SPIE

Volume 9733

Proceedings of SPIE 0277-786X, V. 9733

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Diode Laser Technology and Applications XIV*, edited by Mark S. Zediker, Proceedings of SPIE Vol. 9733 (SPIE, Bellingham, WA, 2016) Six-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 LD DEVICE RELIABILITY

- 9733 02 **Reliability of high power laser diodes with external optical feedback** [9733-1]
- 9733 03 **Rapid stress-testing vs. long-term aging: a case study of 980-nm emitting single-spatial mode lasers** [9733-2]
- 9733 04 **Reliability, failure modes, and degradation mechanisms in high power single- and multi-mode InGaAs-AlGaAs strained quantum well lasers** [9733-3]
- 9733 05 **Reliability study on high power 638-nm triple emitter broad area laser diode** [9733-4]
- 9733 06 **Sequential description of the catastrophic optical damage of high power laser diodes** [9733-5]
- 9733 07 **Improved long wavelength 14xx and 19xx nm InGaAsP/InP lasers** [9733-6]

SESSION 2 HIGH POWER FIBER COUPLED DEVICES I

- 9733 08 **A fiber-coupled 9xx module with tap water cooling** [9733-7]
- 9733 09 **High-brightness laser diode module over 300W with 100 μ m/Na 0.22 fiber** [9733-8]
- 9733 0A **Multi-kW high-brightness fiber coupled diode laser based on two-dimensional stacked tailored diode bars** [9733-9]

SESSION 3 HIGH POWER FIBER COUPLED DEVICES II

- 9733 0B **Advances in high-power 9XXnm laser diodes for pumping fiber lasers** [9733-10]
- 9733 0D **Reduced-mode (REM) diodes enable high brightness fiber-coupled modules** [9733-12]
- 9733 0E **DPAL pump system exceeding 3kW at 766nm and 30 GHz bandwidth** [9733-13]

SESSION 4 EXTERNAL FEEDBACK AND BEAM COMBINING

- 9733 0F **Spectral beam combining of multi-single emitters** [9733-14]
- 9733 0G **Building block diode laser concept for high brightness laser output in the kW range and its applications** [9733-15]

- 9733 OH **Compact 35 μ m fiber coupled diode laser module based on dense wavelength division multiplexing of NBA mini-bars** [9733-16]
- 9733 OI **High-power operation of coherently coupled tapered laser diodes in an external cavity** [9733-17]
- 9733 OJ **Wavelength locking of single emitters and multi-emitter modules: simulation and experiments** [9733-18]
- 9733 OK **Simultaneous frequency stabilization and high-power dense wavelength division multiplexing (HP-DWDM) using an external cavity based on volume Bragg gratings (VBGs)** [9733-19]

SESSION 5 HIGH POWER DEVICES I

- 9733 OL **940nm QCW diode laser bars with 70% efficiency at 1 kW output power at 203K: analysis of remaining limits and path to higher efficiency and power at 200K and 300K (Invited Paper)** [9733-20]
- 9733 OM **High duty-cycle, high-efficiency QCW stacks for medical applications** [9733-21]
- 9733 OO **Assessing the influence of the vertical epitaxial layer design on the lateral beam quality of high-power broad area diode lasers** [9733-23]
- 9733 OP **Optical mode engineering and high power density per facet length (>8.4 kW/cm) in tilted wave laser diodes** [9733-24]
- 9733 OQ **High-power 1550 nm tapered DBR lasers fabricated using soft UV-nano-imprint lithography** [9733-25]

SESSION 6 HIGH POWER DEVICES II

- 9733 OR **High-power single emitters and low fill factor bars emitting at 808 nm** [9733-26]
- 9733 OS **Thermal investigation on high power DFB broad area lasers at 975 nm with 60% efficiency** [9733-27]
- 9733 OT **Advances in 808nm high power diode laser bars and single emitters** [9733-28]
- 9733 OU **Characterization of high performance silicon-based VMJ PV cells for laser power transmission applications** [9733-29]

SESSION 7 LASER DIODE PACKAGING I: JOINT SESSION WITH CONFERENCES 9730 AND 9733

- 9733 OV **Integrated high power VCSEL systems** [9733-30]
