Table of contents

Volume 1102

WindEurope conference 2018 within the Global Wind Summit

25–28 September 2018, Hamburg, Germany

Accepted papers received: 21 September 2018

Published online: 10 October 2018

Preface

[Global Wind Summit 2018](#)

[Peer review statement](#)

Papers

Assessing the wind resource and turbine performance

[Evaluation of ERA-Interim and NCEP-CFSR Reanalysis Datasets against in-situ Measured Wind Speed Data for Keti Bandar Port, Pakistan](#)

Zia ul Rehman Tahir, Muhammad Salam Sarfraz, Muhammad Asim, Muhammad Sajid Kamran, Shahid Imran and Nasir Hayat.....1

[Comparison of simulations and wind tunnel measurements for the improvement of design tools for Vertical Axis Wind Turbines](#)

Sarah Barber and Henrik Nordborg.....12

[Wind field reconstruction from lidar measurements at high-frequency using machine learning](#)

Clym Stock-Williams, Paul Mazoyer and Sébastien Combrexelle.....23

[Comparison of Reanalysis, Analysis and Forecast datasets with measured wind data for a Wind Power Project in Jhimpir, Pakistan](#)

Zia ul Rehman Tahir, Muhammad Asim, Saqib Jamil, Rizwan Shad, Nasir Hayat, Ali Moaz, Muhammad Talha Akram and Muhammad Safyan.....33

[Wake detection in the turbine inflow using nacelle lidars](#)

Dominique P Held, Nikolaos Kouris, Antoine Larvol and Jakob Mann.....42

[Extreme Winds in the New European Wind Atlas](#)

David Bastine, Xiaoli Larsén, Björn Witha, Martin Dörenkämper and Julia Gottschall.....49

[Accuracy quantification of a CFD model in complex site by cross-checking wind measurements](#)

G Crasto, L Terzi and A Lombardi.....59

[Wind power prediction in complex terrain using analog ensembles](#)

Yngve Birkelund, Stefano Alessandrini, Øyvind Byrkjedal and Luca Delle Monache.....67

[A novel method to quantify atmospheric stability](#)

Lasse Svenningsen, René M. M. Slot and Morten L. Thøgersen.....76

[IEA Wind Task 32: Best Practices for the Certification of Lidar-Assisted Control Applications](#)

David Schlipf, Nikolai Hille, Steffen Raach, Andrew Scholbrock and Eric Simley.....86

[Evaluation of the Weather Research and Forecasting \(WRF\) model with respect to wind in complex terrain](#)

Kine Solbakken and Yngve Birkelund.....98

[Investigation of the validity of the Blade Element Momentum Theory for wind turbine simulations in turbulent inflow by means of Computational Fluid Dynamics](#)

S. Ehrich, C.M. Schwarz, H. Rahimi, B. Stoevesandt and J. Peinke.....108

[Forecasting wind ramps: can long-range lidar increase accuracy?](#)

I Würth, S Ellinghaus, M Wigger, M J Niemeier, A Clifton and P W Cheng.....117

Developments in turbine technology

[Systems Engineering for Lidar-Assisted Control: A Sequential Approach](#)

David Schlipf, Holger Fürst, Steffen Raach and Florian Haizmann.....129

[NAUTILUS-DTUI0 MW Floating Offshore Wind Turbine at Gulf of Maine: Public numerical models of an actively ballasted semisubmersible](#)

J Galván, M J Sánchez-Lara, I Mendikoa, G Pérez-Morán, V Nava and R Rodríguez-Arias.....139

[Assessing the mechanical stresses of dynamic cables for floating offshore wind applications](#)

D G Young, C Ng, S Oterkus, Q Li and L Johanning.....153

[Directional fatigue accumulation in wind turbine steel towers](#)

RMM Slot, J Schwarte, L Svenningsen, JD Sørensen and ML Thøgersen.....166

[Gearless generator with magnets on the stator for wind turbine](#)

V Dmitrievskii and V Prakht.....176

[Optimal yaw strategy for optimized power and load in various wake situations](#)

Albert M. Urbán, Torben J. Larsen, Gunner Chr. Larsen, Dominique P. Held, Ebba Dellwik and David Verelst.....184

[Flight Phase Control Strategies for Airborne Wind Energy Systems](#)

John Warnock, David McMillan and Samuel Tabor.....197

[Observability Analysis for Horizontal Axis Wind Turbines using Empirical Gramian Matrices](#)

Bastian Ritter, Edwin Mora and Axel Schild.....203

[Research sized wind turbine blade modal tests: comparison of the impact excitation with shaker excitation](#)

M. M. Luczak, B. Peeters, S. Manzato, E. Di Lorenzo, K. Reck-Nielsen, P. Berring, P. U. Haselbach and K. Branner.....214

[Beyond OC5 – Further advances in floating wind turbine modelling using Bladed](#)

A Beardsell, A Alexandre, B Child, R Harries and D McCowen.....222

[Manufacturing cost - a critical evaluation criteria for new developments in wind turbine drivetrain technologies](#)

F. Harzendorf, B. Azzam, R. Schelenz and G. Jacobs.....232

Digitalisation

[Optimal time step of SCADA data for the power curve of wind turbine](#)

Minh-Thang Do and Julien Berthaut-Gerentes.....243

End of life issues

[Down-regulation and individual blade control as lifetime extension enablers](#)

Vasilis Pettas and Po Wen Cheng.....249

Environmental impacts, social acceptance & spatial planning

[Effect of electricity market price uncertainty modelling on the profitability assessment of offshore wind energy through an integrated lifecycle techno-economic model](#)

Anastasia Ioannou, Andrew Angus and Feargal Brennan.....261

[Is the future development of wind energy compromised by the availability of raw materials?](#)

E Gonzalez, A Ortego, E Topham and A Valero.....272

[Lessons from German On-shore wind farm planning](#)

Jinjin Guan.....282

Health and safety

[Human-free offshore lifting solutions](#)

M Leimeister, T Balaam, P Causon, D Cevasco, M Richmond, A Kolios and F Brennan.....289

Integrating wind into the energy system

[Reactive power and voltage control interaction and optimization in the Danish largest wind power plant at Kriegers Flak](#)

Vladislav Akhmatov, Qiuwei Wu and Tibor Takarics.....299

[Developing, implementing and testing up and down regulation to provide AGC from a 10 MW wind farm during varying wind conditions](#)

Eldrich Rebello, David Watson and Marianne Rodgers.....310

[Hybrid Auxiliary Power Supply System for Offshore Wind Farm](#)

Xing Huang and Yao Chen.....322

[Large-scale wind generation simulations: From the analysis of current installations to modelling the future](#)

Matti Koivisto, Petr Maule, Poul Sørensen, Lukas Galdikas, Nicolaos Cutululis and Simone Biondi.....332

[Analysing the effect of the sliding feed-in premium scheme to the revenues of a wind farm with the use of mesoscale data - case study of Greece](#)

K Loukidis, A Vlamakis and P Papastamatiou.....340

Operations and Maintenance

[Innovative methods for wind turbine power curve upgrade assessment](#)

Ludovico Terzi, Andrea Lombardi, Francesco Castellani and Davide Astolfi.....350

[Comparative analysis of binning and Gaussian Process based blade pitch angle curve of a wind turbine for the purpose of condition monitoring](#)

Ravi Kumar Pandit and David Infield.....361

[Condition monitoring of 88km long Offshore HVDC Power Cable: comparison of DTS and as built data](#)

Etienne Rochat, Sanghoon Chin and Fabien Ravet.....370

O&M Cost-Based FMECA: Identification and Ranking of the Most Critical Components for 2-4 MW Geared Offshore Wind Turbines

D Cevasco, M Collu and Z Lin.....379

Multi-task distribution learning approach to anomaly detection of operational states of wind turbines

Stephan Vogt, Scott Otterson and Volker Berkhout.....390
