## Volume 387

**25th International Conference on Vacuum Technique and Technology**

**5–7 June 2018, St. Petersburg, Russian Federation**

**Accepted papers received: 4 July 2018**

**Published online: 17 July 2018**

### **Preface**

[25<sup>th</sup> International Conference on Vacuum Technique and Technology](#)

[Peer review statement](#)

### **Papers**

[The porosity determination of dispersion medium by the method of expansion of pore air into vacuum \(on the example of the main soil types in the Chuvash republic\)](#)

V V Alekseev, S A Vasiliev and M Y Ivanov.....1

[Membrane-capacitive transducer with compensation for the primary standard of pressure](#)

I V Andronov, V N Gorobey, E K Izrailov, R E Kuvandykov, A A Lobashev and A A Chernyshenko.....7

[Temperature characteristics of the photosensitive structures metal-AlGa<sub>N</sub> developed by vacuum thermal deposition](#)

A A Anikina, S A Tarasov, I A Lamkin and G I Kontsevik.....12

[Tests of modern vacuum gauges for type approval for the last 10 years](#)

A I Antsukova, V N Gorobei, A A Pimenova and A A Chernyshenko.....16

[Peculiarities of using nanomaterials based on SiO<sub>2</sub>-SnO<sub>2</sub>-In<sub>2</sub>O<sub>3</sub> as sensitive elements of vacuum sensors](#)

I A Averin, A A Karmanov, S E Igoshina, I A Pronin, N D Yakushova and V A Moshnikov.....21

[Estimation of the position error of the magnetorheological elastomers active vibration control platform for precision vacuum equipment](#)

A M Bazinenkov, I V Makeev, A P Rotari and D A Ivanova.....26

[AFM investigation of MoS<sub>2</sub> thin films](#)

A I Belikov, Do Thi Nhan and V N Kalinin.....29

[MoS<sub>2</sub> thin films spectrophotometry](#)

A I Belikov and Kyaw Zin Phyo.....33

[Experimental leak tests of gas-filled instruments using automatic leak detection](#)

S A Bushin and S S Galkin.....37

[Determination of heat fluxes and surface temperatures during magnetron sputtering with a cold and hot target](#)

S P Bychkov.....43

[Gas-discharge laser with controlled output power for medical applications](#)

V V Chernigovskiy, S A Martsinukov, D K Kostrin and A S Kiselev.....49

[Experimental study of the fragmentation of van der Waals gas clusters by electron ionization](#)

S T Chinenov, A E Zarvin, V E Khudozhitkov, V V Kalyada and A S Yaskin.....53

[Technology of creating organic light-emitting structures](#)

A E Degterev, I A Lamkin and S A Tarasov.....58

[Development of calculation method of main parameters of vacuum liquid transportation system](#)

K E Demikhov, A A Ochkov and U S Gordeeva.....62

[Experimental study of a vacuum fluid transportation system](#)

K E Demikhov, A A Ochkov and U S Gordeeva.....66

[System of vacuum mechanisms failure prediction based on outgassing flows dynamic](#)

E A Deulin, V P Mikhailov and R O Emelianenko.....71

[The phenomenon model of X-ray beam angular divergence decreasing formed by composite waveguide-resonator](#)

V K Egorov and E V Egorov.....76

[TÜBİTAK UME vacuum laboratory capabilities and activities](#)

Alper Elkatmis and Rifat Kangi.....82

[To the calculation of the equation of measurements of a MEMS vacuum transducer](#)

A Garshin, V Gorobey and R Kuvandykov.....88

[Modeling of reactive sputtering of hot titanium target in nitrogen and oxygen](#)

A O Goncharov, E A Minzhulina and V I Shapovalov.....92

[The experimental study of spacial distribution of particles produced in the pulse arc discharge](#)

V D Goncharov and R V Yashkardin.....96

[The possibility of using permanent magnets in planar magnetron installations for sputtering magnetic targets](#)

V D Goncharov, R V Yashkardin and E M Fiskin.....101

[New state primary standard GET 49-2016 of reproduction pressure unit in range  \$10^{-6}\$ – \$10^3\$  Pa](#)

V N Gorobei, E K Izrailov, R E Kuvandykov, D M Fomin and A A Chernyshenko.....107

[Production technology of micromechanical vacuum gauge](#)

V N Gorobey, S A Konakov, R E Kuvandykov, I V Popova and R A Teteruk.....111

[Inhomogeneous metal oxide films with a fractal structure as an object for observation of quantum size effects](#)

S E Igoshina, I A Averin, A A Karmanov, I A Pronin, N D Yakushova and V A Moshnikov.....115

[Ab initio modeling of carbon films deposited by laser plasma](#)

V V Ilyasov, O M Holodova, I V Ershov, N V Prutsakova, T P Zhdanova, I P Gritsay and A V Ashkanov.....120

[Vacuum pumping system for the multi-aperture low-energy continuously-operated electron accelerator with a high-density beam current](#)

A G Ivanov, D A Karpov, S L Kosogorov and N A Uspensky.....124

[Study of the waveguide elements for mm-wave traveling wave tube](#)

A S Ivanov, O N Mikhailova, V N Titov and A D Tupitsyn.....129

[Investigation of gas discharge features during HiPIMS using optical emission spectroscopy](#)

V V Karzin and K I Karapets.....133

[Study of nanoscale metal oxide coatings produced by magnetron sputtering of copper followed by heat treatment](#)

I N Kashkul, L D Bakhchova, K G Elanskaia and D N Redka.....139

[Specifics of oil vacuum pumps operation in handling radioactive materials](#)

N T Kazakovsky and V A Korolev.....143

[Research of acoustically stimulated thermal desorption in electrovacuum microwave devices](#)

I F Khanbekov, I P Li, V S Petrov, V P Mikhaylov and E A Deulin.....146

[Investigation of a small-sized source parameters for magnetron sputtering with liquid-phase target](#)

A A Khramova, A R Matanin, D A Polin, D D Vasil'ev and K M Moiseev.....151

[Influence of hydrogen content in working gas on growth kinetics of hardened layer at ion nitriding of 16MnCr5 and A290C1M steels](#)

Y G Khusainov, R S Esipov, K N Ramazanov, E L Vardanyan, P V Tarasov and S R Shekhtman.....156

[Investigation of current-voltage characteristics of a glow discharge in molecular gases](#)

A S Kiselev, E A Smirnov and A A Zagoskin.....161

[Phase difference meter between the alternating current and voltage components for determining the impedance of plasma of glow discharge lasers](#)

A S Kiselev, E A Smirnov and A S Fadeev.....164

[Influence of the technological development on the adhesion increment of metallic thin film coatings to ceramic substrates of aluminum oxide](#)

L L Kolesnik, Myo Kyaw Hlaing and Zaw Phyo Aung.....167

[Features of magnetron sputtering of a doubled Ta/Ti target](#)

A E Komlev, E S Shutova and A A Komlev.....172

[Possibility of measuring range extension of growing thin films thickness control, based on surface plasmon resonance effect](#)

A E Komlev, R V Babinova and R V Dyukin.....177

[Metallic coatings for MEMS structures](#)

A V Korlyakov, O N Mikhailova and A V Serkov.....182

[Application of a vacuum-arc discharge for the production of biocompatible coatings](#)

D K Kostrin and A A Lisenkov.....186

[Numerical study of rarefied gas flows in microchannels with oscillating elements](#)

V V Kosyanchuk and A N Yakunchikov.....191

[Target heating in sputtering unit of magnetron](#)

A A Kozin.....196

[Mechanisms of epitaxial growth of SiC films by the method of atom substitution on the surfaces \(100\) and \(111\) of Si single crystals and on surfaces of Si films grown on single crystals  \$Al\_2O\_3\$](#)

S A Kukushkin and A V Osipov.....200

[Improvement of performance properties of products by surface treatment of materials with cathode spots of vacuum arc discharge](#)

V G Kuznetsov and T A Kurbanov.....205

[Improving the adhesive strength of the babbit layer of sliding bearings](#)

V G Kuznetsov and T A Kurbanov.....209

[System for deposition of diamond like  \$a\$ -C:H films in Ar-C<sub>2</sub>H<sub>2</sub> plasma with ion beam assistance](#)

I V Lopatin, Yu H Akhmadeev, D Yu Ignatov, S S Kovalskiy and E A Petrikova.....213

[Structure and properties of solid lubricating coatings based on the TiN-Pb system](#)

A A Lozovan, L N Lesnevsky, S Ya Betsofen, M A Liakhovetsky and A M Ushakov.....218

[Study of a variable deposition angle effect on the structure of Ti-Pb composite coatings](#)

A A Lozovan, S Ya Betsofen, S S Alexandrova, M A Lyakhovetskiy and E P Kubatina.....222

[Design of the evaporation source for Au-Ge alloy](#)

M V Makarova, K M Moiseev, A A Nazarenko and P A Luchnikov.....226

[Distribution of coating thickness applied by magnetron sputtering](#)

S A Martsinukov, D K Kostrin, A A Lisenkov and V A Simon.....231

[Investigation of electrochemical sensors with thin film nanocomposite Pt/C electrodes obtained by magnetron deposition](#)

E A Medvedeva and A M Baranov.....237

[Composite nanostructured wear-resistant coatings for high-speed cutting processing](#)

M Sh Migranov, S R Shekhtman, N A Suhova and A M Migranov.....241

[Formation of the thin film heterostructures CuO/ZnO by RF magnetron sputtering powder targets](#)

N V Mukhin, D A Chigirev, L D Bakhchova, G A Konoplev, K V Kochunov and I N Kashkul.....246

[Vacuum system "MAGNA TM 150-01K" for magnetron sputtering deposition of multilayer functional coatings](#)

V V Odinokov, R A Karakulov, V V Panin and A V Shubnikov.....251

[Non-self-sustained low-pressure glow discharge for nitriding steels and alloys](#)

E V Ostroverkhov, V V Denisov, Yu A Denisova, N N Koval and I V Lopatin.....256

[Informatics support of thin film deposition with specified structure development](#)

Y V Panfilov.....260

[Investigation of the influence of technological growth parameters on the characteristics of organic photosensitive structures based on the ZnPc:C<sub>60</sub> system](#)

M D Pavlova, I A Lamkin and S A Tarasov.....265

[A combined surface layer strengthening of aluminum alloys by plastic deformation and vacuum ion plasma processing methods](#)

V V Plikhunov, L M Petrov, Yu S Rumyantsev and A N Smirnova.....269

[Mass transfer of niobium and copper in binary systems obtained by magnetron sputtering](#)

D V Postnikov, A I Blesman, D A Polonyankin, S L Ibnoyaminova and A A Teplouhov.....274

[Modern technologies of X-ray systems for control of electronic components](#)

N N Potrakhov, V B Bessonov, A V Obodovskiy, A Y Gryaznov, K K Guk and N E Staroverov.....278

[A model of the vacuum level effect on the sensor response of vacuum sensors based on nanostructured semiconductor oxide materials](#)

I A Pronin, N D Yakushova, I A Averin, A A Karmanov and V A Moshnikov.....282

[The change in the phase state of thin PZT layers in the region of the morphotropic phase boundary obtained by the RF magnetron sputtering with varying target-substrate distance](#)

V P Pronin, D M Dolgintsev, V V Osipov, I P Pronin, S V Senkevich and E Yu Kaptelov.....287

[Development of a device for monitoring gas discharge parameters in a system with boiling liquid in a channel](#)

A N Ramazanov, D K Kostrin and V A Simon.....292

[Development of physico-technological basics of formation of structural organized ferroelectric films by the method of magnetron sputtering followed by laser processing](#)

D M Redka, T V Gordinskaya, N V Mukhin and A B Kozyrev.....297

[Formation of coatings from the flow of metal plasma of a vacuum-arc discharge](#)

A A Rikov, M I Yurchenkov, A A Lisenkov and D K Kostrin.....302

[Pump-down model of vacuum chambers with adsorbing walls](#)

L N Rozanov.....306

[Features of the formation of non-vertical profiles on the surface of 4H-SiC by the reactive-ion etching](#)

A V Serkov, V A Golubkov, V A Ilyin and D A Savchenko.....311

[Current-voltage characteristics of magnetron with hot target](#)

V I Shapovalov, E A Minzhulina and V V Smirnov.....315

[Magnetron with a sputtering unit for deposition of binary alloy films and solid solutions of two compounds](#)

V I Shapovalov, A A Kozin, E A Minzhulina and V V Smirnov.....319

[Coefficient of friction of titanium oxynitride films deposited by hot target reactive sputtering](#)

D S Shestakov, A S Useinov, K S Kravchuk, E V Gladkikh, A V Zavyalov, A A Morozova and V V Smirnov.....323

[Advanced development of chemical sources of current \(CSC\) and ultra high-volume capacitor structures \(UCS\) for energy storage devices](#)

V V Sleptsov, S N Kulikov, D Yu Kukushkin and A O Diteleva.....327

[Investigation of the deposition of metal nanoclusters on the hidden surface of porous electrode materials by electrophoresis](#)

V V Sleptsov, A V Savkin, D Y Kukushkin and A O Diteleva.....332

[Investigation of the synthesis of nanoparticles by pulsed electrical erosion in the conditions of overvoltage of the discharge gap](#)

V V Sleptsov, A V Savkin, V I Berdnik, D Y Kukushkin and A O Diteleva.....336

[Thin-film technologies for producing electrode materials for chemical sources of current \(CSC\) and ultra-high-volume capacitor structures \(UCS\)](#)

V V Sleptsov, D Yu Kukushkin and A O Diteleva.....340

[Influence of acid-base and adsorptive characteristics of disperse aluminum modified by ammonium compounds on antifriction effect in lubricant](#)

A G Syrkov, M O Silivanov, V R Kabirov and I V Pleskunov.....344

[Development of a device for automating the diagnostics of plasma parameters by probe method](#)

A S Talanov, A A Lisenkov and D K Kostrin.....350

[Finite element modeling of nanoindentation and scratching of Si, SiC, Ge crystals with anisotropic plasticity](#)

R S Telyatnik.....354

[Pulsed X-ray source based on photo X-ray tube](#)

G Timofeev and N Potrakhov.....359

[Obtaining of non-stoichiometric titanium oxide using reactive magnetron sputtering](#)

S Y Udovichenko, A N Bobylev, D A Belotserkovtseva and D D Shpindyuk.....363

[Investigation of physical and mechanical properties of coatings based on intermetallics of the Ti-Al system obtained in acetylene environment from vacuum-arc discharge plasma](#)

E L Vardanyan, A Yu Nazarov, K N Ramazanov and R N Khusnimardanov.....367

[Yttrium molybdates coating deposition of oxide-fibre/molybdenum-matrix composites](#)

E L Vardanyan, A Yu Nazarov, S N Galyshev, R F Gallyamova and S T Mileyko.....372

[Simulation of free-molecular and transition multicomponent gas flow through the system of filaments with different temperatures](#)

A N Yakunchikov and V V Kosyanchuk.....377

[Investigation of the correlation between gas-sensitive properties and fractal dimension of nanostructured ZnO/ZnO<Cu, Fe> films obtained by the sol-gel method](#)

N D Yakushova, I A Pronin, I A Averin, A A Karmanov, V A Moshnikov and D Tz Dimitrov.....381

[Diagnosing system on the principle of high voltage pulses measurements](#)

R V Yashkardin.....385

[Features of the methane clusters formation in supersonic jets of methane and its mixtures with monatomic gases](#)

A E Zarvin, V E Khudozhitkov and V V Kalyada.....391
