Volume 10575

Part One of Two Parts

Proceedings of SPIE, 1605-7422, V. 10575

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Medical Imaging 2018: Computer-Aided Diagnosis*, edited by Nicholas Petrick, Kensaku Mori, Proceedings of SPIE Vol. 10575 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Authors*

xix *Conference Committee*

xxiii *2018 Medical Imaging Award Recipients*

Part One

SESSION 1 LUNG I AND LIVER

10575 02 **Dense volumetric detection and segmentation of mediastinal lymph nodes in chest CT images** [10575-1]

10575 03 **Early detection of lung cancer recurrence after stereotactic ablative radiation therapy: radiomics system design** [10575-2]

10575 04 **Pneumothorax detection in chest radiographs using convolutional neural networks** [10575-3]

10575 05 **Boosting CNN performance for lung texture classification using connected filtering** [10575-4]

10575 06 **Automatic liver volume segmentation and fibrosis classification** [10575-5]

SESSION 2 RADIOMICS

10575 07 **Association of high proliferation marker Ki-67 expression with DCEMR imaging features of breast: a large scale evaluation** [10575-6]

10575 08 **Detecting mammographically occult cancer in women with dense breasts using Radon Cumulative Distribution Transform: a preliminary analysis** [10575-7]

10575 09 **Deriving stable multi-parametric MRI radiomic signatures in the presence of inter-scanner variations: survival prediction of glioblastoma via imaging pattern analysis and machine learning techniques** [10575-8]

10575 0A **Robustness of radiomic breast features of benign lesions and luminal A cancers across MR magnet strengths** [10575-9]

10575 0B **Empirical evaluation of cross-site reproducibility in radiomic features for characterizing prostate MRI** [10575-10]

10575 0C **A deep learning classifier for prediction of pathological complete response to neoadjuvant chemotherapy from baseline breast DCE-MRI** [10575-11]

SESSION 3 BRAIN I

10575 0D **Deep learning and texture-based semantic label fusion for brain tumor segmentation** [10575-12]

10575 0E **Quantifying the association between white matter integrity changes and subconcussive head impact exposure from a single season of youth and high school football using 3D convolutional neural networks** [10575-13]

10575 0F **Single season changes in resting state network power and the connectivity between regions distinguish head impact exposure level in high school and youth football players** [10575-14]

10575 0G **Gaussian processes with optimal kernel construction for neuro-degenerative clinical onset prediction** [10575-15]

10575 0H **MRI textures as outcome predictor for Gamma Knife radiosurgery on vestibular schwannoma** [10575-16]

10575 0I **ADMultiImg: a novel missing modality transfer learning based CAD system for diagnosis of MCI due to AD using incomplete multi-modality imaging data** [10575-17]

10575 0J **Longitudinal connectome-based predictive modeling for REM sleep behavior disorder from structural brain connectivity** [10575-18]

SESSION 4 MUSCULOSKELETAL AND SKIN

10575 0K **Automated synovium segmentation in doppler ultrasound images for rheumatoid arthritis assessment** [10575-19]

10575 0L **Automatic pedicles detection using convolutional neural network in a 3D spine reconstruction from biplanar radiographs** [10575-20]

10575 0M **Fully automated bone mineral density assessment from low-dose chest CT** [10575-21]

10575 0N **Segmentation of skin lesions in chronic graft versus host disease photographs with fully convolutional networks** [10575-22]

10575 0O **Computer-aided detection of basal cell carcinoma through blood content analysis in dermoscopy images** [10575-23]

SESSION 5 BREAST I

10575 0P **Improving performance of breast cancer risk prediction using a new CAD-based region segmentation scheme** [10575-24]

10575 0Q **Cross-domain and multi-task transfer learning of deep convolutional neural network for breast cancer diagnosis in digital breast tomosynthesis** [10575-25]

10575 0R **Improving classification with forced labeling of other related classes: application to prediction of upstaged ductal carcinoma *in situ* using mammographic features** [10575-26]

10575 0S **Deep learning in breast cancer risk assessment: evaluation of fine-tuned convolutional neural networks on a clinical dataset of FFDMs** [10575-27]

10575 0T **Transfer learning with convolutional neural networks for lesion classification on clinical breast tomosynthesis** [10575-28]

10575 0U **Breast tumor segmentation in DCE-MRI using fully convolutional networks with an application in radiogenomics** [10575-29]

SESSION 6 CARDIAC, VESSELS, AND NOVEL APPLICATIONS

10575 0V **A quality score for coronary artery tree extraction results** [10575-30]

10575 0W **Aortic root segmentation in 4D transesophageal echocardiography** [10575-31]

10575 0X **Automated assessment of aortic and main pulmonary arterial diameters using model-based blood vessel segmentation for predicting chronic thromboembolic pulmonary hypertension in low-dose CT lung screening** [10575-32]

10575 0Z **Identification and functional characterization of HIV-associated neurocognitive disorders with large-scale Granger causality analysis on resting-state functional MRI** [10575-34]

SESSION 8 KEYNOTE AND EYE

10575 11 **Automated segmentation of geographic atrophy using deep convolutional neural networks** [10575-36]

10575 12 **An affordable and easy-to-use diagnostic method for keratoconus detection using a smartphone** [10575-37]

SESSION 9 COLON AND PROSTATE

10575 13 **Detection of protruding lesion in wireless capsule endoscopy videos of small intestine** [10575-38]

10575 14 **Radiomics analysis of DWI data to identify the rectal cancer patients qualified for local excision after neoadjuvant chemoradiotherapy** [10575-39]

10575 15 **Development of a computer aided diagnosis model for prostate cancer classification on multi-parametric MRI** [10575-40]

10575 16 **Cascade classification of endocytoscopic images of colorectal lesions for automated pathological diagnosis** [10575-41]

10575 17 **A new fractional order derivative based active contour model for colon wall segmentation** [10575-42]

10575 18 **Detection of colorectal masses in CT colonography: application of deep residual networks for differentiating masses from normal colon anatomy** [10575-43]

SESSION 10 HEAD AND NECK

10575 19 **Comparison of different deep learning approaches for parotid gland segmentation from CT images** [10575-44]

10575 1A **Detection of eardrum abnormalities using ensemble deep learning approaches** [10575-45]

10575 1B **A convolutional neural network for intracranial hemorrhage detection in non-contrast CT** [10575-46]

10575 1C **Deep 3D convolution neural network for CT brain hemorrhage classification** [10575-47]

10575 1D **Cerebral microbleed detection in traumatic brain injury patients using 3D convolutional neural networks** [10575-48]

SESSION 11 LUNG II

10575 1E **Comparing deep learning models for population screening using chest radiography** [10575-49]

10575 1F **Deep-learning derived features for lung nodule classification with limited datasets** [10575-50]

10575 1G **Prognostic importance of pleural attachment status measured by pretreatment CT images in patients with stage IA lung adenocarcinoma: measurement of the ratio of the interface between nodule and neighboring pleura to nodule surface area** [10575-51]

10575 1H **Differentiating invasive and pre-invasive lung cancer by quantitative analysis of histopathologic images** [10575-52]

10575 1I **Using YOLO based deep learning network for real time detection and localization of lung nodules from low dose CT scans** [10575-53]

10575 1J **Automated volumetric lung segmentation of thoracic CT images using fully convolutional neural network** [10575-54]

SESSION 12 QUANTITATIVE

10575 1K **Variations in algorithm implementation among quantitative texture analysis software packages** [10575-55]

10575 1L **Towards quantitative imaging: stability of fully automated nodule segmentation across varied dose levels and reconstruction parameters in a low-dose CT screening patient cohort** [10575-56]

10575 1M **Anomaly detection for medical images based on a one-class classification** [10575-57]

10575 1N **Quantitative CT analysis for the preoperative prediction of pathologic grade in pancreatic neuroendocrine tumors** [10575-58]

10575 1O **Quantitative image feature variability amongst CT scanners with a controlled scan protocol** [10575-59]

SESSION 13 BRAIN II

10575 1P **A primitive study on unsupervised anomaly detection with an autoencoder in emergency head CT volumes** [10575-60]

10575 1Q **Artery and vein segmentation of the cerebral vasculature in 4D CT using a 3D fully convolutional neural network** [10575-61]

10575 1R **Detection of brain tumor margins using optical coherence tomography** [10575-62]

10575 1S **Classification of brain MRI with big data and deep 3D convolutional neural networks** [10575-63]

10575 1T **Saliency U-Net: A regional saliency map-driven hybrid deep learning network for anomaly segmentation** [10575-64]

10575 1U **Radiation-free quantification of head malformations in craniosynostosis patients from 3D photography** [10575-65]

SESSION 14 OTHER ORGANS

10575 1V **Bladder cancer treatment response assessment in CT urography using two-channel deep-learning network** [10575-66]

10575 1W **Automated detection and segmentation of follicles in 3D ultrasound for assisted reproduction** [10575-67]

10575 1X **Comparison of machine learned approaches for thyroid nodule characterization from shear wave elastography images** [10575-68]

10575 1Y **Bladder cancer treatment response assessment with radiomic, clinical, and radiologist semantic features** [10575-69]

10575 1Z **Automatic detection of kidney in 3D pediatric ultrasound images using deep neural networks** [10575-70]

Part Two

SESSION 15 BREAST II

10575 20 **Generalization error analysis: deep convolutional neural network in mammography** [10575-71]

10575 21 **Compression of deep convolutional neural network for computer-aided diagnosis of masses in digital breast tomosynthesis** [10575-72]

10575 22 **ICADx: interpretable computer aided diagnosis of breast masses** [10575-73]

10575 23 **Do pre-trained deep learning models improve computer-aided classification of digital mammograms?** [10575-74]

10575 24 **Fully automated gynecomastia quantification from low-dose chest CT** [10575-75]

10575 25 **Breast mass detection in mammography and tomosynthesis via fully convolutional network-based heatmap regression** [10575-76]

POSTER SESSION: ABDOMINAL AND GASTROINTESTINAL

10575 26 **Detecting PHG frames in wireless capsule endoscopy video by integrating rough global dominate-color with fine local texture features** [10575-77]

10575 27 **Automatic blood vessel based-liver segmentation using the portal phase abdominal CT** [10575-78]

10575 28 **Deep convolutional neural network for the classification of hepatocellular carcinoma and intrahepatic cholangiocarcinoma** [10575-79]

10575 29 **Computer-aided detection of bladder wall thickening in CT urography (CTU) (Cum Laude Poster Award)** [10575-80]

10575 2A **Histogram-based adaptive gray level scaling for texture feature classification of colorectal polyps** [10575-81]

10575 2B **Bladder cancer staging in CT urography: effect of stage labels on statistical modeling of a decision support system** [10575-82]

10575 2C **Performance evaluation of 2D and 3D deep learning approaches for automatic segmentation of multiple organs on CT images (Honorable Mention Poster Award)** [10575-83]

10575 2D **Urinary bladder cancer T-staging from T2-weighted MR images using an optimal biomarker approach** [10575-141]

POSTER SESSION: BRAIN AND HEAD

10575 2E **Automated volumetry of temporal horn of lateral ventricle for detection of Alzheimer's disease in CT scan** [10575-84]

10575 2F **Exploring DeepMedic for the purpose of segmenting white matter hyperintensity lesions** [10575-85]

10575 2G **Evaluation of a deep learning architecture for MR imaging prediction of ATRX in glioma patients** [10575-86]

10575 2H **Measurement of hard tissue density based on image density of intraoral radiograph** [10575-88]

10575 2I **Classifying magnetic resonance image modalities with convolutional neural networks** [10575-89]

POSTER SESSION: BREAST

10575 2J **Pectoral muscle segmentation in breast tomosynthesis with deep learning** [10575-90]

10575 2K **Computer-aided classification of breast masses using contrast-enhanced digital mammograms** [10575-91]

10575 2L **Applying a new unequally weighted feature fusion method to improve CAD performance of classifying breast lesions** [10575-92]

10575 2M **Recurrent neural networks for breast lesion classification based on DCE-MRIs** [10575-93]

10575 2N **Multi-resolution analysis using integrated microscopic configuration with local patterns for benign-malignant mass classification** [10575-94]

10575 2O **Association between mammogram density and background parenchymal enhancement of breast MRI** [10575-95]

10575 2P **Reduction of false-positives in a CAD scheme for automated detection of architectural distortion in digital mammography** [10575-96]

10575 2Q **A fully automatic microcalcification detection approach based on deep convolution neural network** [10575-97]

10575 2R **Learning better deep features for the prediction of occult invasive disease in ductal carcinoma in situ through transfer learning** [10575-98]

10575 2S **Deformable image registration as a tool to improve survival prediction after neoadjuvant chemotherapy for breast cancer: results from the ACRIN 6657/I-SPY-1 trial** [10575-99]

10575 2T **Expert identification of visual primitives used by CNNs during mammogram classification** [10575-100]

10575 2U **Similarity estimation for reference image retrieval in mammograms using convolutional neural network** [10575-101]

10575 2V **Convolutional encoder-decoder for breast mass segmentation in digital breast tomosynthesis** [10575-102]

10575 2W **Deep learning-based features of breast MRI for prediction of occult invasive disease following a diagnosis of ductal carcinoma in situ: preliminary data** [10575-103]

10575 2X **Breast cancer molecular subtype classification using deep features: preliminary results** [10575-104]

POSTER SESSION: CARDIAC

10575 2Y **Voxel-based plaque classification in coronary intravascular optical coherence tomography images using decision trees** [10575-105]

10575 2Z **Myocardial scar segmentation from magnetic resonance images using convolutional neural network** [10575-106]

10575 30 **Convolutional neural networks for the detection of diseased hearts using CT images and left atrium patches** [10575-107]

POSTER SESSION: EYE

10575 31 **Lesion detection in ultra-wide field retinal images for diabetic retinopathy diagnosis** [10575-108]

POSTER SESSION: LUNG

10575 33 **3D GGO candidate extraction in lung CT images using multilevel thresholding on supervoxels** [10575-110]

10575 34 **Opacity annotation of diffuse lung diseases using deep convolutional neural network with multi-channel information** [10575-111]

10575 35 **Localization of lung fields in HRCT images using a deep convolution neural network** [10575-112]

10575 36 **Deep neural network convolution (NNC) for three-class classification of diffuse lung disease opacities in high-resolution CT (HRCT): consolidation, ground-glass opacity (GGO), and normal opacity** [10575-113]

10575 37 **A deep-learning based automatic pulmonary nodule detection system** [10575-114]

10575 38 **An evaluation of consensus techniques for diagnostic interpretation** [10575-115]

10575 39 **Lung nodule detection from CT scans using 3D convolutional neural networks without candidate selection** [10575-116]

10575 3A **An automatically generated texture-based atlas of the lungs** [10575-117]

10575 3B **A coarse-to-fine approach for pericardial effusion localization and segmentation in chest CT scans** [10575-118]

POSTER SESSION: MUSCULOSKELETAL AND SKIN

10575 3C **Automated quasi-3D spine curvature quantification and classification** [10575-119]

10575 3D **Computer aided detection system for Osteoporosis using low dose thoracic 3D CT images** [10575-120]

10575 3E **Automatic detection of anatomical regions in frontal x-ray images: comparing convolutional neural networks to random forest** [10575-121]

POSTER SESSION: QUANTITATIVE

10575 3F **Applying a CAD-generated imaging marker to assess short-term breast cancer risk** [10575-123]

10575 3G **Asymmetry quantification from reflectance images of orthotic patients using structural similarity metrics** [10575-124]

10575 3H **Quantitative characterization of liver tumor radiodensity in CT images: a phantom study between two scanners** [10575-125]

10575 3I **Deep convolutional neural network for mammographic density segmentation** [10575-126]

10575 3J **Quantitative assessment for pneumoconiosis severity diagnosis using 3D CT images** [10575-127]

10575 3K **Quantitative analysis of adipose tissue on chest CT to predict primary graft dysfunction in lung transplant recipients: a novel optimal biomarker approach** [10575-128]

10575 3L **Impact of deep learning on the normalization of reconstruction kernel effects in imaging biomarker quantification: a pilot study in CT emphysema** [10575-129]

10575 3M **Lung parenchymal analysis on dynamic MRI in thoracic insufficiency syndrome to assess changes following surgical intervention** [10575-130]

10575 3N **Applying a new mammographic imaging marker to predict breast cancer risk** [10575-131]

POSTER SESSION: RADIOMICS

10575 3O **Quantitative CT based radiomics as predictor of resectability of pancreatic adenocarcinoma** [10575-132]

10575 3P **Stability of deep features across CT scanners and field of view using a physical phantom** [10575-133]

10575 3Q **Temporal assessment of radiomic features on clinical mammography in a high-risk population** [10575-134]

10575 3R **Deep radiomic prediction with clinical predictors of the survival in patients with rheumatoid arthritis-associated interstitial lung diseases** [10575-135]

10575 3S **Radiomic biomarkers from PET/CT multi-modality fusion images for the prediction of immunotherapy response in advanced non-small cell lung cancer patients** [10575-136]

10575 3T **Classification of brain tumors using texture based analysis of T1-post contrast MR scans in a preclinical model** [10575-137]

10575 3U **Radiomics for ultrafast dynamic contrast-enhanced breast MRI in the diagnosis of breast cancer: a pilot study** [10575-138]

10575 3V **Reduction in training time of a deep learning model in detection of lesions in CT** [10575-139]

10575 3W **The effects of variations in parameters and algorithm choices on calculated radiomics feature values: initial investigations and comparisons to feature variability across CT image acquisition conditions** [10575-140]
