Volume 9791

Proceedings of SPIE, 1605-7422, V. 9791

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Medical Imaging 2016: Digital Pathology*, edited by Metin N. Gurcan, Anant Madabhushi, Proceedings of SPIE Vol. 9791 (SPIE, Bellingham, WA, 2016) Six-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*

ix *Conference Committee*

xi *Introduction*

xiii *2016 Medical Imaging Award Recipients*

KEYNOTE AND TRENDS

9791 03 **Automated robust registration of grossly misregistered whole-slide images with varying stains** [9791-2]

9791 04 **Model coupling for predicting a developmental patterning process** [9791-3]

PRECISION MEDICINE AND GRADING

9791 05 **Classification of breast cancer stroma as a tool for prognosis** [9791-4]

9791 06 **Automated tubule nuclei quantification and correlation with oncotype DX risk categories in ER+ breast cancer whole slide images** [9791-5]

9791 07 **Computer-assisted bladder cancer grading: *α*-shapes for color space decomposition** [9791-6]

9791 08 **Multi-instance multi-label learning for whole slide breast histopathology** [9791-7]

9791 09 **Intraoperative neuropathology of glioma recurrence: cell detection and classification** [9791-8]

9791 0A **Preliminary evaluation of a fully automated quantitative framework for characterizing general breast tissue histology via color histogram and color texture analysis** [9791-9]

DETECTION AND SEGMENTATION

9791 0B **Hotspot detection in pancreatic neuroendocrine tumors: density approximation by *α*-shape maps** [9791-10]

9791 0C **Adaptive local thresholding for robust nucleus segmentation utilizing shape priors** [9791-11]

9791 0D **Non-uniform object counting method in large-format pyramid images applied to CD31 vessel counting in whole-mount digital pathology sections** [9791-12]

9791 0E **Segmentation of vessel structures in serial whole slide sections using region-based context features** [9791-13]

9791 0F **Automated renal histopathology: digital extraction and quantification of renal pathology** [9791-14]

MACHINE LEARNING

9791 0G **Differentiation of arterioles from venules in mouse histology images using machine learning** [9791-15]

9791 0H **Lymphoma diagnosis in histopathology using a multi-stage visual learning approach** [9791-16]

9791 0I **Evaluating stability of histomorphometric features across scanner and staining variations: predicting biochemical recurrence from prostate cancer whole slide images** [9791-25]

9791 0J **A structure-based approach for colon gland segmentation in digital pathology** [9791-18]

9791 0K **Miniature objective lens for array digital pathology: design improvement based on clinical evaluation** [9791-19]

9791 0L **Quantitative diagnosis of tongue cancer from histological images in an animal model** [9791-20]

EMERGING TECHNOLOGIES

9791 0M **Multi-scale learning based segmentation of glands in digital colonrectal pathology images** [9791-21]

9791 0N **3D morphological measurement of whole slide histological vasculature reconstructions** [9791-22]

9791 0O **Single-pixel hyperspectral imaging for real-time cancer detection: detecting damage in ex vivo porcine tissue samples** [9791-23]

9791 0P **Offset-sparsity decomposition for enhancement of color microscopic image of stained specimen in histopathology: further results** [9791-24]

POSTER SESSION

9791 0R **Automatic labeling of molecular biomarkers on a cell-by-cell basis in immunohistochemistry images using convolutional neural networks** [9791-17]

9791 0T **Deciphering protein signatures using color, morphological, and topological analysis of immunohistochemically stained human tissues** [9791-27]

9791 0U **A machine learning approach to quantifying noise in medical images** [9791-28]

9791 0V **Pathological Gleason prediction through gland ring morphometry in immunofluorescent prostate cancer images** [9791-29]

9791 0W **Color-texture based extreme learning machines for tissue tumor classification** [9791-30]

9791 0X **Cell nuclei attributed relational graphs for efficient representation and classification of gastric cancer in digital histopathology (Cum Laude Poster Award)** [9791-31]

9791 0Y **Mixture of learners for cancer stem cell detection using CD13 and H&E stained images** [9791-32]

9791 10 **Identification of immune cell infiltration in hematoxylin-eosin stained breast cancer samples: texture-based classification of tissue morphologies** [9791-34]

9791 11 **Nucleus segmentation in histology images with hierarchical multilevel thresholding** [9791-35]

9791 12 **Quantification of tumor morphology via 3D histology: application to oral cavity cancers** [9791-36]

9791 14 **Automatic cell detection and segmentation from H&E stained pathology slides using colorspace decorrelation stretching** [9791-38]

9791 15 **Deep learning for tissue microarray image-based outcome prediction in patients with colorectal cancer** [9791-39]

9791 17 **Hierarchical nucleus segmentation in digital pathology images** [9791-41]

9791 18 **A four class model for digital breast histopathology using high-definition Fourier transform infrared (FT-IR) spectroscopic imaging** [9791-42]

9791 19 **The role of imaging based prostate biopsy morphology in a data fusion paradigm for transducing prognostic predictions** [9791-43]

9791 1A **Automated detection of retinal cell nuclei in 3D micro-CT images of zebrafish using support vector machine classification** [9791-44]

9791 1B **Automatic choroid cells segmentation and counting in fluorescence microscopic image** [9791-45]

9791 1C **Classification of human carcinoma cells using multispectral imagery** [9791-46]

9791 1D **High-definition Fourier transform infrared spectroscopic imaging of prostate tissue** [9791-47]

9791 1E **A generic nuclei detection method for histopathological breast images** [9791-48]
