Volume 10767

Proceedings of SPIE 0277-786X, V. 10767

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Remote Sensing and Modeling of Ecosystems for Sustainability XV*, edited by Wei Gao, Ni-Bin Chang, Jinnian Wang, Proceedings of SPIE Vol. 10767 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

REMOTE SENSING, MODELING APPLICATION, AND GIS I

10767 02 **Harnessing commercial satellite technologies to monitor our forests (Invited Paper)** [10767-1]

10767 04 **Characterization of canola canopies using optical and SAR imagery** [10767-4]

10767 05 **Green areas and urban heat island: combining remote sensed data with ground observations** [10767-6]

10767 06 **Synthetic aperture radar for pipeline right-of-way monitoring** [10767-51]

REMOTE SENSING, MODELING APPLICATION, AND GIS II

10767 08 **The Compact Hyperspectral Prism Spectrometer: advanced imaging spectrometer for sustainable land imaging (Invited Paper)** [10767-8]

10767 09 **A method for quantifying the number of U.S. lakes with cyanobacterial harmful algal blooms using satellite remote sensing** [10767-9]

10767 0A **The urbanization impact in China: a prospective model (1992-2025)** [10767-10]

REMOTE SENSING FOR AGRICULTURE, ECOSYSTEMS, AND HYDROLOGY

10767 0C **Spatial interpolation of surface ozone observations using deep learning (Invited Paper)** [10767-12]

10767 0G **Investigation of the impact of urban vegetation on air pollutants based on remotely sensed measurements: a case study in Shenzhen, China** [10767-17]

POSTER SESSION

10767 0H **Study on spatial distribution of aerosol optical depth and particulate matter using MODIS data** [10767-18]

10767 0J **Research on crop classification in northeast China based on multi-source and multi-temporal SAR Images** [10767-20]

10767 0K **Research of forest type identification based on multi-dimensional POLSAR data in northeast China** [10767-21]

10767 0L **The spatial distribution characteristics and ground-level estimation of NO_2 and SO_2 over Huaihe River Basin and Shanghai based on satellite observations** [10767-22]

10767 0M **Study on the extraction method of tidal flat** [10767-23]

10767 0N **Thermally enhanced spectral indices to discriminate burn severity in Mediterranean forest ecosystems** [10767-24]

10767 0O **Correction and prediction of ultraviolet (UV-MFRSR) radiation value based on GARCH model** [10767-25]

10767 0P **The variation characteristics of PM2.5 in Shanghai and its correlation with meteorological factors** [10767-26]

10767 0Q **Comparative study of the spatial interpolation methods for the Shanghai regional air quality evaluation** [10767-27]

10767 0R **Analysis of land use changes and driving factors in Dongying urban area from 2005 to 2015** [10767-28]

10767 0S **Simulation of land use/cover change in Shanghai based on SLEUTH model** [10767-29]

10767 0U **Analysis on land use changes and their driving forces in Weihai City between 2005 and 2015** [10767-31]

10767 0V **Using remote sensing to assess sustainable development on a Chinese national-level new district** [10767-32]

10767 0X **A photon-efficient method based on curve fitting for photon counting 3D imaging lidar** [10767-34]

10767 0Y **Estimating initial biomass of green tide algae in the South Yellow Sea with aid of UAV and S2A data** [10767-35]

10767 10 **Cardiovascular and respiratory diseases surveillance around Shanghai Chemical Industry Park based on remote sensing** [10767-37]

10767 11 **The extraction of wetland vegetation information based on UAV remote sensing images** [10767-38]

10767 12 **Change of sea surface temperature in the northwest Pacific Ocean over the past decade and its impacts on fisheries** [10767-39]

10767 13 **Monitoring of polluted water in coastal zone using unmanned aerial vehicle remote sensing** [10767-40]

10767 14 **Verification of mountain road hazard susceptibility maps: provincial highway routes 8 and 9 as study area** [10767-41]

10767 15 **Regional sea level change prediction based on time-frequency analysis and intelligent algorithm** [10767-42]

10767 16 **Simulation of methane emissions from double-rice cropping system in southern China during the past 50 years by DNDC model** [10767-43]

10767 17 **Spatial-temporal distribution characteristics of chlorophyll-a in offshore waters of Yantai and Weihai based on GOCI data** [10767-44]

10767 18 **Suitability regionalization of Chinese medicinal yam under the impact of climate change simulated by CMIP5 multi-model ensemble projections** [10767-45]

10767 1A **Utility of CrIS/ATMS temperature and humidity profiles to diagnose the atmospheric duct** [10767-47]
