# Table of contents

## Volume 980

**6th International Conference Heat and Mass Transfer and Hydrodynamics in Swirling Flows**

**21–23 November 2017, Novosibirsk, Russian Federation**

**Accepted papers received: 20 February 2018**

**Published online: 19 March 2018**

### **Preface**

[Heat and Mass Transfer and Hydrodynamics in Swirling Flows](#)

[Peer review statement](#)

### **Papers**

#### **Heat and mass transfer in swirling flows**

[Swirl effect on flow structure and mixing in a turbulent jet](#)

Z D Kravtsov, D K Sharaborin and V M Dulin.....1

[Investigating the structure of a vortex flow in the closed polygonal containers](#)

I Yu Podolskaya, G V Bakakin and I V Naumov.....6

[Kelvin waves on helical vortex tube in swirling flow](#)

M A Tsoy, S G Skripkin, P A Kuibin, S I Shtork and S V Alekseenko.....12

[Hydraulic resistance of tubes with internal helical finning designed by deforming cutting](#)

I A Popov, A V Shchelchkov, A N Skrypnik, D V Ryzhkov, N N Zubkov, Yu V Zhukova and S A Sverchkov.....18

[Dynamics of the aircraft in a vortex wake](#)

A M Gaifullin and Yu N Sviridenko.....26

[Mathematical modelling of thermolabile solutions concentration in vortex chamber](#)

V V Kharkov.....32

[Heat transfer simulation of unsteady swirling flow in a vortex tube](#)

S V Veretennikov, Sh A Piralishvili, O A Evdokimov and A I Guryanov.....38

[Column formation and hysteresis in a two-fluid tornado](#)

B R Sharifullin, I V Naumov, M A Herrada and V N Shtern.....44

[Interaction of laser beams with magnetized substance in a strong magnetic field](#)

V V Kuzenov.....50

[Numerical simulation of an argon swirling flow in the presence of a DC discharge](#)

P N Kazanskii, A I Klimov, N E Molevich, D P Porfiriev and I P Zavershinskii.....56

[Hydrodynamic characteristics of viscous fluid flow in screw channels formed by two ribs](#)

A I Kadyirov, B R Abaydullin and E K Vachagina.....62

[Heat transfer and structure of flow at boiling of refrigerant R134a in channels with inserts in the form of finned twisted tape](#)

A V Shishkin and S E Tarasevich.....66

[Determining the parameters of vortex structures in a hydrodynamic vortex chamber](#)

V S Dremov, S I Shtork and I K Kabardin.....71

[Visualization of vortex structures and analysis of frequency of PVC](#)

E S Gesheva, S I Shtork and S V Alekseenko.....76

[Heat transfer of coolants in channels with swirling and continuous wall roughness](#)

AV Zlobin, S E Tarasevich, AV Shishkin and A B Yakovlev.....81

[Numerical simulation of a low-swirl impinging jet with a rotating convergent nozzle](#)

K Borynyak, M Hrebtov, M Bobrov and N Kozyulin.....87

[Investigation of acoustic and gas dynamic characteristics of strongly swirled turbulent jets](#)

S Yu Krasheninnikov, VP Maslov, AK Mironov and PD Toktaliev.....93

[Vortex Structure Effects on Impingement, Effusion, and Cross Flow Cooling of a Double Wall Configuration](#)

P M Ligrani.....99

[Modeling air and fire non-stationary whirls in laboratory conditions](#)

A Y Varaksin.....114

[Large-eddy simulations of the near field of a swirling turbulent annular jet](#)

V. Ryzhenkov and R. Mullyadzhyanov.....120

**Vortex and heat exchange intensifiers**

[Thermo-aerodynamic efficiency of non-circular ducts with vortex enhancement of heat exchange in different types of compact heat exchangers](#)

V Ya Vasilev and S A Nikiforova.....126

[Experimental investigation of hydrodynamics and heat exchange in the ring channel with heat exchangers in the modes of single-phase convection and bubble boiling](#)

B Y Agishev, E A Boltenko, A N Varava, A V Dedov, A V Zakharenkov, A T Komov and Y V Smorchova.....132

[Calculating processes of laminar and turbulent heat transfer around the elements of the aircraft](#)

V V Kuzenov, A O Dobrynina and V V Shumaev.....138

[Comparative analysis of film cooling efficiency at coolant supply into a single array of triangular dimples](#)

A A Khalatov, O O Petliak, S D Severin and N A Panchenko.....145

[Heat transfer under transition and film boiling of liquids at dimpled spheres and cylinders](#)

V. M. Zhukov, Yu. A. Kuzma-Kichta, A. V. Lavrikov, K. I. Belov and V. A. Len'kov.....151

[RANS and LES analysis of a separation region in front of a backward-facing step](#)

T A Baranova, V L Zhdanov, D A Ivanov, Ja I Smulsky and V I Terekhov.....161

[Investigating the influence of cells with various geometric parameters on the air flow in the channel](#)

V I Terekhov, Ja I Smulsky, K A Sharov and A V Zolotukhin.....167

**Heat and mass transfer at micro- and nanoscales**

[Features of round air jet flowing at low Reynolds numbers](#)

V V Lemanov, K A Sharov and N V Gorinovich.....172

[Heat transfer enhancement at increasing water concentration in alcohol in the process of non-stationary film boiling](#)

P K Kanin, V A Ryazantsev, M A Lexin, A R Zabirov and V V Yagov.....177

[Numerical Investigation of a Novel Microscale Swirling Jet Reactor for Medical Sensor Applications](#)

G Ogus, M Baelmans, J Lammertyn and M Vanierschot.....182

### **Swirling flames**

[A study of burning processes of fossil fuels in straitened conditions of furnaces in low capacity boilers by an example of natural gas](#)

P V Roslyakov, Y V Proskurin, D A Khokhlov and M N Zaichenko.....193

[Structure of a swirling jet with vortex breakdown and combustion](#)

D K Sharaborin, V M Dulin and D M Markovich.....199

[Investigation of turbulent swirling jet-flames by PIV / OH PLIF / HCHO PLIF](#)

A S Lobasov and L M Chikishev.....205

### **Swirling flows based devices in power engineering**

[Cavitation conditions in the molten metal under the action of the disk agitator](#)

A Tokhmetova, M Khmeleva, L Minkov and V Dammer.....211

[Mathematical modeling of swirled flows in industrial applications](#)

A A Dekterev, A A Gavrilov and A V Sentyabov.....217

[Possibilities of application of the swirling flows in cooling systems of laser mirrors](#)

Yu Shanin and A Chernykh.....223

[The Effect of Flow Swirling on the Safety and Reliability of Nuclear Power Installations of New Generation](#)

O V Mitrofanova, O A Ivlev and D S Urtenov.....229

[Experimental modeling of swirl flows in power plants](#)

S I Shtork, I V Litvinov, E S Gesheva, M A Tsoy and S G Skripkin.....234

[Investigation of inner aerodynamics of the four-vortex furnace model](#)

I S Anufriev, E Yu Shadrin and O V Sharypov.....241

[High effective heterogeneous plasma vortex reactor for production of heat energy and hydrogen](#)

N K Belov, I P Zavershinskii, A I Klimov, N E Molevich, D P Porfiriev and B N Tolkunov.....245

[Numerical research of the swirling supersonic gas flows in the self-vacuuming vortex tube](#)

V T Volov and A S Lyaskin.....251

[Modeling of atomization and distribution of drop-liquid fuel in unsteady swirling flows in a combustion chamber and free space](#)

A A Sviridenkov, P D Toktaliev and V V Tretyakov.....257

**Experimental methods for swirling flows**

[LDA Diagnostics of velocity fields inside the Ranque tube](#)

I K Kabardin, V G Meledin, N I Yavorsky, M R Gordienko, M Kh Pravdina, D V Kulikov, V I Polyakova and V A Pavlov.....263

[Acoustic relaxation of the hydro-mechanical system under critical expiration of swirl flow](#)

I G Pozdeeva and O V Mitrofanova.....268
