Volume 10618

Proceedings of SPIE 0277-786X, V. 10618

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *2017 International Conference on Optical Instruments and Technology: Advanced Optical Sensors and Applications*, edited by Xuping Zhang, Hai Xiao, Francisco Javier Arregui, Proceedings of SPIE Vol. 10618 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Symposium Committee</i>
xi	<i>Conference Committee</i>
xiii	<i>Introduction</i>
xv	<i>Conference Organizers</i>

SESSION 1

10618 02	Distributed dynamic stress sensor based on white light interferometer (Invited Paper) [10618-66]
10618 03	Measurement of multiple vibration points by using POTDR [10618-16]
10618 04	An event recognition method for fiber distributed acoustic sensing systems based on the combination of MFCC and CNN [10618-6]
10618 05	Application of the probe pulse with ergodic SOPs in detecting multi-vibrations using POTDR [10618-87]
10618 06	Characterization of dynamic strain induced by drilling carbon fiber reinforced polymers using optical frequency-domain reflectometry [10618-59]
10618 07	Double-sideband heterogeneous pulse modulation method for distributed acoustic sensing [10618-117]

SESSION 2

10618 08	Dynamic population gratings in Er-doped optical fiber for mechanical vibrations detection [10618-81]
10618 09	A high sensitivity fiber Bragg grating seismic system and oil exploration test [10618-91]
10618 0A	Research on fiber optic impact load localization based on honeycomb layout and fractal filtering principle [10618-80]
10618 0B	Research on fiber optic magnetic field sensor based on LPG and FBG composite structure [10618-86]

SESSION 3

- 10618 0C **Radiation resilient fiber Bragg grating sensors for sensing applications in nuclear reactor cores (Invited Paper)** [10618-132]
- 10618 0D **Environmental parameters monitoring using a single mode-bare core multimode-single mode optical fiber sensor** [10618-32]
- 10618 0E **System design and verification of high-speed camera system under extreme cryogenic and vacuum environment** [10618-12]
- 10618 0F **Precise sample preconcentration based on plasmon-assisted optical manipulation for a bead-based Raman biosensor** [10618-118]
- 10618 0G **CO detection method by liquid filmed hollow core fiber sensor** [10618-109]
- 10618 0H **Quantum cascade laser spectroscopic sensor for breath gas analysis** [10618-27]

SESSION 4

- 10618 0I **Study on the characteristics of microfluidic oscillator based on a new type of normally closed valve structure** [10618-70]
- 10618 0J **An MEMS optical fiber pressure sensor fabricated by Au-Au thermal-compression bonding** [10618-28]
- 10618 0K **Color filter designing for the detector of the space optical-remote-sensing camera** [10618-88]
- 10618 0L **High sensitivity strain sensor based on cascaded cladding mode resonant double-clad fiber and simple mode fiber** [10618-89]
- 10618 0M **Real-time vibration monitoring system of thin-walled structures' health status based on the self-mixing effect** [10618-74]

POSTER SESSION

- 10618 0N **A simple demodulation algorithm for optical SPR sensor based on all-phase low-pass filters** [10618-1]
- 10618 0O **Parylene-C diaphragm-based fiber-optic Fabry-Perot acoustic sensor for trace gas detection** [10618-5]
- 10618 0P **A method for improving the measurement accuracy of lateral shearing interferometry** [10618-9]
- 10618 0Q **Features research for pipeline leakage based on ρ -OTDR sensing system** [10618-14]

- 10618 OR **Research on fiber laser sensor based on multimode interference effect with no-core fiber**
[10618-17]
- 10618 OS **Monitoring and warning system of slope based on distributed fiber optic sensor technology**
[10618-20]
- 10618 OT **A 16-channel multi-longitudinal mode fiber laser sensor array system based on
wavelength/frequency division multiplexing** [10618-79]
- 10618 OU **Impact and vibration monitoring method of composite flexible structures based on FBG
sensor network** [10618-84]
- 10618 OV **Study on vibration performance and damaging detection of composite materials based on
FBG** [10618-119]
- 10618 OW **An intelligent system for simultaneous measurement of oil temperature and level in
transformer conservator using fiber grating sensor** [10618-131]
- 10618 OX **Tunable Fano resonance and its application in refractive index sensor** [10618-133]
- 10618 OY **A novel and miniaturized FPI accelerometer based on a spherical air cavity at fiber end**
[10618-135]
- 10618 OZ **Sensing with slow light in an active fiber Bragg grating** [10618-142]
- 10618 IO **Simultaneous strain and cryogenic temperature measurement by using an improved
EFPI/FBG fiber sensor** [10618-143]
