

1st European Conference on Gas Micro Flows

(GasMems 2012)

Journal of Physics: Conference Series Volume 362

**Skiathos, Greece
6-8 June 2012**

**ISBN: 978-1-62276-779-3
ISSN: 1742-6588**

Printed from e-media with permission by:

Papers

012001 [Direct Simulation of Transport Properties from Three-Dimensional \(3D\) Reconstructed Solid-Oxide Fuel-Cell \(SOFC\) Electrode Microstructures](#) "3"

N S K Gunda and S K Mitra

012002 [Design of micro distribution systems consisting of long channels with arbitrary cross sections](#) "4"; "S Misdanitis and D Valougeorgis

012003 [Flow rate measurements of binary gas mixtures through long trapezoidal microchannels](#) "39"; "L Szalmas, S Colin and D Valougeorgis

012004 [Numerical analysis of thermal creep flow in curved channels for designing a prototype of Knudsen micropump](#) "4"; "V Leontidis, J J Brandner, L Baldas and S Colin

012005 [Rarefied gas mixture flow between plates of arbitrary length due to small pressure difference](#) "63"; "C Tantos, S Naris and D Valougeorgis

012006 [A kinetic switching criterion for hybrid modelling of multiscale gas flows](#) "6"; "J Meng, N Dongari, J M Reese and Y Zhang

012007 [Low speed/low rarefaction flow simulation in micro/nano cavity using DSMC method with small number of particles per cell](#) "78"; "A Amiri-Jaghargh, E Roohi, H Niazmand and S Stefanov

012008 [Compressibility and rarefaction effects on entropy and entropy generation in micro/nano Couette flow using DSMC](#) "8"; "O Ejtehadi, J A Esfahani and E Roohi

012009 [Velocity Inversion In Cylindrical Couette Gas Flows](#) "2"; "N Dongari, R W Barber, D R Emerson, Y Zhang and J M Reese

012010 [Heat transfer enhancement of a horizontal microchannel using ferro-nanoparticles injection](#) "7"; "M Shams and S Tolou

012011 [Uniform Polynomial Equations Providing Higher-order Multi-dimensional Models in Lattice Boltzmann Theory](#) "32"; "J W Shim

012012 [Hydraulic resistance and convective heat transfer within independent power generation micro sources \(IPM\) channels](#) "37"; "Sudarev A V, Sudarev B V and Suryaninov A

012013 [Monte Carlo analysis of thermal transpiration effects in capacitance diaphragm gauges with helicoidal baffle system](#) "34"; "M Vargas, M Wüest and S Stefanov

012014 [DSMC simulation of the gas flow through a bend and a short microchannel](#) "359"; "N K Kulakarni and S K Stefanov

- 012015 [Oscillatory heating in a microchannel at arbitrary oscillation frequency in the whole range of the Knudsen number](#)""36; "" O Buchina and D Valougeorgis
- 012016 [Accounting for rotational non-equilibrium effects in subsonic DSMC boundary conditions](#)""384""C White, M K Borg, T J Scanlon and J M Reese
- 012017 [On the role of surface shape in a micro-scale heat conduction problem](#)""396""A Dinler, I A Graur, R W Barber, D R Emerson and P Perrier
- 012018 [Carbon Dioxide Transport in Carbon Nanopores](#)""3: 5""D Mantzalis, N Asproulis and D Drikakis
- 012019 [Characterization of CO₂ Flow Through Charged Carbon Nanotubes](#)""3; 3""D Mantzalis, N Asproulis and D Drikakis
- 012020 [Pressure Calculations in Nanochannel Gas Flows](#)""422""J H Kim, A J H Frijns, S V Nedeja and A A van Steenhoven
- 012021 [Integrated temperature microsensors for the characterization of gas heat transfer](#)""42; A Vittoriosi, J J Brandner and R Dittmeyer
- 012022 [Flow and Heat Transfer Characteristics of Turbulent Gas Flow in Microtube with Constant Heat Flux](#)""444""C Hong, Y Asako, S Matsushita and I Ueno
- 012023 [Hydraulic and thermal design of a gas microchannel heat exchanger](#)""458""Y Yang, J J Brandner and G L Morini
- 012024 [Design and optimization of a Holweck pump via linear kinetic theory](#)""474""S Naris, E Koutandou and D Valougeorgis
- 012025 [Experimental study of the gas flows through channels with circular cross sections](#)""487 M Hadj-Nacer, P Perrier, J G Méolans, I Graur and M Wüest
- 012026 [Velocity field measurements in gas phase internal flows by molecular tagging velocimetry](#)""498""F Samouda, J J Brandner, C Barrot and S Colin
- 012027 [TRANSFLOW: An experimental facility for vacuum gas flows](#)""4: : ""S Varoutis, T Giegerich, V Hauer and C Day
- 012028 [Experimental analysis of heat transfer between a heated wire and a rarefied gas in an annular gap with high diameter ratio](#)""4; 6""H Chalabi, O Buchina, L Saraceno, M Lorenzini, D Valougeorgis and G L Morini
- 012029 [Implementation of SMC averaging method in a channeled molecular flow of liquids and gases](#)""526""S M H Karimian and S Namvar

012030 [Numerical simulation of micro flows with moving obstacles](#) "533" G Dechristé and L Mieussens

012031 [Simulation of gas flows in micro/nano systems using the Burnett equations](#) "543"
F Bao, X Yu and J Lin

012032 [Quantitative measurement of gas pressure drop along T-shaped micro channels by interferometry](#) "555"
Nikolaj Ugras, Uwe Knip, Nils-Cristian E. Dettqvist, Uwe Klug

012033 [Pressure dependence of the quality factor of a micromachined cantilever in rarefied gases](#) "563"
M Stifter, M Sachse, T Sauter, W Hortschitz and F Keplinger

012034 [Heat transfer in micro devices packaged in partial vacuum](#) "572"
A Rana, M Torrilhon and H Struchtrup

012035 [Tangential Momentum Accommodation Coefficient measurements for various materials and gas species](#) "582"
H Yamaguchi, Y Matsuda and T Niimi

012036 [Development of Pressure-Sensitive Channel Chip for Micro Gas Flows](#) "588"
Y Matsuda, H Yamaguchi and T Niimi

012037 [Numerical modeling of Knudsen's thermal creep experiment](#) "594"
Yu A Anikin, O I Dodulad, Yu Yu Kloss, D V Martynov, P V Shuvalov and F G Tcheremissine

012038 [Effect of surface roughness: comparison between continuum and kinetic approaches](#) "59";
O Rovenskaya and G Croce

012039 [Detailed investigation on the effect of wall spring stiffness on velocity profile in molecular dynamics simulation](#) "5";
S Namvar and S M H Karimian

012040 [Rebuilding of Rothe's nozzle measurements with OpenFOAM software](#) "622"
E Arlemark, G Markelov and S Nedeá

012041 [Gas mixing enhancement in minichannels using a rotationally oscillatory circular cylinder](#) ""632""M Raisee and M Cheraghi

012042 [A Kinetic Model for Gas Mixtures Based on a Fokker-Planck Equation](#) ""63: H Gorji and P Jenny

012043 [Thermal Lattice Boltzmann models derived by Gauss quadrature using the spherical coordinate system](#) ""647""V E Ambrus and V Sofonea

012044 [Efficient Time-Step Coupling For Hybrid Continuum/Molecular Modelling of Unsteady Micro-Scale Gas Flows](#) ""655""D A Lockerby, C A Duque-Daza, M K Borg and J M Reese

012045 [Thermal-Pressure-Driven Gas Flows through Micro Channels](#) ""665""H Akhlaghi and E Roohi
