**9th International Symposium on Electromagnetic Processing of Materials
(EPM 2018) 14–18 October 2018, Hyogo, Japan**

**Accepted papers received: 29 August 2018
Published online: 13 October 2018**

Preface

[9th International Symposium on Electromagnetic Processing of Materials \(EPM2018\)](#)

[Peer review statement](#)

Papers

[Improvement of the properties of light metal matrix Micro/Nanocomposite Materials: myth or reality?](#)

M. Garrido, L. Davoust, R. Daudin, L. Salvo and Y. Fautrelle.....1

[Electromagnetic sensor just below CC mold by using magnetic transformation of steel](#)

H. Harada, M. Nagashima, T. Konno, M. Yamana and T. Toh.....4

[Real-time control of the mould flow in a model of continuous casting in frame of the TOMOCON project](#)

T. Wondrak, U. Hampel, M. Ratajczak, I. Glavinic, F. Stefani, S. Eckert, D. van der Plas, P. Pennerstorfer, I. Muttakin, M. Soleimani, S. Abouelazayem, J. Hlava, A. Blishchik and S. Kenjeres.....8

[Application of modulated calorimetry to the liquid metals using electromagnetic levitation and static magnetic field](#)

O. Budenkova, M. Milgravis, Ch. Garnier, A. Gagnoud, Y. Delannoy, S. Semenov, P. Chometon, S. Rivoirard, M. Alamir and J. Etay.....12

[Experimental study on the behaviour of the submerged jet in a cold liquid metal model for continuous casting of round blooms under the influence of rotating magnetic fields](#)

D. Schurmann, B. Willers and S. Eckert.....16

[Experimental and numerical investigation on particle-induced liquid metal flow using Lorentz force velocimetry](#)

Ch. Karcher, Z. Lyu, Th. Boeck, N. Tran and U. Lüdtke.....20

[Visualisation of the large scale circulation in Rayleigh-Bénard convection using contactless inductive flow tomography](#)

T. Wondrak, F. Stefani, V. Galindo and S. Eckert.....24

[Transient Eddy Current Flow Metering: a calibration-free velocity measurement technique for liquid metals](#)

N. Krauter and F. Stefani.....28

[Lorentz Force Velocimetry using a bulk HTS magnet system](#)

O. Vakaliuk and B. Halbedel.....32

[A precise magnetic flux leakage method for the defects detection within the steel thin sheet](#)

Bo Wang and Xiaodong Wang.....36

[Experimental investigation on the buoyancy-induced flow in a model of the Czochralski crystal growth process](#)

J. Pal, S. Franke, S. Eckert and G. Gerbeth.....40

[Effect of travelling magnetic field inductor characteristics on the liquid metal flow in a rectangular cell](#)

E. Shvydkiy, I. Kolesnichenko, R. Khalilov, A. Pavlinov and G. Losev.....44

[Experimental study of liquid metal flows under volute traveling magnetic fields](#)

K. Ueno and T. Kamada.....48

[Convective end effects in annular linear induction pumps](#)

Yves Delannoy, Elena Martin-Lopez and Fabrice Benoit.....52

[Online Flow Control with Mold Flow Measurements and Simultaneous EM Braking and Stirring](#)

M. Sedén and N. Jacobson.....57

[Linear stability of parallel flow of liquid metal in a rectangular duct driven by a constant pressure gradient under the influence of a uniform magnetic field](#)

T. Tagawa.....61

[Performance maps of a high flowrate EM pump Experimental and numerical analysis](#)

S. Vitry, E. Martin Lopez, F. Benoit, L. Cachon and L. Goldsteins.....65

[Electron beam melting toward inclusion-free titanium alloys](#)

H. Funagane.....69

[Electroslag process for better titanium deposition morphology](#)

E. Platacis, I. Kaldre, E. Blumbergs and V. Serga.....73

[Pulse electromagnetic force microstructural control at continuous billet casting 7xxx Al-alloys](#)

M.A. Slazhniev, K.H. Kim, H.S. Sim, S.W. Kim and W.J. Kim.....77

[MHD-physical modification effect on microstructure control of the 7xxx high-strength Alalloys](#)

S.W. Kim, M.A. Slazhniev, K.H. Kim, H.S. Sim and W.J. Kim.....81

[Nucleation and crystal growth in magnetoelectrodeposition](#)

A.L. Daltin, M. Benaissa and J.P. Chopart.....85

[Determination of the properties of ionic vacancy by magnetic field](#)

R. Aogaki, A. Sugiyama, M. Miura, Y. Oshikiri, M. Miura, R. Morimoto, I. Mogi, S. Takagi and Y. Yamauchi.....89

[Effects of Vertical MHD Flows and Cell Rotation on Surface Chirality in Magnetoelectrodeposition](#)

I. Mogi, R. Morimoto, R. Aogaki and K. Takahashi.....93

[Electrodeposition of doped ZnO under a constant magnetic field](#)

M. Stübner, J.P. Chopart and A.L. Daltin.....97

[Optimization conditions for the electro-deposition of thin ZnTe film and effect of magnetic field](#)

T. Kozuka, K. Sameshima and Y. Heguri.....101

[Overview of Electromagnetic Forces to Control Flow During Continuous Casting of Steel](#)

B.G. Thomas and S.M. Cho.....105

[Application of static magnetic field to casting of steel](#)

Y. Miki, K. Furumai and T. Odagaki.....109

[Electromagnetic particle separation in the cold crucible melting with novel type bottom pouring nozzle](#)

V. Bojarevics and K. Pericleous.....113

[Numerical simulation of surface deformations in a three-fluid process stirred by low frequency magnetic field](#)

R. Bourrou, A. Gagnoud, O. Budenkova, P. Charvin and C. Lafon.....117

[Development of EMBr/EMS Multifunction Mold](#)

Nobuhiro Okada, Masayuki Kawamoto and Shintaro Ohga.....121

[Experimental modelling of continuous casting of steel in slab moulds using low melting liquid metals](#)

K. Timmel, T. Wondrak and S. Eckert.....125

[Numerical Simulation of Turbulent Steel Cem® Mold Under High Mass Flow Condition](#)

J.Y. Hwang, M.J. Cho, B.G. Thomas and S.M. Cho.....129

[Analysis of the Influence of Vertical EMBr on Steel/slag Interface in Continuous Casting](#)

L. Xu, E.G. Wang, C. Karcher, A.Y. Deng and X.J. Xu.....133

[Two Paradigms on Study Slab Continuous Casting Process with Mold Electromagnetic Stirring](#)

Zuosheng Lei, Bin Li, Yueming Zhou, Xing Wu, Yunbo Zhong and Zhongming Ren.....137

[Resonant pulsed electromagnetic stirring of melt for effective grain fragmentation](#)

D. Köppen, E. Baake, G. Gerstein, G. Mrówka-Nowotnik and G. Jarczyk.....141

[Permanent magnet dipole stirrer for aluminium furnaces](#)

T. Beinerts, A. Bojarevičs, R. Baranovskis, M. Milgrāvis and I. Kaldre.....145

[An Experimental and Modeling Study of Al-based Nanocomposites Fabricated by Ultrasonic Cavitation and Solidification Processing](#)

Laurentiu Nastac and Yang Xuan.....149

[Effect of time-modulated magnetic fields on the solidification structure and extrusion properties of wrought aluminum alloys](#)

D. Räßiger, C. Resewski, S. Müller, B. Willers, W. Reimers and S. Eckert.....153

[Inclusion Removal from Molten Steel Using Electromagnetic Vibrating Force](#)

Asuka Maruyama and Kazuhiko Iwai.....157

[Microwave Processing of Metallic Materials](#)

N. Yoshikawa.....161

[Coupling of Magnetite Particles with Microwaves at Temperatures lower than the Curie Point](#)

A. Amini, K. Ohno, T. Maeda and K. Kunitomo.....165

[Relevance of Low-Rm MHD for Surface Viscosimetry of Liquid Metals](#)

K. Patouillet, L. Davoust, O. Doche and V. Ebrahimian.....169

[Optimization of Amplitude and Frequency Modulated Magnetic Field Parameters in a Square Mold Wall](#)

A. Kapusta, B. Mikhailovich, M. Havkin, B. Tilman, K. Smirnov and A. Kudriavtcev.....173

[3D Numerical Modeling for Inductive Processes](#)

A. Gagnoud, Y. Du Terrail-Couvat and O. Budenkova.....177

[Numerical modelling of liquid metal electromagnetic pump with rotating permanent magnets](#)

V. Dzelme, A. Jakovics and I. Bucenieks.....181

[Numerical and experimental study of liquid metal stirring by rotating permanent magnets](#)

V. Dzelme, A. Jakovics, J. Vencels, D. Köppen and E. Baake.....185

[Fast 3D simulation of various applications of induction heating](#)

H.K. Bui, A. Ba, G. Berthiau and D. Trichet.....189

[Numerical study of surface waves generated by low frequency EM field for silicon refinement](#)

V. Geza, J. Vencels, G. Zageris and S. Pavlovs.....193

[Electromechanical Milling - Conception and Design of the Excitation System](#)

B. Halbedel.....198

[Oscillating Electromagnetic Force Effect on Concentration Distribution near Liquid Solid Interface](#)

Kazuhiko Iwai, Tomoyuki Yokota, Asuka Maruyama and Takashi Yamada.....203

[Experimental investigation of the effect of travelling magnetic field on the CET in Sn-10wt.%Pb alloy](#)

K. Zaidat, I. Sari, A. Boumaaza, A. Abdelhakem, L. Hachani and Y. Fautrelle.....207

[Investigation of Si content on the grain refinement of Al-Si alloy under pulsed magnetic field](#)

J.C. Jie, S.P. Yue, Z.L. Zheng, Z.K. Guo and T.J. Li.....211

[Continuous Casting of Hypereutectic Aluminum-Silicon Alloy Billets Using Electromagnetic Stirring Technique](#)

Joonpyo Park, Myoung Gyun Kim, Jong Ho Kim, Jaehyuk Shin and Keeahn Lee wLee.....215

[Direct chill casting with reversing rotational electromagnetic field](#)

S. Shimasaki and A. Minagawa.....219

[Microstructure and properties of Al-Si alloys under intermediate frequency electromagnetic field](#)

Yubo Zhang, Ying Fu, Gingtao Guo, Jinchuan Jie and Tingju Li.....223

[Contactless electromagnetic method for aluminium degassing](#)

I. Kaldre, A. Bojarevics, T. Beinerts, R. Baranovskis, R. Nikoluskins, M. Milgrāvis and M. Kalvāns.....227

[Potentials of single stage induction heating for press hardening of steel blanks](#)

B. Nacke and A. Dietrich.....231

[Induction Preheating for the Submerged Arc Welded Steel Tube Production](#)

C. Cincunegui and P. Marino.....236

[Simulating the magnetic field/transfer phenomenon of the tundish with channel type inducting heating](#)

B. Yang, A. Y. Deng and E. G. Wang.....240

[Recent progress of induction heating technology in Baosteel](#)

C.Y. Wu, X.L. Jin and Y.M. Zhou.....244

[Induction contour hardening of gear wheels made of steel 300M](#)

Jerzy Barglik.....248

[Nuclear waste treatment by induction heating and stirring of a metal/glass bath: the PIVIC process](#)

P. Charvin, F. Lemont and A. Russello.....252

[Induction heat treatment of large diameter pipes and coils](#)

V. Demidovich, V. Andrushkevich and Yu. Perevalov.....256

[Design of an one-sided transverse flux induction coil by using a numerical optimization algorithm](#)

M. Schulze, A. Nikanorov and B. Nacke.....260

[Potential of open source simulation tools for induction heating](#)

V. Geza, M. Scepankis, R. Vilums and A. Eimuss.....264

[Hierarchical optimization approaches in designing surface hardening induction systems](#)

M. Baldan, A. Nikanorov and B. Nacke.....268

[Three-dimensional numerical computation of gas-liquid two-phase flow under pseudo microgravity environment using a superconducting electromagnet](#)

S. Kikuchi and T. Tagawa.....272

[Numerical investigation of a double frequency approach for longitudinal HF welding of clad pipes](#)

W. Ebel, M. Kroll, E. Baake and A. Nikanorov.....276

[Effect of Electromagnetic Field on Microstructure and Properties of Cu-Cr-Co-Si Alloy](#)

Xinglong Sun, Jinchuan Jie and Tingju Li.....280

[Design improvements for increasing lifetime of single-shot coils applied at rotating workpieces](#)

S Schubotz and B Nacke.....284

[Investigation of refining mechanism in pure Al under pulsed magnetic field](#)

S.P. Yue, Z.L. Zheng, J.C. Jie, Z.K. Guo and T.J. Li.....288

[Microstructure Evolution of Cu-15Ni-8Sn Alloy Prepared by Vertical Semi-continuous Casting with EMS](#)

Zhongkai Guo, Jinchuan Jie, Shipeng Yue, Tingju Li and Qingtao Guo.....292

[High-Density \$\beta\$ -FeSi₂ crystals with 3D alignment fabricated by an oscillating magnetic field](#)

Keizo Ono, Ayumu Hashimoto, Keiji Kurokawa, Noriaki Nakatsuka, Kohei Morishita and Hideyuki Yasuda.....296

[Mono-dispersed droplets formation from capillary jet of liquid metal by applying an electric field](#)

Y. Hamaguchi, K. Matsumoto, S. Shimasaki and S. Taniguchi.....301

[Structure Formation of Magnetic Particles under Magnetic Fields toward Anisotropic Materials](#)

T. Ando, D. Katayama, N. Hirota, O. Koike, R. Tatsumi and M. Yamato.....305

[Structural Transformation of Bilayer Ferro-foams Caused by Homogeneous Static Magnetic Field](#)

Wang Chen, Hua-Qiao Dong, Song-Bao Wang, Zuo-Sheng Lei and Jia-Hong Guo.....309

[Multi-frequency inductive system for magnesium level detection in a titanium reduction reactor](#)

N. Krauter, F. Stefani, T. Gundrum, T. Wondrak, P. Frick and R. Khalilov.....313

[MHD-equipment and technologies of semi-continuous billet casting of high-strength Al-alloys](#)

M.A. Slazhniev, K.H. Kim, H.S. Sim, S.W. Kim and W.J. Kim.....317

[Fundamental Studies on Induction Heating and Stirring of Non-Metallic Molten Fluid](#)

N. Yoshikawa, K. Watanabe, T. Igarashi and S. Komarov.....321

[Separation of steelmaking slag with mechanical stirring by fluctuated magnetic field](#)

Y. Takaki, M. Sasaki, K. Ishida, Y. Nishina, J. Yotsuji and J. Tateno.....326

[On the Possibility of Melt Stirring in the Ladle by Modulated Traveling Magnetic Field](#)

A. Kapusta, B. Mikhailovich, M. Havkin, B. Tilman, K. Smirnov and A. Kudriavtcev.....330

[Simulation of electrically induced vortical flows](#)

V. Dzelme, A. Jakovics, A. Chudnovsky and E. Baake.....334

[Electromagnetic flow rate measurement in molten tin circulating in a closed-loop test system](#)

Z. Lyu, Ch. Karcher, Y. Kolesnikov and Th. Boeck.....338
