

PROCEEDINGS OF SPIE

Optical and Electronic Cooling of Solids III

Richard I. Epstein
Denis V. Seletskiy
Mansoor Sheik-Bahae
Editors

30–31 January 2018
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 10550

Proceedings of SPIE 0277-786X, V. 10550

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical and Electronic Cooling of Solids III*, edited by Richard I. Epstein, Denis V. Seletskiy, Mansoor Sheik-Bahae, Proceedings of SPIE Vol. 10550 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v *Authors*
vii *Conference Committee*

CRYOGENIC COOLING IN Yb:HOST SYSTEMS

- 10550 05 **Laser cooling of solids: latest achievements and prospects (Invited Paper)** [10550-4]

RADIATION-BALANCED LASERS

- 10550 0B **Investigation of radiation-balanced disk lasers** [10550-10]

LASER COOLING IN SEMICONDUCTORS

- 10550 0F **Understanding the origin of parasitic absorption in GaAs double heterostructures** [10550-14]

SYSTEM MODELING AND THERMAL METROLOGY

- 10550 0K **Model of anti-Stokes cooling in a Yb-doped fiber (Invited Paper)** [10550-19]
10550 0M **In-situ fiber temperature sensor for anti-Stokes cooling measurements in doped fibers**
[10550-21]
10550 0O **Structural and optical characterizations of Yb³⁺ doped GeO₂-PbF₂-PbO glass-ceramics for optical refrigeration** [10550-28]
