Mechanical Science and Technology Update (MSTU-2018)

27–28 February 2018, Omsk, Russia

Accepted papers received: 25 June 2018
Published online: 26 July 2018

Preface

Mechanical Science and Technology Update (MSTU-2018)

Peer review statement

Papers

Work modeling processes of the hand-held impact machines

A Abramov, D Abramenkov and E Izhbuldin.....1

A new algorithm of fast SSD calculation for motion estimation

E A Altman and E I Zakharenko.....9

"Regular element" global SLAE of the finite element method when simulating electromagnetic processes of electric devices

E G Andreeva.....15

Modelling the reusable space transport system for small payloads delivery

V S Aslanov and T A Ledkova.....22

Investigation of the orientation of floccules in magnetic sump during cleaning of cooling lubricants

B A Avdeyev, V B Masyagin, R R Dema and O B Kalugina.....29

Increase of steel surface operational properties by combined hardening

Yulia Bakhracheva.....36

The Dynamic Reactions of the Piston Machines Mechanical Drive Joints

P D Balakin and V N Belkov.....40

Universal technique of elimination of power parametric excitation in general mechanical systems

P D Balakin and I P Zgonnik.....44

Calculation of parameters for a resilient element of a flat-belt Continuously Variable Transmission

P D Balakin, I P Zgonnik and O S Dyundik.....49

Method of non-destructive control of the solvent diffusion coefficient in products made from anisotropic porous materials

V P Belyaev, S V Mishchenko and P S Belyaev.....54

The research of compensation for changes in air flow rate by increasing the oxygen concentration of oxidant in a fuel cell

P V Belyaev, D A Podberezkin and R A Em.....59

An application of the exponential spline for the approximation of a function and its derivatives in the presence of a boundary layer

I A Blatov, A I Zadorin and E V Kitaeva.....66

Experimental studies of correction propulsion system elements for small space vehicles manufactured due to additive method

V N Blinov, V V Shalay, V I Kuznetsov, A B Yakovlev, P S Yachmenev, A I Luyanchik and V V Kositsin.....73

DEM Calibration Approach: Implementing Contact Model

A V Boikov, R V Savelev and V A Payor.....88

Solid lubricant ceramic coatings on aluminium and its alloys

A N Bolotov, G B Burdo and V V Novikov.....94

Multifunctional vibrational source of seismic waves

Yu A Burian, V N Sorokin and V V Lizunov.....100

Performance characteristics describe the structure of descriptors

I V Chervenchuk, V I Potapov, V V Makarov, O P Shafeeva, M S Doroshenko and A S Gritsay.....110

The Kramers problem in the energy diffusion regime: transient times

M V Chushnyakova, I I Gontchar and A I Blesman.....118

Plasmatic hardening application to increase operational durability of rolling mills bearing units

R R Dema, O B Kalugina, B A Avdeyev and E P Masyutkin.....122

Control systems design: the technology of stochastic perturbations simulation

L A Denisova and V A Meshcheryakov.....128

Investigation of free oscillations for reasoning constructive decisions of mirror segments of parabolic antenna

S V Doronin and E M Reyzmunt.....135

Decidability of knapsack problem for Baumslag-Solitar group

Fedor Dudkin and Alexander Treier.....142

Computer-aided design the spherical helical platform intended for the internal surface maintenance of spherical tanks

N V Dyakonov and A G Yanishevskaya.....148

Choosing modes for thermal treatment of deposited coatings based on chromium steel with carbide-boride-nitride doping

E N Eremin, A S Losev, S A Borodikhin, I A Ponomarev and A E Matalasova.....156

A Quantitative Criterion for Quality Mixing Assessment for the Effective Unit of Mixed Products

A V Evseev, M S Paramonova and V V Preis.....161

Designing of special concretes for machine building

R S Fediuk, A P Svintsov, V S Lesovik, A A Pak and R A Timokhin.....168

Information technologies usage models during agile systems functioning

A S Geyda and I V Lysenko.....173

Methodical uncertainty in the two-point measurement of parts prismatic elements linear dimensions

V I Glukhov and V V Shalay.....179

Applicability of Kramers rate formulas in the energy diffusion regime

I I Gontchar, M V Chushnyakova and A I Blesman.....186

Software for energy efficient control system over process parameters of MIMO objects on a set of functioning states

A N Gribkov, D Yu Muromtsev, V N Shamkin, O A Belousov and M P Belyaev.....190

Method of the cast-in-place friction pile well walls local soil compaction

A V Gruzin and V V Gruzin.....195

The description of the Industry 4.0 cyber and physical production division based on Petri net models

A V Gurjanov, D A Zakoldaev, A V Shukalov and I O Zharinov.....203

Mathematical modeling of the using of the innovative intermediate products at the stage of production of gross regional product

O D Kazakov, S P Novikov and N A Afanasyeva.....209

Injection of hydrogen sulfide into a porous medium partially saturated with water

M K Khasanov.....214

Numerical study of the process of injection carbon dioxide into a porous formation saturated with methane and its hydrate

M K Khasanov, M V Stolpovsky and I K Gimaltdinov.....220

Experimental study of heat transfer on the rubber-cord cased pneumatic element surfaces under the natural convection

V S Korneyev, I A Pen'kov, I N Kvasov and S A Korneyev.....226

Formation of wear resistant nanostructural topocomposite coatings on metal materials by ionic-plasma processing

D N Korotaev, E E Tarasov, K N Poleschenko, E N Eremin and E V Ivanova.....234

Comparative analysis of methods of cargo vibration damping moved by overhead crane

M S Korytov, V S Shcherbakov and V V Titenko.....240

Modeling of a Temperature Distribution in Optomechanical Thermal Microsystems

A G Kozlov.....250

Studies on the dynamics of impact interaction of the mechanoreological model under elastic plastic transformation of its mechanical system

V L Lapshin and A V Eliseev.....259

Attitude motion of space debris during its removal by ion beam taking into account atmospheric disturbance

A S Ledkov and V S Aslanov.....266

Estimation of the failure-free operation for deployment of transformable space structures

A M Lepikhin, A E Burov and Yu P Pokhabov.....274

The sapphire tips of the active control devices of detail's dimensions of produced with hollows and ridges, with the possibility of determining the lateral approximation of ridges

E V Leun, V I Leun and A E Shahanov.....279

Simulated Annealing for Competitive *p*-Median Facility Location Problem

T V Levanova and A Y Gnusarev.....290

Numerical study of printing ink structuring

S N Litunov, E N Gusak and Yu D Toshhakova.....295

Perspectives of subjects' psychophysiological state identification using dynamic biometric features

P S Lozhnikov, A E Sulavko, R V Borisov and S S Zhumazhanova.....301

Generation of a biometrically activated digital signature based on hybrid neural network algorithms

P S Lozhnikov and A E Sulavko.....308

Geometrical and computer modeling of the technical workpieces main objects shaping

A A Lyashkov.....320

Automated Geometric and Computer-aided Non-Circular Gear Formation Modeling

A A Lyashkov, K L Panchuk and I A Khasanova.....331

Architecture of the automated information system for monitoring and resources accounting

Andrey G Malyutin, Andrey A Lavrukhin and Andrey S Okishev.....338

Improvement of aluminothermic welding on the basis of the experimentally-theoretical research of welding seam cooling process

A L Manakov, A D Abramov, A S Ilinykh, M S Galay and Je S Sidorov.....347

Calculation of linear technological dimensions based on the results of workpiece control

V B Masyagin, R I Bazhenov, B A Avdeyev, R L Artykh, D D Primak and I A Volkov.....353

Comparative erosion tests results of titanium alloy Ti-6Al-4V samples obtained by using 3D - printing technology and manufactured by the traditional technological method

A F Mednikov, A B Tkhabisimov, A A Makeeva and M R Dasaev.....360

Universal input of knapsack problem for groups

Alexei Mishchenko and Alexander Treier.....366

On NP-completeness of subset sum problem for Lamplighter group

Alexei Mishchenko and Alexander Treier.....371

Experimental studies on the mechanical properties of a woven composite material for space antenna reflector

E V Moskvichev and A Yu Larichkin.....376

Vibration protection of a human-operator based on the application of disturbance-stimulated control mechanism

V A Nehaev, V A Nikolaev, N V Zakernichnaya and S V Baglaychuk.....380

Criterion of equationally Notherian property for posets

A Yu Nikitin and I D Kudyk.....386

Efficient topological generation in compact Lie groups

Gennady A. Noskov.....391

Peculiarities of mathematical modeling of contact interaction of massive bodies and shells

S P Novikov, O D Kazakov and A V Iakovlev.....396

Research of Electro-Thermal Aging Process of Cross-Linked Polyethylene

D A Polyakov, K I Nikitin, A N Novozhilov and M Ya Kletsel.....404

Numerically-analytical solution of problem gaming confrontation hardware-redundant dynamic system with the enemy operating in conditions of incomplete information about the behavior of participants in the game

V I Potapov, O P Shafeeva, M S Doroshenko, I V Chervenchuk and A S Gritsay.....410

Algorithms and software for obtaining dissimilar order and high order of symbolic sequences

N N Pozdnichenko, M S Stupin, A S Gumenyuk, M S Doroshenko and O P Shafeeva.....416

Dynamic Loading of Cogwheels at the Time of Start-Up

N E Proskuriakov and I V Lopa.....424

A method for the measurement of the diameters of large-scaled shafts

H Radev, V Bogev and V Vassilev.....429

Measurement of the macro geometry of large-scale rotary workpieces type "ring"

H Radev, V Bogev, V Vassilev and I Blagov.....434

Research on the high quality replacement carbide plates operability with Al-Si-N hardening coating

D S Rechenko, B P Gritsenko, A Yu Popov and D G Balova.....442

Limit combinatorics as a method for investigating of mathematical models

Vladimir Remeslennikov.....449

Numerical analysis of thermal deformation for constructive variants of mirror segments in a parabolic antenna

E M Reyzmunt and S V Doronin.....454

Development of a mathematical model of sound insulation with flexible panels

E A Romanenko, G S Russkikh and Z N Sokolovskiy.....460

Analysis of Approaches for Synthesis of Networks-on-chip by Using Circulant Topologies

A Yu Romanov, A A Amerikanov and E V Lezhnev.....467

Generic NP-incomplete problems

Alexander Rybalov.....479

The acoustic waves propagation laws in the force-fit connections for test of the interference fit

A O Ryzhova, S A Bekher and A L Bobrov.....484

Experimental registrations of plain sieve operation, making transverse fluctuations

U K Sabiev, E V Demchuk, A Yu Golovin and I V Skysanov.....491

Improving the processing accuracy of the valve seats of internal combustion engines using diagnostic measurements

D T Safarov and A G Kondrashov.....497

A mathematical model of changes of parameters of handwritten patterns depending on the signers states

A E Samotuga.....505

Mathematical models for estimating production risks

V S Serdyuk, A M Dobrenko, O A Tsorina, E V Bakiko and S V Yanchij.....510

Logical aspects of machine learning

A N Shevlyakov.....515

On equations over Brandt semigroups

A N Shevlyakov and M A Vakhrameev.....520

Research and software development using AR technology

D A Smuseva and A Y Rolich.....525

Increasing efficiency of vibration protection system by using pneumatic rubber cord devices

V N Sorokin and N V Zakharenkov.....538

Biometric pattern recognition using wide networks of gravity proximity measures

A E Sulavko and S S Zhumazhanova.....547

Low-temperature heat capacity VO2±δ and solid solutions V1-XFeXO2

Vad I Surikov, N A Semenyuk, Val I Surikov, Y V Kuznetsova and S V Yanchij.....560

Computer visualization of quality estimation the color reproduction in digital printing systems measuring colour gamut of the color-reproducing system: interpretation aspects

I A Sysuev, L G Varepo, S N Litunov, L B Antropova and A A Miroshnichenko.....565

Theory of the piston air spring in the boom machine working equipment

V N Tarasov, I V Boyarkina and G N Boyarkin.....570

Calculation Of Non-Stationary Magnetic Field Of The Polarized Electromagnet With The External Attracted Anchor

A S Tatevosyan, A A Tatevosyan and N V Zaharova.....580

Metallographical researches results of titanium alloy Ti-6Al-4V samples obtained by using traditional and additive technologies

A B Tkhabisimov, A F Mednikov, A Yu Marchenkov, O S Zilova and A A Burmistrov.....584

Testing the Printing Systems for Enlarging Color Reproduction

O V Trapeznikova, L G Varepo, I A Sysuev, O A Novoselskaya and L S Kostuchkova.....590

Combined hydraulic power vehicle transmission modes

N N Trushin and G V Shadskii.....597

Investigation of heat and mass transfer process in the closed volume with different types of impact on liquid

V I Trushlyakov, I Y Lesnyak, A A Novikov and A V Panichkin.....605

Optimization of energy consumption at thermal vacuum liquid evaporation in the closed volume

V I Trushlyakov and A V Panichkin.....613

Dynamic control of tug-debris tethered system after the capturing of the debris

V I Trushlyakov, V V Yudintsev and R S Pikalov.....627

Computer visualization of automatized calculation the factors of mass transfer the viscous incompressible liquid with contact width variation

L G Varepo, A V Panichkin, O V Trapeznikova and I V Nagornova.....638

Determination of the Internal Combustion Engine Valve Gear Characteristics

Alexander Vasilyev and Yulia Bakhracheva.....644

A small spacecraft microengine with SHF impact on working medium: cooling and dilatometric evaporator valve

I S Vavilov, A I Lukyanchik, P S Yachmenev, R N Litau and A V Lysakov.....649

Smallsat's dilatometric micromotor: estimation of characteristics

I S Vavilov, A I Lukyanchik, P S Yachmenev, A V Pavlenko, A V Lysakov and R N Litau.....659

Data distribution system: preparation of server stations data

E O Vikulov, O V Denisov and L A Denisova.....668

High-accuracy finite element

A V Yakovlev, O D Kazakov, E G Ryzhikova and N A Afanasyeva.....674

Growing graphs with addition of communities

E B Yudin.....681

The kinematics and strength study of indexing bevel gear mechanism in rotating device driver

N V Zakharenkov and I N Kvasov.....689

Analysis of strain state prismatic samples for mechanical testing of the biaxial stretching method digital image correlation

E V Zenkov, I P Aistov and K A Vansovich.....696

Numerical modeling of the dynamics of multi-storey buildings with elastoplastic seismic insulators

E V Zenkov and V I Sobolev.....705

The research of the automatic temperature condition control systems for LCD screens of avionics indication equipment

I O Zharinov and O O Zharinov.....712

The research of statistical distribution of the image tristimulus values displayed on the avionics indication equipment

I O Zharinov and O O Zharinov.....718

Nonlinear effects in materials obtained by the method of selective laser melting

A S Zhukov, B K Barakhtin and P A Kuznetsov.....724

Diagnostics and evaluation of the residual life of an induction motor according to energy parameters

Y Zhukovskiy and N Koteleva.....729

The influence of ultrasound on physico-mechanical properties of composite materials reinforced with carbonaceous fibers in the formation process

I V Zlobina, N V Bekrenev and G K Muldasheva.....736

Strengthening microwave modification of structural elements of composite materials reinforced with synthetic fibers

I V Zlobina, N V Bekrenev and D P Teterin.....741

Iteration of database relations for queries of special form

Sergey Zykin and Andrey Poluyanov.....746
