

PROCEEDINGS OF SPIE

Nonlinear Optics and its Applications 2018

Benjamin J. Eggleton
Neil G. R. Broderick
Anna C. Peacock
Editors

23–25 April 2018
Strasbourg, France

Sponsored by
SPIE

Cosponsored by
Strasbourg the Eurooptimist (France)
CNRS (France)
Investissements d'Avenir (France)
iCube (France)
Université de Strasbourg (France)

Cooperating Organisations
Photonics 21 (Germany)
EOS—European Optical Society (Germany)
Photonics Public Private Partnership (Belgium)
Comité National d'Optique et de Photonique (France)

Volume 10684

Proceedings of SPIE 0277-786X, V. 10684

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nonlinear Optics and its Applications 2018*, edited by Benjamin J. Eggleton, Neil G. R. Broderick, Anna C. Peacock, Proceedings of SPIE Vol. 10684 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

SILICON PHOTONICS

10684 06 **High gain optical parametric amplification in ultra-silicon-rich nitride (USRN) waveguides**
[10684-5]

PHOTONIC CIRCUITS

10684 0D **High-repetition-rate femtosecond-laser micromachining of low-loss optical-lattice-like waveguides in lithium niobate** [10684-12]

DEVELOPMENTS IN NONLINEAR FIBRE OPTICS

10684 0G **Tunability improvement of a doubly resonant OPO for fast and high-resolution gas spectroscopy** [10684-15]

HIGH HARMONIC GENERATION

10684 0K **Phase-matched optical wave mixing in the XUV region by two-colour high-order harmonic generation (Best Student Paper Award)** [10684-20]

NEW MATERIALS AND PROCESSES

10684 0P **Modeling and parameter retrieving in time domain spectroscopy of material and metamaterial**
[10684-25]

10684 0Q **Analysis of the characteristics of the airy beam off-shooting soliton** [10684-26]

NONLINEAR EFFECTS IN OPTICAL WAVEGUIDES

10684 0W **Optimal input signal distribution and capacity for nondispersive nonlinear optical fiber channel at large signal-to-noise ratio** [10684-32]

QUANTUM AND NONLINEAR OPTICS

- 10684 10 **Continuous-wave, multi-milliwatt, tunable difference-frequency generation across 4608-4694 nm in orientation-patterned GaP** [10684-36]
- 10684 11 **A new way of controlling NesCOPOs (Nested Cavity doubly resonant OPO) for faster and more efficient high resolution spectrum measurement** [10684-37]
- 10684 12 **Optical rectification for a new shot to shot feedback system for laser-driven plasma wakefield accelerators** [10684-38]

MODE-LOCKED FIBRE LASERS: JOINT SESSION BETWEEN CONFERENCES 10683 AND 10684

- 10684 14 **Propagation of infrared ultrashort pulses in the air (Invited Paper)** [10684-40]
- 10684 15 **Dissipative soliton resonance in the Er:Yb:doped double-clad fiber laser** [10684-41]
- 10684 16 **Graphene-based saturable absorber for high average-power fiber lasers** [10684-42]

POSTER SESSION

- 10684 1A **Analysis of frequency modulation of femtosecond laser pulses with various incident pulse shape at SHG in medium with combined nonlinear response** [10684-46]
- 10684 1B **Physical parameters of ultrawide band laser sources and their impacts on multiphoton imaging** [10684-47]
- 10684 1D **Supercontinuum generation and intermodal four-wave mixing in a step-index few-mode fibre** [10684-49]
- 10684 1E **Nonlinear optical characterization of new ionic liquids by a noise reduced thermally managed EZ-Scan technique** [10684-50]
- 10684 1F **Effect of pump depletion on the evolution of cavity solitons in WGM resonator structures** [10684-51]
- 10684 1I **Spatial-temporal pulses in a waveguide under conditions of second harmonic generation** [10684-55]
- 10684 1L **Dissipative soliton dynamics in non-Kerr and Kerr type nonlinear media** [10684-59]
- 10684 1M **Generation of terahertz pulses in a nonlinear dielectric waveguide** [10684-60]
- 10684 1N **Absorptance testing of massive nonlinear-optical crystal boules of polyhedron shape** [10684-61]

- 10684 1O **A new technique based on angular momentum non-linear canalization of wave signals for largely improved free space or fiber communication systems** [10684-62]
- 10684 1Q **Compact diode-pumped Nd:YVO₄ slab ns-amplifier** [10684-64]
- 10684 1R **Breakdown of optical lattice formation in dual-pumped super-cavity soliton states** [10684-65]
- 10684 1S **Piezoelectric resonance spectroscopy for measuring surface temperature distribution of optical materials interacting with laser radiation** [10684-66]
- 10684 1U **Tyndall scattering in colloidal solution of quantum dots under the action of laser pulses** [10684-69]
- 10684 1V **Effect of temperature on the absorption of rubidium vapor cell D₂ line studied by two-photon absorption spectroscopy** [10684-70]
- 10684 1W **1- μ m-pumped optical parametric generator and oscillator based on orientation-patterned gallium phosphide** [10684-71]
- 10684 1X **Threshold effect in optical limiters based on conjugates J-type phthalocyanine dimers Zn and Mg with single-walled carbon nanotubes** [10684-72]
- 10684 1Y **Compact continuous wave THz source based on monolithic two color laser diode** [10684-73]
- 10684 1Z **Tunable spatial compensation for polarization entangled photons** [10684-74]
- 10684 20 **Nonlinear properties of CdSe/ZnS quantum dots colloidal solutions under one- and two-photon excitation by means of high-power ultrashort laser pulses** [10684-75]
- 10684 21 **Nonlinear effects in colloidal nanoplatelets with two-dimensional electronic structure** [10684-76]
- 10684 24 **Peculiarities of spatial soliton formation in azobenzene liquid crystal** [10684-79]
- 10684 25 **Graphene all-optical sensor based on nonlinear multimode interference coupler** [10684-80]
- 10684 26 **Determination of Kerr and two-photon absorption coefficients of ABI thin films** [10684-81]
- 10684 28 **Controlling terahertz spectrum in asymmetric air plasmas: the role of GDD and phase** [10684-83]
- 10684 2A **Two-axis acousto-optical deflector for high-power laser radiation** [10684-85]
- 10684 2D **Stimulated light scatterings in submicron single crystal diamond films implanted with light ions** [10684-88]
- 10684 2H **Generation of dark soliton trains with high repetition rates through dissipative four wave mixing** [10684-92]

- 10684 2I **Image fidelity improvement using self-pumped phase conjugation digital holographic microscopy** [10684-93]
- 10684 2J **Implementation of stimulated Raman losses and stimulated Raman gain microscopy using three femtosecond laser sources** [10684-94]
- 10684 2K **Features of nonlinear absorption of $\text{Bi}_2\text{Te}_{3-x}\text{-Se}_x$ and $\text{Bi}_{2-x}\text{Sb}_x\text{Te}_{3-y}\text{Se}_y$ films** [10684-95]
