Table of contents

Volume 406

13th International Conference on Textile Composites (TEXCOMP-13)

17–19 September 2018, Milan, Italy

Accepted papers received: 1 August 2018

Published online: 21 September 2018

Preface

[13th International Conference on Textile Composites \(TEXCOMP-13\)](#)

[Peer review statement](#)

Papers

Plenary

[An integrated methodology for fatigue life prediction of carbon fiber-reinforced polymer matrix composites under constant and variable \$R\$ -ratio loadings](#)

M Kawai.....1

[Hierarchical design of structural composite materials down to the nanoscale via experimentation and modelling](#)

L. Gorbatikh, Q. Liu, V. Romanov, M. Mehdikhani, A. Matveeva, O. Shishkina, A. Aravand, B. Wardle, I. Verpoest and S. V. Lomov.....14

Invited papers

[History and future of composites forming analysis](#)

R Akkerman, S P Haanappel and U Sachs.....20

[Stress analysis of 3D textile composites using high performance computing: new insights and challenges](#)

M Keith Ballard and John D Whitcomb.....30

[How to evaluate the fatigue life of textile composite structures by the numerical analysis and the experimental data with scatter](#)

Masaru Zako.....47

Mechanical behaviour of fiber-reinforced polymer composites in the presence of voids

[Influence of voids presence on mechanical properties of 3D textile composites](#)

Y Chen, D Vasiukov and C-H Park.....56

[Predicting the effect of voids on mechanical properties of woven composites](#)

R. S. Choudhry, Tahir Sharif, Kamran A. Khan, Sohaib Z Khan, Abid Hassan and Muhammad A Khan.....66

[X-ray \$\mu\$ CT based assessment of thermal cycling induced cracks in non-crimp 3D orthogonal woven composite materials with porosity](#)

M. Gigliotti, Y. Pannier, Y. Sinchuk, R. Antoranz-Gonzalez, M.C. Lafarie-Frenot and S.V. Lomov.....73

[Effect of intra-ply voids on the homogenized behavior of a ply in multidirectional laminates](#)

A Matveeva, D Garoz, R D B Sevenois, M Zhu, L Pyl, W Van Paepegem and L Farkas.....87

[Analysis of void morphology in composite laminates using micro-computed tomography](#)

Mahoor Mehdikhani, Nghi Q Nguyen, Ilya Straumit, Larissa Gorbatikh and Stepan V Lomov.....101

[Multi-scale experimental and computational investigation of matrix cracking evolution in carbon fiber-reinforced composites in the absence and presence of voids](#)

Mahoor Mehdikhani, Nikolay Petrov, Larissa Gorbatikh and Stepan V Lomov.....106

[Examination of voids and geometry of bio-based braided composite structures](#)

Garrett W. Melenka, Brianna M. Bruni-Bossio, Cagri Ayranci and Jason P. Carey.....112

[In-situ computer tomography for analyzing the effect of voids on the damage behavior of composite materials](#)

R Protz, I Koch and M Gude.....127

[Visual analysis of void and reinforcement characteristics in X-ray computed tomography dataset series of fiber-reinforced polymers](#)

M. Schiwarth, J. Weissenböck, B. Plank, B. Fröhler, C. Heinzl and J. Kastner.....137

Forming of textile reinforcements for composites

[Definition and quantification of drapeability through the measurement of constituent effects](#)

M Christ and A Herrmann.....149

[Multi-scale analysis of flax fibres woven fabrics for composite applications](#)

A C Corbin, D Soulat, M Ferreira, A R Labanieh, X Gabrion and V Placet.....156

[A dissipative constitutive model for the hysterical behaviour of a woven composite fabric under large strain](#)

Y Denis, E Guzman-Maldonado, N Hamila and F Morestin.....167

[Automated wet compression moulding of load-path optimised TFP preforms with low cycle times](#)

J Fial, M Harr, P Böhler and P Middendorf.....179

[Evaluation of the mechanical behaviour of tufted preforms](#)

Imen Gnaba, Peng Wang, Xavier Legrand and Damien Soulat.....188

[Compaction behaviour of tow at meso-scale: experimental investigations of morphological evolution at dry, lubricated and saturated states](#)

J Hemmer, A Sakkalatty Dharmalingam, A-S Lectez, C Burtin, S Comas-Cardona, C Binetruy and T Savart.....195

[Forming low-cost, high quality carbon tows for automotive application](#)

T Sharif, P Potluri, R S Choudhry and A Dodworth.....203

[Perspectives of web based composites from RCF material](#)

G Stegshuster and S Schlichter.....210

Virtual textile composites

[Prediction of elastic characteristics of spatially reinforced composite materials](#)

A N Anoshkin, P V Pisarev, D A Ermakov and N A Merzlyakova.....216

[Characterisation and modelling of complex textile geometries using TexGen](#)

L P Brown, A Endruweit, A Long and I A Jones.....222

[Virtual development and numerical simulation of 3D braids for composites](#)

Yordan Kyosev, Matthias Hübner and Chokri Cherif.....230

[Meso-scale model for the forming process of biaxial reinforced weft-knitted fabrics](#)

M Q Pham, O Döbrich, J Mersch, T Gereke and C Cherif.....237

[Recent developments in "COMPOSITES DREAM" for meso-FE modelling of advanced materials](#)

Tatsuo Sakakibara, Takuya Yamamoto, Gen Yamada, Aki Imaoku, Ryo Ohtagaki and Masaru Zako.....251

[Mechanical modelling of a sheared textile composite unit cell](#)

M Song, A J Thompson, B El-Said, D Ivanov and S R Hallett.....256

[Development of methods for optimisation of complex 3D weave geometries](#)

G H Spackman, L P Brown and I A Jones.....264

[Utilizing numerical models to identify process-induced residual stresses in 3D woven carbon/epoxy composites](#)

Igor Tsukrov, Kostiantyn Vasylevskyi, Borys Drach, Hilary Buntrock and Todd Gross.....274

[A proposal of conventional FE-modeling for layered braided composites: comparison of numerical results with experimental results](#)

Takuya Yamamoto, Aki Imaoku, Tatsuo Sakakibara and Masaru Zako.....281

Nano-engineered composites

[Tensile characterization of 3D nanostitched p-aramid/phenolic MWCNTs composites](#)

K Bilisik, G Erdogan, N S Karaduman, G Kaya, E Sapanci and S Gungor.....288

[Nonwoven fabrics with carbon nanotubes used as interleaves in CFRP](#)

Paulina Latko-Durałek, Kamil Dydek, Patryk Bolimowski, Emilia Golonko, Paweł Durałek, Rafał Kozera and Anna Boczkowska.....295

[Influence of contents rate and dispersion of carbon nanotubes on interfacial adhesion between continuous fiber reinforced thermoplastics and injection resin](#)

K Matsumoto, J Shiode, H Nishino and T Tanaka.....307

[Effect of addition of fine sub-micron sized and thick glass fibers into epoxy matrix on fatigue life of plain-woven textile carbon fiber composite](#)

Kazuya Okubo, Toru Fujii and Tsubasa Kondo.....314

[Estimation of shear strength of FRP joints using adhesives with ceramics particles](#)

Tetsusei Kurashiki, Takumi Sakamoto, Koushu Hanaki, Kazutaka Mukoyama and Xingsheng Li.....323

[A promising reinforcement for textile composites: Study on the effect of cellulose nanofiber \(CNF\) content on the mechanical properties of CNF reinforced epoxy resin](#)

Xingsheng Li, K. Hanaki, X. Wang, T. Kurashiki and K. Mukoyama.....329

Natural composites

[Self-reinforced biobased composites based on high stiffness PLA yarns](#)

G Buyle, L Van der Schueren, J Beauson, S Goutianos, G Schillani and B Madsen.....337

[Analysis of the natural fiber reinforced polymer: composite fiber rods \(FRPCY\)](#)

M A El Messiry and R M El Deeb.....343

[Manufacture and characterization of 3D warp interlock fabric made of flax roving](#)

Henri Lansiaux, Damien Soulat, François Boussu and Ahmad Rashed Labanieh.....351

[Flexural behavior and damage extent in woven natural fibers/polypropylene composite laminates](#)

Pietro Russo, Giorgio Simeoli, Vito Pagliarulo, Vittorio Bianco and Pietro Ferraro.....362

Properties and Characterization

[Comparison of strength of 3D printing objects using short fiber and continuous long fiber](#)

T Isobe, T Tanaka, T Nomura and R Yuasa.....369

[Thermoplastic vs. thermoset epoxy carbon textile composites](#)

Hironori Nishida, Valter Carvelli, Toru Fujii and Kazuya Okubo.....375

[Using micro-CT to quantitatively validate the textile compaction simulation](#)

W Wijaya, Y X Lim, P A Kelly, S Bickerton, M A Ali, R Umer and K A Khan.....385

[Improvement of mode-II interlaminar fracture toughness of carbon textile composites with modified matrix of thermoplastic and thermoset epoxy-addition of glass fibers](#)

Soichiro Imagawa, Hironori Nishida, Kazuya Okubo and Toru Fujii.....392

[Novel high performance auxetic fibrous structures for composite reinforcement](#)

C Gonçalves, R Magalhães, S Rana, R Figueiro, J Nunes and G Dias.....401

Modelling

[Influence of process induced defects for biaxial carbon fiber braids](#)

R Czichos, O Bareiro, A K Pickett, P Middendorf and T Gries.....409

[Tetrahedral textiles: assessment of mesoscale mechanical modelling by experimental measurements](#)

M Ghazimoradi, N Naouar, V Carvelli, P Boisse and R Frassine.....419

[Micro-scale model for a multi-scale modeling approach of thermoplastic fiber reinforced polymers](#)

Stefan Hesseler, Scott E Stapleton, Valeriy Yakovlev, Lars Appel and Thomas Gries.....427

[Novel textile preforming for optimised fibre architectures](#)

Mikhail Matveev, Vivek Koncherry, Sree Shankhachur Roy, Prasad Potluri and Andrew Long.....437

[Two different modelling approaches for fabric composites subjected to ballistic impact](#)

R Scazzosi, A Manes, G Petrone and M Giglio.....448

[A numerical study examining the formation of consolidation induced defects in dry textile composites](#)

A. J. Thompson, J. P-H. Belnoue and S. R. Hallett.....460

[Assessment of process-induced microcracks in 3D woven composites using meso-scale model simulations](#)

Nikolay V Timoshchuk, Kent D Kasper and Harun H Bayraktar.....469

[Effects of misalignments on thermally induced shapes of woven fabric reinforced laminates](#)

L L Warnet, R H Schrijver and R Akkerman.....477

[Damage characterization during high temperature fatigue of off-axis woven organic matrix composites for aircraft applications](#)

F. Foti, Y. Pannier, D. Mellier and M. Gigliotti.....487

Damage characterization

[An evaluation of damage development for CFRTP by conventional tows and spread tows using acoustic emission](#)

Takayuki Kinoshita, Tetsusei Kurashiki, Kazutaka Mukoyama, Koushu Hanaki, Masaru Zako, Xingsheng Li and Stepan V. Lomov.....497

[Multi-instrument multi-scale experimental damage mechanics for fibre reinforced composites](#)

Stepan V Lomov, Christian Breite, Delphine Carrella-Payan, Valter Carvelli, Nuri Ersoy, Marco Gigliotti, Raquel Antoranz Gonzalez, Sergey Ivanov, Malika Kersani, Marie-Christine Lafarie-Frenot, Mark Mavrogordato, Mahoor Mehdikhani, Arsen Melnikov, Francisco Mesquita, Fatih Oz, Yannick Pannier, Lincy Pyl, Erich Schöberl, Ian Sinclair, S Mark Spearing, Yentl Swolfs, Danny Van Hemelrijk, Man Zhu and Larissa Gorbatikh.....504

[In-situ structural health monitoring of glass fiber reinforced composites by tufted reinforcement](#)

A T Martins, Z Aboura, A Laksimi and K Khellil.....512

[Laminate fibre wave defect – KDF evaluation](#)

Luciano Brambilla.....520

Infusion and Permeability

[Experimental process pressure analysis for model-based manufacturing of composites by resin transfer moulding](#)

E Fauster, J Thirunavukkarasu, P Hergan and R Schledjewski.....531

[Mechanical and permeability properties of NCF with different knitting condition](#)

Akio Ohtani, Shintaro Agata, Masayuki Kitamura and Asami Nakai.....540

[Characterization and modeling of composite Vacuum Infusion process: influence of fabric type, resin viscosity and strain rate](#)

Claire-Isabelle Zénone, Philippe Le Grogneec and Chung Hae Park.....545

Manufacturing

[Adaptive fiber-reinforced plastics based on open reed weaving functionalization](#)

M Ashir, DMP Vo, A Nocke and C Cherif.....557

[Intrinsic fibre heating: a novel approach for automated dry fibre placement](#)

F Helber, A Amann, S Carosella and P Middendorf.....565

[Investigating the unwinding behavior of technical yarns and development of a new sensor system for the braiding process](#)

S Maidl, M Sabieraj, A Mierzwa, C Ebel and K Drechsler.....575

[Effect of configuration in intermediate materials on textile processability by TFP technology](#)

Asami Nakai, Akio Ohtani and Kenya Morie.....586

[Fabrication of hybrid thin ply tapes](#)

J. Quintana Casanovas, J. Costa, J.A. Mayugo and A. Galan Llongueras.....590
