SPIE

**Volume 9090**

Proceedings of SPIE 0277-786X, V. 9090

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Automatic Target Recognition XXIV*, edited by Firooz A. Sadjadi, Abhijit Mahalanobis, Proceedings of SPIE Vol. 9090 (SPIE, Bellingham, WA, 2014) Article CID Number.

---

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

---

## ADVANCED CONCEPT I

---

- 9090 02 **Unification of automatic target tracking and automatic target recognition** [9090-1]  
B. J. Schachter, Northrop Grumman Corp. (United States)
- 9090 03 **Optimized sparse presentation-based classification method with weighted block and maximum likelihood model** [9090-2]  
J. He, T. Zuo, B. Sun, X. Wu, Beijing Normal Univ. (China); C. Chen, Naval Academy of Armament (China)
- 9090 04 **Maritime vessel recognition in degraded satellite imagery** [9090-3]  
K. Rainey, S. Parameswaran, J. Harguess, Space and Naval Warfare Systems Ctr. Pacific (United States)
- 9090 05 **Application of an image feature network-based object recognition algorithm to aircraft detection and classification** [9090-4]  
J. Straub, The Univ. of North Dakota (United States)
- 9090 06 **Fusion-based approach for long-range night-time facial recognition** [9090-5]  
R. B. Martin, M. Sluch, K. M. Kafka, A. Dolby, R. Ice, B. E. Lemoff, West Virginia High Technology Consortium Foundation (United States)

---

## ADVANCED CONCEPT II

---

- 9090 07 **Nonstationary noise propagation with sources** [9090-7]  
J. S. Ben-Benjamin, L. Cohen, The City Univ. of New York (United States)
- 9090 08 **Passive detection, characterization, and localization of multiple LFMCW LPI signals (2014 ATR Best Paper Award)** [9090-8]  
B. Hamschin, J. Clancy, M. Grabbe, M. Fortier, The Johns Hopkins Univ. Applied Physics Lab. (United States); J. Novak, ASD Space and Sensor Systems (United States)

---

## ACTIVE SENSOR PROCESSING

---

- 9090 0A **Ladar ATR via probabilistic open set techniques (2014 ATR Best Student Paper Award)** [9090-11]  
M. Scherreik, B. Rigling, Wright State Univ. (United States)
- 9090 0B **Radar target identification using various nearest neighbor techniques** [9090-12]  
I. Jouny, Lafayette College (United States)

9090 0C **Automatic detection of pulsed radio frequency (RF) targets using sparse representations in undercomplete learned dictionaries (2014 ATR Best Paper Award)** [9090-13]  
D. I. Moody, D. A. Smith, S. P. Brumby, Los Alamos National Lab. (United States)

9090 0D **Autonomous underwater pipeline monitoring navigation system** [9090-14]  
B. Mitchell, N. Mahmoudian, G. Meadows, Michigan Technological Univ. (United States)

---

#### ADVANCED SENSOR PROCESSING II

---

9090 0E **Time-frequency filtering for classifying targets in nonstationary clutter (Invited Paper)** [9090-15]  
V. T. Gomatam, P. Loughlin, Univ. of Pittsburgh (United States)

9090 0F **Instantaneous frequency and the Wigner-Gabor signal** [9090-16]  
P. J. Loughlin, Univ. of Pittsburgh (United States)

9090 0H **Cross-spectral TDOA and FDOA estimation (Invited Paper)** [9090-9]  
D. J. Nelson, U.S. Dept. of Defense (United States)

9090 0I **Matrix superposition structure with a tree-based principle (Invited Paper)** [9090-21]  
A. Sokolnikov, Visual Solutions and Applications (United States)

---

#### ADVANCED ALGORITHMS

---

9090 0K **Line fitting based feature extraction for object recognition** [9090-31]  
B. C. Li, Lockheed Martin Systems Integration-Owego (United States)

9090 0L **Sparse representation for vehicle recognition** [9090-19]  
N. D. Monnig, Univ. of Colorado at Boulder (United States); W. Sakla, Air Force Research Lab. (United States)

9090 0M **Adaptive compressive sensing for target detection** [9090-20]  
A. Mahalanobis, R. Muise, Lockheed Martin Missiles and Fire Control (United States); S. Roy, Univ. of Washington (United States)

9090 0N **Automatic target recognition using group-structured sparse representation** [9090-22]  
B. Sun, X. Wu, J. He, X. Zhu, Beijing Normal Univ. (China); C. Chen, Naval Academy of Armament (China)

---

#### FACIAL AND ACTIVITY RECOGNITION

---

9090 0O **Automatic recognition of emotions from facial expressions (2014 ATR Best Student Paper Award)** [9090-23]  
H. Xue, I. Gertner, The City College of New York (United States)

9090 0P **Robust person and object tracking in LWIR and VIS based on a new template matching method** [9090-24]  
T. Müller, Fraunhofer Institute of Optronics, System Technologies and Image Exploitation (Germany)

9090 0Q **Military personnel recognition system using texture, colour, and SURF features** [9090-26]  
M. E. Irhebhude, E. A. Edirisinghe, Loughborough Univ. (United Kingdom)
