

International Journal on

Advances in Software

2009 vol. 2 nr. 1

The *International Journal On Advances in Software* is Published by IARIA.

ISSN: 1942-2628

journals site: <http://www.ariajournals.org>

contact: petre@aria.org

Responsibility for the contents rests upon the authors and not upon IARIA, nor on IARIA volunteers, staff, or contractors.

IARIA is the owner of the publication and of editorial aspects. IARIA reserves the right to update the content for quality improvements.

Abstracting is permitted with credit to the source. Libraries are permitted to photocopy or print, providing the reference is mentioned and that the resulting material is made available at no cost.

Reference should mention:

International Journal On Advances in Software, issn 1942-2628
vol. 2, no. 1, year 2009, <http://www.ariajournals.org/software/>

The copyright for each included paper belongs to the authors. Republishing of same material, by authors or persons or organizations, is not allowed. Reprint rights can be granted by IARIA or by the authors, and must include proper reference.

Reference to an article in the journal is as follows:

<Author list>, "<Article title>"
International Journal On Advances in Software, issn 1942-2628
vol. 2, no. 1, year 2009,<start page>:<end page> , <http://www.ariajournals.org/software/>

IARIA journals are made available for free, proving the appropriate references are made when their content is used.

CONTENTS

A Heuristic Approach to the Allocation of Different Workloads in Computational Grid Environments	1 - 10
Javier Díaz, Universidad de Castilla-La Mancha, Spain Sebastián Reyes, Universidad de Castilla-La Mancha, Spain Camelia Muñoz-Caro, Universidad de Castilla-La Mancha, Spain Alfonso Niño, Universidad de Castilla-La Mancha, Spain	
A MATLAB GUI for the analysis and reconstruction of signal and image data of a SAFT-based 3D Ultrasound Computer Tomograph	11 - 21
Torsten Hopp, Forschungszentrum Karlsruhe, Germany Gregor F. Schwarzenberg, Forschungszentrum Karlsruhe, Germany Michael Zapf, Forschungszentrum Karlsruhe, Germany Nicole V. Rüter, Forschungszentrum Karlsruhe, Germany	
Using Secondary Information Sources to Generate and Augment Semantics of Design Information	22 - 35
Sascha Opletal, Universität Stuttgart, Germany Dieter Roller, Universität Stuttgart, Germany Steffen Rüger, Universität Stuttgart, Germany	
Semantic Enabled Framework for SLA Monitoring	36 - 46
Kaouthar Fakhfakh, CNRS – LAAS and Université de Toulouse, France / National Engineering School of Sfax, Tunisia Saïd Tazi, CNRS – LAAS and Université de Toulouse, France Khalil Drira, CNRS – LAAS and Université de Toulouse, France Tarak Chaari, National Engineering School of Sfax, Tunisia Mohamed Jmaiel, National Engineering School of Sfax, Tunisia	
Complex software systems : Formalization and Applications	47 - 62
Marc Aiguier, École Centrale Paris, France Pascale Le Gall, École Centrale Paris, France Mbarka Mabrouki, École Centrale Paris, France	
A Underlay System for Enhancing Dynamicity within Web Mashups	63 - 75
Heiko Pfeffer, Technische Universität Berlin, Germany	
A Method for Automatically Eliciting node Weights in a Hierarchical Knowledge Based Structure for Reasoning with Uncertainty	76 - 83

S. E. Hegazy, Aston University, UK
C. D. Buckingham, Aston University, UK

Addressing Data Model Variability and Data Integration within Software Product Lines **84 - 100**

Joerg Bartholdt, Siemens AG, Germany
Roy Oberhauser, Aalen University, Germany
Andreas Rytina, itemis, Germany

From Supervised to Reinforcement Learning: a Kernel-based Bayesian Filtering Framework **101 - 116**

Matthieu Geist, Supélec and ArcelorMittal Research and INRIA Nancy, France
Olivier Pietquin, Supélec, France
Gabriel Fricout, ArcelorMittal Research, France

Examining Implementations of a Computationally Intensive Problem in GF(3) **117 - 128**

Joey C. Libby, University of New Brunswick, Canada
Jonathan P. Lutes, University of New Brunswick, Canada
Kenneth B. Kent, University of New Brunswick, Canada

How to compare and exploit different techniques for unit-test generation **129 - 144**

Alberto Bacchelli, University of Bologna, Italy
Paolo Ciancarini, University of Bologna, Italy
Davide Rossi, University of Bologna, Italy

Incremental verification of consistency properties of large-scale workflows from the perspectives of control flow and evidence life cycles **145 - 159**

Osamu Takaki, National Institute of Advanced Industrial Science and Technology (AIST), Japan
Izumi Takeuti, National Institute of Advanced Industrial Science and Technology (AIST), Japan
Takahiro Seino, National Institute of Advanced Industrial Science and Technology (AIST), Japan
Noriaki Izumi, National Institute of Advanced Industrial Science and Technology (AIST), Japan
Koichi Takahashi, National Institute of Advanced Industrial Science and Technology (AIST), Japan

Crucial Service-Oriented Antipatterns **160 - 171**

Jaroslav Král, Charles University, Czech Republic
Michal Žemlička, Charles University, Czech Republic
