

PROCEEDINGS OF SPIE

Nanophotonic Materials XV

Stefano Cabrini
Gilles L  rondel
Adam M. Schwartzberg
Taleb Mokari
Editors

22–23 August 2018
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 10720

Proceedings of SPIE 0277-786X, V. 10720

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nanophotonic Materials XV*, edited by Stefano Cabrini, Gilles Léronde, Adam M. Schwartzberg, Taleb Mokari, Proceedings of SPIE Vol. 10720 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

NEW MATERIAL PROPERTIES FOR APPLICATIONS

10720 03	Optimal annealing of cubic NaYF₄:Er nanomaterials for biomedical sensing applications [10720-2]
10720 04	Parametric study of wavelength demultiplexers designed via objective-first algorithm [10720-3]

METAL OXIDES PROPERTIES

10720 08	Ultrafast dynamics of the ultraviolet and visible photoluminescence in the aluminum-doped zinc oxide metamaterial [10720-7]
----------	--

NANO-PARTICLES PROPERTIES

10720 0C	Optical properties of white CdSe:Zn quantum dots [10720-11]
----------	--

NANOSCALE STRUCTURES

10720 0J	Optical second harmonic generation from silicon with embedded silver nanostructures [10720-18]
10720 0K	Directed assembly of bimetallic nanoarchitectures by interfacial photocatalysis with plasmonic hot electrons [10720-19]

THIN FILMS AND 2D MATERIALS

10720 0N	Enhanced photoelectrochemical water splitting by plasmonic Au nanostructures/reduced graphene oxide (Best Paper Award) [10720-22]
10720 0O	A DFT study on the structures, energy, and optical properties of copper (titanium or zirconium) doped graphenes [10720-23]

POSTER SESSION

- 10720 0U **Anomalous light absorption by a monolayer graphene-water complex** [10720-28]
- 10720 0W **Enhancement of Purcell factor in all-dielectric dimer** [10720-30]
- 10720 0Z **Combined effect of plasmonic interaction of nano-particles** [10720-34]
