

PROCEEDINGS OF SPIE

Disruptive Technologies in Sensors and Sensor Systems

**Russell D. Hall
Misty Blowers
Jonathan Williams**
Editors

**11–12 April 2017
Anaheim, California, United States**

Sponsored and Published by
SPIE

Volume 10206

Proceedings of SPIE 0277-786X, V. 10206

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Disruptive Technologies in Sensors and Sensor Systems*, edited by Russell D. Hall, Misty Blowers, Jonathan Williams, Proceedings of SPIE Vol. 10206 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/17/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>
xi	<i>Student Panel Presentations</i>

SENSORS AND COMMUNICATION I

10206 03	Digital modulation and achievable information rates of thru-body haptic communications [10206-1]
10206 04	Modular system for measuring a speech quality in the IP telephony infrastructures using autonomous probes [10206-2]
10206 05	An energy-efficient and secure hybrid algorithm for wireless sensor networks using a mobile data collector [10206-3]

SENSORS AND COMMUNICATION II

10206 07	An optofluidic channel model for in vivo nanosensor networks in human blood [10206-5]
10206 08	Temporal dynamics of frequency-tunable graphene-based plasmonic grating structures for ultra-broadband terahertz communication [10206-6]

INTERNET OF THINGS/CYBER PHYSICAL SYSTEMS

10206 0A	Verification of OpenSSL version via hardware performance counters [10206-8]
10206 0B	Micromanaging the IoT space (Invited Paper) [10206-9]
10206 0D	Application of graph-based semi-supervised learning for development of cyber COP and network intrusion detection (Invited Paper) [10206-11]

INNOVATION IN CYBER OPERATIONS

10206 0E	Application of free energy minimization to the design of adaptive multi-agent teams (Invited Paper) [10206-12]
10206 0G	Practical comparison of distributed ledger technologies for IoT (Invited Paper) [10206-14]

10206 0H **A computational framework for modeling targets as complex adaptive systems** [10206-15]

10206 0I **Data provenance assurance in the cloud using blockchain** [10206-16]

SENSOR M&S

10206 0K **Use of head-worn sensors to detect lapses in vigilance through the measurement of PERCLOS and cerebral blood flow velocity** [10206-17]

10206 0L **Design and simulation of sensor networks for tracking Wifi users in outdoor urban environments** [10206-18]

COMPUTING M&S

10206 0O **Towards noise-aware surrogate models of carrier population dynamics in optically excited GaN** [10206-22]

10206 0P **An integrated radar model solution for mission level performance and cost trades** [10206-23]

10206 0R **Improving developer productivity with C++ embedded domain specific languages** [10206-25]

10206 0T **A preliminary architecture for building communication software from traffic captures** [10206-27]

SPECTRUM

10206 0U **Simulated transient thermal infrared emissions of forest canopies during rainfall events** [10206-28]

10206 0V **Simplifying BRDF input data for optical signature modeling** [10206-29]

10206 0W **Non-destructive evaluation of specialty coating degradation using terahertz time-domain spectroscopy** [10206-30]

10206 0X **Inverse analysis of diffuse reflectance spectra for explosives monitoring** [10206-31]
