Tangled Magnetic Fields in Astro- and Plasma Physics (1) Quantised Flux in Tightly Knotted and Linked Systems (2)

A selection of papers arising from two workshops organized within the six-month programme Topological Dynamics in the Physical and Biological Sciences
Journal of Physics: Conference Series Volume 544

Edinburgh, United Kingdom
15-19 December 2012

Cambridge, United Kingdom
3-7 December 2012

ISBN: 978-1-63439-476-5
ISSN: 1742-6588

Table of contents

Volume 544

Tangled Magnetic Fields in Astro- and Plasma Physics (1)
Quantised Flux in Tightly Knotted and Linked Systems (2)
15–19 October 2012, Cambridge (1) and 3–7 December 2012, Edinburgh (2)

Accepted papers received: 1 October 2014
Published online: 20 October 2014

Dedication
011001

Konrad Bajer

Preface

011002

Preface Keith Moffatt, Thomas Kephart

011003

Peer review statement

Papers

012001

Helicity, linking, and writhe in a spherical geometry 1

J Campbell and M A Berger

012002

A complete topological invariant for braided magnetic fields 11

A R Yeates and G Hornig

012003

Lower and upper bounds on the energy of braided magnetic fields 21

J-J Aly

012004

Magnetic field generated by current filaments 31

Y Kimura

012005

Multiple breathers on a vortex filament 36

H Salman

012006

Topological constraints in magnetic field relaxation 48

S Candelaresi

012007

Tightening elastic (*n*, 2)-torus knots 53

E L Starostin and G H M van der Heijden

012008

Generalized helicity and Beltrami fields 63

R V Buniy and T W Kephart

012009

Variational analysis of topological stationary barotropic MHD in the case of single-valued magnetic surfaces 73

A Yahalom

012010

The effect of tangled magnetic fields on instabilities in tokamak plasmas 84

A J Thornton, A Kirk, J R Harrison, P Cahyna, I T Chapman, E Nardon (the MAST team)

012011

The ideal versus the reality: topology and turbulence in the current density in tokamak 92

F Spineanu and M Vlad

012012

Large scale reconstruction of the solar coronal magnetic field 101

T Amari, J-J Aly, P Chopin, A Canou and Z Mikic

012013

Tropical cyclogenesis: a numerical diagnosis based on helical flow organization 111

G V Levina and M T Montgomery

012014

Higher order topological invariants from the Chern-Simons action 121

R V Buniy and T W Kephart

012015

On combinatorial properties of a higher asymptotic ergodic invariant of magnetic lines 130

P M Akhmet'ev

012016

Higher-order topological phase: generalizations of the Aharonov-Bohm and Josephson effects 141

R V Buniy and T W Kephart

012017

Random walks and polygons in tight confinement 149

Y Diao, C Ernst and U Ziegler

012018

How averaged Menger curvatures control regularity and topology of curves and surfaces 159

P Strzelecki and H von der Mosel

012019

Möbius invariant energy of tori of revolution 171

H Funaba and J O'Hara

012020

How nice are critical knots? Regularity theory for knot energies 183

S Blatt and P Reiter

012021

Topological stirring of two-dimensional atomic Bose-Einstein condensates 193

A C White, N P Proukakis and C F Barenghi

012022

Torus quantum vortex knots in the Gross-Pitaevskii model for Bose-Einstein condensates 202

D Proment, M Onorato and C F Barenghi

012023

Quantum turbulence in atomic Bose-Einstein condensates 211

A J Allen, N G Parker, N P Proukakis and C F Barenghi

012024

Abelian and non-Abelian Hopfions in all odd dimensions 223

E Radu and T Tchrakian

012025

The spectrum of tightly knotted flux tubes in QCD 233

R V Buniy, J Cantarella, T W Kephart and E Rawdon

012026

Scaling properties of cosmic (super)string networks 244

C J A P Martins

012027

Inflation and cosmic (super)strings: implications of their intimate relation revisited 253

M Sakellariadou

012028

Cosmic superstring networks with Y-junctions: Evolution, B-modes and gravitational waves 262

D A Steer
