipoint Relaying for Mobile Ad Hoc Networks	72
<i>Yongsheng Fu, Xinyu Wang, Wei Shi, and Shanping Li</i>	
A Gossip-Enabled Spatial Index for Moving Object Management over Wireless Sensor Networks	77
<i>Chao-Chun Chen, Chiang Lee, and Yen-Liang Liu</i>	
Routing Protocols	
Efficient Interdomain Multicast Delivery in Disruption Tolerant Networks	81
<i>P. Yang and M. Chuah</i>	
Routing Protocol Using Bloom Filters for Mobile Ad Hoc Networks	89
<i>Tomoyuki Osano, Yoshitaka Uchida, and Norihiro Ishikawa</i>	
Interference-Aware QoS Routing in Wireless Mesh Networks	95
<i>Zhen Xu, Chuanhe Huang, and Yong Cheng</i>	
A Multi-metric QoS Routing Method for Ad Hoc Network	99
<i>Jing Cao and Wei Wu</i>	
Mobility Management	
NEMO-Based Multiple Interfaces Scheme between Overlay Heterogenous Access Networks	103
<i>Xiaohua Chen, Huachun Zhou, Yajuan Qin, and Hongke Zhang</i>	
Speed-Based Probability-Driven Seamless Handover Scheme between WLAN and UMTS	110
<i>Zhiwei Yan, Huachun Zhou, Hongke Zhang, and Sidong Zhang</i>	
A Tracking Range Based Ant-Colony Routing Protocol for Mobile Wireless	116
<i>Yan Luo, Yun Xu, Liusheng Huang, and Hongli Xu</i>	
Security and Privacy II	
Key Establishment in Multi-core Parallel Systems	122
<i>Meikang Qiu and Jing Deng</i>	
An Authentication Protocol for Proxy Mobile IPv6	129
<i>Huachun Zhou and Hongke Zhang</i>	
A Distributed Lightweight Group Rekeying Scheme with Speedy Node Revocation for Wireless Sensor Networks	137
<i>Zeng Wei-ni, Lin Ya-ping, and Liu Yong-he</i>	

On-Demand Anonymous Routing with Distance Vector Protecting Traffic Privacy in Wireless Multi-hop Networks	145
<i>Daisuke Takahashi, Xiaoyan Hong, and Yang Xiao</i>	

Topology Control

Design of Infrastructure Wireless Mesh Networks: Formulations and Solutions	152
<i>Ahmed Beljadid, Abdelhakim Hafid, and Michel Gendreau</i>	
Topology Control for Throughput Optimization in Wireless Mesh Networks	161
<i>Deying Li, Baobing Wang, and Xiaohua Jia</i>	
Optimal Selection of Aggregation Nodes in Sensor Networks with Time Delay Constraint	169
<i>Bo Sun, Sui-Xiang Gao, and Zhi-Peng Jiang</i>	

Geographic Routing

Hybrid Position-Based Routing Algorithms for 3D Mobile Ad Hoc Networks	177
<i>Song Liu, Thomas Fevens, and Alaa Eddien Abdallah</i>	
A Holistic Routing Protocol Design in Underground Wireless Sensor Networks	187
<i>Di Wu, Renfa Li, and Lichun Bao</i>	
On Design of Mobile Agent Based Location Service for Geographic Routing	195
<i>Yang He, Yuanxin Ouyang, Yunlu Liu, and Zhang Xiong</i>	

Reliable Routing

A Path Reliable Routing Protocol in Mobile Ad Hoc Networks	203
<i>Wei Tang and Wei Guo</i>	
Adaptive Algorithms to Mitigate Inefficiency in Reliability Differentiation Mechanisms for Wireless Sensor Networks	208
<i>Zeng Yong, Ma Jianfeng, Dong Lihua, Pang Liaojun, and Guo Yuanbo</i>	
Geography-Aware Fume Diffusion Spotting in Sensor Networks	212
<i>Xiaoning Cui, Qing Li, and Baohua Zhao</i>	

System and Applications

MTreeTV: A Hybrid Video Broadcast Architecture	219
<i>He Lei, Ma Xiangjie, Zhang Weili, Guo Yunfei, and Ma Hailong</i>	
An Indoor Sensor Network System for Pursuit-Evasion Games	227
<i>Zhenning Li, Hongbin Li, Fan Zhang, Jiming Chen, and Youxian Sun</i>	
LACONIC: History-Based Code Dissemination in Programmable Wireless Sensor Networks	234
<i>Seungki Hong, Yeon Jun Choi, Yang Yu, and Loren J. Rittle</i>	

Broadcasting and Multicasting

Linear Optimal Hierarchical Multicast Tree Algorithms for P2P Database	242
<i>Qingfeng Fan, Frédéric Magoules, Qiongli Wu, and Yanxiang He</i>	
Analysis of Link Error in Reducing Broadcasting Redundancy of MANET AAPs	250
<i>Sang-Chul Kim</i>	

Interference-Aware Broadcast Scheduling in Wireless Networks	258
<i>Gruia Călinescu and Sutep Tongngam</i>	

Network Management

Active Protection in Wireless Networking	267
<i>Ming Lei, Yang Xiao, and Susan V. Vrbsky</i>	

LCO-MAC: A Low Latency, Low Control Overhead MAC Protocol for Wireless

Sensor Networks	271
<i>Kien Nguyen and Yusheng Ji</i>	

A Congestion Avoidance and Performance Enhancement Scheme for Mobile Ad Hoc

Networks	276
<i>Chen Chen, Qingqi Pei, and Jianfeng Ma</i>	

Medium Access Control

GENTLE: Reducing Reader Collision in Mobile RFID Networks	280
<i>Jieun Yu and Wonjun Lee</i>	

Versatile Model Architecture for Multi-channel MAC Simulation in NS2	288
<i>Gengyu Wei and Dongmei Zhang</i>	

Characteristics of Frame Traffic in 802.11 Wireless Networks	295
<i>Xiaohu Ge and Yang Yang</i>	

Author Index
