TABLE OF CONTENTS

Succeeding through Alliances: A Business Strategy 1
Anthony Nickens

The Soft Side of Innovation: Five Things Engineers Need to Know and Do for Corporate Success 2
Jeff Lindsay

New Chemical Introduction at Lubrizol 6
Frank Van Lier

Improvisation Techniques for Chemical Process Innovation 7
Peter J. Ludovice, Lew Lefton, Richard Catrambone

Chemical Product Design Course at Carnegie Mellon University 9
Nick Sahinidis, Apurva Samudra

A Product Design Capstone Course in the Chemical Engineering Undergraduate Curriculum at SUNY-Buffalo 10
Paschalis Alexandridis

Using Process Simulation for Technology Transfer and Process Facility Fit 15
Charles Siletti, Demetri Petrides

Technology Transfer in Outsourcing Manufacturing of Specialty Polymers 16
Zhaoyang Ou, Zhen Lai, Chieh-Min Cheng

Technology Transfer of Pharmaceutical Freeze-Dried Sterile Liquid Manufacturing - A Case Study 17
John F. Peragine

Project Management in a Matrix Organization 18
Frank Van Lier

Environmental Law 101 Module 19
Chris A. Paul

Planning, Managing, and Best Practices for Project Procurement 20
Eldon R. Larsen, Paul Jason Dean

Tools and Techniques for Managing Innovation From Beginning to End 29
Jack Hipple, Mukund Karanjikar, Eldon R. Larsen

Finding the Right Ideas 30
Mukund Karanjikar

Choosing the Right Team to Innovate 31
Jack Hipple

Manging Your Innovation Project 34
Eldon R. Larsen

Discussion on Innovation Management 35
Jack Hipple, Mukund Karanjikar, Eldon R. Larsen

Why University-Industry Partnerships Matter 36
Anthony M. Boccanfuso

IP Challenges in University-Industry Collaborations 37
Ken Horton

Managing Multilateral Technology Collaborations at the Institute for Collaborative Biotechnologies 38
David H. Gay

Opening Stem Cell Research and Development: A Policy Proposal for the Management of Data, Intellectual Property, and Ethics 39
Krishanu Saha, David E. Winickoff, Gregory D. Graff

Property Prediction for Lipids Based Product Design and Analysis 44
Carlos Axel Diaz-Tovar, Rafiqul Gani, Bent Sarup

Quantitative Structure-Property Relationship Model for Prediction of IGC_{50} Toxicitiy Potentials 45
K. M. Yerramsetty, B. J. Neely, K. A. M. Gasem

Pseudo-Component Viscoelastic Model of Soft Tissues 46
Upasana Manimegalai Sridhar, Sundararajan. V. Madihally, Russell R. Rhinehart

Design of Biofuel Additives Using Molecular Design Techniques 62
Subin Hada, Charles C. Solvason, Mario Richard Eden

Thermostatic Self-Heating Coffee Cup 64
Michael S. Bolmer

Agro-, Bio-, Chemical- and Energy Conversion - Process Intensifications and Their Applications in Intensified Integrated Plants and Engineered Ecosystems 69
G. Akay

Energy Challenges and the Role of Process Intensification 71
Laurence R. Weatherley
Chemical Looping Processes: An Example for Process Intensification 72
L.-S. Fan
Process Intensification - An Industrial Perspective 73
Ravi Dixit, John Pendergast
Quantitative Structure-Property Relationship Models — A Comparison of Different Methodologies 78
K. M. Yerramsetty, B. J. Neely, K. A. M. Gasem
Characterization Based Chemical Product Design for the Nanoscale 79
Charles C. Solvason, Nishanth Chemmangattuvalappil, Mario Richard Eden
Managing the Complexity in Liquid Formulation Design 82
Elisa Conte, Rafiqul Gani
Use of Aggregation Predictions in the Design of Protein Formulations 84
Brock C. Roughton, Anthony I. Pokphanh, T. Steele Reynolds, J. Laurence, E. M. Topp, K. V. Camarda
Design of Base Fluids for High Pressure/High Temperature Drilling 85
Apurva Samudra, Nick Sahinidis
Structure-Property Relations for the Design of Organic Glasses for Organic Electronics and Nanolithography 87
Richard A. Lawson, Clifford L. Henderson
Analysis of An Air Separation Unit as Part of An IGCC Power Plant 88
Dustin D. Jones, Debangsu Bhattacharyya, Richard Turton, Stephen E. Zitney
Application of Graphical Techniques to Coal Gasification: Analysis of Partial Pressure and Target CO:H_2 and CO_2:H_2 Ratios 89
Lwazi Ngubevana, Diane Hildebrandt, David Glasser
Biomass Catalytic Steam Gasification - Thermodynamics Analysis and Reaction Experiments in a CREC Riser Simulator 90
Enrique Salaices, Benito Serrano, Hugo I. Delasa
Kinetics of High Pressure Biomass Gasification 99
Pradeep K. Agrawal, Kristiina IIsa, Anna Elgqvist, Steven J. Lien, Scott A. Sinquefield
Gasification Fluidized Bed Reactor Modeling 103
Alireza Abbasi, Hugo I. Delasa, Masahiro Kawaji, Paul E. Ege
The Dry Gasification Oxy-Combustion (DGOC) Power Production Process 108
Michael E. Walker, Donald J. Chmielewski, Javad Abbasian, Marco J. Castaldi
Experimentally Validated Model Based Optimization of Filter Drying Process 109
Ekneet Sahni, John Strong, Billie Buzon, Bodhisattwa Chaudhuri
Modeling the Caking Behavior of Corn Distillers Dried Grains with Solubles (DDGS) 111
Rose Prabin Kingsly Ambrose, Klein Ileleji
Understanding Granular Behavior in Designing Solids Processing Equipments 112
Suman K. Hajra, Thomas O'Brien, Chris Guenther
How to Avoid Caking and Moisture Migration in Process Equipment 113
Kerry D. Johanson
Segregation During Pneumatic Conveying of Blended Plastic Pellets 124
Nestor A. Vasquez, Karl Jacob, Parvinder Walia, Alex Voets
Nrel's Integrated Biorefinery Research Facility - Pilot Scale Solids Handling Risk Mitigation 125
Jane Fisher, Dan Schell, Rick Elander, Dave Sievers
Generation of Hydrogen-Rich Syngas through Gasification of Fuel Cane Bagasse in a Downdraft Gasifier 126
C. Andrea Jordan, Ming Tham, Galip Akay
Scale-up of Membranes for Separation of Hydrogen From Syngas for Carbon Capture 127
David H. Anderson, Carl R. Evenson IV, John D. Faull, Douglas S. Jack
Extrapolating Syngas Pilot Plant Data through CFD Modeling 132
Umesh Shah, Kerry J. McKenna, Alex Gorodetsky
Integration and Operation of Pilot Plants in a Commercial Gasification Facility 152
Glenn Shoaf, Paul Fanning, Michael Brannon, Jerry Schlather
Pressurized Oxy-Blown Fluidized Bed Biomass Gasification System 153
Ravi Randhava, Richard Kao
Experience with a Pressurized Fluidized Bed Biomass/Black Liquor Gasifier 160
Kevin J. Whitty, Daniel Sweeney, Brett Christensen
Commissioning of a 500 KW Pressurized Entrained-Flow Coal Gasifier 161
Kevin J. Whitty, Travis Waind, David Ray Wagner

Membranes Technologies for Chemical Processes to Produce Clean Water and Energy, Biofuel and Pharmaceutics 162
T. S. Chung
Microreactor for Industrial Applcation: Technical and Economical Benefits 163
Sergio Pissavini
Design Enhancements of a High Temperature, Ceramic Micro-Channel Heat Exchanger 164
Merrill Wilson, James N. Cutts, Joseph R. Fellows
Toward Low-Cost Fabrication of Microchannel Process Technologies — Cost Modeling for Manufacturing Development 172
Steven D. Leith, Dale A. King, Brian K. Paul
A Compact Integrated Warm Syngas Overall Cleanup System 180
Liyu Li, David L. King, Baowei Chen, Chris Howard
Pyrolysis of Biomass and Coal in a Free Fall Reactor 181
Shaoping Xu
Solar Thermochemical Production of Metal Nitrides and Ammonia Utilizing Transition Metal Reactants 182
Ronald Michalsky, Peter H. Pfromm
Mitigation of Fouling in a Super-Decanter Centrifuge 183
Akiya Kuboyama, Hirofumi Inokuchi, Christianto Wibowo
Challenges in Low Temperature Process Design 184
Danahe Marmolejo-Correa, Truls Gundersen
Exergy-Analysis Based Refrigeration System Synthesis at Ethylene Plants 186
Jian Zhang, Yanqin Wen, Qiang Xu
Fully Automatic Computer-Aided Design and Synthesis of Complex Separation Networks 187
Seon B. Kim, Andreas A. Linninger
Comparison of Mixing in Rocking Reactors and a Laboratory Dyeing Reactors 188
Srinivas Hanumansetty, Edgar O. Rear
Optimal Synthesis and Design of Three-Phase Separator for Upstream Oil and Gas Processes 189
Rajab Khalilpour, Ali Abbas
Challenges in Developing A Bilayer Tablet 190
Admassu Abebe, Ilgaz Akseli, Kyle Martin, Omar Sprockel, Alberto Cuitino
Fundamental Concepts and Practical Experimentation on Multi-Layer Tablets 191
Adam Procopio, Katherine Chin, Larrry Rosen, Antonios Zavaliangos
On the Structural Integrity of Bilayer Tablets Upon Ejection 192
Antonios Zavaliangos, Gerald Klinzing, Adam Procopio
Mechanistic Characterization of Bilayer Tablets .I: The Role of Pre-Compaction and Compaction Forces 193
Ilgaz Akseli, Admassu Abebe, Omar Sprockel, Alberto Cuitino
Mechanistic Characterization of Bilayer Tablets. II: The Effect of Layer Sequence and Fracture Surface Topography 194
Ilgaz Akseli, Admassu Abebe, Omar Sprockel, Alberto Cuitino
Innovative Tablet Technology for Pharmaceutical Drug Delivery 196
Rich Ferreira
Real-Time Monitoring of Nucleation and Growth Rates in An Industrial Semi-Batch Sugar Crystallizer 197
Terry P. Redman, Greg Golovanoff, Wayne Genck
Apply PAT to the Definition of Design Space to Enable the Control Strategy for Crystallization Processes 198
George Zhou, Aaron Moment, Angela Spartalis, Sean Harrington, Shane Grosser, Marguerite Mohan, Naijun Wu, Ganeshwar Prasad, Tseng-En Hu, Paul Fernandez, John Higgins
Automated Crystallization Platform: Integrating Hardware, Software, and PAT to Expedite the Process of Crystallization Development 199
Amanda Rogers, Jacob Albrecht, James Vernille, Jose Tabora, Francesco Ricci, Mitsuko Fujiwara, Richard D. Braatz
Characterization of Flash Crystallization Process Using PAT 200
Barbara Wood, Brian Glennon
Crystallization Scale-up with Process Analytical Technologies — Ensuring Success From the R&D Lab to the Manufacturing Plant 201
Terry P. Redman, Ben Smith, Des O'Grady
Direct Measurement of Length and Orientation of Microfibers in Solution 218
Taslima Khanam, Nurur Rahman Mohammad, Arvind Rajendran, Vinay Kariwala, Anand K. Asundi

Application of a Synthesis and Design Methodology Incorporating Process Intensification 220
Philip Lutze, Rafiqul Gani, John M. Woodley
New Optimization-Based Approach to Process Synthesis — towards the Full Integration of Process Design, Operation and Control 222
Nikola Nikacevic, Adrie Huesman, Paul Van Den Hof, Andrzej Stankiewicz
Coupled Isothermal Continuous Preferential Crystallization (CIC-PC) — A Novel Promising Technology for Gaining Pure Enantiomers with High Productivity 225
Andreas Seidel-Morgenstern, Martin Peter Elsner
Permeation, a Process Intensification Tool in Methyl Acetate Synthesis 229
Thomas Winkler, Susanne Lux, M. Siebenhofer
Characterization of Microwave Assisted Melting of Metals 230
Ramanathan Srinivasan, Tanmay Basak, Chandrasekaran Sekaran
High Throughput Experimentation in Process Research Utilizing the Protasis "One Minute NMR" System 231
Carrie Brockway Wager, Mark Zell
Microfluidic Platforms for Pharmaceutical Screening 232
Michael R. Thorson, Sachit Goyal, Benjamin R. Schudel, Yuchuan Gong, Geoff G. Z. Zhang, Paul J. A. Kenis
Methodological Aspects of On-Line Probes in Batch & Semi Batch Stirred Tanks 233
Evgeny Zlotnikov
Jacket Controlled RC1 Heat Transfer Scale Down 236
Edward M. Davis
Simulation and Optimization for Product Loss Reduction in a Chemical Plant 237
Xiongtao Yang, Qiang Xu, Kuyen Li
Ultrasound Induced Destruction of Liposomes Using Vaporizing Emulsion Droplets 238
James R. Lattin, Taylor Atkinson, Ghaleb A. Husseini, William Pitt
Improvement in Recuperation Process of Acid by-Product Using Six Sigma 240
Paulo C. Meneghetti, Theodore P. Kircher
New Developments in Heat Transfer Scale Down and in-Situ FT-IR for Safe Scale up From the Lab to the Plant 255
Leen Schellekens
Optimization and Scale-up of 4,4'-Diamino-3,3'-Azoxyfurazan (DAAF)through the Use of Real-Time Analytical Tools 256
Kimberly Hanson, Shilpa Amato, Jerry S. Salan, Matt Jorgensen
Energetic Material Process Development Using Scale-Down Experiments 257
Jerry S. Salan
Application of in-Situ Technology in 2,6-Diamino-3,5-Dinitropyrazine-1-Oxide (LLM-105) Recrystallizations 258
Andrew G. Pearsall, Bradley Sleadd, Tod F. Ricks, Shilpa Amato
Taking the Min to the Max: A Case Study in Small Scale Process Development Using On-Line Reaction Calorimetry and in-Situ Particle Characterization 259
Cheryl Teich, Aaron Sarafinas, Paul Morton
Real-Time Analysis of Process Conditions During a Super-Saturation Controlled Recrystallization 260
Tod F. Ricks
Intensification Options for Different Hierarchical Process Levels Illustrated in the Conceptual Design of a Novel Cyclohexanol Production Process 261
Hannsjörg Freund, Rakesh Kumar, Amit Katariya, Kai Sundmacher
Process Intensification in Reactive Distillation: Design of a Diabatic Microwave Heated Column for the Synthesis of n-Propyl Propionate 262
E. Altman, G. D. Stefanidis, T. Van Gerven, A. Stankiewicz
Development of a Highly Integrated Reaction-Distillation Process for the Production of Methylal 263
Jan-Oliver Drunsel, Hans Hasse, Ulrich Schmidt, Mario Renner, Sergej A. Blagov
Chemical Synthesis with Extractive Product Isolation as An Approach for Process Intensification 264
Susanne Lux, Thomas Winkler, Matthäus Siebenhofer
Biodiesel Production Using An Intensified Spinning Disc Reactor 265
Zheyan Qiu, Laurence R. Weatherley
Study On a Cryogenic Separation System Under Abnormal Situations Via Dynamic Simulation 266
Xiongtao Yang, Qiang Xu, Kuyen Li
Ethanol Production by Bioconversion of Softwood Prehydrolysates Supplemented with Pulp Mill Sludges 267
Li Kang, Sunghoon Yoon, Gopal A. Krishnagopalan, Y. Y. Lee
Molecular Design of Solvents for 2nd Generation Biofuels Separation Processes 268
Ana Silveira, José Scilipoti, Martin Cismondi, Esteban A. Brignole

Reactive Extraction as a Method to Produce Biodiesel From Jatropha Curcas Seed 269
Farizul H. Kasim, Adam P. Harvey
A Novel Approach for Carboxylic Acid Recovery From Fermentation Broths 276
Alvaro Orjuela, Abraham J. Yanez, Carl T. Lira, Dennis Miller
A Techno-Economic Simulation of Alternative Feedstock Strategies for An Integrated Forest Biorefinery 277
Anna K. Kalliola, Juha H. Hakala, Pertti S. Koukkari
Integrated Production of Succinic Acid with the Separative Bioreactor 286
Yupo J. Lin, Cynthia S. Millard, Saurav Datta, Seth W. Snyder, Edward J. St. Martin
BioProcess Intensification in the Production of Starch-Degrading Enzyme α -Amylase 287
Dzun Noraini Jimat, C. Harwood, G. Akay
BioProcess Intensification In the Production of Bioethanol Using Saccharomyces Cerevisiae W303 288
Wan Salwanis Wan Md Zain, Janet Quinn, Galip Akay
Comparison of Advanced Oxidation Technologies 289
Muhammad Suleman Tahir, Shahid Raza Malik, Peter Letonja, Matthaus Siebenhofer
Effect of Relative Volatility Ranking On the Design and Operation of Batch Reactive Distillation Systems 296
Yu-Lung Kao, Jeffrey D. Ward
Stripping Methanol From a High Viscosity System by a Rotating Packed Bed 298
Chia-Ying Chiang, Hwai-Shen Liu
Electrodeposition of Aluminum in Ionic Liquid Under High Gravity Field 299
Lianbin Xu, Pengyuan Zhang, Guangtao Tang, Jiezhen Cui, Jian-Feng Chen
Reactive Scheduling for Ethylene Cracking Furnace System 300
Chuanyu Zhao, Chaowei Liu, Qiang Xu
Optimizing Design Specification for LNG Receiving Terminal Using Dynamic Simulation 301
Chul-Jin Lee, Youngsub Lim, Chonghun Han
Recent Advances in Reactive Distillation 302
Philip Lutze, Rafiqul Gani, John M. Woodley, Emmanuel A. Dada
Energy Saving In Crude Oil Atmospheric Distillation Columns by Modifying Vapour Feed Inlet Tray From Pre-Fractionation Train 303
Mehdi Arjmand, Luis Moreno, Longcheng Liu
Applying Best Practices in Procedural Operations in a Continuous Process 318
Marcus A. Tennant
Investigation Based On Electric Field to Optimize and Design An Energy-Saving Magnesium Electrolysis Cell 338
Yun Zhao, Ze Sun, Guimin Lu, Jianguo Yu
Photocatalytic Oxidation of Rhodamine B Over P-Doped Titania Nanotubes 340
R. Asapu, Daniel H. Chen, Bin Wang, Rakesh Sadu, Zhanhu Guo
Adsorptive Product Recovery From a Fermentation Broth Using a Nitrogen Source for Regeneration 341
Paul J. Th. Bussmann, Ronald C. Vroon
An Alternative Process for Oxidative Methane Coupling for Ethylene, Electricity and Formaldehyde Production 342
Daniel Salerno, Harvey Arellano-Garcia, Günter Wozny
Developing E3 Crude Oil Blending Strategy for Petroleum Refineries 343
Vibhor Mittal, Jian Zhang, Qiang Xu
The Sustainable and Scalable Synthesis of Piperylene Sulfone: A "Volatile" and Recyclable DMSO Substitute 344
Gregory Marus, Eduardo Vyhmeister, Pamela Pollet, Megan Donaldson, Veronica Llopis Mestre, Sean Faltermeier, Renee Roesel, Leslie Gelbaum, Charles L. Liotta, Charles A. Eckert
A Novel Solution Strategy with the Event-Tree-Based Modeling Approach for Crude Oil Scheduling 345
Xiao-Rong He, Lai-Xi Zou, Chufu Li, Chaowei Liu
A "Green" Pilot Plant Process Cooling Alternative 346
Frank P. Lee, Michael K. Corrigan
A Case Study in Miniplant Scale for the Carbon Dioxide Capture of the Oxidative Coupling of Methane Process 348
Steffen Stünkel, Reinhard Schomäcker, Günter Wozny
Deep Dehydration of Organic Solvents by Pressure Swing Adsorption 350
Akitoshi Ito, Yasushi Fujimura, Hiroshi Umino
Esterification of Succinic and Acetic Acid Mixtures with Ethanol by Reactive Distillation 359
Alvaro Orjuela, Andrea Del Pilar Orjuela, Aspi Kolah, Carl T. Lira, Dennis Miller
Development of Technology for Small-Scale Drying of Fish and Its by-Products 360
Emrod Elisante, Bernard Chove, Charles McHunguzi

Bark-Based Biorefinery — From Pilot Experiments to Process Model 375
Sakari Kaijaluoto, Lotta Sorsamäki, Olli Aaltonen, Tiina Nakari-Setälä
Rapid Solar-Thermal Gasification of Biomass — Laboratory Curiosity to Development Facility 378
Alan Weimer, Christopher Perkins
A Collaborative Pilot Demonstration of DOW AMBERLYST® BD20 Catalyst in Free Fatty Acid Esterification for Biodiesel Manufacture 379
Aaron Sarafinas, Christine D. Miller, Robert T. Hanlon, Alfred K. Schultz
Evaluation of Scaling Factors for Industrial Bioprocesses: Application to the Production of Ethanol From Glucose 380
Adriana Ruiz, Hernán Alvarez
Dual Fluidized Bed Reforming: Pilot Test Results & Potential Commercial Implications 381
Karl Mayer, George Apanel, Tobias Pröll, Mark Ibsen, Hermann Hofbauer
How Much Does My Pilot Plant Cost? 389
Adam Whalley, David Edwards
A Fast Method for Developing Accurate Scoping and Screening Cost Estimates for Pilot Plants 390
Richard Palluzi
An Approach for Estimating the Value of Computational Tools in Drug Product Development 415
Mary T. Am Ende, Bruno C. Hancock, Kristen J. Huta
Best Practices for Reducing the Cycle Time and Cost of Piloting 416
David A. Berg, Michael T. Cleary
Compact Heat Exchange Reactor for Process Efficiency Improvement 424
Zhijun Jia
Green Chemistry with Microreactors and Novel Catalysts 425
Sunitha Tadepalli, Geatesh Tampy
Hydrodeoxygenation of Pyrolysis Oil in a Microreactor 426
Narendra Joshi, Adeniyi Lawal
Polymer Membrane Separations for Microreactors 427
Thomas Schafer
Enzyme Catalyzed Polymerization Reactions in Microreactors 428
Santanu Kundu, Atul S. Bhangale, William E. Wallace III, Richard A. Gross, Kathryn L. Beers
Membrane Microbioreactor for Enzyme-Catalyzed Degradation of Pectin 429
Muhd. Nazrul Hisham Zainal Alam, Manuel Pinelo, Anne S. Meyer, Gunnar E. Jonsson, Krist V. Gernaey
Separation Processes in Micro Reaction Technology 430
T. Dietrich, Andreas Freitag, Ralf Scholz, Stefan Link, Jan-Wilhelm Thies
Structurally Optimized Microbioreactors: A Design Example for Immobilized Yeast Cultivations 432
Rita L. Fernandes, Daniel Schäpper, Fridolin Okkels, Anna Eliasson Lantz, Henrik Bruus, Krist V. Gernaey
Author Index
