SPIE

Volume 10731

Proceedings of SPIE 0277-786X, V. 10731

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nanostructured Thin Films XI*, edited by Akhlesh Lakhtakia, Tom G. Mackay, Proceedings of SPIE Vol. 10731 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 INAUGURAL LECTURE

10731 02 **Study of self-shadowing effect as a simple means to realize nanostructured thin films and layers with special attentions to birefringent obliquely deposited thin films and photo-luminescent porous silicon (Keynote Paper) [10731-1]**

SESSION 2 FABRICATION AND CHARACTERIZATION I

10731 04 **Asymmetric MIM structure formation by PLD technique with metallic nitrides and its SPP excitation and waveguiding characteristics [10731-3]**

SESSION 3 PLASMONICS

10731 07 **Nanostructured carbon-titanium multilayer films obtained by thermionic vacuum arc method [10731-6]**

SESSION 4 THEORETICAL STUDIES

10731 09 **No pain, no gain: on the modeling of a nanostructured active medium (Invited Paper) [10731-8]**

10731 0A **Bragg supermirrors and polarization-state-dependent attenuation and amplification [10731-9]**

10731 0C **Biomimicry designs for passive optical solutions for nanoscale radiative cooling applications [10731-11]**

10731 0D **Binding energy of radial deformed single walled carbon nanotubes [10731-12]**

SESSION 5 PHYSICAL PROPERTIES

10731 0F **Enhancement of optical resistance in high reflectivity coatings using oblique angle deposition method [10731-14]**

SESSION 6 FABRICATION AND CHARACTERIZATION II

10731 0I **Design, fabrication, and characterization of a one-dimensional polarizing photonic crystal** [10731-19]

10731 0J **Ellipsometric study of aluminum-nickel nano-films for plasmonic application** [10731-20]

SESSION 7 LIGHT MANIPULATION

10731 0K **Applications of light-trapping sculptured thin films (Invited Paper)** [10731-21]

10731 0L **Optimization of light trapping in ultrathin nonhomogeneous $\text{CuIn}_{1-\xi}\text{Ga}_\xi\text{Se}_2$ solar cell backed by 1D periodically corrugated backreflector** [10731-22]

POSTER SESSION

10731 0O **Tuning circular dichroism by capping SiO_2 nanohelices upon silver nanohelices** [10731-25]

10731 0R **Chiral sculptured thin films as circular Bragg supermirrors** [10731-28]

10731 0T **Comparison of structural properties of iron nano-particles prepared by sol-gel method and spin coating technique** [10731-30]
