Contents

Preface

Michael J. Cassidy and Alexander Skabardonis	1
Capacity drops at merges: an endogenous model	
Ludovic Leclercq, Jorge A. Laval and Nicolas Chiabaut	12
Mitigating freeway off-ramp congestion: a surface streets coordinated approach	
Germán E. Günther, Juan E. Coeymans, Juan C. Muñoz and Juan C. Herrera	27
Extended bottlenecks, the fundamental relationship, and capacity drop on freeways	
Benjamin Coifman and Seoungbum Kim	44
Optimal inter-area coordination of train rescheduling decisions	
F. Corman, A. D’Ariano, D. Pacciarelli and M. Pranzo	58
Design of a rail transit line for profit maximization in a linear transportation corridor	
Zhi-Chun Li, William H.K. Lam, S.C. Wong and A. Sumalee	82
Design and implementation of efficient transit networks: procedure, case study and validity test	
M. Estrada, M. Roca-Riu, H. Badia, F. Robusté and C.F. Daganzo	113
Cognitive cost in route choice with real-time information: an exploratory analysis	
Song Gao, Emma Frejinger and Moshe Ben-Akiva	136
Estimating time of day demand with errors in reported preferred times: an application to airline travel	
Raúl Brey and Joan L. Walker	150
Dynamics of information generation and transmissions through a social network in non-recurrent transport behaviour	
Takamasa Iryo, Kazuma Yamabe and Yasuo Asakura	169
A maximum entropy-least squares estimator for elastic origin-destination trip matrix estimation	
Chi Xie, Kara M. Kockelman and S. Travis Waller	189
Hysteresis phenomena of a macroscopic fundamental diagram in freeway networks	
Nikolas Geroliminis and Jie Sun	213
On the fundamental diagram and supply curves for congested urban networks	
Ronghui Liu, Tony May and Simon Shepherd	229
Implementing kinematic wave theory to reconstruct vehicle trajectories from fixed and probe sensor data	
Babak Mehran, Masao Kuwahara and Farhana Naznin	247
On the existence of pricing strategies in the discrete time heterogeneous single bottleneck model	
Kien Doan, Satish Ukkusuri and Lanshan Han	269
Nonlinear pricing on transportation networks	
Siriphong Lawphongpanich and Yafeng Yin	292
A splitting rate model of traffic re-routeing and traffic control	
Mike Smith and Richard Mounce	316
A tractable class of algorithms for reliable routing in stochastic networks	
S. Samaranayake and S. Blandina, A. Bayen	341
Dynamic network loading: a stochastic differentiable model that derives link state distributions	
Carolina Osorio, Gunnar Flötteröd and Michel Bierlaire	364
Modeling heterogeneous risk-taking behavior in route choice: a stochastic dominance approach	
Xing Wu and Yu (Marco) Nie	382
Managing evacuation networks	
Carlos F. Daganzo and Stella K. So	405
Models for relief routing: equity, efficiency and efficacy	
Michael Huang, Karen Smilowitz and Burcu Balcik	416
Animal dynamics based approach for modeling pedestrian crowd egress under panic conditions	
Nirajan Shiwakoti, Majid Sarvi, Geoff Rose and Martin Burd	438
PAMSCOD: Platoon-based arterial multi-modal signal control with online data	
Qing He, K. Larry Head and Jun Ding	462

Contents

Development and evaluation of a constrained optimization model for traffic signal plan transition Jisun Lee and Billy M. Williams	490
Efficiency and equity of ramp control and capacity allocation mechanisms in a freeway corridor Qiong Tian, Hai-Jun Huang, Hai Yang and Ziyou Gao	509
Dynamic ride-sharing: a simulation study in metro atlanta Niels Agatz, Alan L. Erera, Martin W.P. Savelsbergh and Xing Wang	532
Optimal route decision with a geometric ground-airborne hybrid model under weather uncertainty Yoonjin Yoon, Mark Hansen and Michael O. Ball	551
Coordinated aviation network resource allocation under uncertainty Andrew M. Churchill and David J. Lovell	572
Platoon-based traffic flow model for estimating breakdown probability at single-lane expressway bottlenecks Yasuhiro Shiomi, Toshio Yoshii and Ryuichi Kitamura	591
A porous flow approach to modeling heterogeneous traffic in disordered systems Rahul Nair, Hani S. Mahmassani and Elise Miller-Hooks	611
The economics of parking provision for the morning commute Zhen (Sean) Qian, Feng (Evan) Xiao and H. M. Zhang	628
Proactive detection of high collision concentration locations on highways Koohong Chung, Kitae Jang, Samer Madanat and Simon Washington	650
Optimality of environmental policies in air transport markets and changes in the schedule delay: a theoretical approach M. Pilar Socorro and Ofelia Betancor.	662
Characterization of traffic oscillation propagation under nonlinear car-following laws Xiaopeng Li and Yanfeng Ouyang	678
Evidence of convective instability in congested traffic flow: a systematic empirical and theoretical investigation Martin Treiber and Arne Kesting	698
Freeway traffic oscillations: microscopic analysis of formations and propagations using wavelet transform Zuduo Zheng, Soyoung Ahn, Danjue Chen and Jorge Laval	717
