**Volume 10757**

Proceedings of SPIE 0277-786X, V. 10757

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Data Storage 2018: Industrial Optical Devices and Systems*, edited by Ryuichi Katayama, Yuzuru Takashima, Proceedings of SPIE Vol. 10757 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

---

**SESSION 1 OPTICAL DATA STORAGE TECHNOLOGIES I**

---

10757 03	<b>Recording arbitrary polarization states on photorefractive media [10757-2]</b>
10757 04	<b>Rewritable multilevel optical data storage in BaFCl nanocrystals [10757-4]</b>
10757 05	<b>Proposal of multiphase partial response method for optical disc readout systems [10757-5]</b>

---

**SESSION 2 OPTICAL DATA STORAGE TECHNOLOGIES II**

---

10757 08	<b>Far-field focus sensor using moving interference fringes generated by a one-dimension uniform-pitch grating inside a collinear hologram data disc [10757-8]</b>
10757 09	<b>Effect of various factors on wavelength tolerance in microholographic recording [10757-9]</b>
10757 0A	<b>CMOS image sensor: characterizing its PRNU (photo-response non-uniformity) [10757-10]</b>

---

**SESSION 3 OPTICAL TECHNOLOGIES FOR INTELLIGENT CARS I**

---

10757 0B	<b>Holography for automotive applications: from HUD to LIDAR (Invited Paper) [10757-11]</b>
10757 0D	<b>Physical and geometrical hybrid design of two-layer and depth-chirped holographic image guide for see-through glass type head mounted display [10757-13]</b>

---

**SESSION 4 OPTICAL TECHNOLOGIES FOR INTELLIGENT CARS II**

---

10757 0E	<b>Development of coaxial 3D-LiDAR systems using MEMS scanners for automotive applications (Invited Paper) [10757-14]</b>
----------	---

- 10757 OF **Beam steering by digital micro-mirror device for multi-beam and single-chip lidar** [10757-15]
- 10757 OG **Light recycling beam steering on a DMD lidar** [10757-16]
- 10757 OH **Single detector imaging lidar by digital micromirror device for large field-of-view and mid-range mapping applications** [10757-17]
