**XIII International Research-Technical Conference on the Problems of Designing,
Construction and Use of Low Energy Housing**

11–13 September 2018, Krakow, Poland

Accepted papers received: 9 August 2018

Published online: 1 November 2018

Preface

[XIII International Research-Technical Conference on the Problems of Designing,
Construction and Use of Low Energy Housing](#)

[XIII International Research-Technical Conference on the Problems of Designing,
Construction and Use of Low Energy Housing](#)

[Peer review statement](#)

Papers

Low Energy Building Design

[Defining the Polish nearly Zero Energy Building \(nZEB\) renovation standard](#)

S S Firlag and A Chmielewski.....1

[Dormitory thermal retrofitting to nZEB standard](#)

J Kwiatkowski, J Sowa, A Trząski and A Wiszniewski.....9

[A probabilistic tool for evaluating the effectiveness of financial measures to support the
energy improvements of existing buildings](#)

M D'Orazio, E Di Giuseppe, R Esposti, S Coderoni and E Baldoni.....17

[NZEBs built of elements based on styrofoam re-granulate](#)

M Wesołowska, P Szczepaniak and J Gajewski.....25

[The choice of the optimal level of the primary energy index for the collective residential buildings](#)

M Basińska and H Koczyk.....33

[Energy monitoring of low-energy houses in northern Poland Part one: *Characteristics of buildings and their energy demand*](#)

W Sarosiek, B Sadowska, R Stachniewicz and A Świącicki.....43

[Energy monitoring of low-energy houses in northern Poland Part two: *Verification of the thermal quality of cooling baffles*](#)

R Stachniewicz, A Świącicki, B Sadowska and W Sarosiek.....51

[Solar energy impact on space heating and cooling needs in moderate climate](#)

D A Chwieduk.....59

Building envelope systems and materials

[Retrofitting of building envelopes: Evaluation of effectiveness using weather-affected material parameters](#)

V Kočí, J Maděra and R Černý.....65

[Design of envelopes for timber buildings in terms of sustainable development in the low-energy construction](#)

A Iringová.....71

[Effect of two different types of building envelope insulation on future heating demand of a family house using simulation software](#)

P Turcsanyi and A Sedlakova.....78

[Strength and hygric properties of ETICS applied at various temperature, using adhesives with different cellulose ethers](#)

P Konca.....85

[Hygrothermal assessment of internally insulated brick wall based on numerical simulation](#)

D Kaczorek.....91

[Thermal simulation of building performance with different loadbearing materials](#)

J Strzałkowski and Halina Garbalińska.....98

[Evaluation of thermal performance of window lintel construction detail](#)

J Fořt, Z Pavlík, M Jerman and R Černý.....107

[Selected aspects of design for internal partitions and construction joints in low energy consumption buildings – a case study](#)

K. Pawłowski.....114

[The characteristics of temperature fluctuations in thermal insulation covered with layer of PCM](#)

A Wieprzkowicz and D Heim.....122

[Tests of the innovative building materials used for external walls in a case-study construction objects](#)

B Pietruszka, K Oberda and M Piasecki.....130

[Polycarbonate multi-wall panels integrated in multi-layer solar façade concepts](#)

M Čekon and K Struhala.....138

[Comparison of triple glazed windows based on long-term measurement](#)

P Juras.....146

Internal and External Environment

[Energy Certification Label vs. Passive Discomfort Index for existing dwellings](#)

S A Magalhães, V P de Freitas and J L Alexandre.....154

[Assessment of the impact of spatial development changes on thermal comfort experienced by man in the external environment](#)

A D Bochenek and K Klemm.....163

[Analysis of energy efficiency and thermal comfort for an office building complex located in Poland – a case study](#)

M Zygmunt and D Gawin.....171

[Thermal comfort of the sport facilities on the example of indoor tennis court](#)

S Bugaj and P Kosiński.....180

[Numerical analysis of outdoor climate conditions based on the 3-years measurement for Zilina](#)

D Jurasova.....187

[Influence of microclimate control scenarios on energy consumption in the Gallery of the 19th-Century Polish Art in the Sukiennice \(the former Cloth Hall\) of The National Museum in Krakow](#)

A Sadłowska-Sałęga, J Radoń, J Sobczyk and K Wąs.....195

Laboratory and in-situ testing and data acquisition

[Effect of the variable air volume on energy consumption - case study](#)

P Kapalo and N Spodyniuk.....203

[Analysis of ventilation air exchange rate and indoor air quality in the office room using metabolically generated CO₂.](#)

K. Nowak, K. Nowak-Dzieszko and A. Marcinowski.....210

[Energy use optimization in the building of National Library](#)

J Radoń, P Sadłowska-Sałęga, K Wąs, A Gryc and A Kupczak.....219

[Low airflow measurements by means of gas tracing method](#)

T Kisilewicz and K Nowak-Dzieszko.....227

[Long-term monitoring of the thermal insulation properties of building envelope structures in real climatic conditions](#)

Dušan Katunský, Miloslav Bagoňa, Richard Baláž, Martin Lopusniak, Marián Verta' and Marek Zozulák.....236

[Building of Research Centre as the experimental laboratory for civil engineering](#)

P Juras, P Durica, D Jurasova, R Ponechal and J Rybarik.....243

[Thermal insulation versus overheating - monitoring results](#)

T Kisilewicz.....251

Low energy building installations

[Towards the definition of a reference ideal radiator for the assessment of heat emission efficiency in buildings](#)

A Ferrantelli, K-V Vösa and J Kurnitski.....259

[Hygienic Water Audit Scheme as a Tool in the Fight against Legionella - problems and goals of the research project](#)

D Kaposztasova and Z Vranayova.....267

[Impact of heating concept on the energy demand of family house](#)

P Durica, J Jandacka and P Juras.....273

[Reducing energy demand in existing buildings as a tool to reduce air pollution](#)

P Lis.....281

[Ice rink – design of size of water storage tanks with small heat source for ice resurfacing machine](#)

M Kovac and K Kovacova.....289

Lighting and acoustics

[Simulation of visual comfort in selected industrial hall](#)

E Dolnikova and D Katunsky.....295

[Determination of daylight conditions in office room using digital images as a light source.](#)

D Knera and D Heim.....302

[Determination of total solar and visual radiation transmitted through triple glazing component with PCM layer](#)

D Heim, D Knera, M Krempski-Smejda and A Wieprzkowicz.....308

[National and European requirements concerning acoustic insulation from air sounds for internal walls](#)

H. Nowak and T. Kania.....314

[Acoustical renovation of beam-and-block Ackermann floor in Cracow residential building from 1940](#)

A K Kłosak, B Ziarko and K Nering.....323

Computer aided modeling and design (under auspices of IBPSA)

[Occupant behavior modeling based on migration registration technique](#)

J W Dziejdzic and V Novakovic.....335

[The influence of building zones with different dynamic properties on the building energy performance](#)

H Jędrzejuk.....344

[Using CFD software for the evaluation of hygrothermal conditions at wall-window perimeters](#)

A Stolarska, J Strzałkowski and Halina Garbalińska.....352

[Mathematical modeling of the building thermal state taking into account the heat and energy impact of the environment](#)

A Malinowski and A Muzychak.....360

[CFD modelling of transient thermal performance of solar chimney used for passive ventilation in a building](#)

A Lechowska, N Szczepanik-Ścisło, J Schnotale, M Stelmach and T Pyszczek.....368

Building, environment, sustainable development

[Use of vegetation and natural management of rainwater and grey water resources in the external space of the building](#)

A Bucka and B Ziarko.....376

[Potential Influence of Carbon Fixation by Wood Carbonization on Atmospheric CO₂ Concentration and Temperature](#)

Y Baba and S Hokoi.....385

Innovations in shaping the residential and retail buildings. Functional and pro-environmental potential of shipping containers in architecture

A M Berbesz and I M Szefer.....394

GIS modeling of green roofs allocation potential – case study (Kosice)

Z Poorova and Z Vranayova.....402

Vertical greenery systems for the energy retrofitting of buildings in Mediterranean climate: a case study in Catania, Italy

S Cascone, G Evola, C Leone and G Sciuto.....409

Thermal, energy and life-cycle aspects of a transparent insulation façade: a case study

M Čekon and K Struhala.....417
