TABLE OF CONTENTS

International Symposium on Liquid Metal Processing and Casting

Dedication
Foreword
Committees

International Symposium on Liquid Metal Processing and Casting

VAR Process

Numerical Simulation of the Thermal Behaviour of the Primary Material in Remelting Processes: Applications to VAR and EBM and Experimental Validation	3
<i>J. Bellot, P. Zabeti, H. Mir, J. Jourdan, P. Chapelle, and A. Jardy</i>	
Calibration of a Simulation Model for VAR with Respect to the Influence of Helium Cooling.....	13
<i>J. Terhaar, M. Maurischat, N. Blaes, D. Bokelmann, and K. Kelkar</i>	
A Unified 3D Model of the VAR Process	21
<i>V. Bojarevics, K. Pericleous, G. Djambazov, and M. Ward</i>	
Behaviour of Hard- α Inclusions in the Liquid Pool of a VAR Titanium Ingot	29
<i>G. Ghazal, A. Jardy, P. Chapelle, and Y. Millet</i>	
Multiscale Modeling of the Onset of Freckle Formation during VAR.....	39
<i>L. Yuan, G. Djambazov, K. Pericleous, and P. Lee</i>	
An Analysis of the Use of Magnetic Source Tomography to Measure the Spatial Distribution of Electric Current during VAR	47
<i>B. Nair, and R. Ward</i>	
New Methods of VAR Process Control: Technical Challenges	57
<i>R. Williamson</i>	
A New Optical Emission Monitor for VAR	65
<i>R. Aikin, and R. Williamson</i>	
Characterizing Arc Motion and Distribution during VAR	75
<i>R. Woodside, and P. King</i>	
On the Origin of the White Spot Defect in Vacuum Arc Remelted Ingots	85
<i>F. Shved</i>	

Solidification

Comparison between Temperature- and Enthalpy-Based Formulations for the Energy Transport Equation in Solidifying Multi-Component Systems	97
<i>V. DeFelice, A. Jardy, and H. Combeau</i>	
Structure Refinement by a Liquid Metal Cooling Directional Solidification Process for Single Crystal Nickel-Base Superalloys	107
<i>C. Brundidge, T. Pollock, and D. VanDrasek</i>	
Heat Extraction and Dendritic Growth in the Liquid Metal Cooling (LMC) Directional Solidification Process.....	119
<i>J. Miller, and T. Pollock</i>	
High Thermal Gradient Directional Solidification with Liquid Metal Cooling and Its Application in the Processing of Nickel-Based Superalloys	127
<i>L. Liu</i>	

Steel Processing

Manganese and Phosphorous Distribution Equilibrium between Converter Slags Saturated with 2CaO·SiO ₂ and MgO and Low Manganese Steel	137
<i>Z. Chen</i>	
Mathematical Modeling of Two Phase Flow in a RH Degasser.....	143
<i>R. Tavares, C. Carneiro, and R. Reis</i>	
Simulation of Non-Metallic Inclusions Formation during Liquid Steel Reoxidizing	151
<i>A. Alexeenko, and E. Baybekova</i>	
Modeling Solidification and Slag Infiltration during Continuous Casting of Slabs.....	159
<i>P. Lopez, P. Lee, and K. Mills</i>	
Development of Flow Modifiers for the Mold to Reduce the Intermixing Length in Slab Casting	169
<i>R. Tavares, R. Elias, F. Torres, and F. Policarpo</i>	
Kinetic Model of Hot Metal Dephosphorization in a Torpedo Car	177
<i>Z. Chen</i>	
Physic-Chemical Model of Degassing and Simulation of Metal Foam Formation at Vacuum Treatment.....	183
<i>L. Kamkina, G. Stovpchenko, Y. Yakovlev, and O. Velichko</i>	
The Study of the Macrosegregation in Heavy Steel Ingots	191
<i>B. Sang, D. Liu, X. Kang, and D. Li</i>	

ESR Process

Bounds on Model Parameters for Computational Analysis of the ESR Process.....	201
<i>A. Patel, and M. Gierula</i>	
Couple Modeling of Electromagnetic, Fluid Flow and Heat Transfer in Slag Bath during Current-Conductive Mould ESR process.....	213
<i>F. Liu, Z. Jiang, X. Zang, and X. Geng</i>	
Estimation of Electroslag Remelting Process with an Unscented Kalman Filter.....	225
<i>J. Beaman, and S. Ahn</i>	
Numerical and Experimental Investigations on the ESR Process of the Hot Work Tool Steel W300.....	235
<i>A. Kharicha, W. Schutzenhofer, A. Ludwig, and R. Tanzer</i>	
Thermophysical Properties of ESR Electrofluxes (Part 1: Density).....	243
<i>S. Akbari, J. Reitz, and B. Friedrich</i>	
On Nitrogen Pick-up during Pressure-ESR of Austenitic Steels.....	253
<i>A. Patel, J. Reitz, J. Magee, R. Smith, G. Maurer, and B. Friedrich</i>	
Electroslag Remelting of Steels with Inoculation.....	265
<i>M. Chatterjee, and P. Sarkar</i>	
New Plant Concepts for the Production of Large Size ESR Ingots.....	273
<i>H. Holzgruber, A. Scheriau, and B. Rinnerhofer</i>	
Modeling of the ESR Ingot Enlargement.....	287
<i>L. Medovar</i>	
PESR Processing of TiAl-Electrodes Made by Aluminothermic Reduction.....	295
<i>B. Friedrich, J. Reitz, T. Mionskowski, and J. Stoephasius</i>	
Quick Determination of Total Fluoride in Electroslag Refining Fluxes.....	303
<i>K. Wroblewski, J. Fields, J. Fraley, R. Werner, and S. Rudoler</i>	
Investigation on Solidification Quality of Industrial-Scale ESR Ingot.....	309
<i>Y. Dong, Z. Jiang, and Z. Li</i>	

Process Optimization and Novel Techniques

Levitated Liquid Droplets in AC and DC Magnetic Field.....	319
<i>V. Bojarevics, S. Easter, and K. Pericleous</i>	
Freckling Tendencies of Ni-Base Superalloys.....	327
<i>K. Kajikawa, T. Sato, and H. Yamada</i>	

Modeling of Macro-Segregation in a Permanent Mold Casting.....	337
<i>L. Nastac, A. Patel, and G. Maurer</i>	
Thermoelectromagnetic Convection - An Alternative Stirring Technique in Metallurgy.....	345
<i>A. Cramer, X. Zhang, and G. Gerbeth</i>	
The Use of Smooth Particle Hydrodynamics to Model Dross Formation during Crucible Tipping of Aluminum Melts	353
<i>J. Taylor, M. Prakash, G. Pereira, and P. Rohan</i>	
New Measurement Protocol for Modulated Calorimetry Using Electromagnetic Levitation	363
<i>J. Etay, and P. Schetelat</i>	
Physical and Mathematical Model of Aluminium Refining Process in the URC - 7000 Reactor	371
<i>M. Saternus, and J. Botor</i>	
Precious Metal Recovery from the Used Auto Catalytic Converters	381
<i>A. Fornalczyk, and M. Saternus</i>	
New Approaches for Recycling of Aluminum Scraps.....	389
<i>J. Cui, and H. Roven</i>	
The Mechanical Properties and Corrosion Resistance of Cast and Wrought Hastelloy C are Significantly Enhanced When the Unwanted Complex Carbides are Removed through a Dissolution Process	397
<i>G. Calboreanu</i>
