

PROCEEDINGS OF SPIE

# ***Photon Counting Applications 2017***

**Ivan Prochazka  
Roman Sobolewski  
Ralph B. James**  
*Editors*

**24–25 April 2017  
Prague, Czech Republic**

*Sponsored by*  
SPIE

*Cooperating Organisations*  
Science and Technology Facilities Council (United Kingdom)  
ELI Beamlines (Czech Republic)  
Laserlab Europe  
ALLU—Association of Laser Users (United Kingdom)  
European Optical Society  
HiLASE (Czech Republic)  
AWE—Atomic Weapons Establishment (United Kingdom)

*Published by*  
SPIE

**Volume 10229**

Proceedings of SPIE 0277-786X, V. 10229

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photon Counting Applications 2017*, edited by Ivan Prochazka, Roman Sobolewski, Ralph B. James, Proceedings of SPIE Vol. 10229 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/17/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

---

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

- v *Authors*
- vii *Conference Committee*
- ix *Introduction*

---

## SUPERCONDUCTING PHOTON COUNTING I

---

- 10229 03 **Superconducting nanowire single-photon detectors: recent advances (Invited Paper)** [10229-2]

---

## SOLID STATE PHOTON COUNTING AND ITS APPLICATIONS I

---

- 10229 0A **High-performance integrated pick-up circuit for SPAD arrays in time-correlated single photon counting (Invited Paper)** [10229-9]
- 10229 0B **High-efficiency dynamic routing architecture for the readout of single photon avalanche diode arrays in time-correlated measurements** [10229-10]
- 10229 0C **Photon counting detector package optimized for laser time transfer with sub-picosecond limiting precision and stability** [10229-11]
- 10229 0D **Development of a high-performance multi-channel system for time-correlated single photon counting** [10229-12]
- 10229 0E **Development and characterization of an 8x8 SPAD-array module for gigacount per second applications** [10229-13]

---

## SUPERCONDUCTING PHOTON COUNTING II

---

- 10229 0G **Coherent detection of weak signals with superconducting nanowire single photon detector at the telecommunication wavelength (Invited Paper)** [10229-15]
- 10229 0H **Superconducting order parameter fluctuations in NbN/NiCu and NbTiN/NiCu bilayer nanostripes for photon detection** [10229-16]
- 10229 0I **Investigation of dark counts in innovative materials for superconducting nanowire single-photon detector applications** [10229-17]

---

## SOLID STATE PHOTON COUNTING AND ITS APPLICATIONS II

---

- 10229 0J **Satellite laser ranging in the near-infrared regime (Invited Paper)** [10229-18]

- 10229 OK **Satellite and lunar laser ranging in infrared** [10229-19]
- 10229 OL **Evaluation of performance of silicon photomultipliers in LIDAR applications** [10229-20]
- 10229 ON **Ultra-high optical responsivity of semiconducting asymmetric nano-channel diodes for photon detection** [10229-22]

---

**POSTER SESSION**

- 10229 OP **An ultra-fast thermoelectric sensor for single-photon detection in a wide range of the electromagnetic spectrum** [10229-24]
- 10229 OQ **Tracks detection from high-orbit space objects** [10229-25]
- 10229 OR **Short-range energy budget simulator of single photon lidar demonstrator** [10229-26]
- 10229 OS **Time transfer capability of standard small form factor pluggable laser modules based on photon counting approach** [10229-27]
