

PROCEEDINGS OF SPIE

Thin Films for Solar and Energy Technology VIII

Michael J. Heben
Mowafak M. Al-Jassim
Editors

28–29 August 2016
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 9936

Proceedings of SPIE 0277-786X, V. 9936

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Thin Films for Solar and Energy Technology VIII*, edited by Michael J. Heben, Mowafak M. Al-Jassim, Proceedings of SPIE Vol. 9936 (SPIE, Bellingham, WA, 2016) Six digit article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SIMULATION AND ADVANCED CONCEPTS

9936 03	Ultra-high aspect ratio copper nanowires as transparent conductive electrodes for dye sensitized solar cells [9936-3]
---------	--

CZTS AND CIGS

9936 07	Crystallographic and optoelectronic properties of the novel thin film absorber Cu_2GeS_3 [9936-10]
---------	--

PEROVSKITES

9936 0B	Hysteresis dependence on $\text{CH}_3\text{NH}_3\text{PbI}_3$ deposition method in perovskite solar cells [9936-15]
---------	---

POSTER SESSION

9936 0I	Design and simulation of a MEM pressure microgripper based on electrothermal microactuators [9936-21]
9936 0L	Room temperature deposition of zinc oxide thin films by rf-magnetron sputtering for application in solar cells [9936-24]
