Volume 9941

Proceedings of SPIE 0277-786X, V. 9941

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic Light Emitting Materials and Devices XX*, edited by Franky So, Chihaya Adachi, Jang-Joo Kim, Proceedings of SPIE Vol. 9941 (SPIE, Bellingham, WA, 2016) six digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/16/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii *Authors*
- ix *Conference Committee*
- xi *Introduction*

TADF-BASED OLEDS I

- 9941 03 **Efficient HOMO-LUMO separation by multiple resonance effect toward ultrapure blue thermally activated delayed fluorescence (Invited Paper)** [9941-2]
- 9941 04 **A series of pyrimidine based blue to green thermally activated delayed fluorescent emitters realizing a high EQE of 25% (Invited Paper)** [9941-3]

TADF MECHANISMS

- 9941 07 **Role of intermediate state in the excited state dynamics of highly efficient TADF molecules (Invited Paper)** [9941-6]
- 9941 0A **Turbocharged molecular discovery of OLED emitters: from high-throughput quantum simulation to highly efficient TADF devices (Invited Paper)** [9941-9]

OLED MATERIALS AND DEVICES

- 9941 0H **Magnetic field effect in organic light emitting diodes based on donor-acceptor exciplexes showing thermally activated delayed fluorescence (Invited Paper)** [9941-93]
- 9941 0J **Recent development of organic light-emitting diode utilizing energy transfer from exciplex to phosphorescent emitter (Invited Paper)** [9941-18]
- 9941 0K **New ultra deep blue emitters based on chrysene chromophores** [9941-19]
- 9941 0L **Green-emitting MADF complex for OLED applications (Invited Paper)** [9941-92]

INTERFACE AND DEGRADATION

- 9941 0N **A comprehensive and unified picture of energy level alignment at interfaces with organic semiconductors (Invited Paper)** [9941-21]
- 9941 0O **On the role of polar molecules and the barrier for charge injection in OLEDs** [9941-22]
- 9941 0P **Effect of halogenated impurities on lifetime of organic light emitting diode** [9941-23]

SOLUTION PROCESSED OLEDS

- 9941 16 **Multiscale study of the self-organized gradient effect of novel hole injection material PEDOT:PSS:PFI** [9941-39]

SIMULATIONS FOR OLEDS

- 9941 19 ***In silico* evaluation of highly efficient organic light-emitting materials** [9941-41]
9941 1C **Accelerated discovery of OLED materials through atomic-scale simulation** [9941-44]

POSTER SESSION

- 9941 1K **Improvement of amplified spontaneous emission performance in organic waveguides** [9941-49]
9941 1L **The electrodeposition of multilayers on a polymeric substrate in Flexible Organic Light Emitting Diode (OLED)** [9941-53]
9941 1M **N-type molecular electrical doping in organic semiconductors: formation and dissociation efficiencies of charge transfer complex** [9941-54]
9941 1O **Enhanced color purity of blue OLEDs based on well-design structure** [9941-56]
9941 1T **Two stacked tandem white organic light-emitting diodes employing WO₃ as a charge generation layer** [9941-61]
9941 1V **The two-dimensional optical pattern of a five inch diagonal white organic light emitting diode by rapid rotating measurement** [9941-63]
9941 1X **Blue phosphorescent OLEDs with 34.1% external quantum efficiency using a low refractive index electron transporting material** [9941-65]
9941 21 **Characterization of the MoO₃/Ag grids/MoO₃ sandwich electrode deposited on flexible substrate via thermal deposition method** [9941-69]
9941 22 **Quantifying charge trapping and molecular doping in organic p-i-n diodes** [9941-71]
9941 24 **Improved hole-injection and power efficiency of organic light-emitting diodes using an ultrathin cerium fluoride buffer layer** [9941-73]
9941 26 **Design and fabrication a simple and fast mass production line of light extraction film** [9941-75]
9941 27 **Deep-blue phosphorescent organic light-emitting diode with external quantum efficiency over 30% using novel Ir complex** [9941-77]

- 9941 29 **Physical characterizations of direct and inverted solution-processed organic light-emitting diodes** [9941-79]
- 9941 2E **Study of natural organic dyes as active material for fabrication of organic light emitting diodes** [9941-85]
