Table of contents

Volume 625

Wake Conference 2015
9–11 June 2015, Visby, Sweden

Accepted papers received: 1 June 2015
Published online: 18 June 2015

Preface

011001

[Wake Conference 2015](#) A Barney, J N Sørensen and S Ivanell

011002

[Peer review statement](#)

Papers

ABL - Mesoscale

012001

[First comparison of LES of an offshore wind turbine wake with dual-Doppler lidar measurements in a German offshore wind farm](#) L Vollmer, M van Dooren, D Trabucchi, J Schneemann, G Steinfeld, B Witha, J Trujillo and M Kühn **1**

ABL - Turbulence

012002

[The role of atmospheric stability/turbulence on wakes at the Egmond aan Zee offshore wind farm](#) R J Barthelmie, M J Churchfield, P J Moriarty, J K Lundquist, G S Oxley, S Hahn and S C Pryor **9**

012003

[A spectral model of stably stratified surface-layer turbulence](#) A Segalini, J Arnqvist, I Carlén, H Bergström and P H Alfredsson **19**

012004

[Using the coupled wake boundary layer model to evaluate the effect of turbulence intensity on wind farm performance](#) Richard J A M Stevens, Dennice Gayme and Charles Meneveau **29**

Aerodynamics, Wakes

012005

[Predicting wake meandering in real-time through instantaneous measurements of wind turbine load fluctuations](#) S Aubrun, Y A Muller and C Masson **39**

012006

[Characterizing Wake Turbulence with Staring Lidar Measurements](#) D Bastine, M Wächter, J Peinke, D Trabucchi and M Kühn **47**

012007

[A wake detector for wind farm control](#) C L Bottasso, S Cacciola and J Schreiber **57**

012008

[Simulation of wake effects between two wind farms](#) K S Hansen, P-E Réthoré, J Palma, B G Hevia, J Prospathopoulos, A Peña, S Ott, G Schepers, A Palomares, M P van der Laan and P Volker **65**

012009

[Data-driven Reduced Order Model for prediction of wind turbine wakes](#) G V Iungo, C Santoni-Ortiz, M Abkar, F Porté-Agel, M A Rotea and S Leonardi **77**

012010

[Local blockage effect for wind turbines](#) Takafumi Nishino and Scott Draper **87**

012011

[Wake effect on a uniform flow behind wind-turbine model](#) V L Okulov, I V Naumov, R F Mikkelsen and J N Sørensen **97**

012012

[Wind-tunnel study of the wake behind a vertical axis wind turbine in a boundary layer flow using stereoscopic particle image velocimetry](#) V Rolin and F Porté-Agel **105**

012013

[Comparison of actuator disc and Joukowsky rotor flows, to explore the need for a tip correction](#) Gijs van Kuik, Wei Yu, Sasan Sarmast and Stefan Ivanell **115**

Experiments, Wind Tunnels

012014

[A wind-tunnel investigation of wind-turbine wakes in yawed conditions](#) Majid Bastankhah and Fernando Porté-Agel **125**

012015

[Offshore wind farm flow measured by complementary remote sensing techniques: radar satellite TerraSAR-X and lidar windscanners](#) J Schneemann, J Hieronimus, S Jacobsen, S Lehner and M Kühn **135**

012016

[Study of wake meandering by means of fixed point lidar measurements: Spectral analysis of line-of-sight wind component](#) Davide Trabucchi, Gerald Steinfeld, David Bastine, Juan-José Trujillo, Jörg Schneemann and Martin Kühn **143**

012017

[Wind turbine wake detection with a single Doppler wind lidar](#) H Wang and R J Barthelmie **152**

MexNext contributions

012018

[Comparison between experiments and Large-Eddy Simulations of tip spiral structure and geometry](#) S Ivanell, T Leweke, S Sarmast, H U Quaranta, R F Mikkelsen and J N Sørensen **162**

Simulations, LES

012019

[Aeroelastic large eddy simulations using vortex methods: unfrozen turbulent and sheared inflow](#) E Branlard, G Papadakis, M Gaunaa, G Winckelmans and T J Larsen **172**

012020

[Evaluation of wind farm effects on fatigue loads of an individual wind turbine at the EnBW Baltic 1 offshore wind farm](#) A Bustamante, L Vera-Tudela and M Kühn **184**

012021

[Evaluation of the Actuator Line Model with coarse resolutions](#) M Draper and G Usera
191

012022

[Large-eddy simulations of wind farm production and long distance wakes](#) S O Eriksson,
K Nilsson, S-P Breton and S Ivanell **201**

012023

[Coalescing Wind Turbine Wakes](#) S Lee, M Churchfield, S Sirnivas, P Moriarty, F G
Nielsen, B Skaare and E Byklum **211**

012024

[Large Eddy Simulation of wind turbine wakes: detailed comparisons of two codes
focusing on effects of numerics and subgrid modeling](#) Luis A Martínez-Tossas, Matthew
J Churchfield and Charles Meneveau **220**

Simulations, RANS

012025

[Data-driven RANS for simulations of large wind farms](#) G V Iungo, F Viola, U Ciri, M A
Rotea and S Leonardi **230**

012026

[Predicting wind farm wake interaction with RANS: an investigation of the Coriolis force](#)
M P van der Laan, K S Hansen, N N Sørensen and P-E Réthoré **240**

Simulations, Wind farms

012027

[Quantifying variability of Large Eddy Simulations of very large wind farms](#) S J
Andersen, B Witha, S-P Breton, J N Sørensen, R F Mikkelsen and S Ivanell **252**

012028

[Wake downstream of the Lillgrund wind farm - A Comparison between LES using the
actuator disc method and a Wind farm Parametrization in WRF](#) O Eriksson, J Lindvall,
S-P Breton and S Ivanell **264**

012029

[The effect of blockage on power production for laterally aligned wind turbines](#) A R Meyer Forsting and N Troldborg **274**

012030

[How Many Model Evaluations Are Required To Predict The AEP Of A Wind Power Plant?](#) J P Murcia, P E Réthoré, A Natarajan and J D Sørensen **283**

012031

[Large-eddy simulation of the diurnal variation of wake flows in a finite-size wind farm](#) Mahdi Abkar, Ahmad Sharifi and Fernando Porté-Agel **294**

012032

[LES and RANS simulation of onshore Bessaker wind farm: analysing terrain and wake effects on wind farm performance](#) Mandar Tabib, Adil Rasheed and Trond Kvamsdal **304**

Vortex dynamics, Stability

012033

[Effects of incoming wind condition and wind turbine aerodynamics on the hub vortex instability](#) R Ashton, F Viola, F Gallaire and G V Iungo **314**

012034

[Instability of wind turbine wakes immersed in the atmospheric boundary layer](#) Francesco Viola, Giacomo Valerio Iungo, Simone Camarri, Fernando Porté-Agel and François Gallaire **324**

Wake modeling

012035

[Comparing satellite SAR and wind farm wake models](#) C B Hasager, P Vincent, R Husson, A Mouche, M Badger, A Peña, P Volker, J Badger, A Di Bella, A Palomares, E Cantero and P M F Correia **333**

012036

[Wake meandering under non-neutral atmospheric stability conditions - theory and facts](#) G C Larsen, E Macheffaux and A Chougule **343**

012037

[Engineering models for merging wakes in wind farm optimization applications](#)

E Machefaux, G C Larsen and J P Murcia Leon **353**

012038

[Turbulent large-scale structure effects on wake meandering](#) Y-A Muller, C Masson and

S Aubrun **364**

012039

[A new analytical model for wind farm power prediction](#) Amin Niayifar and Fernando

Porté-Agel **375**

012040

[The impact of wake models on wind farm layout optimization](#) Jonas Schmidt and

Bernhard Stoevesandt **385**

012041

[Coupling of a free wake vortex ring near-wake model with the Jensen and Larsen far-](#)

[wake deficit models](#) J W van Heemst, D Baldacchino, D Mehta and G J W van Bussel

395

WakeBench contributions

012042

[Numerical and Experimental Methods for Wake Flow Analysis in Complex Terrain](#)

Francesco Castellani, Davide Astolfi, Emanuele Piccioni and Ludovico Terzi **406**

012043

[Wind turbine wake interactions; results from blind tests](#) Per-Åge Krogstad and Lars

Sætran **416**

012044

[Atmospheric stability assessment for the characterization of offshore wind conditions](#) J

Sanz Rodrigo, E Cantero, B García, F Borbón, U Irigoyen, S Lozano, P M Fernande and

R A Chávez **437**
