3rd European Symposium on Fire Safety Science

12–14 September 2018, Nancy, France

Accepted papers received: 9 October 2018
Published online: 14 November 2018

Preface

3rd European Symposium on Fire Safety Science

Peer review statement

Keynote Lecture

Thermal decomposition of solid fuels. Objectives, challenges and modelling

Thomas Rogaume.....1

Material behavior in fire

Maze running into intumescence: mechanistic aspects in polypropylene

Serge Bourbigot, Johan Sarazin, Fabienne Samyn and Maude Jimenez.....17

Modelling of fire performance of Cross Laminated Timber (CLT) panels

Trong Tuan Tran, Mourad Khelifa, Ali Nadjai, Marc Oudjene and Yann Rogaume.....23

Study of the influence of heat transfer of a CLT beam through FEM

Juan Enrique Martínez-Martínez, Mar Alonso-Martínez, Felipe Pedro Álvarez Rabanal and Juan José del Coz Díaz.....29

Assessment of fire behaviour of polyisocyanurate (PIR) insulation foam enhanced with lamellar inorganic smart fillers

Eleni Asimakopoulou, Jianping Zhang, Maurice McKee, Kinga Wieczorek, Anna Krawczyk, Michele Andolfo, Marco Scatto, Michele Sisani and Maria Bastianini.....35

An engineering model for ignition and extinction of wood flames using bench-scale data

Paul Lardet, Véronique Georges, Lucas Terrei and Mahjouba Nichane.....41

Velocity and temperature measurements in a vertical wall flame

Andres Valencia, Bertrand Lecordier and Alexis Coppalle.....47

Intermediate-Scale Tests Of Ventilated Facades With Aluminium-Composite Claddings

Eric Guillaume, Talal Fateh, Renaud Schillinger, Roman Chiva, Sebastian Ukleja and Roy Weghorst.....53

Simulation of the pyrolysis of charring polymers: influence of the porous media properties

Jianwei Shi, Germain Boyer and Jean-François Thovert.....59

Response of Asymmetric Slim Floor Beams in Parametric-Fires

Naveed Alam, Ali Nadjai, Chrysanthos Maraveas, Konstantinos Daniel Tsavdaridis and Faris Ali.....65

Numerical Study of the Decomposition Mechanism of Intumescent Coating

Talal Fateh, Salah Benkorichi, Lucas Robinet and Jean-Louis Consalvi.....71

Thermal oxidative decomposition estimation combining TGA and DSC as optimization targets for PMMA

Alain Alonso Ipiña, Mariano Lázaro Urrutia, David Lázaro Urrutia and Daniel Alvear Portilla.....77

Modeling heat transfers across a silicone-based intumescent coating

Tatenda Nyazika, Maude Jimenez, Fabienne Samyn and Serge Bourbigot.....83

Comparative study of the thermal decomposition behaviour of different amino acids and peptides

Alexander Schaberg, Robert Wroblowski and Roland Goertz.....89

High-Throughput Fire Tests and Weathering-Induced Degradation Behaviour of Intumescent Coatings

Lars-Hendrik Daus, Manfred Korzen and Bernhard Schartel.....95

The Impact of Bromine- and Phosphorous-Based Flame Retardants on Flame Stability and Heat Feedback from Laminar Wall Flames

Isaac Leventon, Roland Kraemer and Stanislav Stoliarov.....101

PROPTI – A Generalised Inverse Modelling Framework

Lukas Arnold, Tristan Hehnen, Patrick Lauer, Corinna Trettin and Ashish Vinayak.....107

Experimental study on the onset of swelling for thin intumescent coatings

Andrea Lucherini, Nemer Abusamha, Jupiter Segall-Brown and Cristian Maluk.....113

Determination of mechanical properties of normal strength limestone concrete after exposure to elevated temperatures

Urška Dolinar, Gregor Trtnik and Tomaž Hozjan.....119

Application of the Kragten method in order to evaluate the uncertainty of the heat release rate determination using of the cone calorimeter

Pierre Cremona, Thomas Rogaume, Franck Richard and Benjamin Batiot.....125

Influence of a misalignment of the cone or the sample holder on the view factor with a Monte Carlo approach

Pierre Cremona, Yan Billaud, Thomas Rogaume, Franck Richard and Benjamin Batiot.....131

Heat release and flame spread assessment of insulation in External Thermal Insulation Composite System (ETICS) façades

Martyn Mclaggan, Konrad Wilkens Flecknoe-Brown, Anders Dragsted and Patrick Van Hees.....137

Experimental tools applied to the ignition study of spruce wood under cone calorimeter

Lucas Terrei, Zoubir Acem, Véronique Georges, Paul Lardet, Pascal Boulet and Gilles Parent.....143

Experimental investigation of the fire behaviour of a carbon-PEKK composite used for aeronautical applications

Nathan Grange, Brady Manescau, Khaled Chetehouna, Nicolas Gascoin, Samuel Senave and Isabelle Reynaud.....149

Effect of Back Boundary Condition on Pyrolysis of Charring and Non-charring Materials

S Sabarilal and Amit Kumar.....155

Numerical simulation of EN 50399 standard test – Calibration and validation of a numerical virtual test

Bertrand Girardin, Damien Flammier and Gildas Auguin.....161

Fire dynamics, Structures in fire

Experimental Study about the Influence of Heat Tightness of an Enclosure Fire on Ignition Risk of Unburnt Gases in a Connected Exhaust System

Brady Manescau, Hui-Ying Wang, Bruno Coudour and Jean Pierre Garo.....167

Calculation of radiation transmittance through n-heptane in a pool fire

Teemu Isojärvi, Hadi Bordbar and Simo Hostikka.....173

Towards the prediction of the convective and the radiative heat fluxes in turbulent buoyant flames

Germain Boyer.....179

Assessment of an insulating air layer model of façade external system: contribution to fire simulation of facade performance fire test

Virginie Drean, Renaud Schillinger and Gildas Auguin.....185

Study on Smoke Behavior in Under-viaduct Stations by using Scale Reduced Model.

Hideki Ozumi, Susumu Mafune, Osamu Suzuki, Hyun woo Park and Yoshifumi Ohmiya.....191

A Large Eddy Simulation of LNG Pool Fire on Board a Chemical/Oil Tanker

Abdullah Bolek and Selma Ergin.....197

Fire Growth Rate Strategies in FDS

Francesco Ciani and Monica Capobelli.....203

Design of fire safety equivalence of building open arcades to exterior spaces

Emanuele Gissi, Piergiacomo Cancelliere and Mauro Caciolai.....209

Simulations of a Turbulent Line Fire with a Steady Flamelet Combustion Model and Non-Gray Gas Radiation Models

Van Minh Le, Alexis Marchand, Salman Verma, James White, Andre Marshall, Thomas Rogaume, Franck Richard, Jocelyn Luche and Arnaud Trouvé.....215

An Experimental Study of on the Combustion Properties of Lobby Chairs in Open Space and in ISO Room Compartment

Jaeyoung Lee, Yoshifumi Ohmiya, Fumiaki Saito, Yusuke Shintani and Kazunori Harada.....221

Performance and calibration of two subgrid extinction models for turbulent diffusion combustion in an under-ventilated enclosure fire

Alexander Snegirev, Egor Kuznetsov, Ekaterina Markus, John Harris and Bradford Moravec.....227

Application of a simplified pyrolysis model to predict fire development in rack storage facilities

Ekaterina Markus, Alexander Snegirev, Egor Kuznetsov and Leonid Tanklevskiy.....233

"Experimental assessment of separation distances of a load-bearing straw-bale construction"

Petr Hejtmánek, Hana Najmanová and Tomáš Váchal.....239

CNG release from pressurized vessel through pressure relief safety device: isentropic flow approach versus CFD model

Lucie Hasalová, Jiří Ira, Milan Jahoda and Václav Vystrčil.....245

Experimental and Numerical investigations of the flow characteristics in confined fires

Benjamin Betting, Émilien Varea, Carole Gobin, Gilles Godard, Bertrand Lecordier and Béatrice Patte-Rouland.....251

Capabilities and Limitations of the Fire Dynamics Simulator in the Simulation of Tunnel Fires with a Multiscale Approach

Matteo Pachera, Xavier Deckers and Tarek Beji.....257

FireFOAM simulation of a localised fire in a gallery

Fabien Salmon, Delphine Lacanette, Jean-Christophe Mindeguia, Colette Sirieix, Catherine Ferrier and Jean-Claude Leblanc.....263

A Case Study of Far-Field Temperatures in Progressing Fires

Nils Johansson.....269

Flow behaviour of the exchange flow through a ceiling vent in natural convection: A numerical approach using CALIF^{3}S-ISIS CFD software

Patricio Becerra Barrios, Hugues Pretrel, Samuel Vaux and Olivier Vauquelin.....275

On the discrepancy of modelling the heat transfer for pure natural convection

Alexander Belt, Max Böhler, Leonie Rommeswinkel and Lukas Arnold.....281

Experimental parametric study on low-frequency oscillating behaviour of pool fires in a small-scale mechanically-ventilated compartment

Maxime Mense, Yannick Pizzo, Hugues Pretrel, Jean-Claude Loraud and Bernard Porterie.....287

Impact of the room geometry on the smoke filling time due to a fire plume

Samia Haouari Harrak, El Mehdi Koutaiba, Rabah Mehaddi, Pascal Boulet and Simon Becker.....293

Experimental investigation of externally venting flames geometric characteristics and impact on the façade of corridor-like enclosures

Konstantinos Chotzoglou, Eleni Asimakopoulou, Jianping Zhang and Michael Delichatsios.....299

An experimental investigation of burning behaviour of liquid pool fire in corridor-like enclosures

Konstantinos Chotzoglou, Eleni Asimakopoulou, Jianping Zhang and Michael Delichatsios.....305

Indicators for the Quality Assessment of the Grid Resolution

Francesco Saverio Ciani and Giordana Gai.....311

Preliminary Numerical Study of Fire-Induced Pressure Rise in a Passive House Compartment

Junyi Li, Tarek Beji and Bart Merci.....317

Full-scale smoke tests in a three-storey residential building

Gabriel Giovannelli, El Mehdi Koutaiba, Elizabeth Blanchard, Samia Haouari Harrak, Rabah Mehaddi, Pascal Boulet, Thomas Rogaume and Benjamin Batiot.....323

Review and comparative assessment of engineering correlations for the fire-induced air inflow rate through a compartment opening

Dimitrios Pikiokos and Dionysios Kolaitis.....329

Smoke spreading along corridor induced by outdoor wind: numerical simulation and parameter sensitivity analysis

Aijuan Wang, Brady Manescau, Khaled Chetehouna and Charles de Izarra.....335

Experimental study of smoke propagation in a tilted tunnel

Romain Hanouzet, Olivier Vauquelin and Samuel Vaux.....341

Overpressure induced by fires in airtight buildings

Sylvain Brohez and Irene Caravita.....347

Experimental and Numerical Comparison of Small-scale Gaseous Fire Whirls

Monica Diab, Aaron Yip, Mahshid Hadavand, Jan Haelssig and Michael Pegg.....353

Fire Safety Verification Method – The Australia Research Experience

Peter Johnson and Nate Lobel.....359

On the Use of Risk Concepts in Fire Safety Engineering

Fredrik Nystedt.....365

Flame properties of large kerosene fires

Giacomo Erez, Gilles Parent, Anthony Collin, Pascal Boulet, Mathieu Suzanne, Eddie Faure and Aurélien Thiry-Muller.....371

Fire Safety Protection Assessment of Industrial Technologies

Kamila Kempna, Jan Smolka, Milos Kvarcak, Ivan Kricfalusi, Zdenek Stejskal, Tomaz Hozjan and Dionysis Kolaitis.....377

Positive Pressurization and Ventilation for Fighting Fires in High-Rise Structures with Multiple Stairwells

Prabodh Panindre, N.S. Susan Mousavi, Sunil Kumar and John Ceriello.....383

Experimental and numerical investigations in order to model the fire development and propagation for fire safety engineering studies

Jeremy Colombiano, Virginie Drean, Thomas Rogaume, Franck Richard, Benjamin Batiot, Talal Fateh, Ali Nadjai and Eric Guillaume.....389

Wildland fires

Multi-scale modelling of wood degradation using thermally thin wood plates

Guillaume Gerandi, Virginie Tihay-Felicelli, Paul-Antoine Santoni, Valérie Leroy-Cancellieri and Dominique Cancellieri.....395

Experimental and numerical investigation of shrub combustion

Jean-Baptiste Tramoni, Paul-Antoine Santoni and Frédéric Morandini.....401

Laboratory Scale Experimental Study of Foam Suppression on Smouldering Combustion of a Tropical Peat

Nadhira Gilang Ratnasari, Afiri Dianti, Pither Palamba, Mohamad Lutfi Ramadhan, Gatot Prayogo, Agus Sunjarianto Pamitran and Yulianto Sulistyo Nugroho.....407

Fire suppression

Assessment of the Fire Dynamics Simulator Modeling for the Heating and Evaporation of a Single Water Droplet at Moderate and High Temperatures

Tarek Beji and Bart Merci.....413

A Detailed Investigation on the Effect of the Sherwood and Nusselt Number Modelling for the Heating and Evaporation of a Single Suspended Water Droplet

Tarek Beji and Bart Merci.....419

Large eddy simulations of flame extinction with infinitely fast chemistry

Georgios Maragkos and Bart Merci.....425

Control of Spontaneous Combustion of Sub-Bituminous Coal by Means of Heat Exchanger Submersion inside the Piles

Hanifa Khansa Zhafira, Anindia Setyo Widiani and Yulianto Sulistyo Nugroho.....431

Evaluation of Oxygen Reduction System (ORS) in Large-scale Fire Tests

Xiangyang Zhou, Yibing Xin and Sergey Dorofeev.....437

Comparison of sprinkler activation times under flat and corrugated metal deck ceiling

Marcus Runefors, Per Boström and Erik Almgren.....443

Discharge Characteristics of a Portable Compressed Air Foam System

Oluwadamilola Okunrounmu, Paul Lhotsky and George Hadjisophocleous.....449

Evaluation of the justifiable investment in residential sprinkler system installations using the J-value methodology

Michael Spearpoint and Danny Hopkin.....455

Experimental Study of a Downward Directed Water Mist suppressing a Diffusion Flame

Karthikeyan Rajasekar, Amit Kumar and Satyanarayan Chakravarthy.....461

Evacuation

A survey on the factors affecting horizontal assisted evacuation in hospitals

Lamija Catovic, Chatarina Alniemi and Enrico Ronchi.....467

Study of Sound Direction Evacuation

Wenhui Dong, Chunyu Yu and Mei Zhibin.....473

A Time-continuous Compartment Model for Building Evacuation

Bertrand Maury, Sylvain Faure, Jacques Angelé and Rémi Bachimont.....479

People evacuation in tunnel fires: a cross evaluation of two methodologies

Benjamin Truchot, Christophe Willmann and Joel Guivarch.....485

A Review of Current and Historical Occupant Load Factors for Mercantile Occupancies

Michael Spearpoint and Charlie Hopkin.....491

Small-scale Studies on Evacuation Characteristics of Pedestrians with physical, mental or age-related Disabilities

Paul Geoerg, Robert Malte Polzin, Jette Schumann, Stefan Holl and Anja Hofmann.....497
