35th UIT Heat Transfer Conference (UIT2017)26–28 June 2017, Ancona, Italy

Accepted papers received: 1 November 2017

Published online: 20 November 2017

Preface

35th UIT Heat Transfer Conference (UIT2017)

Peer review statement

Keynote Lecture

Thermophysical properties of fluids: dynamic viscosity and thermal conductivity

G Latini.....1

Micro and nanoscale thermo-fluid dynamics

Electro-osmotic flow in rectangular microchannels: geometry optimization

M Lorenzini.....13

A multiscale approach to interpret and predict the apparent slip velocity at liquid-liquid interfaces

P Poesio, A Damone and O K Matar.....23

Nanoparticle Deposition During Cu-Water Nanofluid Pool Boiling

L Doretti, G A Longo, S Mancin, G Righetti and J A Weibel.....32

Heat transfer in nuclear plants

Pre-test analysis of protected loss of primary pump transients in CIRCE-HERO facility

V Narcisi, F Giannetti, A Del Nevo, M Tarantino and G Caruso.....41

Pool temperature stratification analysis in CIRCE-ICE facility with RELAP5-3D© model and comparison with experimental tests

V Narcisi, F Giannetti, M Tarantino, D Martelli and G Caruso.....51

Analysis of a full-scale integral test in PERSEO facility by using TRACE code

S D'Amico, C Lombardo, I Moscato, M Polidori and G Vella.....61

Verification of RELAP5-3D code in natural circulation loop as function of the initial water inventory

C Bertani, N Falcone, A Bersano, M Caramello, T Matsushita, M De Salve and B Panella.....71

Analysis of unmitigated large break loss of coolant accidents using MELCOR code

M Pescarini, F Mascari, D Mostacci, F De Rosa, C Lombardo and F Giannetti.....81

Study of steam condensation at sub-atmospheric pressure: setting a basic research using MELCOR code

A Manfredini and M Mazzini.....91

Multi-phase fluid dynamics, heat transfer and interface phenomena

Novel gas holdup and regime transition correlation for two-phase bubble columns

G Besagni and F Inzoli.....102

Water holdup estimation from pressure drop measurements in oil-water two-phase flows by means of the two-fluid model

L P M Colombo, M Guilizzoni, G Sotgia, P Babakhani Dehkordi and A Lucchini.....112

Characterization of highly hydrophobic textiles by means of X-ray microtomography, wettability analysis and drop impact

M Santini, M Guilizzoni, S Fest-Santini and M Lorenzi.....121

Bubble aspect ratio in dense bubbly flows: experimental studies in low Morton-number systems

G Besagni, F Inzoli, T Ziegenhein, H Hessenkemper and D Lucas.....131

Flow boiling of R32 in a horizontal smooth tube of 6.0 mm internal diameter: heat transfer coefficient and pressure drop

R Mastrullo, A W Mauro and L Viscito.....141

R245fa Flow Boiling inside a 4.2 mm ID Microfin Tube

G A Longo, S Mancin, G Righetti and C Zilio.....151

Heat transfer degradation during condensation of non-azeotropic mixtures

M Azzolin, A Berto, S Bortolin and D Del Col.....161

Experimental investigation on predictive models for motive flow calculation through ejectors for transcritical CO_2 heat pumps

G Boccardi, G Lillo, R Mastrullo, A W Mauro, L Saraceno, M Pieve and R Trinchieri.....171

Effects of Force Fields on Interface Dynamics, in view of Two-Phase Heat Transfer Enhancement and Phase Management for Space Applications

P Di Marco and G Saccone.....181

Numerical Simulation of rivulet build up via lubrication equations

N Suzzi and G Croce.....193

Micro Droplets of non-Newtonian Solutions in Silicone Oil Flow through a Hydrophobic Micro Cross-Junction

B Rostami and G L Morini.....204

Fluid-flow pressure measurements and thermo-fluid characterization of a single loop two-phase passive heat transfer device

A Ilinca, D Mangini, M Mameli, D Fioriti, S Filippeschi, L Araneo, N Roth and M Marengo.....213

Modelling the pressurization induced by solar radiation on above ground installations of LPG pipeline systems

M Leporini, A Terenzi, B Marchetti, G Giacchetta, F Polonara, F Corvaro and R Cocci Grifoni.....225

Computational fluid dynamics and heat transfer

012024
The following article is OPEN ACCESS
Magnetohydrodynamic flow and heat transfer around a heated cylinder of arbitrary conductivity

A Tassone, M Nobili and G Caruso.....234

A multiscale numerical algorithm for heat transfer simulation between multidimensional CFD and monodimensional system codes

A Chierici, L Chirco, R Da Già, S Manservisi and R Scardovelli.....244

An optimal control method for fluid structure interaction systems via adjoint boundary pressure

L Chirco, R Da Già and S Manservisi.....254

CFD analysis of aircraft fuel tanks thermal behaviour

C Zilio, G A Longo, G Pernigotto, F Chiacchio, P Borrelli and E D'Errico.....264

A priori and a posteriori analysis of the flow around a rectangular cylinder

A Cimarelli, A Leonforte, M Franciolini, E De Angelis, D Angeli and A Crivellini.....274

A Spalart–Allmaras local correlation–based transition model for Thermo–fuid dynamics

V D'Alessandro, F Garbuglia, S Montelpare and A Zoppi....282

Study of the flow field past dimpled aerodynamic surfaces: numerical simulation and experimental verification

L Binci, G Clementi, V D'Alessandro, S Montelpare and R Ricci.....293

CFD three dimensional wake analysis in complex terrain

F Castellani, D Astolfi and L Terzi.....303

Investigation of the effect of cylindrical insert devices on laminar convective heat transfer in channel flow by applying the Field Synergy Principle

P Vocale, A Mocerino, F Bozzoli and S Rainieri.....313

Numerical analysis of flow resistance and heat transfer in the transitional regime of pipe flow with twisted-tape turbulators

R Rossi, L Cattani, A Mocerino, F Bozzoli, S Rainieri, R Caminati and G Pagliarini.....323

Numerical analysis of heat conduction problems on 3D general-shaped domains by means of a RBF Collocation Meshless Method

R Zamolo and E Nobile.....334

Anisotropy effects on convective heat transfer and pressure drop in Kelvin's open-cell foams

M Iasiello, N Bianco, W K S Chiu and V Naso.....345

CFD simulations of power coefficients for an innovative Darrieus style vertical axis wind turbine with auxiliary straight blades

F Arpino, G Cortellessa, M Dell'Isola, M Scungio, V Focanti, M Profili and M Rotondi.....355

Heat transfer and efficiency in energy systems, environmental technologies and buildings

Use of phase change materials during compressed air expansion for isothermal CAES plants

B Castellani, A Presciutti, E Morini, M Filipponi, A Nicolini and F Rossi.....363

Multi-objective Optimization of a Solar Humidification Dehumidification Desalination Unit

M Rafigh, M Mirzaeian, B Najafi, F Rinaldi and R Marchesi.....372

Development of a low-cost temperature data monitoring. An upgrade for hot box apparatus

T de Rubeis, I Nardi and M Muttillo.....382

Energetic performance analysis of a commercial water-based photovoltaic thermal system (PV/T) under summer conditions

I Nardi, D Ambrosini, T de Rubeis, D Paoletti, M Muttillo and S Sfarra.....392

Innovative coupling of cogeneration units with fire tube boilers: thermo-fluid dynamics of the fire tubes

L Cioccolanti, A Arteconi, C M Bartolini and F Polonara.....402

Thermal analysis of a Phase Change Material for a Solar Organic Rankine Cycle

M Iasiello, K Braimakis, A Andreozzi and S Karellas.....410

Energy saving opportunities in the refrigerated transport sector through Phase Change Materials (PCMs) application

P Principi, R Fioretti and B Copertaro.....420

Recent trends in the development of heat exchangers for geothermal systems

A Franco and M Vaccaro.....431

Analytical solutions for tomato peeling with combined heat flux and convective boundary conditions

G Cuccurullo, L Giordano and A Metallo.....441

How accelerated biological aging can affect solar reflective polymeric based building materials

C Ferrari, G Santunione, A Libbra, A Muscio and E Sgarbi.....450

A Solar Chimney for renewable energy production: thermo-fluid dynamic optimization by CFD analyses

S Montelpare, V D'Alessandro, A Zoppi and E Costanzo.....462

Natural, forced and mixed convection

Experimental characterization of a solar cooker with thermal energy storage based on solar salt

G Coccia, G Di Nicola, S Tomassetti, G Gabrielli, M Chieruzzi and M Pierantozzi.....476

Numerical investigation on natural convection in horizontal channel partially filled with aluminium foam and heated from above

B Buonomo, A Diana, O Manca and S Nardini.....486

Analytical models of Ohmic heating and conventional heating in food processing

A Serventi, F Bozzoli and S Rainieri.....499

On the effect of the aspect ratio on the mixed convection in a vertical cylindrical cavity with rotating inner wall

A Fichera, M Marcoux and A Pagano.....510

New data processing of local heat transfer coefficient inside a rectangular channel

P Gramazio, L Vitali, D Fustinoni and A Niro.....518

Influence of the boundary conditions on heat and mass transfer in spacer-filled channels

M Ciofalo, M F La Cerva, M Di Liberto and A Tamburini.....530

Conduction

Artificial Neural Network Modeling of Liquid Thermal Conductivity for alkanes, ketones and silanes

G Latini, G Di Nicola, M Pierantozzi, G Coccia and S Tomassetti.....544

Heat transfer in Fire Engineering

On the temperature prediction in a fire escape passage

G Casano and S Piva.....554

Other

A brief compendium of correlations and analytical formulae for the thermal field generated by a heat source embedded in porous and purely-conductive media

P Conti, D Testi and W Grassi.....564

Dry deposition models for radionuclides dispersed in air: a new approach for deposition velocity evaluation schema

M. Giardina, P. Buffa, A. Cervone, F. De Rosa, C. Lombardo and M. Casamirra.....574
