Volume 9987

Proceedings of SPIE 0277-786X, V. 9987

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Electro-Optical and Infrared Systems: Technology and Applications XIII*, edited by David A. Huckridge, Reinhard Ebert, Stephen T. Lee, Proceedings of SPIE Vol. 9987 (SPIE, Bellingham, WA, 2016) six-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/16/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

ACTIVE IMAGING

9987 02	On the real performance of SWIR range-gated active imaging in scattering media (Invited Paper) [9987-1]
9987 03	Laser illumination and EO systems for covert surveillance from NIR to SWIR and beyond [9987-2]
9987 04	RGB-NIR active gated imaging [9987-3]
9987 05	Non-destructive testing of composite materials used in military applications by eddy current thermography method [9987-4]
9987 06	Non-destructive testing of mid-IR optical fiber using infrared imaging [9987-5]
9987 07	Active vision systems based on powerful laser diode matrixes: design peculiarities and vision range [9987-6]

ELECTRO-OPTICAL SYSTEM DESIGN, TECHNOLOGY AND APPLICATIONS I

9987 08	SSUSI-lite: next generation far-ultraviolet sensor for characterizing geospace (Invited Paper) [9987-7]
9987 09	Concept for an airborne real-time ISR system with multi-sensor 3D data acquisition [9987-8]

ELECTRO-OPTICAL SYSTEM DESIGN, TECHNOLOGY AND APPLICATIONS II

9987 0A	Electro-optical muzzle flash detection [9987-10]
9987 0B	Middle infrared hyperspectral imaging of adhesives, varnishes and inks on Al plate and papers by using a bolometer camera and an imaging type interferometer [9987-11]
9987 0C	Challenges and solutions for high performance SWIR lens design [9987-12]
9987 0D	Laser-induced damage threshold of camera sensors and micro-opto-electro-mechanical systems [9987-13]

IMAGE PROCESSING

- 9987 OE **Turbulence mitigation methods for sea scenarios (Invited Paper)** [9987-14]
- 9987 OF **Improvements in ship tracking in electro-optical and infrared data using appearance** [9987-15]
- 9987 OG **Multi-temporal anomaly detection technique** [9987-16]
- 9987 OH **Classifying objects in LWIR imagery via CNNs** [9987-17]
- 9987 OI **Real-time person detection in low-resolution thermal infrared imagery with MSER and CNNs** [9987-18]
- 9987 OJ **Improved colour matching technique for fused nighttime imagery with daytime colours** [9987-19]

ELECTRO-OPTICAL SYSTEMS: PERFORMANCE EVALUATION

- 9987 OK **How to pass a sensor acceptance test: using the gap between acceptance criteria and operational performance (Invited Paper)** [9987-20]
- 9987 OL **SWIR, VIS and LWIR observer performance against handheld objects: a comparison (Invited Paper)** [9987-21]
- 9987 OM **Feature long axis size and local luminance contrast determine ship target acquisition performance: strong evidence for the TOD case** [9987-22]
- 9987 ON **Visual acuity performance of several observers using the triangle orientation discrimination methodology** [9987-23]

SYSTEM MODELLING

- 9987 OO **The prediction of the optical contrast of air-borne targets against the night-sky background for Photopic and NVG sensors (Invited Paper)** [9987-24]
- 9987 OP **A first order analytical TOD sensor performance model** [9987-25]
- 9987 OQ **Analysis on the detection capability of the space-based camera for the space debris** [9987-26]
- 9987 OR **Ray tracing simulation of aero-optical effect using multiple gradient index layer** [9987-28]

DETECTORS

- 9987 0S **True differential pyroelectric infrared detector with improved D* test results with analysis** [9987-29]
- 9987 0T **A new monolithic approach for mid-IR focal plane arrays** [9987-31]
- 9987 0U **Advances in the characterization of InAs/GaSb superlattice infrared photodetectors** [9987-32]
- 9987 0V **A practical implementation of high resolution relative spectral response measurement of CMOS IRFPAs using Fourier Transform Infrared Spectrometer (FTIR)** [9987-33]
- 9987 0X **Ultrapact plasmonic sensor with graphene-based silicon reflector** [9987-35]

POSTER SESSION

- 9987 0Y **Space based optical staring sensor LOS determination and calibration using GCPs observation** [9987-36]
- 9987 10 **Active manipulating propagation in the graphene hybrid plasmonic waveguides in mid-infrared region** [9987-39]
- 9987 11 **Analysis of the variation of range parameters of thermal cameras** [9987-40]
- 9987 12 **Test stand for determining parameters of microbolometer camera** [9987-41]
- 9987 13 **A new systematic calibration method of ring laser gyroscope inertial navigation system** [9987-42]
- 9987 14 **A three axis turntable's online initial state measurement method based on the high-accuracy laser gyro SINS** [9987-43]
- 9987 16 **Coherent synthetic imaging using multi-aperture scanning Fourier ptychography** [9987-45]
