TABLE OF CONTENTS

Student Paper Contest	xxvii
Foreword	xxviii
MA-1: Towards 5G	
MA-1.1: A Novel Alternative to Cloud RAN for Throughput Densification: Coded Pilots and Fast User-Packet Scheduling at Remote Radio Heads	3
<i>Ozgun Y. Bursalioglu, Chenwei Wang, Haralabos Papadopoulos, DOCOMO Innovations Inc, United States; Giuseppe Caire, Technische Universität Berlin, Germany</i>	
MA-1.2: Integer Forcing Analog-To-Digital Conversion for Massive MIMO Systems	11
<i>Luis G. Ordóñez, Iñaki Estella, Maxime Guillaud, Huawei Technologies, France</i>	
MA-1.3: Analytical Handle for ZF Reception in Distributed Massive MIMO	16
<i>Rajitha Senanayake, University of Melbourne, Australia; Angel Lozano, Universitat Pompeu Fabra, Spain; Peter Smith, Victoria University of Wellington, New Zealand; Jamie Evans, University of Melbourne, Australia</i>	
MA-1.4: The Impact of Beamforming and Coordination on Spectrum Pooling in MmWave Cellular Networks	21
<i>Hossein Shokri, KTH Royal Institute of Technology, Sweden; Federico Boccardi, Ofcom, United Kingdom; Elza Erkip, New York University, United States; Carlo Fischione, KTH Royal Institute of Technology, Sweden; Gabor Fodor, Ericsson, Sweden; Marios Kountouris, Huawei Technologies Co. Ltd., France; Petar Popovski, Aalborg University, Denmark; Michele Zorzi, University of Padova, Italy</i>	
MA-1.5: Limited Feedback Based Double-Sided Full-Dimension MIMO for Mobile Backhauling	27
<i>Stefan Schwarz, Markus Rupp, Technische Universität Wien, Austria</i>	
MA-1.7: Overloaded Multiuser MISO Transmission with Imperfect CSIT	34
<i>Enrico Piovano, Hamdi Joudeh, Bruno Clerckx, Imperial College London, United Kingdom</i>	
MA-1.8: Enforcing Coordination in Network MIMO with Unequal CSIT	39
<i>Paul de Kerret, Antonio Bazco, David Gesbert, EURECOM, France</i>	
MAa-2: Spectrum Sharing Between Communication and Radar Systems	
MAa-2.1: Bargaining over Fair Performing Dual Radar and Communication Task	47
<i>Andrey Garnae, Wade Trappe, Rutgers University, WINLAB, United States; Athina Petropulu, Rutgers University, United States</i>	
MAa-2.2: Spectrum Sharing Between MIMO-MC Radars and Communication Systems	52
<i>Bo Li, Athina Petropulu, Rutgers University, United States</i>	
MAa-2.4: Spectrum Maps for Cognition and Co-Existence of Communication and Radar Systems	58
<i>Maarit Melvasalo, Visa Koivunen, Jarmo Lunden, Aalto University, Finland</i>	
MAa-3: Topology of Networks	
MAa-3.1: Influence of Topology in Information Flow in Social Networks	67
<i>Harish Chintakunta, Athanasios Gentimis, Florida Polytechnic University, United States</i>	
MAa-3.2: Persistent Homology Lower Bounds on Distances in the Space of Networks	72
<i>Weiyu Huang, Alejandro Ribeiro, University of Pennsylvania, United States</i>	
MAa-3.4: Persistent Homology of Directed Networks	77
<i>Samir Chowdhury, Facundo Memoli, The Ohio State University, United States</i>	
MAa-4: High Dimensional Inference, Random Matrices, and Applications	
MAa-4.1: Free Component Analysis	85
<i>Hao Wu, Raj Rao Nadakuditi, University of Michigan, United States</i>	
MAa-4.3: Inference of Principal Components of Noisy Correlation Matrices with Prior Information	95
<i>Remi Monasson, CNRS & Ecole Normale Supérieure, France</i>	

MAa-4.4: A Tailored Sparse PCA Method for Finding Vaccine Targets Against Hepatitis C	100
<i>Ahmed Abdul Quadeer, David Morales-Jimenez, Matthew McKay, Hong Kong University of Science and Technology, Hong Kong SAR of China</i>	
MAa-5: Sequential Signal Processing	
MAa-5.1: On Parallel Sequential Change Detection Controlling False Discovery Rate	107
<i>Jie Chen, Wenyi Zhang, H. Vincent Poor, University of Science and Technology of China, China</i>	
MAa-5.2: Distributed Quickest Detection with Optional Observations at the Fusion Center.....	112
<i>Bo Jiang, Lifeng Lai, Worcester Polytechnic Institute, United States</i>	
MAa-5.4: Dynamic change-point detection using similarity networks	117
<i>Shanshan Cao, Yao Xie, Georgia Institute of Technology, United States; Yuxin Chen, Stanford University, United States</i>	
MA-6: Signals and Systems in Visual Cultural Heritage	
MA-6.1: Automated Classification of Pen Strokes in Van Gogh's Drawings	125
<i>Rosaleena Mohanty, University of Wisconsin-Madison, United States; William Sethares, University of Wisconsin-Madison and Rijksmuseum, United States; Teio Meedendorp, Louis van Tilborgh, Van Gogh Museum, Netherlands</i>	
MA-6.2: Non-Negative Dictionary Learning for Paper Watermark Similarity	130
<i>David Picard, Thomas Henn, ETIS ENSEA/Université de Cergy-Pontoise/CNRS, France; Georg Dietz, papierstruktur.de, France</i>	
MA-6.3: Automated Chain Line Marking and Pattern Matching in Radiographs of Rembrandt's	134
Prints <i>Xuelie Xi, Cornell University, United States; Devin Conathan, University of Wisconsin, United States; Amanda House, Cornell University, United States; William Sethares, University of Wisconsin-Madison and Rijksmuseum, United States; C. Richard Johnson, Jr., Cornell University, United States</i>	
MA-6.4: Deep Learning Classification of Photographic Paper Based on Clustering by Domain	139
Experts <i>Andrea Frost, Western Washington University, United States; Sally Wood, Santa Clara University, United States; Paul Messier, Yale University, United States; David Palzer, Andrew G. Klein, Western Washington University, United States</i>	
MA-6.5: Wove Paper Analysis through Texture Similarities.....	144
<i>Patrice Abry, CNRS / ENS Lyon, France; Andrew G. Klein, Western Washington University, United States; Paul Messier, Yale University, United States; Margaret H. Ellis, Morgan Library & Museum, United States; William A. Sethares, University of Wisconsin, United States; David Picard, ENSEA, France; Yuanhao Zhai, David L. Neuhoff, University of Michigan, United States; Stephane Roux, ENS Lyon, France; Stephane Jaffard, Université Paris-Est - Créteil Val-de-Marne, France; Herwig Wendt, CNRS / University of Toulouse, France; C. Richard Johnson, Jr., Cornell University, United States</i>	
MA-6.6: Multispectral Reflectance Imaging and Reflectance Spectroscopy at the Interface of	149
Cultural Heritage Research and Undergraduate Education: Investigating a Golden Age Dutch Painting at The Huntington <i>Erich Uffelman, Mallory Stephenson, Washington and Lee University, United States; John Delaney, Kathryn Dooley, National Gallery of Art (Washington, DC), United States</i>	
MAa-7: Computer Arithmetic I	
MAa-7.1: A Theoretical Analysis of Square versus Rectangular Component Multipliers in	157
Recursive Multiplication <i>Behrooz Parhami, University of California, Santa Barbara, United States</i>	
MAa-7.2: Memristor Based Adder Circuit Design	162
<i>Nagaraja Revanna, Earl Swartzlander, University of Texas at Austin, United States</i>	
MAa-7.3: Synthesis of Correlated Bit Streams for Stochastic Computing	167
<i>Megha Parhi, Yin Liu, Marc D. Riedel, Keshab K. Parhi, University of Minnesota, United States</i>	
MAa-8: Error Correction and Network Coding	
MAa-8.1: On the Catastrophic Puncturing Patterns for Finite-Length Polar Codes	235
<i>Song-Nam Hong, Ajou University, ; Dennis Hui, Ivana Maric, Ericsson Research, United States</i>	

MAa-8.2: On Error Correction for Asynchronous Communication Based on Iterative Processing.....	240
<i>Chen Yi, Joerg Kliewer, New Jersey Institute of Technology, United States</i>	
MAa-8.3: Linear Superposition Coding for the Asymmetric Gaussian MAC with Quantized Feedback	245
<i>Stefan Farthofer, Gerald Matz, Vienna University of Technology, Austria</i>	
MAa-8.4: Physical-Layer Network Coded QAM with Trellis Shaping for the Two-Way Relay Channel	250
<i>Daniela Donati, Mark Flanagan, University College Dublin, Ireland</i>	
MAa-8.5: Construction of Minimal Sets for Capacity- Approaching Variable-Length Constrained Sequence Codes	255
<i>Congzhe Cao, Ivan Fair, University of Alberta, Canada</i>	
MAa-8: Efficient Hardware Implementation	
MAa-8.1: Cost-Performance Tradeoffs in Unreliable Computation Architectures	215
<i>Mehmet Donmez, Maxim Raginsky, Andrew Singer, Lav Varshney, University of Illinois at Urbana Champaign, United States</i>	
MAa-8.2: Baseband Volterra Filters with Even-Order Terms: Theoretical Foundation and Practical Implications	220
<i>Harald Enzinger, Karl Freiberger, Gernot Kubin, Graz University of Technology, Austria; Christian Vogel, FH Joanneum - University of Applied Sciences, Austria</i>	
MAa-8.3: Fast Time-Domain Volterra Filtering	225
<i>Harald Enzinger, Karl Freiberger, Gernot Kubin, Graz University of Technology, Austria; Christian Vogel, FH Joanneum - University of Applied Sciences, Austria</i>	
MAa-8.4: Hardware Implementation of a Series of Transform Matrices Based on Discrete Hirschman Transform	229
<i>Peng Xi, Victor Debrunner, Florida State University, United States</i>	
MAa-8: Neural Imaging	
MAa-8.1: Detection of Diabetic Peripheral Neuropathy using Spatial-Temporal Analysis in Infrared Videos	263
<i>Peter Soliz, Carla Agurto, Ana Edwards, Zyden Jarry, VisionQuest Biomedical LLC, United States; Janet Simon, Foot & Ankle Associates of New Mexico, United States; Mark Burge, University of New Mexico Health Sciences Center, United States</i>	
MAa-8.2: Clustering Brain-Network-Connectivity States using Kernel Partial Correlations.....	268
<i>Konstantinos Slavakis, Shiva Salsabilian, David Wack, Sarah Muldoon, Henry Baidoo-Williams, University at Buffalo, United States; Jean Vettel, US Army Research Laboratory, United States; Matt Cieslak, Scott Grafton, University of California, Santa Barbara, United States</i>	
MAa-8: Massive MIMO	
MAa-8.1: Massive MIMO via Cooperative Users.....	177
<i>Sha Hu, Fredrik Rusek, Ove Edfors, Lund University, Sweden</i>	
MAa-8.2: Robust Precoding Design for Massive MISO Downlink	183
<i>Mostafa Medra, Timothy Davidson, McMaster University, Canada</i>	
MAa-8.3: Analysis and Evaluation of a Practical Downlink Multiuser MIMO Scheduler over LTE Advanced Massive MIMO Systems	188
<i>Rob Arnott, NEC Telecom Modus, United States; Kengo Oketani, NEC Corporation, United States; Narayan Prasad, Sampath Rangarajan, NEC Laboratories America, United States; Patricia Wells, NEC Telecom Modus, United States</i>	
MAa-8.4: Grassmannian Training for Massive MIMO Cellular Networks.....	193
<i>Yonghee Han, Jungwoo Lee, Seoul National University, Republic of Korea</i>	
MAa-8.5: Power Allocation for Downlink Path-Based Precoding in Multiuser FDD Massive MIMO Systems Without CSI Feedback	198
<i>Chin-Wei Hsu, Ming-Fu Tang, Borching Su, National Taiwan University, Taiwan</i>	

MAa-8.6: Performance of Cell-Free Massive MIMO Systems with MMSE and LSFD	203
Receivers	
<i>Elina Nayebi, University of California, San Diego, United States; Alexei Ashikhmin, Thomas L. Marzetta, Bell Laboratories, United States; Bhaskar D. Rao, University of California, San Diego, United States</i>	
MAa-8.7: A Path Selection Algorithm for Sparse Massive MIMO Channels	208
<i>Maliheh Soleimani, Mahmood Mazrouei-Sebdani, Witold A. Krzymien, University of Alberta, Canada; Jordan Melzer, TELUS Communications, Canada</i>	
MAB-2: Hybrid Analog/Digital Precoding	
MAB-2.1: Alternating Minimization for Hybrid Precoding in Multiuser OFDM mmWave	281
Systems	
<i>Xianghao Yu, Jun Zhang, Hong Kong University of Science and Technology, Hong Kong SAR of China; Khaled B. Letaief, Hong Kong University of Science and Technology, Hong Kong and Hamad bin Khalifa University, Qatar</i>	
MAB-2.2: Subspace Estimation and Hybrid Precoding for Wideband Millimeter-Wave	286
MIMO System	
<i>Wai Ming Chan, Taejoon Kim, City University of Hong Kong, Hong Kong SAR of China; Hadi Ghauch, Mats Bengtsson, KTH Royal Institute of Technology, Sweden</i>	
MAB-2.3: Frequency selective multiuser hybrid precoding for mmWave systems with imperfect	291
channel knowledge	
<i>Nuria Gonzalez-Prelcic, University of Vigo, Spain; Robert W. Heath, University of Texas at Austin, United States</i>	
MAB-2.4: Hybrid Precoding for Millimeter Wave Systems with a Constraint on User	296
Electromagnetic Radiation Exposure	
<i>David Love, Miguel Castellanos, Purdue University, United States; Bertrand Hochwald, University of Notre Dame, United States</i>	
MAB-3: Smart Grid	
MAB-3.2: On the Solution of the Three-Phase Load-Flow in Distribution Networks	303
<i>Mohammadhafez Bazrafshan, Nikolaos Gatsis, University of Texas at San Antonio, Iran</i>	
MAB-3.3: A Compressive Sensing Framework for the Analysis of Solar Photo-Voltaic Power	308
<i>Raksha Ramakrishna, Anna Scaglione, Bitu Analui, Arizona State University, United States</i>	
MAB-3.4: Power Network Topology Control for Mitigating the Effects of Geomagnetically	313
Induced Currents	
<i>Cecilia Klauber, Hao Zhu, University of Illinois, United States</i>	
MAB-4: Information Theory and Statistical Learning	
MAB-4.3: Beyond Maximum Likelihood: Boosting the Chow-Liu Algorithm for Large Alphabets.....	321
<i>Jiantao Jiao, Yanjun Han, Tsachy Weissman, Stanford University, United States</i>	
MAB-4.4: Adaptive Sequential Learning.....	326
<i>Craig Wilson, Google, Inc., United States; Venugopal Veeravalli, University of Illinois at Urbana-Champaign, United States</i>	
MAB-5: Multisensor Systems and Statistical Inference	
MAB-5.1: How to Capture a Stopping Time: The Independent Case.....	333
<i>George Moustakides, University of Patras, Greece</i>	
MAB-5.2: Wideband Capon Beamforming with Pre-Steering.....	338
<i>Richard Kozick, Bucknell University, United States; Christian Coviello, University of Oxford, United Kingdom</i>	
MAB-5.3: Sparsity-Promoting Bootstrap Method for Large-Scale Data.....	343
<i>Visa Koivunen, Emad Mozafari, Aalto University, Finland</i>	
MAB-7: Neural Signal Processing	
MAB-7.2: Detection of Protein Repeats Using The Ramanujan Filter Bank.....	351
<i>Srikanth V. Tenneti, Vaidyanathan P.P., California Institute of Technology, United States</i>	

MAB-7.3: On Inferring Functional Connectivity with Directed Information in Neuronal Networks	356
<i>Zhiting Cai, Rice University, United States; Curtis Neveu, John Byrne, University of Texas Health Science Center at Houston, United States; Behnaam Aazhang, Rice University, United States</i>	
MAB-7.4: Seizure Prediction using Long-Term Fragmented Intracranial Canine and Human EEG Recordings	361
<i>Zisheng Zhang, Keshab Parhi, University of Minnesota, United States</i>	
MAB-8: Sparse Methods and Compressive Sensing	
MAB-8.1: Time-Recursive Multi-Pitch Estimation using Group Sparse Recursive Least Squares	369
<i>Filip Elvander, Johan Sward, Andreas Jakobsson, Lund University, Sweden</i>	
MAB-8.2: Low-rank Matrix Recovery from Quantized and Erroneous Measurements: Accuracy-preserved Data Privatization in Power Grids	374
<i>Meng Wang, Rensselaer Polytechnic Institute, United States</i>	
MAB-8.3: Bayesian Method for Image Recovery from Block Compressive Sensing	379
<i>Uditha Wijewardhana, Marian Codreanu, Matti Latva-aho, University of Oulu, Finland</i>	
MAB-8.4: Stable Compressive Low Rank Toeplitz Covariance Estimation Without Regularization	384
<i>Heng Qiao, Piya Pal, University of Maryland, United States</i>	
MAB-8.5: Sparse Bayesian Learning Boosted by Partial Erroneous Support Knowledge	389
<i>Mohammad Shekaramiz, Todd K. Moon, Jacob H. Gunther, Utah State University, United States</i>	
MAB-8.6: Hyperparameter-Free Sparse Regression of Grouped Variables	394
<i>Ted Kronvall, Stefan Ingi Adalbjörnsson, Santhosh Nadig, Andreas Jakobsson, Lund University, Sweden</i>	
MAB-8.7: One-Bit Compressive Sampling with Time-Varying Thresholds: Maximum Likelihood and the Cramer-Rao Bound	399
<i>Christopher Gianelli, Luzhou Xu, Jian Li, University of Florida, United States; Petre Stoica, Uppsala University, Sweden</i>	
MAB-8: Speech and Image Analysis	
MAB-8.1: A Joint EMD and Teager-Kaiser Energy Approach Towards Normal and Nasal Speech Analysis	429
<i>Chris De La Cruz, Balu Santhanam, University of New Mexico, United States</i>	
MAB-8.2: Iris Recognition using Cross-Spectral Comparison	434
<i>Jennifer Webb, Delores Etter, Vianka Barboza, Elena Sharp Sharp, Southern Methodist University, United States</i>	
MAB-8.3: Efficient Facial Recognition using Vector Quantization of 2D DWT Features	439
<i>Ahmed Aldhahab, Taif Al Obaidi, Wasfy B. Mikhael, University of Central Florida, United States</i>	
MAB-8.4: An Efficient DCT template-based Object Detection Method using Phase Correlation	444
<i>Markus Hörhan, Horst Eidenberger, Vienna University of Technology, Austria</i>	
MAB-8.5: Transfer of Multimodal Emotion Features in Deep Belief Networks	449
<i>Hiranmayi Ranganathan, Shayok Chakraborty, Panchanathan Sethuraman, Arizona State University, United States</i>	
MAB-8.6: Direct Classification from Compressively Sensed Images via Deep Boltzmann Machine	454
<i>Henry Braun, Pavan Turaga, Cihan Tepedelenlioglu, Andreas Spanias, Arizona State University, United States</i>	
MAB-8: Design Methodologies for Signal Processing Systems	
MAB-8.1: A New Open-Source SIMDVector libm Fully Implemented with High-Level Scalar C	407
<i>Christoph Lauter, Sorbonne Universités, UPMC Univ Paris 6, UMR 7606, LIP6, France</i>	

MAB-8.2: Fast Digital Design Space Exploration with High-Level Synthesis: A Case Study	412
with Approximate Conjugate Gradient Pursuit	
<i>Benjamin Knoop, Karthik Vinod, Sebastian Schmale, Dagmar Peters-Drolshagen, Steffen Paul, University of Bremen, Germany</i>	
MAB-8.3: High-Level System Synthesis and optimization of Dataflow Programs for MPSoCs.....	417
<i>Endri Bezati, Simone Casale Brunet, Marco Mattavelli, École polytechnique fédérale de Lausanne, Switzerland; Jorn Janneck, Lund University, Sweden</i>	
MAB-8.5: Trace-Based Manycore Partitioning of Stream-Processing Applications	422
<i>Jorn Janneck, Lund University, Sweden; Michalska Malgorzata, Simone Casale-Brunet, Endri Bezati, Marco Mattavelli, École polytechnique fédérale de Lausanne, Switzerland</i>	
MPa-1: Algorithm and Hardware Aspects for 5G Wireless Systems	
MPa-1.1: Understanding Real Many-Antenna MU-MIMO Channels	461
<i>Clayton Shepard, Abeer Javed, Ryan Guerra, Jian Ding, Lin Zhong, Rice University, United States</i>	
MPa-1.2: Decentralized Data Detection for Massive MU-MIMO on a Xeon Phi Cluster.....	468
<i>Kaipeng Li, Rice University, United States; Rishi Sharan, Cornell University, United States; Yujun Chen, Joseph Cavallaro, Rice University, United States; Christoph Studer, Cornell University, United States</i>	
MPa-1.3: An Energy Efficiency Perspective on Massive MIMO Quantization	473
<i>Muris Sarajlic, Liang Liu, Ove Edfors, Lund University, Sweden</i>	
MPa-1.4: Limited Feedback in MISO Systems with Finite-Bit ADCs.....	479
<i>Jianhua Mo, Robert Heath, University of Texas at Austin, United States</i>	
MPa-2: Interference Limited Next Generation Satellite Communications (SatnEXIV)	
MPa-2.1: User Selection for Multi-beam Satellite Channels: A Stochastic Geometry	487
Perspective	
<i>Mathini Sellathurai, Heriot Watt University, United Kingdom; Satyanarayana Vuppala, Tharm Ratnarajah, University of Edinburgh, United Kingdom</i>	
MPa-2.2: Efficient Satellite Systems Based on Interference Management and Exploitation.....	492
<i>Alessandro Ugolini, University of Parma, Italy; Amina Piemontese, Chalmers University of Technology, Sweden; Alessandro Vanelli-Coralli, University of Bologna, Italy; Giulio Colavolpe, University of Parma, Italy</i>	
MPa-2.3: NOMA and Interference Limited Satellite Scenarios	497
<i>Ana Perez-Neira, Universitat Politecnica de Catalunya, Spain; Marius Caus, Miguel Angel Vazquez, Centre Tecnologic de Telecomunicacions de Catalunya, Spain</i>	
MPa-2.4: Optimized Link Adaptation for DVB-S2X Precoded Waveforms based on SNIR	502
Estimation	
<i>Stefano Andrenacci, Danilo Spano, University of Luxembourg, Luxembourg; Dimitrios Christopoulos, Newtec, Belgium; Symeon Chatzinotas, University of Luxembourg, Luxembourg; Jens Krause, SES, Luxembourg; Björn Ottersten, University of Luxembourg, Luxembourg</i>	
MPa-3: Communication and Coding for Distributed Computing	
MPa-3.1: Coded Distributed Computing: Fundamental Limits and Practical Challenges	509
<i>Songze Li, Qian Yu, University of Southern California, United States; Mohammad-Ali Maddah-Ali, Bell Labs, Alcatel-Lucent, United States; Salman Avestimehr, University of Southern California, United States</i>	
MPa-4: Sparse Sampling for Data Analytics	
MPa-4.1: Solving Inverse Source Problems for Linear PDEs using Sparse Sensor	517
Measurements	
<i>John Murray-Bruce, Pier Luigi Dragotti, Imperial College London, United Kingdom</i>	
MPa-4.2: Rethinking Sketching as Sampling: Linear Transforms of Graph Signals	522
<i>Fernando Gama, University of Pennsylvania, United States; Antonio García Marques, King Juan Carlos University, Spain; Gonzalo Mateos, University of Rochester, United States; Alejandro Ribeiro, University of Pennsylvania, United States</i>	

MPa-4.3: Distributed Adaptive Learning of Signals Defined over Graphs	527
<i>Paolo Di Lorenzo, Paolo Banelli, University of Perugia, Italy; Sergio Barbarossa, Stefania Sardellitti, Sapienza University of Rome, Italy</i>	
MPa-4.4: Subgraph Detection using Graph Signals	532
<i>Sundeep Prabhakar Chepuri, Geert Leus, Delft University of Technology, Netherlands</i>	
MPa-5: Recent Advances in Nonstationary Signal Processing	
MPa-5.1: Algorithms for Analysis of Signals with Time-Warped Cyclostationarity	539
<i>Antonio Napolitano, University of Napoli, Italy; William Gardner, University of California, Davis, United States</i>	
MPa-5.2: The Sound of Silence: Recovering Signals from Time-Frequency Zeros	544
<i>Patrick Flandrin, CNRS & ENS de Lyon, France</i>	
MPa-5.3: Nonstationary Signal Design for Coexisting Radar and Communications Systems	549
<i>John Kota, Antonia Papandreou-Suppappola, Arizona State University, United States; Garry Jacyna, MITRE Corporation, United States</i>	
MPa-5.4: Benefits of Noncircular Statistics for Nonstationary Signals	554
<i>Scott Wisdom, Les Atlas, James Pitton, Greg Okopal, University of Washington, United States</i>	
MPa-6: Emerging Models and Methods in Image and Video Processing	
MPa-6.1: Sampled Efficient Full-Reference Image Quality Assessment Models	561
<i>Christos Bampis, Todd Goodall, Alan Bovik, University of Texas at Austin, United States</i>	
MPa-6.2: Feature Extraction and Image Retrieval on an Automata Structure	566
<i>Tiffany Ly, Rituparna Sarkar, Scott Acton, Kevin Skadron, University of Virginia, United States</i>	
MPa-6.3: Distributed Video Analysis for the Advancing Out of School Learning in	571
Mathematics and Engineering Project	
<i>Cody Eilar, Venkatesh Jatla, Marios Pattichis, Carlos LopezLeiva, Sylvia Celedon-Pattichis, University of New Mexico, United States</i>	
MPa-6.4: WIDEBAND FINGERPRINT DEMODULATION VIA	576
BI-DIMENSIONAL MULTIRATE FREQUENCY TRANSFORMATIONS	
<i>Wenjing Liu, Balu Santhanam, University of New Mexico, United States</i>	
MPa-7: Advances in Neuronal Modeling	
MPa-7.1: Tracking Epileptic Seizure Activity via Information Theoretic Graphs	583
<i>Andrea Goldsmith, Jeremy Kim, Yonathan Morin, Stanford University, United States</i>	
MPa-7.2: A Neural Model of High-Acuity Vision in the Presence of Fixational Eye	588
Movements	
<i>Alexander Anderson, Kavitha Ratnam, Austin Roorda, Bruno Olshausen, University of California, Berkeley, United States</i>	
MPa-7.4: Probing the Functional Circuitry Underlying Auditory Attention via Dynamic	593
Granger Causality Analysis	
<i>Alireza Sheikhattar, Sina Miran, Jonathan Fritz, Shihab Shamma, Behtash Babadi, University of Maryland, United States</i>	
MPa-8: Beamforming and Array-based Estimation I	
MPa-8.2: Array Self Calibration using Multiple Data Sets	674
<i>Benjamin Friedlander, University of California, Santa Cruz, United States</i>	
MPa-8.3: Convex-Optimization based Geometric Beamforming for FD-MIMO Arrays	679
<i>Stefan Schwarz, Technische Universität Wien, Austria; Tal Philoso, General Motors, Israel; Markus Rupp, Technische Universität Wien, Austria</i>	
MPa-8.4: Reduced-Complexity Direction-of-Arrival Estimation for Large-Aperture Antenna	684
Arrays Employing Spatial Ambiguities	
<i>Chung-Cheng Ho, Scott C. Douglas, Southern Methodist University, United States</i>	
MPa-8.7: A User Cooperative Beamforming Approach to PAPR Reduction in MIMO-OFDM	691
Uplink	
<i>Antti Arvola, Antti Tölli, University of Oulu, Finland; David Gesbert, EURECOM, France</i>	

MPa-8: Communication Networks

MPa-8.1: Performance Analysis of Partial Interference Cancellation in Multi-Antenna UDNs	699
<i>Italo Atzeni, Marios Kountouris, Huawei Technologies, France</i>	
MPa-8.2: Leader Selection in Cooperative Network Based on MDL Subspace Algorithm for Cognitive Radio	704
<i>Sander Ulp, Tõnu Trump, Tallinn University of Technology, Estonia</i>	
MPa-8.3: Optimal De-Anonymization in Random Graphs with Community Structure	709
<i>Efe Onaran, Siddharth Garg, Elza Erkip, New York University, United States</i>	
MPa-8.4: Joint Optimization of Communication Scheduling and Online Power Allocation in Remote Estimation	714
<i>Xiaobin Gao, Emrah Akyol, Tamer Basar, University of Illinois, Urbana-Champaign, United States</i>	
MPa-8.5: Layered Caching for Heterogeneous Storage	719
<i>Avik Sengupta, Virginia Tech, United States; Ravi Tandon, University of Arizona, United States; T. Charles Clancy, Virginia Tech, United States</i>	
MPa-8.6: Energy-Efficient Random Sleep Protocol based on Distributed Coding for Sensor-to-Vehicle Communications	724
<i>Yuki Goto, Shun Ogata, Koji Ishibashi, University of Electro-Communications, Japan</i>	
MPa-8.7: Long-Term Power Allocation for Multi-Channel Device-to-Device Communication Based on Limited Feedback Information	729
<i>Ruhallah AliHemmati, Ben Liang, University of Toronto, Canada; Min Dong, University of Ontario Institute of Technology, Canada; Gary Boudreau, S. Hossein Seyedmehdi, Ericsson Canada, Canada</i>	
MPa-8.8: Decentralized Coded Caching with Distinct Cache Capacities	734
<i>Mohammad Mohammadi Amiri, Qianqian Yang, Deniz Gunduz, Imperial College London, United Kingdom</i>	

MPa-8: Model Selection, Source Separation and Classification

MPa-8.1: Cross-validation techniques for determining the number of correlated components between two data sets when the number of samples is very small	601
<i>Christian Lameiro, Peter J. Schreier, Universität Paderborn, Germany</i>	
MPa-8.2: Model Selection for High-Dimensional Data	606
<i>Arash Owrang, Magnus Jansson, KTH Royal Institute of Technology, Sweden</i>	
MPa-8.3: Bootstrap-based Detection of the Number of Signals Correlated Across Multiple Data Sets	610
<i>Tamuj Hasija, Universität Paderborn, Germany; Yang Song, Nanyang Technological University, Singapore; Peter Schreier, Universität Paderborn, Germany; David Ramirez, University Carlos III of Madrid, Spain</i>	
MPa-8.4: Demixing Sparse Signals from Nonlinear Observations	615
<i>Mohammadreza Soltani, Chinmay Hegde, Iowa State University, United States</i>	
MPa-8.6: Obfuscating Poisson & Gaussian Data Using a Rotation in the Complex Plane.....	620
<i>Ruaridh Macdonald, Muriel Medard, Massachusetts Institute of Technology, United States</i>	
MPa-8.7: Multiscale Tensor Decomposition	625
<i>Alp Ozdemir, Mark A. Iwen, Selin Aviyente, Michigan State University, United States</i>	

MPa-8: Estimation and Learning Theory for Communications

MPa-8.1: On the Log-Likelihood Ratio Evaluation of CWCU Linear and Widely Linear MMSE Data Estimators	633
<i>Oliver Lang, Mario Huemer, Johannes Kepler University, Austria; Christian Hofbauer, Linz Center of Mechatronics GmbH, Austria</i>	
MPa-8.2: Improved SNR-based Estimation of the Attainable Net-Data-Rates in Vectoring VDSL2	638
<i>Driton Statovci, Martin Wolkerstorfer, Sanda Drakulic, Technische Universität Wien, Austria</i>	
MPa-8.3: Effects of Channel Environment on Timing Advance for Mobile Device Positioning in Long-Term Evolution Networks	643
<i>Allison Hunt, Alex DeGabriele, John Roth, Justin A. Blanco, T. Owens Walker III, Jeremy Martin, United States Naval Academy, United States</i>	

MPa-8.4: Benchmarking of Learning Architectures for Digital Predistortion	648
<i>Thomas Magesacher, Lund University, Sweden; Peter Singerl, Infineon Technologies AG, Austria</i>	
MPa-8.5: Supervised Machine Learning for Signals Having RRC Shaped Pulses	652
<i>Mohammad Bari, George Washington University, United States; Hussain Taher, University of Engineering & Technology Peshawar, Pakistan; Syed Saad Sherazi, University of Engineering & Technology Bannu, Pakistan; Milos Doroslovacki, George Washington University, United States</i>	
MPa-8.6: Nonstationary Jammer Suppression Based on Parametric Sparse Reconstruction.....	657
<i>Ben Wang, Harbin Engineering University, China; Yimin Zhang, Temple University, United States; Wei Wang, Harbin Engineering University, China</i>	
MPa-8.7: Radio Transformer Networks: Attention Models for Learning to Synchronize in	662
Wireless Systems	
<i>Timothy J O'Shea, Latha Pemula, Dhruv Batra, T. Charles Clancy, Virginia Tech, United States</i>	
MPb-1: Wireless Networks	
MPb-1.3: The Beam Alignment Problem in mmWave Wireless Networks.....	741
<i>Saeid Haghighatshoar, Giuseppe Caire, Technische Universität Berlin, Germany</i>	
MPb-1.4: Staying Alive - Network Coding for Data Persistence in Volatile Networks	746
<i>Vitaly Abdrashitov, Muriel Medard, Massachusetts Institute of Technology, United States</i>	
MPb-2: Signal Processing for Low-Resolution Sampling	
MPb-2.1: Spatial Coding Based on Minimum BER in 1-Bit Massive MIMO Systems.....	753
<i>Hela Jedda, Technische Universität München, Germany; Amine Mezghani, University of California, Irvine, United States; Jawad Munir, Fabian Steiner, Josef A. Nossek, Technische Universität München, Germany</i>	
MPb-2.2: Analysis of One-Bit Quantized ZF Precoding for the Multiuser Massive	758
MIMO Downlink	
<i>Amodh Kant Saxena, University of California, Irvine, United States; Inbar Fijalkow, ETIS / ENSEA - University Cergy-Pontoise - CNRS, France; Amine Mezghani, Lee Swindlehurst, University of California, Irvine, France</i>	
MPb-2.3: Nonlinear 1-Bit Precoding for Massive MU-MIMO with Higher-Order	763
Modulation	
<i>Christoph Studer, Cornell University, Sweden; Giuseppe Durisi, Chalmers University, Sweden</i>	
MPb-2.4: Channel Estimation in Mixed Hybrid-Low Resolution MIMO Architectures for	768
mmWave Communication	
<i>Nuria Gonzalez-Prelcic, Universidade de Vigo, Spain; Cristian Rusu, University of Vigo, Spain; R Heath, University of Texas at Austin, United States</i>	
MPb-3: Distributed Optimization	
MPb-3.1: Distributed primal-dual method for multi-agent sharing problem with conic constraints	777
<i>Necdet Serhat Aybat, Erfan Yazdandoost, Pennsylvania State University, United States</i>	
MPb-3.2: ESOM: Exact Second-Order Method for Consensus Optimization	783
<i>Aryan Mokhtari, University of Pennsylvania, United States; Wei Shi, University of Illinois at Urbana-Champaign, United States; Qing Ling, University of Science and Technology of China, China</i>	
MPb-3.3: Distributed Nonconvex Multiagent Optimization over Time-Varying Networks	788
<i>Ying Sun, Hong Kong University of Science and Technology, Hong Kong SAR of China; Gesualdo Scutari, Purdue University, United States; Daniel Palomar, Hong Kong University of Science and Technology, United States</i>	
MPb-3.4: Space-Time Scheduling for Green Data Center Networks	795
<i>Tianyi Chen, University of Minnesota, United States; Antonio Marques, Rey Juan Carlos University, Spain; Georgios Giannakis, University of Minnesota, United States</i>	

MPb-4: High-dimensional Inference

MPb-5: Recent Advances in Covariance Matrix Estimation for Array Processing

- MPb-5.1: Bounds for Estimating the Parameters of Low-Rank Compound-Gaussian Clutter and White Gaussian Noise805
Olivier Besson, ISAE-Supaéro, France
- MPb-5.2: Robust Rank Constrained Kronecker Covariance Matrix Estimation810
Arnaud Breloy, LEME, France; Ying Sun, Hong Kong University of Science and Technology, Hong Kong SAR of China; Guillaume Ginolhac, LISTIC, France; Daniel Palomar, Hong Kong University of Science and Technology, Hong Kong SAR of China
- MPb-5.3: Quaternion Structured Paranormal Distributions815
Yonatan Woodbridge, Hebrew University of Jerusalem, Israel; Gal Elidan, Hebrew University of Jerusalem and Google Inc., Israel; Ami Wiesel, Hebrew University of Jerusalem, Israel
- MPb-5.4: New Properties for Tyler’s Covariance Matrix Estimator820
Gordana Draskovic, Frederic Pascal, CentraleSupélec, France

MPb-6: Speech Signal Processing and Health Applications

- MPb-6.1: Models for Objective Evaluation of Dysarthric Speech from Data Annotated by Multiple Listeners827
Ming Tu, Yishan Jiao, Visar Berisha, Julie Liss, Arizona State University, United States
- MPb-6.2: Speech and Language Processing for Mental Health Research and Care831
Daniel Bone, James Gibson, Theodora Chaspari, Dogan Can, Shrikanth Narayanan, University of Southern California, United States
- MPb-6.3: Characterization of the Relationship Between Semantic and Structural Language Features in Psychiatric Diagnosis836
Natália Bezerra Mota, Federal University of Rio Grande do Norte, Brazil; Facundo Carrillo, Diego Fernandez Slezak, Universidad de Buenos Aires, Argentina; Mauro Copelli, Federal University of Pernambuco, Brazil; Sidarta Ribeiro, Federal University of Rio Grande do Norte, Brazil

MPb-7: Advances in Neural Array Processing

- MPb-7.1: Analysis of Signals Recorded from Human Cerebral Cortex using Micro-Scale Electrode Arrays during Articulate Movements841
Kevin O’Neill, Denise Oswald, Arizona State University, United States; Kari Ashmont, David Adelson, Phoenix Children’s Hospital, United States; Bradley Greger, Arizona State University, United States
- MPb-7.2: Decoding Human Intent Using a Wearable System and Multi-Modal Sensor Data846
Md Muztoba, Cemil Geyik, Umit Y. Ogras, Daniel W. Bliss, Arizona State University, United States
- MPb-7.3: Suppression of Neurostimulation Artifacts and Adaptive Clustering of Parkinson’s Patients Behavioral Tasks using EEG851
Alexander Maurer, Arizona State University, United States; Sara Hanrahan, Joshua Nedrud, Adam Hebb, Colorado Neurological Institute, United States; Antonia Papandreou-Suppappola, Arizona State University, United States

MPb-8: Communication Theory

- MPb-8.1: Fundamental BER Performance Trade-off in Cooperative Cognitive Radio Systems with Random Number of Secondary Users889
Ruo Chen Zeng, Cihan Tepedelenlioglu, Arizona State University, United States
- MPb-8.2: Performance of OFDM Systems with Adaptive DFT-Precoding894
Yusaku Yamashita, Hideki Ochiai, Yokohama National University, Japan
- MPb-8.3: Physical Layer Security Analysis for Cooperative Communication with Full-Duplex Relaying under Nakagami-m Fading Model899
Yohannes Jote Tolossa, Abreu Giuseppe, Jacobs University Bremen, Germany
- MPb-8.4: On Zero-Forcing Equalization for Short-Filtered Multicarrier Faster-than-Nyquist Signaling904
Albert Abelló, Damien Roque, ISAE-Supaéro, France; Cyrille Siclet, Alexandre Marquet, GIPSA-lab, France

MPb-8.5: Secret Communication on the Z-Channel with Cooperative Receivers	909
<i>Abdallah M.Fayed, Tamer Khattab, Qatar University, Qatar; Lifeng Lai, Worcester Polytechnic Institute, United States</i>	
MPb-8.6: Optimizing Joint Precoding and Transmit Antenna Selection for Spatial Modulation	915
<i>Michael Carosino, James Ritcey, University of Washington, United States</i>	
MPb-8: Beamforming and Array-based Estimation II	
MPb-8.1: The Advanced TOA Trilateration Algorithms with Performance Analysis	923
<i>Sajina Pradhan, Seokjoo Shin, Goo-Rak Kwon, Jae-young Pyun, Suk-seung Hwang, Chosun University, Nepal</i>	
MPb-8.2: Design and Implementation of a Three-layer Cognitive Radar Architecture	929
<i>Stefan Brueggewirth, Fraunhofer FHR, Germany</i>	
MPb-8.3: Nonstationary Source Separation for Underdetermined Speech Mixtures.....	934
<i>Ryan Corey, Andrew Singer, University of Illinois at Urbana-Champaign, United States</i>	
MPb-8.4: On the Resolution of Diversely Polarized Arrays.....	939
<i>Benjamin Friedlander, University of California, Santa Cruz, United States</i>	
MPb-8.5: Super-resolution DOA Estimation Using a Coprime Sensor Array with the Min Processor	944
<i>Yang Liu, John R. Buck, University of Massachusetts Dartmouth, United States</i>	
MPb-8.6: Dynamic Formulation of Co-prime Array for DOA Estimation.....	949
<i>Xiaomeng Wang, Xin Wang, Stony Brook University, United States</i>	
MPb-8.7: Alternating Optimization Low-Rank Expansion Algorithm to Estimate a Linear Combination of Separable Filters to Approximate 2D Filter Banks	954
<i>Paul Rodriguez, Pontifical Catholic University of Peru, Peru</i>	
MPb-8: Implementations of DSP Kernels	
MPb-8.1: Hardware Architecture for Positive Definite Matrix Inversion Based on LDL Decomposition and Back-Substitution	859
<i>Carl Ingemarsson, Oscar Gustafsson, Linköping University, Sweden</i>	
MPb-8.2: A Scalable Architecture for Massive MIMO Base Stations Using Distributed Processing	864
<i>Erik Bertilsson, Oscar Gustafsson, Erik G. Larsson, Linköping University, Sweden</i>	
MPb-8.3: Interpolated FIR Based Practically Perfect Reconstruction Filter Bank	869
<i>Jorge Cadena, A.A. (Louis) Beex, Virginia Tech, United States</i>	
MPb-8.4: Design of a Multi-Core Hardware Architecture for Consensus-Based MIMO Detection Algorithms	877
<i>Konstantin Tscherkaschin, Benjamin Knoop, Jochen Rust, Steffen Paul, University of Bremen, Germany</i>	
MPb-8.5: Dynamically-Loaded Hardware Libraries (HLL) Technology for Audio Applications	882
<i>Andrea Lomuscio, Angelo Esposito, Gian Carlo Cardarilli, Leonardo Di Carlo, University of Rome Tor Vergata, Italy; Alberto Nannarelli, Technical University of Denmark, Denmark; Marco Re, University of Rome Tor Vergata, Italy</i>	
TAb-1: Biological Communications	
TAb-1.1: Model and Analysis of Population Density Estimation via Quorum Sensing.....	961
<i>Nicolo Michelusi, Purdue University, United States; Urbashi Mitra, University of Southern California, United States</i>	
TAb-2: Recent Advances in Massive MIMO	
TAb-2.1: Dual-regularized Precoding: A Robust Approach for D2D-Enabled Massive MIMO.....	969
<i>Junting Chen, Haifan Yin, Laura Cottatellucci, David Gesbert, EURECOM, France</i>	
TAb-2.3: Massive MIMO with Imperfect Channel Covariance Information	974
<i>Luca Sanguinetti, University of Pisa, Italy; Emil Bjornson, Linköping University, Sweden; Merouane Debbah, CentraleSupélec, France</i>	
TAb-2.4: Pilot Decontamination Through Compressive Wideband Channel Estimation.....	979
<i>Saeid Haghghatshoar, Giuseppe Caire, Technische Universität Berlin, Germany</i>	

TAb-3: Distributed Signal Processing

TAb-3.1: Doubly Compressed Diffusion LMS over Adaptive Networks.....	987
<i>Ibrahim El Khalil Harrane, Rémi Flamary, Cédric Richard, University Nice Sophia Antipolis, France</i>	
TAb-3.2: Decentralized Consensus Optimization with Asynchrony and Delays	992
<i>Tianyu Wu, Kun Yuan, University of California, Los Angeles, United States; Qing Ling, University of Science and Technology of China, China; Wotao Yin, Ali H. Sayed, University of California, Los Angeles, United States</i>	
TAb-3.3: Thermodynamic Limit of Interacting Particle Systems over Dynamical Networks	997
<i>Augusto Santos, Soumya Kar, José M. F. Moura, Carnegie Mellon University, United States; João Xavier, University of Lisbon, Portugal</i>	
TAb-3.4: Distributed Dictionary Learning.....	1001
<i>Amir Daneshmand, Gesualdo Scutari, Purdue University, United States; Francisco Fachine, University of Rome, Italy</i>	

TAb-4: Sketching and Optimizing for Big Data

TAb-4.1: Parallel Asynchronous Lock-free Algorithms for Nonconvex Big-Data Optimization	1009
<i>Loris Cannelli, Gesualdo Scutari, Purdue University, United States; Francisco Fachine, University of Rome, La Sapienza, Italy; Vyacheslav Kungurtsev, Czech Technical University in Prague, Czech Republic</i>	
TAb-4.3: A Divide-and-Conquer Framework for Large-Scale Subspace Clustering	1014
<i>Chong You, Claire Donnat, Daniel Robinson, Rene Vidal, Johns Hopkins University, United States</i>	
TAb-4.4: A Randomized Approach to Large-Scale Subspace Clustering.....	1019
<i>Panagiotis Traganitis, Georgios Giannakis, University of Minnesota, United States</i>	

TAb-5: Hardware Aspects for Compressive Sensing and Analog-to-Information Conversion

TAb-5.1: Exploiting System Configurability towards Dynamic Accuracy-Power Trade-offs in	1027
Sensor Front-ends	
<i>Laura Isabel Galindez Olascoaga, Steven Lauwereins, Komail Badami, Juan-Carlos Pena, KU Leuven, Belgium; Rajesh Venkata, Marian Verhelst, KU Leuven and IMEC, Belgium</i>	
TAb-5.2: Band-Pass Compressive Sampling As an Enabling Technology for Rapid Wideband RF	1032
Spectrum Sensing	
<i>Rabia Tugce Yazicigil, Tanbir Haque, John Wright, Peter R. Kinget, Columbia University, United States</i>	

TAb-6: Phase Retrieval for Imaging: Theory and Methods

TAb-6.2: Robust PhaseLift for Phase Retrieval under Corruptions.....	1039
<i>Paul Hand, Rice University, United States; Thang Huynh, New York University, United States</i>	
TAb-6.4: Robust Phase Retrieval with Sparsity under Nonnegativity Constraints	1043
<i>Daniel Weller, University of Virginia, United States</i>	

TAb-7: Biological Neural Systems

TAb-7.1: A Pulse-Gated, Predictive Neural Circuit.....	1051
<i>Yuxiu Shao, Peking University, China; Andrew Sornborger, University of California, Davis, United States; Louis Tao, Peking University, China</i>	
TAb-7.2: A Multitaper, Causal Decomposition for Stochastic, Multivariate Time Series:	1056
Application to High-Frequency Calcium Imaging Data	
<i>Andrew Sornborger, University of California, Davis, United States; James D Lauderdale, University of Georgia, United States</i>	
TAb-7.3: The Neural Basis for Sleep Regulation - Data Assimilation from Animal to Model	1061
<i>Fatemeh Bahari, Camila Tulyaganova, Myles Billard, Kevin Alloway, Bruce Gluckman, Pennsylvania State University, United States</i>	
TAb-7.4: Neuronal Network Models for Sensory Discrimination.....	1066
<i>Mohammad Samavat, Genevieve Toutain, Sharon Crook, Arizona State University, United States</i>	

TAB-8: MIMO and Multistatic Radars

TAB-8.2: Direct Tracking of Multiple Targets in MIMO Radar	1139
<i>Phuoc Vu, Alexander Haimovich, New Jersey Institute of Technology, United States; Braham Himed, Air Force Research Lab (AFRL/RVMD), United States</i>	
TAB-8.3: Super-Resolution in Position and Velocity Estimation for Short-Range MM-Wave Radar	1144
<i>Anant Gupta, Upamanyu Madhow, University of California, Santa Barbara, United States; Amin Arbabian, Stanford University, United States</i>	
TAB-8.4: High Resolution Geolocation with a Multi-Static Radar	1149
<i>Benjamin Friedlander, University of California, Santa Cruz, United States</i>	
TAB-8.5: Using WCP-OFDM Signals with Time-Frequency Localized Pulses for Radar Sensing	1154
<i>Damien Roque, Stephanie Bidon, University of Toulouse, ISAE-SUPAERO, France</i>	
TAB-8.6: Canonical Correlations for Target Detection in a Passive Radar Network	1159
<i>Yuan Wang, Washington State University, United States; Louis Scharf, Colorado State University, United States; Ignacio Santamaria, University of Cantabria, Spain; Haonan Wang, Colorado State University, United States</i>	
TAB-8.7: Compressive Radar Sensing via One-Bit Sampling with Time-Varying Thresholds.....	1164
<i>Jian Li, University of Florida, United States; Mohammad Mahdi Naghsh, Sayed Jala Zahabi, Mahmoud Modarres-Hashemi, Isfahan University of Technology, Iran</i>	

TAB-8: Array Processing and Wireless Communications

TAB-8.1: An Exact Bayesian Detector for Multistatic Passive Radar	1077
<i>Stephen D. Howard, Songsri Sirianunpiboon, DST Group Australia, Australia; Douglas Cochran, Arizona State University, United States</i>	
TAB-8.2: Compressive Direction-of-Arrival Estimation Off The Grid	1081
<i>Shermin Hamzehei, Marco Duarte, University of Massachusetts, United States</i>	
TAB-8.3: Bandpass Signal Design for Passive Time Delay Estimation	1086
<i>Jeffrey Nanzer, Matthew Sharp, Johns Hopkins Applied Physics Laboratory, United States; Donald Brown, Worcester Polytechnic Institute, United States</i>	
TAB-8.4: Estimation of the Ricean K-Factor from Noisy Complex Channel Coefficients	1092
<i>Xavier Leturc, Thales Communications and Security, France; Philippe Ciblat, Télécom Paristech, France; Christophe Le Martret, Thales Communications and Security, France</i>	

TAB-8: Communication System Theory

TAB-8.1: From Dedicated Redundant Subcarriers to Distributed Redundancy in UW-OFDM	1099
<i>Christian Hofbauer, Linz Center of Mechatronics, Austria; Carl Böck, Mario Huemer, Johannes Kepler University, Austria</i>	
TAB-8.3: Delay-Optimal Scheduling and Power Control for Instantaneous-Interference-Limited CRs	1107
<i>Ahmed Ewaisha, Cihan Tepedelenligolu, Arizona State University, United States</i>	
TAB-8.4: Non-Orthogonal Multiple Access with Sub-Constellation Alignment.....	1112
<i>Sanjeewa Herath, Afshin Haghighat, InterDigital Communications, Inc., Canada</i>	
TAB-8.5: On the Capacity of Diffusion-Based Molecular Timing Channels with Diversity.....	1117
<i>Nariman Farsad, Yonathan Murin, Milind Rao, Andrea Goldsmith, Stanford University, United States</i>	
TAB-8.6: On Global Channel State Estimation and Dissemination in Ring Networks	1122
<i>Shahab Farazi, Donald Brown, Worcester Polytechnic Institute, United States; Andrew Klein, Western Washington University, United States</i>	
TAB-8.7: The Finite Length Analysis of Spatially-Coupled Codes for 1-D Magnetic Recording Channels	1128
<i>Homa Esfahanizadeh, Ahmed Hareedy, Lara Dolecek, University of California, Los Angeles, United States</i>	

TPa-1: Millimeter Wave Cellular Systems

- TPa-1.2: Performance Analysis of Millimeter-wave Cellular Networks with Two-stage Beamforming Initial Access Protocols 1171
Yingzhe Li, Jeffrey Andrews, Francois Baccelli, University of Texas at Austin, United States; Thomas Novlan, Charlie Zhang, Samsung Research America, United States
- TPa-1.3: On the Feasibility of Interference Alignment in Ultra-Dense Millimeter-Wave Cellular Networks 1176
Jian Song, Thanh Tu Lam, Marco Di Renzo, Paris-Saclay University / CNRS, France
- TPa-1.4: Performance Characteristics of 5G mmWave Wireless-to-the-Home 1181
Frederick Vook, Eugene Visotsky, Timothy Thomas, Amitava Ghosh, Nokia Bell Labs, United States

TPa-2: Implementation of Decoders for Polar Codes

- TPa-2.1: Low-Complexity Segmented CRC-Aided SC Stack Decoder for Polar Codes..... 1189
Yi Zhao, Chuan Zhang, Southeast University, China; Shunqing Zhang, Intel Labs, China; Xiaohu You, Southeast University, China
- TPa-2.3: A Multi-Gbps Unrolled Hardware List Decoder for a Systematic Polar Code 1194
Pascal Giard, McGill University, Canada; Alexios Balatsoukas-Stimming, Thomas Christoph Müller, Andreas Burg, École polytechnique fédérale de Lausanne, Switzerland; Claude Thibeault, École de technologie supérieure, Canada; Warren J. Gross, McGill University, Canada
- TPa-2.4: Error Patterns in Belief Propagation Decoding of Polar Codes and Their Mitigation Methods 1199
Shuanghong Sun, Sung-Gun Cho, Zhengya Zhang, University of Michigan, United States

TPa-3: Multiagent Systems and Game Theory

- TPa-3.1: Strategic Communication in Multi-Agent Systems 1207
Emrah Akyol, Cedric Langbort, Tamer Basar, University of Illinois at Urbana Champaign, United States
- TPa-3.3: Computationally Efficient Learning in Large-Scale Games: Sampled Fictitious Play Revisited 1212
Brian Swenson, Soumya Kar, Carnegie Mellon University, United States; Joao Xavier, Instituto Superior Tecnico, Portugal
- TPa-3.4: Equivalent Static and Dynamic Games..... 1216
Dhruva Kartik, Ashutosh Nayyar, University of Southern California, United States

TPa-4: Bilinear Inverse Problems

- TPa-4.1: Simultaneous Blind Deconvolution and Blind Demixing via Convex Programming 1223
Shuyang Ling, Thomas Strohmer, University of California, Davis, United States
- TPa-4.2: Ambiguities on Convolutions with Applications to Phase Retrieval 1228
Philipp Walk, California Institute of Technology, United States; Peter Jung, Technische Universität Berlin, Germany; Goetz E. Pfander, Philipps-University Marburg, Germany
- TPa-4.4: Time-Varying Narrowband Channel Estimation: Exploiting Low-Rank and Sparsity via Bilinear Representation 1235
Sajjad Beygi, Urbashi Mitra, University of Southern California, United States

TPa-5: Detection over Very Large Datasets

- TPa-5.1: Detection of Sparse Mixtures: The Finite Alphabet Case..... 1243
Jonathan Ligo, University of Illinois at Urbana-Champaign, United States; George Moustakides, University of Patras, Greece; Venugopal Veeravalli, University of Illinois at Urbana-Champaign, United States
- TPa-5.2: Quickest Hub Discovery in Correlation Graphs 1248
Taposh Banerjee, Massachusetts Institute of Technology, United States; Alfred Hero, University of Michigan, Ann Arbor, United States
- TPa-5.4: Nonparametric Composite Outlier Detection 1256
Weiguang Wang, Yingbin Liang, Syracuse University, United States; H. Vincent Poor, Princeton University, United States

TPa-6: Big Data Analytics for Image and Video Processing

- TPa-6.1: Food Image Analysis: the Big Data Problem You Can Eat!1263
Yu Wang, Chang Liu, Shaobo Fang, Fengqing Zhu, Purdue University, United States; Deborah Kerr, Curtin University, Australia; Carol Boushey, University of Hawaii, United States; Edward Delp, Purdue University, United States
- TPa-6.2: Graph-based Classification of Healthcare Provider Activity1268
Nasrin Sadeghzadehyazdi, Laura Barnes, Scott Acton, University of Virginia, United States
- TPa-6.3: Building a Living Atlas of the Earth in the Cloud1273
Daniela I. Moody, Steven P. Brumby, Michael S. Warren, Samuel W. Skillman, Ryan Keisler, Rick Chartrand, Tim Kelton, Mark Mathis, Descartes Labs, United States
- TPa-6.4: The Promise of Big Data Technologies and Challenges for Image and Video1278
Analytics in Healthcare
Andreas Panayides, University of New Mexico, United States; Constantinos Pattichis, University of Cyprus, Cyprus; Marios Pattichis, University of New Mexico, United States

TPa-7: Signal Processing for Dynamic Functional Brain Network Analysis

- TPa-7.2: An EEG and fTCD based BCI for Control1285
Matthew Sybeldon, Aya Khalaf, Ervin Sejdic, Murat Akcakaya, University of Pittsburgh, United States
- TPa-7.3: Source-Informed Segmentation: Towards Capturing the Dynamics of Brain Functional1290
Networks Through EEG
Ali Haddad, Laleh Najafizadeh, Rutgers University, United States
- TPa-7.4: Functional Connectivity Metrics for Wavelet Clustering of rs-fMRI Data1295
Alessio Medda, Georgia Tech Research Institute, United States; Jacob Billings, Emory University, United States; Shella Keilholz, Georgia Institute of Technology and Emory University, United States

TPa-8: Relaying and Full Duplex Communications

- TPa-8.1: Robust Message Recovery for Non-Cooperative Compute-And-Forward Relaying1303
Miruna Raceala-Motoc, Jan Schreck, Peter Jung, Slawomir Stanczak, Fraunhofer Heinrich Hertz Institute, Germany
- TPa-8.2: Performance Analysis for Multi-Source Multi-Relay Transmission over κ - μ Fading1308
Channels
Shen Qian, Japan Advanced Institute of Science and Technology, Japan; Jiguang He, Markku Juntti, University of Oulu, Finland; Tad Matsumoto, Japan Advanced Institute of Science and Technology, Japan
- TPa-8.3: Randomized Space-Time Codes with Imperfect Channel Estimation.....1313
Behrouz Shayesteh, Birsan Sirkeci, San Jose State University, United States
- TPa-8.4: Joint Relay Beamforming and Receiver Processing for Multi-way Multi-antenna1317
Relaying
Wen Li, Min Dong, University of Ontario Institute of Technology, Canada
- TPa-8.5: Spatial Half-duplex: Precoder Design and Experimental Evaluation.....1322
Niranjan M Gowda, Ashutosh Sabharwal, Rice University, United States
- TPa-8.6: Degrees of Freedom of Spatial Self-Interference Suppression for In-Band1327
Full-Duplex with Inter-node Interference
Yujun Chen, Ashutosh Sabharwal, Rice University, United States
- TPa-8.7: On the Achievability of Interference Alignment for Full-Duplex Cellular Networks1332
with Multiple Antennas
Wonjae Shin, Seoul National University, Republic of Korea; Jong-Bu Lim, Samsung Electronics, Republic of Korea; Hyun-Ho Choi, Hankyong National University, Republic of Korea; Jungwoo Lee, Seoul National University, Republic of Korea

TPa-8: Network Data Analysis

- TPa-8.1: A New Approach to Distributed Hypothesis Testing1365
Gil Katz, Pablo Piantanida, Merouane Debbah, CentraleSupélec, France
- TPa-8.2: Robust False Data Injection Attacks in Electricity Markets by Limited1370
Adversaries
Mengheng Xue, Ali Tajer, Rensselaer Polytechnic Institute, United States

TPa-8.3: Efficient and Cooperative Failure Control in Smart Grid.....	1375
<i>Jose Cordova-Garcia, Xin Wang, Stony Brook University, United States</i>	
TPa-8.5: Random Matrix Improved Community Detection in Heterogeneous Networks	1385
<i>Hafiz Tiomoko Ali, Romain Couillet, CentraleSupélec, University of Paris-Saclay, France</i>	
TPa-8.6: Distributed Learning over Multitask Networks with Linearly Related Tasks	1390
<i>Roula Nassif, Cédric Richard, André Ferrari, University of Nice-Sophia-Antipolis, France; Ali H. Sayed, University of California, Los Angeles, United States</i>	
TPa-8.7: Distributed Linear Prediction of a Single Source	1395
<i>Kevin Wagner, Naval Research Laboratory, United States; Milos Doroslovacki, George Washington University, United States</i>	
TPa-8.8: A Latent Variable Clustering Method for Wireless Sensor Networks.....	1400
<i>Vladislav Vasilev, Georgi Iliev, Vladimir Poulkov, Technical University of Sofia, Bulgaria; Albena Mihovska, Aalborg University, Denmark</i>	

TPa-8: Subspaces, Covariances and Tensors

TPa-8.1: Covariance Estimation in Terms of Stokes Parameters with Application to Vector Sensor Imaging	1339
<i>Ryan Volz, Mary Knapp, Frank Lind, Frank Robey, Massachusetts Institute of Technology, United States</i>	
TPa-8.2: Principal Subspace Estimation for Low-rank Toeplitz Covariance Matrices with Binary Sensing	1344
<i>Haoyu Fu, Yuejie Chi, The Ohio State University, United States</i>	
TPa-8.3: Complexity and Search Space Reduction in Cyclic-by-Row PEVD Algorithms.....	1349
<i>Fraser Coutts, Jamie Corr, Keith Thompson, Stephan Weiss, University of Strathclyde, United Kingdom; Ian Proudler, Loughborough University, United Kingdom; John McWhirter, Cardiff University, United Kingdom</i>	
TPa-8.4: Investigation of a Polynomial Matrix Generalised EVD for Multi-Channel Wiener Filtering	1354
<i>Jamie Corr, Jennifer Pestana, Stephan Weiss, University of Strathclyde, United Kingdom; Soydan Redif, European University of Lefke, Cyprus; Marc Moonen, KU Leuven, Belgium</i>	
TPa-8.5: Maximum Likelihood Identification of an Information Matrix under Constraints in a Corresponding Graphical Model	1359
<i>Randy Paffenroth, Nan Li, Worcester Polytechnic Institute, United States; Louis Scharf, Colorado State University, United States; Myung Hee Lee, Weill Cornell Medical College, United States</i>	

TPb-1: 5G Cellular Theory

TPb-1.1: 5G New Radio and Ultra Low Latency Applications: A PHY Implementation Perspective	1409
<i>Thomas Wirth, Bernd Holfeld, Matthias Mehlhose, Jens Pilz, Dennis Wieruch, Fraunhofer Heinrich Hertz Institute, Germany</i>	
TPb-1.2: Fundamental Limits of Secure Device-to-Device Coded Caching.....	1414
<i>Ahmed A. Zewail, Aylin Yener, Pennsylvania State University, United States</i>	
TPb-1.3: On the Impact of Blockage on the Throughput of Multi-tier Millimeter-Wave Networks	1419
<i>Shuqiao Jia, David Ramirez, Rice University, United States; Lei Huang, Yi Wang, Huawei Technologies Co. Ltd., China; Behnaam Aazhang, Rice University, United States</i>	
TPb-1.4: Spatial Channel Covariance Estimation for mmWave Hybrid MIMO Architecture	1424
<i>Sungwoo Park, Robert Heath, University of Texas at Austin, United States</i>	
TPb-1.5: Joint User Association and Resource Allocation in Small Cells with Limited Backhaul Capacity	1429
<i>Jong Gyu Jang, Woojin Park, Hyun Jong Yang, Ulsan National Institute of Science and Technology, Republic of Korea; Hye Gyung Jwa, Electronics and Telecommunications Research Institute, Republic of Korea</i>	

TPb-2: Beamforming and Linear Processing

- TPb-2.1: Max-Min Transmit Beamforming via Iterative Regularization 1437
Ahmad Gharanjik, University of Luxembourg / KTH Royal Institute of Technology, Luxembourg;
Bhavani Shankar, University of Luxembourg, Luxembourg; Mojtaba Soltanalian, University of Illinois
at Chicago, United States Virgin Islands; Björn Ottersten, University of Luxembourg / KTH Royal
Institute of Technology, Luxembourg
- TPb-2.2: Two-Stage Downlink Beamforming in MISO Multicell Networks with Limited 1442
Backhaul Signaling
Youjin Kim, Hyun Jong Yang, Ulsan National Institute of Science and Technology, Republic of Korea
- TPb-2.3: A Class of Scalable Feedback Algorithms for Beam and Null-forming from 1447
Distributed Arrays
Sairam Goguri, Ben Peiffer, Raghu Mudumbai, Soura Dasgupta, University of Iowa, United States
- TPb-2.4: Dirty Paper Coding versus Beamforming in Multi-user MIMO under OFDM..... 1452
Ajay Mohanan, Arjun Nadh, Andrew Thangaraj, Radha Krishna Ganti, Indian Institute of Technology,
Madras, India
- TPb-2.5: Linear Detection Schemes for MIMO UW-OFDM..... 1457
Sher Ali Cheema, Jianshu Zhang, Ilmenau University of Technology, Germany; Mario Huemer,
Johannes Kepler University, Austria; Martin Haardt, Ilmenau University of Technology, Germany

TPb-3: Graph Signal Processing

- TPb-3.4: Graph Learning with Laplacian Constraints: Modeling Attractive Gaussian Markov 1470
Random Fields
Hilmi Enes Egilmez, Eduardo Pavez, Antonio Ortega, University of Southern California, United States
- TPb-3.5: Discrete Uncertainty Principles on Graphs..... 1475
Oguzhan Teke, Palghat Vaidyanathan, California Institute of Technology, United States

TPb-4: Five Puzzles and Euclid's Bag of Tricks

- TPb-4.2: Graph Rigidity, Unassigned Distance Geometry and the Nanostructure Problem 1483
Phillip Duxbury, Michigan State University, United States; Simon Billinge, Columbia University,
United States
- TPb-4.3: Self-calibrating Neural Networks for Dimensionality Reduction 1488
Dmitri Chklovskii, Simons Center for Data Analysis, United States

TPb-5: Source Localization and Sparse Array Design

- TPb-5.1: An Ideal-Theoretic Criterion for Localization of an Unknown Number of Sources 1499
Matthew W. Morency, Delft University of Technology, Netherlands; Sergiy A. Vorobyov, Aalto
University, Finland; Geert Leus, Delft University of Technology, Netherlands
- TPb-5.2: Exact Localization of Correlated Sources using 2D Harmonics Retrieval..... 1503
Ali Koochakzadeh, Piya Pal, University of Maryland, College Park, United States
- TPb-5.3: Two-Dimensional Sparse Arrays with Hole-Free Coarray and Reduced Mutual 1508
Coupling
Chun-Lin Liu, Palghat Vaidyanathan, California Institute of Technology, United States
- TPb-5.4: Multiple Source Detection Performance of Linear Sparse Arrays 1513
Yu Rong, Daniel Bliss, Arizona State University, United States
- TPb-5.5: Gridless Super-Resolution Direction Finding for Strictly Non-Circular Sources 1518
Based on Atomic Norm Minimization
Jens Steinwandt, Florian Roemer, Ilmenau University of Technology, Germany; Christian Steffens,
Technische Universität Darmstadt, Germany; Martin Haardt, Ilmenau University of Technology,
Germany; Marius Pesavento, Technische Universität Darmstadt, Germany

TPb-6: Optimization and Adaptive Methods

- TPb-6.1: Vector Approximate Message Passing for the Generalized Linear Model 1525
Subrata Sarkar, Philip Schniter, The Ohio State University, United States; Alyson Fletcher, University
of California, Los Angeles, United States; Sundeep Rangan, New York University, United States

TPb-6.2: Mean-Reverting Portfolio Design via Majorization-Minimization Method.....	1530
<i>Ziping Zhao, Daniel P. Palomar, Hong Kong University of Science and Technology, Hong Kong SAR of China</i>	
TPb-6.3: Online Kernel Dictionary Learning on a Budget.....	1535
<i>Jeon Lee, University of Texas Southwestern Medical Center, United States; Seung-Jun Kim, University of Maryland, Baltimore County, United States</i>	
TPb-6.4: A New Strategy for Effective Learning in Population Monte Carlo.....	1540
<i>Monica Bugallo, Stony Brook University, United States; Victor Elvira, Universidad Carlos III de Madrid, Spain; Luca Martino, Universidad de Valencia, Spain</i>	
TPb-6.5: A Bayesian Framework for Robust Kalman Filtering Under Uncertain Noise	1545
Statistics <i>Roozbeh Dehghannasiri, Texas A&M University, United States; Mohammad Shahrokh Esfahani, Stanford School of Medicine, United States; Edward Dougherty, Texas A&M University, United States</i>	
 TPb-7: Implementation of Full-Duplex Radio Transceivers	
TPb-7.1: Advanced Architectures for Self-Interference Cancellation in Full-Duplex Radios:	1553
Algorithms and Measurements <i>Dani Korpi, Mona Aghababaeetafreschi, Mauno Piililä, Lauri Anttila, Mikko Valkama, Tampere University of Technology, Finland</i>	
TPb-7.3: Real Time Adaptive RF and Digital Self-Interference Cancellation for	1558
Full-Duplex Transceivers <i>Visa Tapio, Markku Juntti, Aarno Pärssinen, Kari Rikkinen, University of Oulu, Finland</i>	
TPb-7.4: Full-Duplex in a Hand-held Device - From Fundamental Physics to Complex	1563
Integrated Circuits, Systems and Networks: An Overview of the Columbia FlexICoN project <i>Harish Krishnaswamy, Gil Zussman, Jin Zhou, Jelena Marasevic, Tolga Dinc, Negar Reiskarimian, Tingjun Chen, Columbia University, United States</i>	
TPb-7.5: Integrating Full-duplex Capabilities in Heterogeneous Spectrum Sharing Systems.....	1568
<i>Wessam Afifi, Marwan Krunch, Mohammed Hirzallah, University of Arizona, United States</i>	
 TPb-8: Image and Video Sensor Processing and Communications	
TPb-8.1: Focal Plane Processing for HOG Detection with Bayer Pattern Sensors.....	1603
<i>Allen Rush, Sally Wood, Santa Clara University, United States</i>	
TPb-8.2: Performance of Maximum Likelihood Temperature/Emissivity Separation of	1608
Hyperspectral Images with Correlated Gaussian Downwelling Radiance <i>David Neal, Todd Moon, Jacob Gunther, Utah State University, United States; Gus Williams, Brigham Young University, United States</i>	
TPb-8.3: Spatially Scalable Video Broadcasting in Multiple Antenna Systems.....	1613
<i>Arash Vosoughi, LG Electronics, United States; Seok-Ho Chang, Dankook University, Republic of Korea; Sang-Hyo Kim, Sungkyunkwan University, Republic of Korea; Pamela Cosman, Laurence Milstein, University of California, San Diego, United States</i>	
 TPb-8: Processing of Physiological Signals	
TPb-8.1: Information-Theoretic Analysis of Refractory Effects in the P300 Speller.....	1621
<i>Vaishakhi Mayya, Boyla Mainsah, Galen Reeves, Duke University, United States</i>	
TPb-8.2: The Addition of Adaptive Comb Filtering to Sequential Adaptive Processing for	1626
Fetal Electrocardiograms (ECGs) <i>Yuqing Dong, Jacob Kovarskiy, William Jenkins, Pennsylvania State University, United States</i>	
TPb-8.3: Fast Respiratory Rate Estimation from PPG Signal Using Sparse Signal	1631
Reconstruction Based on Orthogonal Matching Pursuit <i>Xiaorong Zhang, San Francisco State University, United States; Quan Ding, The Home Depot Techshed, United States</i>	
TPb-8.4: Modeling of Oxygen Saturation and Respiration for Sleep Apnea Detection.....	1636
<i>Sandeep Gutta, Qi Cheng, Oklahoma State University, United States</i>	

TPb-8.5: Do retinal ganglion cells project natural scenes to their principal subspace and whiten them?	1641
<i>Reza Abbasi-Asl, University of California, Berkeley, United States; Cengiz Pehlevan, Simons Foundation, United States; Bin Yu, University of California, Berkeley, United States; Dmitri B. Chklovskii, Simons Foundation, United States</i>	
TPb-8.6: Surface Charge Method for the Forward EEG Problem.....	1646
<i>Francisco J. Solis, Antonia Papandreou-Suppappola, Arizona State University, United States</i>	
TPb-8: Computer Arithmetic II	
TPb-8.1: Optimized Memristor-Based Ripple Carry Adders.....	1575
<i>Lauren Guckert, Earl Swartzlander, Jr., University of Texas at Austin, United States</i>	
TPb-8.2: Computing Hyperbolic Tangent and Sigmoid Functions using Stochastic Logic	1580
<i>Yin Liu, Keshab Parhi, University of Minnesota, Twin Cities, United States</i>	
TPb-8.3: Precise Digital Implementations of Hyperbolic Tanh and Sigmoid Function	1586
<i>Shaghayegh Gomar, Mitra Mirhassani, Majid Ahmadi, University of Windsor, Canada</i>	
TPb-8.4: Optimized Multipartite Table Methods for Elementary Function Computation	1590
<i>James Stine, Masoud Sadeghian, Oklahoma State University, United States</i>	
TPb-8.5: Radix-4 Energy Efficient Carry-Free Truncated Multiplier	1596
<i>Wen Yan, Beijing Institute of Technology, China; Milos Ercegovac, University of California, Los Angeles, United States</i>	
WAa-1: Approximate Computing and Fault Tolerance	
WAa-1.2: Energy Efficiency Limits in Approximate Computing: A Fundamental Physical Perspective	1653
<i>Neal Anderson, University of Massachusetts Amherst, United States</i>	
WAa-1.4: Analog Processing to Enable Scalable High-Throughput mm-Wave Wireless Fiber Systems	1658
<i>Mahmoud Sawaby, Stanford University, United States; Babak Mamandipour, Upamanyu Madhow, University of California, Santa Barbara, United States; Amin Arbabian, Stanford University, United States</i>	
WAa-2: Physical Layer Security	
WAa-2.1: Keyless Authentication over Noisy Channel.....	1665
<i>Wenwen Tu, Lifeng Lai, Worcester Polytechnic Institute, United States</i>	
WAa-2.2: Secure Computation of Linear Functions over Linear Discrete Multiple-Access Wiretap Channels	1670
<i>Mario Goldenbaum, Princeton University, United States; Holger Boche, Technical University of Munich, Germany; H. Vincent Poor, Princeton University, United States</i>	
WAa-2.3: Physical Layer based Authentication without Phase Detection	1675
<i>Sarah Rumpel, Anne Wolf, Eduard A. Jorswieck, Technische Universität Dresden, Germany</i>	
WAa-2.4: Private Authentication with Controllable Measurement	1680
<i>Kittipong Kittichokechai, Rafael F. Schaefer, Giuseppe Caire, Technische Universität Berlin, Germany</i>	
WAa-3: Cognitive Networking	
WAa-3.1: Multiband Noisy Spectrum Sensing with Codebooks.....	1687
<i>Tara Javidi, University of California, San Diego, United States</i>	
WAa-3.2: Correlation-Aware Sensing in Active and Passive Modes for Source Localization.....	1692
<i>Ali Koochakzadeh, Heng Qiao, Pia Pal, University of Maryland, College Park, United States</i>	
WAa-3.4: A POMDP Approach for Active Collision Detection via Networked Sensors	1697
<i>Daphney-Stavroula Zois, University of Illinois, Urbana Champaign, United States</i>	
WAa-4: Decentralized Optimization and Learning	
WAa-4.1: Doubly Stochastic Algorithms for Large-Scale Optimization.....	1705
<i>Alec Koppel, Aryan Mokhtari, Alejandro Ribeiro, University of Pennsylvania, United States</i>	
WAa-4.2: Distributed Gaussian Learning over Time-varying Directed Graphs.....	1710
<i>Angelia Nedich, Alexander Olshevsky, Cesar Uribe, University of Illinois, United States</i>	

WAA-4.3: Expander Graph and Communication-Efficient Decentralized Optimization.....	1715
<i>Yat-Tin Chow, University of California, Los Angeles, United States; Wei Shi, University of Illinois at Urbana Champaign, United States; W Yin, University of California, Los Angeles, United States</i>	
WA-5: Tensor Signal Processing	
WA-5.1: First-Order Perturbation Analysis of Low-Rank Tensor Approximations Based on the Truncated HOSVD	1723
<i>Emilio Rafael Balda, Sher Ali Cheema, Jens Steinwandt, Martin Haardt, Ilmenau University of Technology, Germany; Amir Weiss, Arie Yeredor, Tel-Aviv University, Israel</i>	
WA-5.2: Extension of the Semi-Algebraic Framework for Approximate CP Decompositions via Simultaneous Matrix Diagonalization to the Efficient Calculation of Coupled CP Decompositions	1728
<i>Kristina Naskovska, Martin Haardt, Ilmenau University of Technology, Germany</i>	
WA-5.3: Tensorlab 3.0 – Numerical optimization strategies for large-scale constrained and coupled matrix/tensor factorization	1733
<i>Nico Vervliet, Otto Debals, Lieven De Lathauwer, KU Leuven, Belgium</i>	
WA-5.4: Inferring Directed Network Topologies via Tensor Factorization.....	1739
<i>Yanning Shen, Brian Baingana, Georgios Giannakis, University of Minnesota, United States</i>	
WA-5.5: Robust PCA via Tensor Outlier Pursuit.....	1744
<i>Jineng Ren, Xingguo Li, University of Minnesota, United States; Jarvis Haupt, University of Minnesota, Twin Cities, United States</i>	
WA-5.6: Tensor Completion via Group-Sparse Regularization.....	1750
<i>Bo Yang, Gang Wang, Nikos Sidiropoulos, University of Minnesota, United States</i>	
WA-5.7: Coupled Graph Tensor Factorization	1755
<i>Ahmed S. Zamzam, Vassilis Ioannidis, Nikos D. Sidiropoulos, University of Minnesota, United States</i>	
WAA-6: Emerging Sensing Technologies for Assisted Living	
WAA-6.3: Breathing Detection Based on the Topological Features of IR Sensor and Accelerometer Signals	1763
<i>Fatih Erden, Atilim University, Turkey; Ahmet Enis Cetin, Bilkent University, Turkey</i>	
WAA-6.4: Wideband Radar Based Fall Motion Detection for a Generic Elderly	1768
<i>Baris Erol, Moeness Amin, Fauzia Ahmad, Villanova University, United States; Yimin Zhang, Temple University, United States</i>	
WAb-1: Communication System Development	
WAb-1.1: Maximizing Wireless Power Transfer using Distributed Beamforming	1775
<i>Sairam Goguri, University of Iowa, United States; Dennis Ogbe, Purdue University, United States; Raghuraman Mudumbai, University of Iowa, United States; David Love, Purdue University, United States; Soura Dasgupta, University of Iowa, United States; Patrick Bidigare, BBN Technologies, United States</i>	
WAb-1.2: Digitally Enhanced Inter-modulation Distortion Compensation in Wideband Spectrum Sensing	1780
<i>Han Yan, Danijela Cabric, University of California, Los Angeles, United States</i>	
WAb-1.3: Hybrid Analog-Digital Transceiver Designs for Cognitive Radio Millimeter Wave Systems	1785
<i>Christos G. Tsinos, Sina Maleki, Symeon Chatzinotas, Bjorn Ottersten, University of Luxembourg, Luxembourg</i>	
WAb-2: Massive MIMO in the Field	
WAb-2.1: Massive MIMO Proof-of-Concept: Emulations and Hardware-Field Trials at 3.5 GHz	1793
<i>Thomas Wirth, Lars Thiele, Martin Kurras, Matthias Mehlhose, Thomas Haustein, Fraunhofer Heinrich Hertz Institute, Germany</i>	

WAb-2.2: Directional Propagation Measurements and Modeling in an Urban Environment at 3.7 GHz	1799
<i>Leszek Raschkowski, Stephan Jaeckel, Fabian Undi, Lars Thiele, Wilhelm Keusgen, Fraunhofer Heinrich Hertz Institute, Germany; Boonsarn Pitakdumrongkija, Masayuki Ariyoshi, NEC Corporation, Japan</i>	
WAb-2.3: Massive MIMO Properties based on Measured Channels: Channel Hardening, User Decorrelation and Channel Sparsity	1804
<i>Alex Oliveras Martinez, Elisabeth De Carvalho, Jesper Ødum Nielsen, Aalborg University, Denmark</i>	
WAb-3: Signal Processing with Lattices	
WAb-3.1: Convolutional Lattices	1811
<i>Joseph Boutros, Nicola Di Pietro, Texas A&M University at Qatar, Qatar; Fanny Jardel, Télécom Paristech, France</i>	
WAb-3.2: Typical Sumsets of Lattice Points	1816
<i>Jingge Zhu, Michael Gastpar, École polytechnique fédérale de Lausanne, Switzerland</i>	
WAb-3.3: Lattice Parameter Estimation from Sparse, Noisy Measurements	1821
<i>Vaughan Clarkson, University of Queensland, Australia; Robby McKilliam, Myriota Pty Ltd, Australia; Barry Quinn, Macquarie University, Australia</i>	
WAb-4: Modelling and Inference with Graphs	
WAb-4.1: Kernel-based Reconstruction of Space-time Functions via Extended Graphs.....	1829
<i>Vassilis N. Ioannidis, Daniel Romero, Georgios B. Giannakis, University of Minnesota, United States</i>	
WAb-4.2: Hierarchical Representations of Network Data with Optimal Distortion Bounds	1834
<i>Zane Smith, Samir Chowdhury, Facundo Memoli, The Ohio State University, United States</i>	
WAb-4.3: Efficient Graph Signal Recovery over Big Networks	1839
<i>Gabor Hannak, Peter Berger, Gerald Matz, Vienna University of Technology, Austria; Alexander Jung, Aalto University, Finland</i>	
WAb-6: Image and Video Quality Assessment	
WAb-6.1: No-Reference Image Quality Assessment for High Dynamic Range Images.....	1847
<i>Debarati Kundu, Deepti Ghadiyaram, Alan Bovik, Brian Evans, University of Texas at Austin, United States</i>	
WAb-6.2: A Multi-Stage Temporal Pooling Mechanism for Video Quality Assessment	1853
<i>Venkata Phani Kumar M, Sudipta Mahapatra, Indian Institute of Technology, Kharagpur, India</i>	
WAb-6.3: Sparsity Based Stereoscopic Image Quality Assessment	1858
<i>Sameeulla Khan, Sumohana Channappayya, Indian Institute of Technology, Hyderabad, India</i>	

Additional Papers:

Random Matrix Improved Subspace Clustering.....	90
<i>R. Couillet, University of Paris-Saclay, France</i>	
<i>A. Kammoun, King Abdullah university of Science and Technology, Saudi Arabia</i>	
Automated Selection of Uniform Regions for CT Image Quality Detection.....	273
<i>M. D. Naeemi, S. Roychowdhury, University of Washington, United States</i>	
<i>A. M. Alessio, University of Washington (Department of Radiology), United States</i>	
Multipath Mitigation Techniques for Nonlinear Adaptive Beamforming.....	669
<i>P. Vouras, Naval Research Laboratory, United States</i>	
On Spatial Security Outage Probability Derivation of Exposure Region Based Beamforming with.....	689
Randomly Located Eavesdroppers	
<i>Y. Zhang, Y. Ko, R. Woods, Queen's University Belfast, United Kingdom</i>	
<i>A. Marshall, University of Liverpool, United Kingdom</i>
